E26.2.4 BellSouth SWA Revenue Volume Discounts

- A. Each year of the customer's Letter of Agreement is defined as twelve (12) consecutive bill periods following the beginning date of the Letter of Agreement. For purposes of calculating the BellSouth SWA volume discounts, month one (1) is the first complete bill period after the beginning date of the Letter of Agreement. For example, if the beginning date of the Letter of Agreement is June 6, 2003 bill period, and the bill period is the twelfth, then month one (1) for purposes of calculating the BellSouth SWA volume discounts will be the July 12, 2003 bill period.
- B. The BellSouth SWA Pricing Flexibility volume discounts provided herein will be determined during the first month after the end of each year of the customer's Letter of Agreement. During the second month following the end of each year of the Letter of Agreement, the BellSouth SWA volume discounts will be applied via a credit to the customer's bill.
- C. The BellSouth SWA volume discounts are applicable to the BellSouth SWA services as set forth in E26.2.2.H. preceding.
- D. The BellSouth SWA volume discounts specified in BellSouth SWA Contract Tariff No. MS2003-01 will not be applied to taxes and nonrecurring BellSouth SWA revenues.

E26.2.5 BellSouth SWA Contract Tariff No. MS2003-01 Volume Discount Plan

- A. BellSouth SWA Contract Tariff No. MS2003-01 provides for annual volume discounts based upon annual local switching minutes of use (MOU) above a stated minimum usage achieved, and the Commitment Level and term year as defined in the Letter of Agreement. Discounts are achieved in term years when the achieved local switching volume is equal to or above a Commitment Level usage. When equaled or exceeded, discounts are applied to the Commitment Level usage.
- B. The Commitment Level usage and the achievable volume discounts associated with the BellSouth SWA services are shown in the table below. Volume discounts are not applicable to any usage levels outside of the MOU usage ranges stated in table below:

Annual Usage Commitment Level and Discounts		
Commitment Level MOUs	Year 1 Discounts	Year 2 Discounts
> 20M to 40M	0.7%	1.2%
> 40M to 120M	1.3%	1.8%
> 120M to 200M	2.7%	3.2%
> 200M to 280M	4.0%	4.5%
> 280M to 360M	5.4%	5.9%
> 360M	6.7%	7.2%

- C. The volume discount received for a given year under BellSouth SWA Contract Tariff No. MS2003-01 is determined by multiplying the eligible BellSouth SWA revenue associated with the Commitment Level usage, times the discount percentage achieved as determined in A. preceding.

The following example demonstrates application of the discount:

- Customer Annual Commitment Level – 120M minutes of use
- Achieved Volume – 125M minutes of use
- Contract Year – first year of a one-year contract
- All usage is Local Switching 2
- Local Switching 2 rate - \$.002748/minute
- From Table – applicable discount is 2.7 percent

Therefore:

Volume Discount = Eligible Revenue X Discount Rate

Volume Discount = (120M minutes X \$.002748/minute) X 2.7 percent

Volume Discount = \$8,904

E26.2.5 BellSouth SWA Contract Tariff No. MS2003-01 Volume Discount Plan (Cont'd)

(N)

- D. When the Commitment Level usage volume is not met during a year of the term, a shortfall liability is incurred by the customer. The shortfall usage is equal to the difference in the customer's Commitment Level and the achieved local switching usage volume. The shortfall liability would be equal to the shortfall usage, times the customer's average local switching rate per MOU. The customer's average local switching rate per MOU is equal to revenue generated from the local switching usage rate elements as described in E26.2.2.H. preceding, divided by the achieved local switching usage volume.

(N)

The following example demonstrates application of shortfall:

(N)

Customer Annual Commitment Level – 120M minutes of use

(N)

Achieved Volume – 117M minutes of use

(N)

Contract Year – first year of a one-year contract

(N)

All usage is Local Switching 2

(N)

Local Switching 2 rate - \$.002748/minute

(N)

Therefore:

(N)

Shortfall Usage = Commitment Level – Achieved Volume

(N)

Shortfall Usage = 120M minutes – 117M minutes

(N)

Shortfall Usage = 3M minutes

(N)

Shortfall Liability = Shortfall Usage X Avg Local Switching Rate

(N)

Shortfall Liability = 3M minutes X \$.002748/minute

(N)

Shortfall Liability = \$8,244

(N)

- E. In the event of an early termination of the contract, shortfall usage calculations will be based upon the monthly usage values which comprise the annual Commitment Level. If upon comparing the shortened term commitment to the achieved usage level, a shortfall usage is determined to exist, then a shortfall liability is incurred. The shortfall liability will be calculated as described in D. above.
- F. A termination liability is incurred when a customer terminates the agreement before the end date of the agreement. The termination liability is equal to 90 percent of the volume discount received during the term of the agreement.
- G. This BellSouth SWA Contract Tariff No. MS2003-01 will also provide, as a one-time promotional offer, that the customer may obtain a partial prepayment of the first annual SWA Pricing Flexibility volume discount. To qualify for this prepayment, the customer must subscribe to this plan via a Letter of Agreement (LOA) to begin no later than 30 days after the effective date of the tariff. Using the customer's usage between the commencement of this LOA and December 4, 2003, BellSouth will determine if the customer is on track to earn the discount described at the end of the first year of the LOA. If so, BellSouth will calculate by December 15, 2003, the prorated volume discount and remit to the subscriber the prepayment of this pro rata volume discount as soon as practical thereafter. At the end of the first year of the LOA, if an annual credit has been earned, the prepayment will be subtracted from this annual volume discount amount. If, at the end of the first year, the volume discount has not been earned, then the prepayment shall be returned to BellSouth with interest calculated for the period during which the prepayment was held by the customer (Interest equals prime plus two percent – the prime interest rate is that rate which is effective at the end of the first year of the LOA.).
