(N)

A. General Descriptive Summary

The Advanced Intelligent Network (AIN) offers a family of optional services designed to provide customers with more flexibility in their use of the Public Switched Telephone Network. These Advanced Intelligent Network Services will be available where appropriate Company facilities exist.

B. Disaster Routing Service

1. General

- a. Disaster Routing Service (DRS) enables customers to forward incoming telephone calls placed to multiple telephone numbers at one customer location, en masse, to alternative multiple telephone numbers at one or more alternate locations of the same customer, based on one of three predetermined destination options being activated. Calls may only be forwarded to direct-dial telephone numbers, excluding international numbers. The customer can establish up to three destination routing options; however, only one destination option can be active at any given time. The destination options will be designated as Option 1, 2 or 3. Option 1 will be activated when the service is initially established.
- b. The Company will provide the customer with a password for each DRS group. For security purposes, the password and the group number will be required to change the destination routing options.
- c. No provisions have been made to execute a customer's Disaster Recovery Service in the event that the customer's switching office is out of service.
- d. Calls will not be forwarded if the central office or other network failures or limitations prevent the call from being delivered to the customer's number in the switch.
- e. The intended use of DRS is to provide continuity for the customer's communications needs in the event of a disaster. Any other use of DRS is beyond the scope of this service and may preclude the service from operating in the manner contemplated.
- f. All rates, charges, terms and conditions set forth herein provide for the furnishing of service where suitable facilities and equipment are available and do not create an obligation for the Company to construct such facilities and equipment especially for the provisioning of this service.

ADVANCED INTELLIGENT NETWORK SERVICES

Effective July 15, 2024, Disaster Routing Service will no longer be available for purchase by new or existing customers. In addition, requests to move, add or change will not be accepted. The Company will continue to provide existing service to existing customers until the service is discontinued. (N)
