A. Description of Service

1. BellSouth Centrex Control is a feature of BellSouth Centrex service which utilizes a computer-based operations system accessed via an Internet connection or a Company Secure Network pending conversion to Internet access. BellSouth Centrex Control allows end users to activate and/or deactivate selected features and/or change certain service options and feature configurations on designated BellSouth Centrex service station lines. These changes can be performed on a per line basis or a bulk change basis. Subscriber provided equipment is required for the operation of BellSouth Centrex Control. The BellSouth Centrex Control feature is available where central office switching systems and facilities permit. ISDN station lines will only be controllable in the DMS-100 and 5ESS switches where facilities permit.
2. For access to BellSouth Centrex Control, the subscriber will be required to provide appropriate equipment and Internet access. Service established prior to June 30, 2006, using dedicated access lines will be converted to Internet access.

Note 1: Billing will be in increments of 100 numbers. Partial increments will be rounded up to the next 100.
