A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.34 Digital ESSX Service - Vintage I (Cont'd)

A112.34.7 Common Service Items (Cont'd)

A. *Terms and Conditions* (Cont'd)

4. Nonrecurring Charges

The following nonrecurring charges for service are in addition to any applicable service connection, move, change and installation charges provided for in other sections of this *Guidebook*.

a. Service Establishment Charges

(1) These charges apply as specified, when a service feature is added or changed. These charges apply in addition to other applicable nonrecurring charges.

b. Installation Charge

(1) Installation charges are in addition to other appropriate nonrecurring charges for the service. For a change or a rearrangement in a specific service or feature element, the installation charge specified for that element will be applicable unless otherwise specified.

c. Service Connection Charges

(1) Service Charges as specified for business service in Section A4. are applicable for each main station line, console access loop, etc.

5. Main Station Line Terminated as a Trunk

a. Where a Digital ESSX Main Station Line is terminated as a trunk in customer provided equipment the appropriate recurring charge (A112.34.7.B.5.) will apply in addition to the appropriate Main Station Line Rate.

6. Subsequent Training

a. After the initial installation of the subscriber's system, subsequent training will be provided at the charges indicated in A12.20.8.D.

B. Attendant Features - Data Link Console Operation²

1. **Terms and Conditions** (T)

- a. Central office attendant console operation is offered where all console functions are performed at the expense of the subscriber utilizing compatible customer provided terminal equipment.
- b. Compatible customer provided consoles may be provided only where the central office serving the Digital ESSX has been arranged for use with such consoles.
- c. Control channels are required for various console optional features as indicated and are provided at the appropriate rates and charges.
- d. The service establishment charge for Data Link Console Operation (requires customer provided compatible terminal equipment) includes the following attendant features provided the customer provided terminal equipment meets the technical specifications as outlined for interface with the central office switching equipment.

Note 1: This feature provides access only to services provided by the subscribers compatible terminal equipment.

Note 2: Requires customer provided compatible terminal equipment.

G. Station Message Detail Recording Via Revenue Accounting Office (RAO) (Cont'd)

1. General (Cont'd)
 - b. The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. (SMDR detail on incoming calls does not include the calling number or the type of facility used.) The record will be provided on magnetic tape, to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording-RAO.
2. *Terms and Conditions*
 - a. Station Message Detail Recording (SMDR)-RAO may be offered to main station lines of customers where facilities permit and where the Company's message billing process has been arranged to provide this optional feature.
 - b. Station Message Detail Recording is not represented to be a provision of billing detail.
 - c. Station message details will be provided on magnetic tape. The tape density and number of tracks will be that used by the program and data processing system in use by the Company's accounting center furnishing the tape. The format may be changed to serve Company purposes and the customer will be responsible for making the tape compatible with his data processing equipment.
 - d. Station message details may be provided on all facilities subscribed to by the customer including toll, but will not include intercom calls originated by station users. The customer may designate the group or groups of facilities on which SMDR-RAO is to be provided. Where the facility designated by the customer is the toll network, the magnetic tape file will include a record of each message itemized on the customer's bill; e.g. messages received collect or billed to third number will be on the tape file in addition to toll messages originated by the station user.
3. Rates and Charges

A112.34 Digital ESSX Service - Vintage I (Cont'd)

A112.34.11 Optional Service Features (Cont'd)

I. Subsidiary System Arrangements

1. Subsidiary System

- a. A subsidiary system of a Digital ESSX system is a customer-provided equipment system which is furnished PBX trunks from the central office serving the customer's Digital ESSX system and which is connected by tie lines to that Digital ESSX system.
- b. A Subsidiary System Arrangement provides station numbers which are in sequence with the main station line numbers of the customer's Digital ESSX system to the stations of one or more subsidiary systems.

2. *Terms and Conditions*

- a. Subsidiary System Arrangement (SSA) station numbers are provided by the same central office equipment and facilities which furnish Direct-Inward-Dialing (DID) service and will only be furnished where adequate DID facilities are available in the central office serving the customer's system and where the subsidiary system is properly equipped for DID service.
- b. The PBX trunks of the subsidiary system are provided at the same rates and charges as specified for such trunks furnished from the central office serving the customer's Digital ESSX system. In addition, foreign central office or foreign exchange mileage charges are applicable to those trunks when the subsidiary system is located outside the area of that serving central office.
- c. The same rates and charges as specified for DID service apply for SSA station numbers. Where more than one subsidiary system is involved, each subsidiary system is considered a separate service and the count of station numbers furnished will commence anew at each such system for the purpose of determining the applicable rates and charges.
- d. Tie lines connecting the Digital ESSX and subsidiary systems are provided at the same rates and charges as specified for Digital ESSX tie line terminals, tie lines, and tie line terminals in a customer-provided equipment system.
- e. SSA station numbers are furnished subject to the condition that all inward and outward local and toll network calling by subsidiary system stations be via the central office serving the customer's Digital ESSX system.
 - (1) Where subsidiary system station's outward local and toll network calls are placed via tie lines and the network access registers of the Digital ESSX system, the charges for such calls are identified and billed as primary directory listing calls of the Digital ESSX system.
 - (2) Where subsidiary system station's outward local and toll network calls are placed via PBX trunks, the charges for such calls are identified as primary directory listing calls of the subsidiary system except as specified in A112.34.11.I.2.f.
- f. At the option of the customer, identification of outgoing toll network calls by SSA station number will be provided at the same rates and charges as specified for Identified-Outward-Dialing (IOD) service subject to the following conditions.
 - (1) The identification of outgoing toll calls by SSA station number will only be provided on calls routed via PBX trunks.
 - (2) Where more than one subsidiary system is arranged for the identification of outgoing toll calls by SSA station number, each system shall be considered a separate service and the count of connecting channels which serve as IOD trunks will commence anew at each system for the purpose of determining the applicable rates and charges.
- g. The Digital ESSX subsidiary system arrangement is provided solely for the furnishing of SSA station numbers to subsidiary systems for local and toll network and intercommunication calling and does not provide any of the basic or optional service features of Digital ESSX service to stations of the subsidiary systems.

J. Automatic Route Selection - Basic

1. General

a. Automatic Route Selection - Basic (ARS-B) is an optional feature, available where facilities permit that allows station users, by dialing a preselected code to automatically select the preferred route subscribed to by a customer for network calls. Alternate routing to other facilities subscribed to by the customer is also provided. This agreement is available for use with Foreign Exchange, WATS, CCSA off-net, tie lines and Interexchange Carrier (IC) access lines which are compatible with ARS and toll facilities.

b. Automatic Route Selection - Basic is accessed by dialing a single code (1, 2 or 3 digits) which automatically selects the appropriate route (FX, WATS, CCSA off-net, tie line, IC access line or toll) to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. Patterns may consist of up to eight (8) private routes.

c. For calls using FX, WATS, CCSA off-net, or IC access line facilities, the routing may be based on a Number Plan Area (NPA) and limited to specified central office codes within the NPA as designated by the customer. This is referred to as Foreign Area Discrete Translation.

d. Automatic Route Selection - Basic is a call routing capability and, therefore, all codes must be in a route for selection. Code blocking is not provided by this feature.

2. **Terms and Conditions**

(T)

a. Automatic Route Selection - Basic is provided only in association with Digital ESSX Service central office equipment located on Company premises and may be provided, subject to availability of facilities to Digital ESSX systems which are served by the same such equipment.

b. Preferred routes and alternate routing patterns will be specified by the customer.

c. All rates and charges specified for Automatic Route Selection - Basic are in addition to the rates and charges for associated facilities.

d. The number of patterns required by a customer are governed by the type and variety of facilities to which the customer subscribes.

e. A single rate per pattern will apply regardless of the number of routes in the pattern or the number of facilities in the route.

K. Queuing

1. General

a. Queuing permits main station line users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available.

- Off-Hook Queuing (OHQ), the calling main station line remains off-hook and is held in queue until a facility becomes available.

- Call-back Queuing (CBQ), the calling main station line goes on-hook and is called back when a facility becomes available.

2. **Terms and Conditions**

Queuing may be provided in conjunction with ARS-Basic or as a stand-alone option for outgoing exchange calls. Queuing will be offered where facilities permit.

A112.34.12 Reserved For Future Use

A112.34.13 Customer Management Features

A. Digital ESSX Customer Administration Service

- 1. General
 - a. The Digital ESSX Customer Administration Service (DECAS) feature permits Digital ESSX customers to activate/deactivate selected optional features, change certain service options, and change feature configurations on predesignated Digital ESSX station lines. Customer provided terminal equipment is required for the operation of the DECAS feature.
 - b. For DECAS equipped station lines, DECAS allows the customer to verify and/or display the assignment of features on a single station line, range of station lines or all station lines to determine which station or stations have a particular feature or service option.
 - c. Certain Digital ESSX station lines may be specified by the customer to be exempt from this feature. Additionally, the Company reserves the right to make station lines inaccessible for DECAS.
 - d. Changing the status of a station line from accessible to DECAS to inaccessible or vice versa, must be done by the Company via a Service Order request. Appropriate Service Order Charges specified in Section A4. apply.
 - e. The Company has made the following provisions to protect the integrity of the switching system database and to ensure the security of DECAS changes.
 - (1) A DECAS customer's change, display or verify capabilities are restricted to that particular customer's own Digital ESSX system.
 - (2) All changes are audited as they are entered by the DECAS customer. Invalid changes will not be accepted. An error message detailing which command is in error will be given.
 - (3) Customer access to the database is protected using a dialup, login, password/dialback arrangement.

Note 1: When Code Restriction for NXX assigned to 900 is required, apply Code Restriction for NXX assigned to 900 as specified in A112.28. (T)

A112.34.13 Customer Management Features (Cont'd)

A. Digital ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)

- f. A DECAS customer can schedule changes (individual or bulk) for completion by the next business day or for a future business day. Additionally priority changes may be requested and the changes completed the same day subject to *term and condition* A112.34.13.A.2.f. and o. (T)
- g. Definitions pertaining to DECAS/Digital ESSX features are specified in A112.28.3. (T)
- h. The DECAS feature allows the customer to perform the following transactions from the customer provided terminal.
 - (1) Change particular service options on a per station basis and exchange station telephone numbers (TNs). The change capabilities are:
 - Line Status: Active/Inactive - Station lines made inactive using DECAS will continue to be billed at the *guidebook* rates. (T)
 - Call Pickup Group: The call pickup group to which a station is assigned can be changed on a per station basis.
 - The Forward to Number can be changed for a station line with Call Forwarding Busy Line and/or Call Forwarding Don't Answer assigned
 - Series Completion "Hunt To" Telephone Number (TN): The "hunt to" TN assigned to a station line can be changed on a per-station basis. (All numbers in series completion hunt must be in same customer group.)
 - Station TN Rearrangement: Swap TNs from one location to another
 - Access Line Class of Service
 - Add/Change Customer Entered Listing Information
 - Station Controlled Conference Type
 - Call Transfer Type

A112.34 Digital ESSX Service - Vintage I (Cont'd)

A112.34.13 Customer Management Features (Cont'd)

A. Digital ESSX Customer Administration Service (Cont'd)

2. *Terms and Conditions*

- a. DECAS is provided only with Digital ESSX systems served from a Digital central office and is furnished subject to the availability of facilities.
- b. Customers equipped for DECAS must order via a Service Order. (Appropriate Service Order charges specified in Section A4. will apply.) DECAS changeable features in groups of five (5) at the rates specified in A112.34.13.A.3.c.
- c. Non-DECAS changeable features will be added subject to the specifications and rates in A112.34.8., A112.34.9., or A112.34.10. as appropriate.
- d. Features for DECAS exempt station lines must be requested via a Service Order and added by the Company. (Appropriate Service Order Charges specified in Section A4. will apply). Rates and Charges for the features specified in A112.34.8., A112.34.9., or A112.34.10. apply as appropriate.
- e. The customer provided DECAS terminal equipment requires a Digital ESSX main station line. Rates and Charges in Section A3., A112.34.8., A112.34.9., or A112.34.10. apply as appropriate.
- f. DECAS changes must be entered prior to times to be designated by the Company to be completed as priority changes or by the next business day as requested by the customer.
- g. A DECAS customer cannot activate features in excess of the quantity that has been ordered from the Company. The customer will receive an indication on the terminal screen when 100 percent utilization of a feature is reached. To add additional quantities will require a Service Order. (Appropriate Service Order charges specified in Section A4. will apply.)
- h. Contractual obligations and End User Common Line Charges will be billed to the location where originally installed and will not transfer with a station line number rearrangement.
- i. If the Company is requested to load DECAS changeable features for new Digital ESSX/DECAS customers, the Installation Charge specified in A112.34.13.A.3.b.(4) applies per feature loaded.
- j. The following types of lines will be restricted from Station TN Rearrangement capability. Service option and feature change capabilities will still be available except on lines assigned to multiline hunt groups.
 - Station lines equipped for dial pulse service
 - Station lines assigned to multiline hunt groups
 - Attendant lines
 - Any Digital ESSX line which has a special hardware configuration (e.g., ground start lines and lines having SCAN points or signal distribution points)
 - Manual lines (e.g., station lines with full originating and/or terminating restrictions)
- k. DECAS changeable features added by the Company at the customer's request will be subject to the appropriate Service Order charges specified in Section A4. and the per line charges specified in A112.34.13.A.3.b. following.
- l. Any required changes in customer provided equipment as a result of growth, desired enhancements or technological advancement, will be the responsibility of the DECAS customer. Compatibility with customer provided station terminal equipment is not guaranteed.
- m. The DECAS customer is responsible for assigning and maintaining a record of station feature assignments. The DECAS customer also agrees to provide the Company with a central point of contact for inquiries and/or trouble reports involving station features.
- n. DECAS customers will be responsible for initiating a Service Order to correct any information pertaining to Directory Listings that changed as a result of a DECAS TN swap. The appropriate Service Order Charges specified in Section A4. apply.

A112.34.13 Customer Management Features (Cont'd)

A. Digital ESSX Customer Administration Service (Cont'd)

2. Terms and Conditions (Cont'd)

- o. DECAS customers will be limited to one (1) TN swap per day as a priority request. The numbers of feature changes that can be requested as priority changes will be determined by the Company when DECAS is ordered.
- p. When required by the Company to use a Security Card, the DECAS subscriber will be required to authenticate with the card before network access is permitted. The network access security system validates the user, and establishes the call across the network to the DECA host computer. In conjunction with the Security Card, the Company will provide a login and password in order to maintain secure access and an audit trail. Rates for the Security Card are outlined in A112.34.13.A.3.b.(17) following.

3. Rates And Charges

Digital ESSX-XL customers will have the option of paying for DECAS on either a per system or a per line basis. Customers choosing to pay on a per system basis will be subject to the rates specified in 3.a.(3) following. Customers choosing to pay on a per line basis will be subject to the rates specified in 3.a.(4) following. The installation charge will be reapplied if a Digital ESSX-XL customer changes their DECAS billing arrangement subsequent to the installation of the DECAS feature.
