Note 1: Customers of this service desiring either call screening and/or restriction on their Prestige Deluxe lines may obtain these services as provided for lines and trunks in Section A13.

Note 2: Each of the rate elements shown provide only the basic auxiliary line termination equipment and facilities in the central office. These rates and charges are in addition to the rates and charges applicable for the associated services (FX, WATS, Tie Lines, etc.).

Note 3: WATS group will be applied per band.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.11 Telephone Numbers And Facilities Reserved For Future Use (Cont'd)

H. Rates and Charges

- 1. Each telephone number reserved

	Monthly Rate	USOC
(a) Apply Sixty percent of the monthly rate applicable for intercom and the exchange circuit for a main station line at the customer's main location.	\$-	REN+X

A112.26.12 Optional Service Features

A. Attendant Service - General

- 1. Central office attendant console operation is offered as an auxiliary service with ESSX service.
- 2. The Call Transfer-Attendant feature is furnished with Non-Data Link or Data Link Console operation.
- 3. As an alternative the subscriber may designate a selected station or stations to perform attendant functions. Incoming calls to the listed directory number are connected to the selected station and then completed to the desired party by operation of the Call Transfer feature.

B. Attendant Service - Non-Data Link Console Operation

- 1. Terms and Conditions
 - a. Customer provided consoles will be allowed only where the equipment is compatible with the Central Office serving the system.
 - b. Control channels are required for various console optional features as indicated and are provided at the appropriate rates and charges.
- 2. Rates and Charges

	Installation Charge	1 Month	Term Payment Plan Monthly Rate			USOC
			36 Months	60 Months	84 Months	
(a) (DELETED)

(d) Busy verification by attendant - Verification of main stations and trunks, subsequent installations, per console	9.50	.50	.45	.45	.45	EDSVC

D. Attendant Service - NonKey Telephone Set or Key Telephone System Operation

1. Terms and Conditions

- a. NonKey Telephone Sets or Key Telephone Systems may be used for attendant operations.
- b. Attendant Access Loops are required between the No. 1A ESS serving the system and the answering location. These facilities are used to complete incoming calls for the listed directory number and may be arranged for completing dial "0" traffic. In addition, Attendant Access Loops have the same capabilities as ESSX service main station lines. Access Loops terminate in the Key System and multiple appearances of an Access Loop may be provided within the limits of the associated Key Telephone System.
- c. Recorded intercept is provided utilizing common announcement facilities located within the Central Office.

Note 1: Charges for line hunting arrangements apply as appropriate.

Note 2: Requires compatible customer-provided terminal equipment. Private Line Guidebook charges apply for the associated Supervisory Control Channel.

(6) (DELETED)						
(7) Advanced Private Line Termination						
(a) Per Termination	41.30	155.00	140.00	140.00	140.00	EVW

Note 1: One installation charge applies when any number of miscellaneous lines of the same type are installed at the same time, per occasion, per same group.

Note 2: Tie Lines are not furnished to connect a flat rate system with a measured rate system.

Note 3: Tie Lines terminations are furnished to connect a system to Enhanced Private Switched Communications Service (EPSCS) Type A Channels.

(D)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.12 Optional Service Features (Cont'd)

L. Outgoing Trunk Queuing - WATS (OTQ)

1. Terms and Conditions

- a. The OTQ feature is only available for subscriber systems equipped with Customer Facility Group Network Access Registers from No. 1A ESS central offices equipped with the 1AE5 or later generics and Centrex-CO systems from No. 1A ESS central offices equipped with the 1AE4 or later generics. This feature can only be offered to serve customer stations (excluding the attendant) that are collocated in the same ESSX service as the WATS simulated facilities.
- b. The Inhibit Inflow/Outflow optional features require separate control channel(s) per queue between the central office and the customer provided control key(s) at the customer premises. Guidebook rates apply for control circuits between the control keys on customer premises and the ESSX service office.
- c. In addition to the rates shown for the Music-On-Queue optional feature, rates specified in the Private Line Guidebook apply for channels between the central office and the customer provided music source at the customer premises.

2. Rates and Charges

a. Option Charges

- (1) Per OTQ Arrangement

A112.28.8 Digital ESSX Service-VS and 200

A. Main Station Lines

1. The Digital ESSX service-VS and 200 main station line rate will be composed of the Intercom charge and the appropriate Exchange Circuit charge. Any charges for inside wiring already in place will also continue to apply.

a. Rates and Charges

(1)	Intercom Charge, ESSX service-VS ⁵						
(a)	Per line	-	8.20	8.20	8.20	6.55	NRX
(2)	Intercom Charge, ESSX service-200 ⁵						
(a)	Per line	-	8.20	8.20	8.20	6.55	NRX
(3)	Exchange Circuits, Flat Rate - ESSX service-VS ⁵						
(a)	1/4 mile	-	3.40	3.40	3.40	2.75	EXMAX
(b)	1/2 mile	-	5.10	5.10	5.10	4.05	EXMBX
(c)	3/4 mile	-	6.80	6.80	6.80	5.45	EXMCX
(d)	1 mile	-	8.70	8.70	8.70	6.90	EXMDX
(e)	1 1/2 miles	-	12.40	12.40	12.40	9.85	EXMEX
(f)	2 miles	-	16.10	16.10	16.10	12.80	EXMFX

Note 1: Each of the rate elements shown provide only the basic auxiliary line termination equipment and facilities located at the central office where the basic service is provided and is in addition to other rates and charges applicable for the associated services.

Note 2: One Installation Charge applies when any number of miscellaneous lines of the same type are installed at the same time, per occasion, per same group.

Note 3: Recurring rates apply per DS-1 circuit terminated regardless of number of channels activated at time of initial installation.

Note 4: One installation charge applies when any number of DS0 channels of the same DS1 circuit are installed at the same time, per occasion, per same group.

Note 5: Due to contract expirations, 60 Months Term Payment Plan rates have been converted to 1 Month rates. New rates become effective with billing cycles beginning on or after February 8, 2002.

K. Queuing

1. General

a. Queuing permits main station line users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available.

- (1) Off-Hook Queuing (OHQ), the calling main station line remains off-hook and is held in queue until a facility becomes available.
- (2) Call-back Queuing (CBQ), the calling main station line goes on-hook and is called back when a facility becomes available.

2. Terms and Conditions

Queuing may be provided in conjunction with ARS-Basic or as a stand-alone option for outgoing exchange calls. Queuing will be offered where facilities permit.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.30 Digital Electronic Tandem Switching Features (Cont'd)

A112.30.2 Terms and Conditions (Cont'd)

C. Definitions (Cont'd)

7. Network Speed Call (I) allows a customer group to have up to 1000 common preprogrammed speed call numbers. The numbers may be combined in one list or subdivided into multiple smaller lists. Each list requires a separate feature access code.
8. Priority Queuing (II) allows priority off-hook either trunk or station originating calls to queue against outgoing trunk/facilities. Two levels of priority can be assigned based on customer requirements.
9. See A112.28.11 for rates and charges for Off-hook and Call-back queuing.
10. Time of Day (TOD) system control provides a method of automatically changing network routing parameters according to a prespecified schedule. TOD is required for TOD ARS and TOD NCOS.
 - a. TOD Network Class of Service (NCOS) (I) provides the capability of mapping normal NCOS values into new values based on TOD, day of week, and day of year.
 - b. TOD ARS (I) will allow the customer to activate different routing patterns on specified ranges. Calls will be routed via instructions given in the route list elements.
 - c. Time of Day (TOD, II) system control provides a method of automatically changing the routing parameters according to a prespecified schedule.
11. Traveling Class Mark (TCM) provides the capability to transmit across a private network certain information along with a dialed number to identify privileges available to the caller. This feature equates to Network Information Signaling in the DMS-100.
12. Uniform Numbering (UN) provides a customer specified numbering plan, utilizing seven digits for on-net and ten digits for off-net or seven digits for on-net and 1+10 digits for off-net. Each customer switch connected to the ETN is identified by a unique three digit location code called RNX.
13. Network Class of Service (NCOS) is an information bearing code that is assigned to every station line, trunk, authorization code, and attendant console at each ETN Tandem location. The NCOS is comprised of several pieces of information that combine to represent the identity of the station, trunk or attendant console to which it is assigned. NCOS equates to D-PAT for 5ESS.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.32 ESSX Service - Vintage I (Cont'd)

A112.32.11 Reserved For Future Use

A112.32.12 Optional Service Features

A. Attendant Service - General

1. Central office attendant console operation is offered as an auxiliary service with ESSX service.
2. The Call Transfer-Attendant feature is furnished with Non-Data Link or Data Link Console operation.
3. As an alternative the subscriber may designate a selected station or stations to perform attendant functions. Incoming calls to the listed directory number are connected to the selected station and then completed to the desired party by operation of the Call Transfer feature.

B. Attendant Service - Non-Data Link Console Operation

1. Terms and Conditions
 - a. Customer provided consoles will be allowed only where the equipment is compatible with the Central Office serving the system.
 - b. Control channels are required for various console optional features as indicated and are provided at the appropriate rates and charges.
2. Rates and Charges

D. Attendant Service - NonKey Telephone Set or Key Telephone System Operation

1. Terms and Conditions

a. NonKey Telephone Sets or Key Telephone Systems may be used for attendant operations.

b. Attendant Access Loops are required between the No. 1 ESS serving the system and the answering location. These facilities are used to complete incoming calls for the listed directory number and may be arranged for completing dial "0" traffic. In addition, Attendant Access Loops have the same capabilities as ESSX main station lines. Access Loops terminate in the Key System and multiple appearances of an Access Loop may be provided within the limits of the associated Key Telephone System.

c. Recorded intercept is provided utilizing common announcement facilities located within the Central Office.

A112.34.13 Customer Management Features

A. Digital ESSX Customer Administration Service

1. General

- a. The Digital ESSX Customer Administration Service (DECAS) feature permits Digital ESSX customers to activate/deactivate selected optional features, change certain service options, and change feature configurations on predesignated Digital ESSX station lines. Customer provided terminal equipment is required for the operation of the DECAS feature.
- b. For DECAS equipped station lines, DECAS allows the customer to verify and/or display the assignment of features on a single station line, range of station lines or all station lines to determine which station or stations have a particular feature or service option.
- c. Certain Digital ESSX station lines may be specified by the customer to be exempt from this feature. Additionally, the Company reserves the right to make station lines inaccessible for DECAS.
- d. Changing the status of a station line from accessible to DECAS to inaccessible or vice versa, must be done by the Company via a Service Order request. Appropriate Service Order Charges specified in Section A4. apply.
- e. The Company has made the following provisions to protect the integrity of the switching system database and to ensure the security of DECAS changes.
 - (1) A DECAS customer's change, display or verify capabilities are restricted to that particular customer's own Digital ESSX system.
 - (2) All changes are audited as they are entered by the DECAS customer. Invalid changes will not be accepted. An error message detailing which command is in error will be given.
 - (3) Customer access to the database is protected using a dialup, login, password/dialback arrangement.

Note 1: When Code Restriction for NXX assigned to 900 is required, apply Code Restriction for NXX assigned to 900 as specified in A112.28.

A123.2 Centrex And ESSX-1 Optional Features

(Obsoleted 01-15-96, Type D) Service rates and charges in this section are not available for new installations, moves, transfers of service or replacements or additions to existing service.

Obsolescence Rules

1. Centrex and ESSX-1 Optional Feature service subscribers under a month-to-month payment option will be allowed to maintain their existing service at month-to-month rates until 12-31-96.

On or prior to 12-31-96 Centrex and ESSX-1 service month-to-month subscribers must; 1) convert their entire Centrex and ESSX-1 service account to MultiServ service or MultiServ PLUS service as described in A12.20 and A12.21 respectively; or 2) subscribe to an alternate service.

2. Centrex and ESSX-1 service subscribers under contract will be allowed to maintain their Centrex and ESSX-1 service until the expiration date of their contract or until 12-31-96 if the Term Payment Plan expires prior to that date. Upon expiration of their contract or no later than 12-31-96, Centrex and ESSX-1 service subscribers must disconnect their Centrex and ESSX-1 and either; 1) convert their entire Centrex and ESSX-1 service account to MultiServ service or MultiServ PLUS service as described in A12.20 and A12.21 respectively; or 2) subscribe to an alternate service.

(Obsoleted 7-5-85, Type D, Guidebook Reference A23.)

Available for existing service and additions at existing ESSX-1 locations and all Centrex locations.

A123.2.1 Centrex CO And ESSX-1 Station User Optional Features

A. General

Number 1 ESS Optional Feature service is furnished from Number 1 ESS central office equipment located on Company premises and may be provided, subject to the availability of facilities, to Centrex CO and ESSX-1 systems which are served by the same such equipment.

B. Terms and Conditions

1. Automatic Callback

- a. Automatic Callback permits a main station line user who attempts an intercommunication call to a busy main station line to be automatically connected to that line when both called and calling lines are subsequently idle. Automatic Callback is only operational for intercommunication calls between main station lines served by the same Number 1 ESS customer group.
- b. A calling main station line is permitted only one Automatic Callback request at a time. The called main station line is limited to only one request at a time for Automatic Callback. Once requested, Automatic Callback will remain active for a period not to exceed thirty minutes unless deactivated by the calling main station line.

A123.2 Centrex And ESSX-1 Optional Features (Cont'd)

A123.2.3 Electronic Tandem Switching (Cont'd)

B. Terms and Conditions (Cont'd)

1. Explanation of Terms (Cont'd)
 - b. Automatic Route Selection-Deluxe (ARS-D)

ARS-D provides for the origination of only ten digit calls to a public network telephone number, after the Centrex or ESSX-1 ARS-D access code, e.g., "8", automatically scans the digits and selects a first choice completing route when available, or subsequent route if the first choice route is not available. Routes may include Foreign Exchange trunk lines, Wide Area Telephone Service lines, exchange trunk lines to the toll network or access lines to CCSA or other arrangements where compatible.

The final completing route may be the toll network or, at the option of the customer, the call attempt is routed to overflow tone if a Facilities Restriction Level (FRL) is insufficient to complete the call.

When ARS-D is provided in conjunction with Uniform Numbering/Automatic Alternate Routing (UN/AAR), incoming tie lines from other Centrex, ESSX-1 or PBX systems connected directly to the Centrex or ESSX-1 system may be arranged to have automatic access to the ARS-D and UN/AAR features. When such arrangements are provided, the tie lines to the ARS-D become "dedicated" tie lines, i.e., provided for and restricted to that use only, and separate tie lines are required from the distant Centrex, ESSX-1 or PBX system if access is to be provided to other Centrex or ESSX-1 functions at the ARS-D equipped Centrex or ESSX-1 system. In addition, when ARS-D is provided in conjunction with UN/AAR, routes may include tie lines to a distant Centrex, ESSX-1 or PBX system equipped with an ARS-D like capability for subsequent access to the toll network.

The ARS-D feature provides all number translation and supervision necessary to route the call. "More Expensive Route" (MER) Tone is supplied, at the option of the customer, as a function of the route selected for a particular call.

Time of Day (TOD) Routing is an ARS-D option which permits preprogrammed selection of alternate routing pattern groups for public network calls (up to three sets of ARS-D routing pattern groups) on a time-of-day and day-of-week basis. Manual override is available with the Facility Administration and Control feature. The Maximum number of programmed changes per week is sixteen.

(D)

A123. OBSOLETE SERVICE OFFERINGS - ESS CENTRAL OFFICE FEATURES

A123.2 Centrex And ESSX-1 Optional Features (Cont'd)

A123.2.3 Electronic Tandem Switching (Cont'd)

B. Terms and Conditions (Cont'd)

1. Explanation of Terms (Cont'd)

e. Station Message Detail Recording to Premises (SMDR-P)

SMDR-P provides a record, on magnetic tape equipment located at the customer's premises, of calls originating from Centrex or ESSX-1 station lines to locations outside the same Centrex or ESSX-1 system. Facility groups may also be designated as requiring originating and/or terminating records.

Account Codes are an SMDR-P option which permit a station user to dial a series of digits (code) which will appear in the SMDR-P record for that particular call. The Account Code can be used by the customer for account or project identification. Adding an Account Code to a call, where arrangements have been made to provide this capability, is at the discretion of the station user. Each customer's Account Codes must contain the same number of digits, not to exceed eight, and must not conflict with ETS network code assignments.

A123.2.3 Electronic Tandem Switching (Cont'd)

B. Terms and Conditions (Cont'd)

2. Automatic Route Selection - Deluxe (ARS-D)

- a. ARS-D is furnished only in association with Facilities Restriction Levels (FRL).
- b. Preferred routes and alternate routes in patterns will be specified by the customer.
- c. A maximum of three ARS-D Pattern Groups with a maximum of sixty-four (64) patterns in each Pattern Group will be provided. The three Pattern Groups referred to will consist of one primary and two additional Pattern Groups for Time of Day Routing.
- d. A maximum of ten routes are provided in a pattern.
- e. Each WATS type band is treated as a separate route.
- f. A maximum of sixty-four (64) Number Plan Areas (including the home NPA) may be designated by the customer for routing of calls by central office codes (six digit translation).
- g. All rates and charges specified for ARS-D are in addition to the rates and charges for the associated facilities and facility terminations.
- h. A single rate "per facility terminated in patterns" will apply regardless of the number of patterns having access to that facility. The monthly rate specified is applicable to each facility available to the patterns.
- i. The charges specified in A123.2.3.C. for each code addition or change is applicable whether customer or Company initiated.
- j. Where ARS-D is furnished in connection with Uniform Numbering/Automatic Alternate Routing, tie lines to other PBX, Centrex or ESSX-1 system locations may appear as routes in ARS-D patterns when such tie lines are provided for subsequent access to the toll network at the distant PBX, Centrex or ESSX-1 system location.
- k. The TOD Routing feature permits up to sixteen programmed changes in Pattern Groups per week. When additional ARS-D patterns are required due to TOD changes, rates and charges as specified in A123.2.3.C. apply to each additional pattern.
- l. CCSA access lines (public network calls) and access lines to other similar arrangements, compatible with ARS-D, may be included as routes in patterns.
- m. Centrex or ESSX-1 toll diversion and toll restriction do not function on calls routed via ARS-D.

5. Station Message Detail Recording to Premises (SMDR-P)
 - a. SMDR-P is not represented to be a provision of billing detail.
 - b. Station message detail records will be provided on customer provided terminal equipment located at the customer's premises.
 - c. The customer must provide suitable space, environmental conditions, 110 volt AC power, and magnetic tape for the equipment located at his premises.
 - d. Processing of message detail information by the Company accounting center is not provided with this arrangement.
 - e. The customer must designate all station lines in a No. 1 ESS customer group and/or selected facility groups on which SMDR-P originating and terminating records are to be provided.
 - f. Additions or deletions of SMDR-P recording are provided by Company service orders.
 - g. Where SMDR-P is provided, a detailed record may be made for each completed call. At the option of the customer, arrangements can be made to provide records of calls attempted as well as calls completed. Under certain exceptional conditions, with SMDR-P, calls may be processed without recording the call detail.
 - h. SMDR-P includes the recording of Account Codes and Authorization Codes where these optional features are provided.
 - i. Account Codes are available with the initial installation of SMDR-P at no additional charge. Additions or changes of Account Codes subsequent to the initial installation of SMDR-P are provided at rates and charges shown in A123.2.3.D. (T)

- j. Any required changes in customer provided equipment as a result of growth, desired enhancements or technological advancement, will be the responsibility of the ECAS customer. Compatibility with customer provided station terminal equipment is not guaranteed.
- k. The ECAS customer is responsible for assigning and maintaining a record of station feature assignments. The ECAS customer also agrees to provide the Company with a central point of contact for inquiries and/or trouble reports involving station features.
- l. ECAS customers will be responsible for initiating a Service Order to correct any information pertaining to Listings that changed as a result of ECAS TN swap. The appropriate Service Order charges specified in Section A4. apply.
- m. ECAS customers will be limited to one (1) TN swap per day as a priority request. The number of feature changes that can be requested as priority changes will be determined by the Company when ECAS is ordered.

3. Rates And Charges

a. ECAS Capability

Centrex C.O. or ESSX-1 customers having greater than 600 total main station lines will have to pay for ECAS on a per line basis subject to the rates specified in A123.2.4.A.3.a.(3). The installation charge will be reapplied if a Centrex C.O. or ESSX-1 customer having more than 600 lines changes their ECAS billing arrangement subsequent to the initial installation of the ECAS feature.
