

1. CENTREX SERVICE**A. DESCRIPTION**

- a. Centrex service is provided from central office switching equipment located on a premises owned or leased by the Company and connected by local loops to the premises of the customer or an authorized user.
- b. Centrex service is provided from analog electronic central office switching equipment such as No. 1, No. 1A or No. 2 ESS or from digital electronic central office switching equipment such as DMS 100 or No. 5 ESS.
- c. Centrex enables station users to dial intra-system and outgoing calls directly. Incoming calls may be dialed directly to any station. Incoming calls to the main listed number for the service are connected to a designated answering point and then may be transferred to the desired party.
- d. The Centrex station line includes a local loop (which includes dial tone and a telephone number) and the unregulated basic features package. Unregulated Optional features and services are available.
- e. Centrex is offered only where the customer's location is served by central office switching equipment which has available the equipment and the capacity to provide the service.
- f. Centrex is offered only as a complete service. The local loop is not provided without unregulated basic features or vice versa.
- g. Centrex is offered for a minimum period of one month. Centrex is also available under optional Term Payment Plans of up to and including 84 months.

1. Classes of Service

- a. Business Measured Service - those station lines that serve the premises of business customers including college or university administrative functions, such as office and classroom buildings, faculty clubs, student unions, or administrative quarters of dormitories. Where service in dormitories or other residence locations is provided for instructional purposes as part of the educational process (e.g., for communications with computer assisted education systems) and is not normally used for social or domestic purposes, business service is provided. Business Measured Rate message charge as specified in Part 4, Section 2 apply for local usage.
- b. Residence Flat Rate (Dormitory) - those station lines that serve the living quarters of a college, university or hospital (dormitories, apartments, etc.) and where the major use is of a social or domestic nature by students, faculty members or employees.

2. Intercept of Calls to Unassigned Station Line Numbers

Incoming and Intragroup calls to unassigned numbers are intercepted by a standard recorded announcement.

(D)
(D)

1. CENTREX SERVICE (cont'd) (C)**A. DESCRIPTION (cont'd)****Retail vs. Retail/Resale Application (Terminology)**

Centrex Service is available for the provision of local exchange service directly to the entity using such service to place and receive calls (retail application). Centrex Service is also available to an entity for resale, at retail prices, to its customers (retail/resale application). (C)

In the retail application, the terms customer, subscriber, user, station user, group, group member, account, agent, supervisor or attendant position shall be understood to mean the entity which requested and agrees to pay for Centrex Service or its employees, agents and affiliates. (C)

In the retail/resale application, the terms customer or subscriber shall be understood to mean:

- The "Reseller" when the context concerns: ordering service (or as appropriate blocking service) for resale to its customers; entering into and terminating payment plans for resold service; requesting repair of resold service, including authorization for the dispatch of service technicians to the Reseller's Customer's premises as well as performance of any premises work; and billing responsibility for the provision of Centrex Service ordered by Reseller, and the use, activation or premature termination of service by Reseller's Customers; or (C)
- The "Reseller's Customer" when the context concerns: the service location (premises); the configuration and sizing of the telecommunications system, network, or service resold; and the manner in which the resold service, including any aspects or capabilities of the service, are used, activated, or accessed. Reseller's Customer is also the equivalent term of any of the following or similar terms: user, station user, group, group member, account, agent, supervisor or attendant position.

1. CENTREX SERVICE (cont'd)

(C)

B. DEFINITIONS**Addition**

Provision of supplementary service to a customer's installed system up to the capacity of the system.

Downgrade

Enumerated changes to an installed system generally resulting in a decrease in capacity, capability and/or lower monthly charge.

Line Category

The number of lines the customer has selected as the contract commitment.

Payment Plan

A period of time selected by the customer from among those currently offered by Ameritech, over which the customer agrees to pay a specified price for a product/service.

Removal

Deletion of equipment or service from a customer's installed system.

1. **CENTREX SERVICE (cont'd)** (C)

C. TERMS AND CONDITIONS

1. **Provision of Service**

Centrex Service is provided from switching equipment located on Company premises and is offered for 2 or more lines subject to the availability of facilities. Variations in the switching and control equipment used may cause differences in the operations or availability of certain features. Centrex Service is provided at the option of the Company and is furnished subject to central office switching capacity and the availability of outside plant facilities. Centrex Service is limited to a minimum of 2 lines. (C)
(C)
(C)
(C)

2. **Reserved for Future use**

3. **Suspension of Service**

Suspension of service is not offered for Centrex Service. (C)

1. CENTREX SERVICE (cont'd)**C. Terms and Conditions (cont'd)****4. Centrex Service Guarantee**

- a. Centrex Service Guarantee enables customers to install a Centrex system subject to a service guarantee as described in this sub-paragraph 8. for an initial period of 90 days from the date of installation. If before the Expiration of the initial 90 days the customer decides to cancel the service, all applicable non-recurring feature charges may be adjusted at that time as set forth in sub-paragraph c.
- b. During the effective period of the Centrex Service Guarantee, the Company may, at its discretion offer any of the following options for periods of not less than 30 days.
 - (1) If the customer is dissatisfied and requests that the Centrex service be terminated before expiration of the initial 90 days, unregulated non-recurring feature and Service Establishment charges will be adjusted. The customer will be responsible for any non-recurring charges associated with the installation of any new service (eg. PBX trunks, Exchange Lines, etc.) other than the Centrex service.
 - (2) Customers who request termination of the Centrex service before expiration of the initial 90 days may have their prior service reconnected without incurring any non-recurring charges, provided that the identical service is being reconnected. Any non-recurring charges attributable to changes from the customer's prior service will be paid by the customer.
- c. The line connection charge specified in Part 3, applicable to Centrex loops, shall not be adjusted pursuant to this Guidebook.
- d. The service will be offered on a statewide basis, where Centrex is available.
- e. The Centrex Service Guarantee shall not apply to Centrex systems which include the following unregulated optional features. However, a customer electing Centrex service may add the following unregulated features after the expiration of the initial 90 day period.
 - Automatic Call Distribution (ACD) (unregulated)
 - Simplified Message Desk Interface (SMDI) (unregulated)
 - ISDN Centrex (ISDN) (unregulated)

/1/

/1/ Material now appears on Sheet 5.1.

1. CENTREX SERVICE (cont'd)

C. Terms and Conditions (cont'd)

4. Centrex Service Guarantee (cont'd)

- f. Customers electing the Centrex Service Guarantee may make changes to their Centrex service (station additions, feature changes and additions, etc.) subject to the sub-paragraph above; however, the 90 day initial period applicable to the additions or changes shall begin from the date of installation of the original Centrex service. /1/
- g. Customers may select 36, 60^{/1/} or 84^{/1/} month service plans. Month-to-month service plans are not available. However, if the customer terminates the service before expiration of the initial 90 days, the month-to-month rate shall apply for that period. (C)
- h. Except as otherwise provided in this sub-paragraph, rates, charges, term and conditions as specified elsewhere in this Guidebook for Centrex shall apply as applicable.
- i. Centrex Service Guarantee is limited to customers with 2 - 100 lines.
- j. Centrex Service Guarantee is not available to temporary service customers. /1/

/1/ Effective December 31, 2011, the 84 month Term Payment Plan (TPP) term period is no longer available for new installations or renewals of Centrex Service. Effective September 1, 2013, the 60 month TPP term period is no longer available for new installations or renewals of Centrex Service. Centrex customers currently on a 60 month or 84 month TPP term period may continue service at their existing TPP rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service at the then-current month-to-month rates. If the customer does not request discontinuance of the service, the month-to-month rates in effect at such time will automatically apply. (N)

/2/ Material formerly appeared on Sheet 5.

1. CENTREX SERVICE (cont'd)

C. TERMS AND CONDITIONS (cont'd)

4. Station Line Channel Charge Application

/1/

- a. For the initial channel termination located in the same wire center area in which the dial switching equipment is located, no channel charge is applicable.
- b. For the initial appearance of a station line, which is terminated outside the wire center area that serves the Centrex system, the channel rate elements in d. following apply in addition to the rates and charges for the unregulated basic feature package. Since the rate for the LDC includes the local loop, a Centrex local loop rate is not applicable.
- c. For an additional appearance of the station line which is terminated at a different premises address from the location of the initial station line, the appropriate channel rate elements in d. following are applicable. A station line rate is not applicable.
- d. Rates and charges for facilities are provided via unregulated Dedicated Communications Service for end users and from Part 21, Special Access, for Telecommunications Providers.

For the initial appearance of a station line terminated outside the wire center area that serves the Centrex system, the following rate elements apply:

- Local Distribution Channels (LDC) (2)
- Channel Mileage Terminations (CMT) (2)
- Channel Mileage (CM) (Number of Miles)
- Signaling Capability (Per LDC)

For an additional appearance of a station line, terminated at a different premises address served by the Centrex serving wire center, the following rate elements apply:

- Local Distribution Channel (LDC) (1)
- Signaling Capability (Per LDC)

For an additional appearance of a station line, terminated outside the wire center area that serves the Centrex system, Channel Mileage and Channel Mileage Terminations also apply.

/1/

/1/ Material formerly appeared in Tariff 20, Part 5, Section 2, on 1st Revised Sheet 3.

1. CENTREX SERVICE (cont'd)

(C)

C. TERMS AND CONDITIONS (cont'd)**5. Transmission Specifications****Basic Line Standard Transmission**

The standard transmission specification for basic lines consists of: dial pulse signaling or Dual Tone Multi-Frequency (DTMF) signaling - approximate bandwidth of 300 to 3,000 Hz, loss of 0 to 8.5 dbm at 1004 Hz.

Loop Start Signaling

Basic lines and Electronic Key lines are provided on a single two-wire facility with loop start signaling.

Electronic Key Line Standard Transmission (Non-ISDN)

Electronic Key Lines are provided on a non-loaded loop for access by preprogrammed push button features on compatible Customer Provided Equipment (CPE). The distance limitations from the Company's switching equipment is approximately 2.5 miles. If a customer's premises does not meet transmission requirements in the Company's Technical Reference, Distance Extension will apply in addition to Centrex service charges.

(C)

1. CENTREX SERVICE (cont'd)

(C)

C. TERMS AND CONDITIONS (cont'd)**5. Transmission Specifications (cont'd)****ISDN Line (Custom and National) Standard Transmission**

ISDN lines (Custom and National) are provided on a non-loaded loop for access by preprogrammed push button features on compatible Customer Provided Equipment (CPE). ISDN lines are configured as an ISDN basic rate interface with a capacity of two 64 Kbps "B" channels and one 16 Kbps "D" channel (2B+D).

Integrated Services Digital Network (ISDN) architecture, as recommended in the 1984 recommendation of the International Telegraph and Telephone Consultative Committee (CCITT), provides integrated voice/data communication capability for transmission of Circuit Switched Voice (CSV) and Circuit Switched Data (CSD) signals on an incoming, outgoing and intercommunicating basis.

Valid configurations of services are listed in the Company's ISDN Interface Specifications. If a customer's premises does not meet transmission requirements in the Technical Reference, Distance Extension will apply in addition to Centrex service charges.

- ISDN National lines offer features and capabilities that are more standardized with all types of central office switches.
- ISDN Custom lines offer some features which are not available on ISDN National lines and require the use of proprietary Customer Provided Equipment.

1. CENTREX SERVICE (cont'd)

(C)

C. TERMS AND CONDITIONS (cont'd)

5. Transmission Specifications (cont'd)

OPTI-Centrex Lines

OPTI (Optimally Provisioned Transport Integration) -Centrex lines provide Centrex delivered to a customer premises utilizing a Company 1.544 Mbps or higher facility with multiplexing. Centrex Basic line specifications found elsewhere in this tariff apply. Multiplexing may effect the data transmission characteristics and some features of voice lines/channels. (C)

1. CENTREX SERVICE (cont'd) (C)**C. TERMS AND CONDITIONS (cont'd)****6. Local Service Area**

The exchange or zone of the serving wire center for Centrex Service determines the local service area for all station lines. (See Reference Section) (C)

7. Business Classes of Service

See Other Applicable Charges – Usage

8. Mileage Charges

Where facilities permit, Centrex lines, and Electronic Key lines may be provided to a customer's location outside the serving CO area. Subject to the availability of facilities and where satisfactory transmission and operation can be provided using normal facilities, an additional appearance of a Centrex or Electronic Key line may also be provided. In such cases, in addition to the prices for the specific Centrex line, Dedicated Communication Service or Special Access rates and charges apply. (See Reference Section)

1. CENTREX SERVICE (cont'd)**C. TERMS AND CONDITIONS (cont'd)****9. Cancellation of Service**

In the event of a customer initiated cancellation of service, equipment and/or facilities before completion, or after installation is completed, but prior to service being established, the loss of equipment and facilities in the process of building or being installed, cost of installation labor, cost of removal and other expenses will apply. In addition, Service Connection Charges may also be applicable.

10. Resale

Centrex resellers, sharers or aggregators may obtain features and services for resale, sharing or aggregating for all end users in the Centrex system based on feature Package Pricing and Volume Discount Arrangements specified elsewhere in this Guidebook.

- a. Centrex service may be resold, shared or otherwise aggregated among unaffiliated end users as listed in Part 5.
- b. Where there are unaffiliated end users on the same Centrex system, all loops on the system are priced at the 1-25 loop band of the Matrix, regardless of the quantity of loops provided for each end user or total number of end users or customers of the reseller, sharer or aggregator. (The loop Matrix is specified in D. following). The reseller, sharer or aggregator is responsible for payment of all charges including deposits and termination charges.

(C)

11. Listings**a. Administrative Service**

1. The Company will furnish without charge one main listing for each system in the regular exchange Listing Information System. In addition, a sub-listing will be provided indicating that stations may be dialed directly, if the number is known.
2. Listings for station line numbers are provided on an unregulated basis.

(C)

b. Residence (Dormitory) Service

1. Indented listings under the main listing are not provided for each dormitory station.

12. CCS Limitations

The intercom prices for each Centrex system are based on a 1 1/2 or less CCS (Centum Call Second) load.

1. CENTREX SERVICE (cont'd)

(C)

C. TERMS AND CONDITIONS (cont'd)**13. Reserved for Future Use****14. Intercom Calling**

Centrex intercom calling is only allowed between station users internal to the end user customer or station users of an affiliate company of the end user customer. Unauthorized intercom calling may result in cancellation of the service to the end user or end users violating this prohibition pursuant to Tariff M.P.S.C. No. 20R, Part 2, Section 2.

15. Direct Interconnection

Direct interconnection of Centrex systems belonging to unaffiliated end user customers is prohibited.

1. CENTREX SERVICE (cont'd)**C. TERMS AND CONDITIONS (cont'd)****16. Feature Package Pricing and Volume Discount Arrangements**

- All optional features provided by the Company are listed in the Company's Guidebooks at prevailing rates and charges. (C)
- Feature Package Pricing and Volume Discounts may be provided for all Centrex features or services within a system with the exception of local loops.
- Feature Package Pricing and Volume Discounts are pricing arrangements that allow the Company to package features or services for an individual system subject to the provisions of the Commission's Order in Case No. U-9321.
- As additional features or services are developed, the Company will submit new or revised Guidebook sheets and shall list and briefly describe the new or changed optional feature, the prevailing price and an effective date. (C)
- Unless otherwise specified, all of the regulations for Feature Package Pricing Arrangements and Volume Discounts are in addition to the applicable regulations and rates specified in other sections of this Guidebook. (C)

1. CENTREX SERVICE (cont'd)

(C)

C. TERMS AND CONDITIONS (cont'd)**16. Feature Package Pricing and Volume Discount Arrangements (cont'd)**

- The customer and the Company may elect to enter into an agreement where certain rates or charges are applicable for a fixed period of time. The Company will continue to offer such arrangements without change in the applicable prices unless mutual consent has been reached between the Company and the customer to undertake such changes. At the completion of this period, the agreement may be renewed at the option of the Company and the customer. Revised prices may apply to any renewed agreement.
- The Company may elect to waive or reduce non-recurring charges on selected features or the service establishment charge for periods of time not to exceed 90 days. Customer orders taken or completed during the promotional period will qualify for the waiver or reduction of the non-recurring charges. No waiver or reduction shall be applicable to the loop non-recurring charge. (C)

17. ISDN Centrex - Multiple Devices

- Multiple circuit switched "B" channel devices are allowed, where facilities permit, on an ISDN Centrex line. The Company supports up to four (4) devices to share the "B" channels, per ISDN Centrex line. (C)

1. CENTREX SERVICE (cont'd)

1. CENTREX SERVICE (cont'd) (C)**D. FEATURES (cont'd)** (C)**2. Line Features****Add-On Modules**

Provides the capability to connect 10, 18, 20, 22 or 36 Add-On Modules

Analog Line Pickups

Allows analog lines to have a line appearance on properly equipped Customer Provided Equipment (CPE).

Automatic Callback

Permits a station user who places an intrasystem call to a busy Centrex number to be automatically connected to that line when both the called and calling station lines are available.

Automatic Dial

Provides for automatic dialing of a single telephone number via a specific button on the CPE telephone.

For Centrex users with properly equipped Customer Provided Equipment (CPE) having display capabilities, this feature displays the number currently programmed for Automatic Dial.

For ISDN this functionality is provided by properly equipped CPE.

Automatic Line Preselect

Automatically connects a station user to a preselected line when the handset is lifted. Preselect can be configured to select a ringing line, an idle line, a primary line, or no line.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Blind Transfer with Recall Identification**

Allows a station user to transfer a call to another party without waiting for that party to answer. If the other party does not answer the transferred call in a specific time-out period, the station from which the call was transferred is recalled. On sets with the optional display that have been assigned the text-message option an alphanumeric message is displayed to help identify Blind Transfer recalls.

Call Camp-On

Provides a station user the ability to direct an audible tone signal to any other station line, if that line is in use.

Call Camp-On Selective

Permits a station user to originate by dialing a code, an audible tone to a called busy station line in the same Centrex system.

Call Diverting

Outgoing calls may be screened so that completion of calls to preselected areas is denied. Each arrangement is a predefined standard. The following arrangements are standard: intercom only (fully restricted), intercom and local calls (semi-restricted), and intercom, local and toll calls (unrestricted).

Denied Origination prohibits call origination from designated Centrex stations.

Denied Termination prohibits call completion to designated Centrex stations.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Call Forward of Call Waiting Calls**

Allows station users that have Call Forwarding and Call Waiting assigned to their lines to forward Call Waiting calls that are not answered within a set period of time automatically to a predetermined destination.

Call Forwarding-Busy

Allows incoming calls to a busy station to be routed to a preselected Centrex station line, attendant, or line outside the system.

Incoming Call Only allows only incoming calls from outside of the Centrex group to be forwarded.

Internal/External Split allows separate, forwarded-to directory numbers to be assigned for calls that originated internally or externally to the customer group.

Station Activation allows a customer to activate/deactivate the feature as well as program the forward-to station from the set by using a dial access code.

To External Number allows calls to be forwarded to a number outside of the Centrex group.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Call Forwarding-Don't Answer**

Allows incoming calls to automatically route to a preselected Centrex station line, attendant or to a line outside the Centrex group when the called station is not answered after a preset number of rings.

Incoming Call Only allows only incoming calls from outside of the Centrex group to be forwarded.

Ring Cycles defines a predetermined number of rings before the Call Forward-Don't Answer feature is invoked on a per line or a per system basis.

Internal/External Split allows separate, forwarded-to directory numbers to be assigned for calls that originated internally or externally to the customer group.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Call Forwarding-Don't Answer (cont'd)**

Forwarded Number Busy Interaction Enhancement on a customer group basis provides additional treatment options for incoming calls that are forwarded to the forward-to destination when busy. This enhancement does not apply for ISDN. The available options are:

Treat the call according to any features assigned to the forward-to destination (current functionality); or

Do not forward the call, but continue to ring the base station until answered or abandoned; or

Do not forward the call, but provide an intercept announcement.

Station Activation allows a customer to activate/deactivate the feature as well as program the forward-to station from the set by using a dial access code.

To External Number allows calls to be forwarded to a number outside of the Centrex group.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Call Forwarding-Variable**

Permits a station user to activate routing of incoming calls, to a preselected station line, attendant, or to a line outside of the system.

Reminder Ring/IntraGroup provides a ring splash when an intragroup call is forwarded and the base station is idle.

To IntraGroup Directory Numbers (DNs) Only allows calls to be forwarded to intragroup directory numbers only.

Incoming Calls Only allows only incoming calls outside of the business group to be forwarded.

Call Forwarding per Key

Allows an Electronic Key Line user to enable each line appearance key assigned this feature to call forward to a different number or destination. For Centrex users using properly equipped Customer Provided Equipment with display capabilities, this feature displays the number currently programmed for the Call Forwarding feature.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Call Forwarding Over Private Facilities**

Enables a station user to establish automatic forwarding of incoming calls to a specific private facility access group.

Call Forward Reason Display

Expands the utility of existing Call Forwarding features via display message for Business Sets with display.

Call Hold

Allows a station user to hold a call in progress by dialing an access code, place another call and alternate between the two calls with privacy.

With ISDN CPE, it allows the station user to hold an active call in progress by pressing a button to place or answer another call and alternate between the two calls with privacy.

Call Park

Provides the station user the ability to park a call against the station number. The parked call may be retrieved from any station in the Centrex group by dialing an access code and the station number parked.

Call Pickup

Allows a station user to answer calls directed to another station line within the same pickup group by dialing an access code. Where available, incoming calls will be answered on a first in, first out basis (longest call answered first). ISDN station users may also invoke call pickup via a feature button with properly equipped CPE.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Call Request**

Allows a station user to activate a call request to an idle or busy station. Additionally, provides the ability of a called station to activate a return call by using a feature button, when the station has received a call request.

Call Transfer-All

Allows incoming, outgoing, and intercom calls to be transferred to other Centrex stations.

Call Transfer (Inter-system)-Deluxe

Incoming, outgoing, and intercom calls may be transferred to other Centrex station numbers or other lines outside the Centrex group.

Call Waiting/Cancel Call Waiting

Provides station users with an audible tone to indicate that an incoming call is waiting. This feature can be activated and deactivated with the Cancel Call Waiting capability.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Called Number Display**

Capability to display the called number with the proper Customer Provided Equipment.

Caller ID

Incoming numbers from outside the Centrex system are displayed on compatible Customer Provided Equipment. In addition, the date and time of the incoming call is displayed.

Free per Call Blocking Service is available for customers who are served from appropriately equipped central offices. Centrex Service customers may prevent delivery of their telephone numbers to Caller ID subscribers on a per call basis by activating the appropriate Caller ID activation code prior to placing the call.

(C)

Caller ID-Intercom

The caller's number, if not blocked, is displayed on compatible Customer Provided Equipment when an incoming intercom call is received.

Caller ID with Name

Provides the name associated with the calling party number, or an indication of anonymity or unavailability in lieu of the name, to the called party. Caller ID with Name is an optional feature to Caller ID. Caller ID with Name is not provided without Caller ID.

Calling Name Display on Intercom

Provides delivery of the calling name on calls from other station users within the Centrex system to station users with Electronic Key Line sets.

Calling Reason Display

In addition to a display of both the caller's number and the number being called, this also indicates the reason a call has been forwarded.

Enhancement provides more information on redirected calls.

Centrex Open Interface

Channelization option for terminating Direct and/or Custom High-Capacity service into a Centrex.

1. CENTREX SERVICE (cont'd)**D. Features (cont'd)**

1. Feature Availability (cont'd)

CLASS Automatic Callback

(See Part 7, Section 2)

CLASS Call Screening

(See Part 7, Section 2)

CLASS Repeat Dialing

(See Part 7, Section 2)

/1/

CLASS Visual Message Waiting Indicator

Provides a visual indication when messages have been left for customer customers who also subscribe to compatible voice messaging systems. For customer customers with display sets or adjuncts, the date and time of the messages if the messaging service supplies this information are also displayed in addition to lighting the visual message indicator lamp.

Conference Calling, 3-Way

Allows a station user to add a third party to an existing call.

Consultation Hold

Allows a station user to hold a call in progress (incoming or outgoing) and originate another call with privacy.

/1/ Material now appears on 1st Revised Sheet 221 in Part 20, Section 5 of this Tariff.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Custom Calling Name on Centrex**

Provides internal (employee) and external (Centrex customer of record listed name) calling name display on lines subscribed to the feature. The customer must also subscribe to Caller ID.

The Centrex customer must establish and maintain a directory of all names and lines associated with the Centrex by accessing a Company website. The Company shall not be responsible for the accuracy of the customer directory or any name list that the customer uses for the Custom Calling Name service. (C)

Each Centrex customer of record shall be limited to a maximum of three proprietary website user IDs, and the customer is responsible for protecting the security of the user ID numbers. The Company shall not be liable to the customer or any third party (including but not limited to any employee of the customer) for improper or incorrect designations when such designations are established with the customer's user ID.

Datapath Critical Path Restoration

This option reestablishes a Datapath call that was disconnected by power loss or switch resets in synchronization loss or other network disruptions.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Direct Connect Originating**

Permits a station line to automatically dial a predetermined telephone number when the calling station line goes off-hook.

Direct Connect Originating with Delay

Permits a station line to automatically dial a predetermined telephone number when the calling station line goes off-hook. The customer can define the time delay, normally 1-20 seconds, after which the predetermined telephone number is dialed when the station user goes off-hook.

Direct Inward Dialing (DID)

Calls from outside the Centrex group may be dialed directly to each Centrex number.

Direct Outward Dialing (DOD)

Calls may be placed outside of the Centrex group without the aid of a system attendant.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Direct Station Selection/Busy Lamp Field with Fast Transfer**

This provides a set of related features to allow appropriate Customer Premises Equipment to perform attendant console like functions.

Direct Station Selection provides properly equipped Customer Provided Equipment to monitor, via a busy lamp field, status of directory numbers that appear in the Electronic Key line group. It will also provide direct dialing to a monitored station by means of the feature key.

Camp-On allows the user to extend a call to a busy station. The call is held until the called party is free. If the called party does not answer the waiting call, then the station that extended that call is automatically recalled by the calling party.

Fast Transfer allows the transfer of calls without having to conference the called party beforehand.

Directed Call Park

Provides the station user with the ability to park a call against another station number. The parked call may be retrieved from any station in the Centrex group by dialing an access code and the station number.

Directed Call Pickup

Allows a station user to answer calls directed at another station number within the Centrex group without regard to pick-up groups. This feature may be provided with barge-in, if requested.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Directory Number Hunt with Call Waiting and Preferential Hunt**

Allows a line with Call Waiting to be a member of a directory number hunt group and allows a preferential hunt list for each member of the group.

Display Capability

For Centrex users with properly equipped Customer Provided Equipment having display capabilities, this feature also displays user-entered or incoming call information during the use of other Centrex features.

Distance Extension

Extends the effective working range beyond the normal working range. This arrangement will allow for the proper operation beyond these limitations within the same serving central office.

Distinctive Ringing and Call Waiting Tone

Provides different ringing cadence for incoming calls from within the Centrex system verses outside the system. This feature also provides distinctive call waiting tones for calls coming from within the system verses outside the system for lines equipped with the Call Waiting capability.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****End to End Signaling**

Allows a station user, while in the talking state, to send Dual Tone Multi-Frequency (DTMF) digits to the other end by using a dial pad.

Equal Access for InterLATA Calling

Allows each station line to use a predetermined Inter-Exchange Carrier without dialing any special codes. Override to an alternate carrier can be accomplished by dialing an appropriate Inter-Exchange Carrier code.

Executive Busy Override

Allows a station user to gain access to a busy station.

Executive Busy Override-Exempt

Denies access to a station user invoking Executive Busy Override.

Executive Display Communications

Allows a station user to leave and retrieve messages at an Electronic Key line set with display.

Feature Buttons

Allows a user to activate features or access trunk groups via buttons on a customer provided set.

1. **CENTREX SERVICE (cont'd)**

(C)

*D. FEATURES (cont'd)*2. **Line Features (cont'd)****Group Intercom**

Centrex users may be members of an intercom group of up to 99 members. Each member is assigned a unique 2 digit number. This intercom is separate and distinct from station to station Intercom Calling.

Additional intercom capabilities offered, where available, are:

Individual Page allows a Group Intercom member to page another group member using the built-in speaker on a properly equipped set. This capability is not applicable for ISDN.

All Calls allows a Group Intercom member to simultaneously page up to 29 predefined members of the same Group Intercom group, using the built-in speaker on a properly equipped set. This capability is not applicable for ISDN.

Intercom Key allows a user to directly terminate on a predesignated set by pressing the intercom key.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Hunting Arrangements**

Incoming calls to a busy Centrex line are redirected to a predetermined number(s) to search for an idle line on which to complete the call. If no idle number is found, a busy tone is provided. These types are available:

Circular Hunt permits a complete hunt over all of the station lines in a particular Multi Line Hunt Group (MLHG). Hunting starts with the dialed number and continues to the last terminal prior to the dialed number in the MLHG. Circular Hunt is only provided with Uniform Call Distribution, Preferential Hunt or Multiple Position Hunt (MPH).

Series or Serial Hunt allows a limited number of Centrex lines to be programmed in either a sequential (consecutively numbered) or non-sequential (non-consecutively numbered) order for hunting purposes. Series hunting is done through the ordered list until an idle line is encountered or the end of the list is reached. Call handling line features can be added to the last directory number in the series to increase call completion probability. Series Completion redirects a call only once to any given line.

Enhancement redirects a call from a busy directory number to another directory number giving greater flexibility by providing circular Call-Forward, Busy type chaining.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Hunting Arrangements** (cont'd)

Distributed Line Hunting starts the hunting at the first idle line after the previous hunt and continues until the starting point is reached.

Multi Line Hunt Group (MLHG) is a group of lines with common terminating (incoming call) features that are grouped together to share translation data. Hunting is provided by a common program (shared translations) for the group of lines. Each line is identified by a multi-line terminal number, not a Centrex number.

Enhancement allows the assignment of Multiple Pilot Directory Numbers to a MLHG. Hunting can therefore begin at different points in the group depending on the number dialed.

Non-Hunt Telephone Number in an MLHG can contain station lines which have associated non-hunt directory numbers. If the station line is busy on a call, another call to the non-hunt number will receive busy treatment. These non-hunt numbers are not in the MLHG and do not have access to the MLHG or MPH features.

Preferential Hunt permits a pre-hunt over a preferential list of station lines before hunting the entire MLHG. Each station can be associated with a particular preferential list within a MLHG.

1. **CENTREX SERVICE (cont'd)**

(C)

*D. FEATURES (cont'd)*2. *Line Features (cont'd)***Hunting Arrangements** (cont'd)

Secretarial allows more than one Centrex line to hunt to the same line in a linear pattern.

Uniform Call Distribution (UCD) without queuing is furnished only on station lines equipped for Circle Hunt. This hunting feature provides equal distribution of incoming calls in a prearranged group. Calls in excess of the number of lines in the UCD group will not be held in queue and will receive a busy tone. A make busy arrangement is required to busy out all lines in a group or single lines in a UCD group by operating a key.

Intercom Calling

Centrex users may dial each other's telephone number using 3, 4, or 5 digits without the aid of the system attendant.

Last Number Redial

Allows a designation of a CPE station button to initiate redial of the last number called.

Last Number Redialed associated with Set redials last number from business set regardless of which key the call was made from.

Leave Message Activation

Capability for a station user to activate, via a button, an audible or visual message indication at other locations. The receiving station controls the deactivation of the message indication upon retrieval of the message. **(Requires Message System Service CPE)**

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Listen on Hold**

Allows a station user to place a called party on hold and listen through the speaker on a properly equipped set.

Make Busy

This feature may be assigned to any hunt line, directory number, multi-line hunt line, or distributed hunt line and is activated by one of the following options:

Access Code

The feature is activated when the customer dials an access code.

Key

By using a customer provided external key, the line is made permanently busy when the key is activated, and is normal when the key is not activated.

Make Set Busy

Allows a designation of a CPE station button to busy out all lines terminating on the telephone set.

Make Set Busy except on Group Intercom

Allows an Electronic Key Line station to continue to receive group intercom calls when the set is put into a make busy condition.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Message Retrieval Display**

Provides the capability of a station to directly retrieve messages from their display via button activation and cancel the message waiting indication. (**Requires Message System Service CPE**)

Message Waiting Activation Control

Provides the capability of a predesignated station to activate audible or visual message waiting indications at other stations. The sending station controls both the activation and deactivation of the message waiting indication.

Message Waiting Indication Lamp

Provides the capability of a visual message waiting lamp, that indicates a message is waiting at the message center.

Message Waiting Indication-Visual

Provides the capability of a visual message waiting indication key, that indicates a message is waiting at the message center.

A directory number can have one to four message waiting lamps assigned on a set.

Message Waiting Indicator-Audible

Provides an audible tone signal, e.g. stutter dial tone, on a Centrex line to indicate a message waiting condition.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Multiple Appearance Directory Number(MADN)****- Multiple Call Arrangement (MCA)**

Provides capability to terminate duplicate telephone numbers on Electronic Key Line type Sets or Single Line Sets.

Multiple Call Arrangement (MCA) allows more than one set in the MADN group to be active on the MADN simultaneously. The number of simultaneous calls is restricted only by the number of members in the MADN group.

- Single Call Arrangement (SCA)

Provides capability to terminate duplicate telephone numbers on Electronic Key Line type Sets or Single Line Sets. These numbers are configured in a Single Call Arrangement (SCA).

Single Call Arrangement (SCA) allows only one set to be active (either originating or terminating) on the MADN at any given time.

1. CENTREX SERVICE (cont'd)**D. FEATURES (cont'd)****2. Line Features (cont'd)****Multiple Appearance Directory Numbers(MADN)****- Single Call Arrangement (SCA) (cont'd)**

Includes incoming call disconnect to automatically release the bridge for other MADN Directory Numbers.

Bridging

Allows more than one set in a MADN group to be active on a line simultaneously.

Conference Interaction allows a conference call to be either answered or established by one party, placed on hold, or picked up by another party.

Conference w/3-Way Calling enables a MADN Single Call Arrangement (SCA) with bridging options to establish a three-way call during the bridge state.

Privacy allows a user to exclude another user with the appearance of the same line from entering an existing conversation.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Network Number Display**

Allows an Electronic Business Set with Display to show the directory number of calling and called parties to users with multiple locations connected by customer-owned, private facilities, linked by Common Channel Signaling No. 7. Requires the feature Call Forward Reason Display.

Night Answer

Allows an incoming night call to be indicated by the ringing of a customer provided night bell or a predesignated Centrex line. Calls may be answered at any station other than fully restricted stations by dialing a special code.

Fixed allows calls that are normally routed to the attendant during the day, to be routed to predesignated locations at night. The predesignated route can be an individual directory number or a hunt group.

Flexible allows the attendant to program the Night Service routes for each Incoming Call Identification (ICI) classification assigned to the customer group.

Trunk Answer From Any Station allows any station in the customer group to answer an incoming call by dialing a code. The code is dialed when the Trunk Answer From Any Station alert sounds.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****On Hook Dialing**

A capability available on properly equipped Customer Provided Equipment which allows the user to originate calls without lifting the handset.

Priority Console Alerting

Alerts an attendant to an emergency call by a flashing lamp.

Query Busy Station

Allows up to 128 Electronic Key stations to query the busy/idle status of one designated station either Electronic Key line or Centrex line within the group. The feature supports up to eight simultaneous requests to monitor the station for idle status display.

Repeat Alert

A station can be designated to receive additional alert tones when a call terminates on a Directory Number (DN), MADN, or Group Intercom Key and while the station is active on another call.

Ring Again Idle Set

Prevents a busy set from receiving call back (ring again) while active on another call. Optionally, the set can be designated to receive additional alert tones while active on another call.

Ringring Options for MADN

Provides additional ringing options to a Multiple Appearance Directory Number (MADN) group.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Secondary Directory Telephone Number**

Provides an additional directory number which is not physically terminated, but exists in the programming of Electronic Key Line Service. The additional directory number, while not terminated on a dedicated facility, may be accessed from the network and may originate unique outgoing dial tone from an instrument that has another directory number as its primary number.

Secondary MADN Call Forwarding

Allows secondary Multiple Appearance Directory Number (MADN) members to activate or deactivate call forwarding from their sets.

Set Inspect

Allows a station user to either display features assigned to buttons on the set or display calling or called number of an active call or call on hold via operation of a predesignated button.

Enhancement allows this feature to also be enabled on an automatic basis displaying call information as soon as a call is presented.

Short Hunt

Permits incoming calls to hunt over a set of directory number appearances in search of an idle directory number on which to terminate.

Simultaneous Ring One Number (SR-ON)

Causes one additional telephone number of the customer to ring simultaneously whenever the Centrex station number is dialed. The customer's Centrex station and the SR-ON telephone number must be served from the same central office switch.

SR-ON is only available where equipment, features and facilities are available. Other restrictions and limitations may apply.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Single Line Extension**

Allows a single line set to be bridged with other single line sets using the same Directory Number. Extensions are bridged at the central office and can be to the same premises, different building or different premises in the same central office.

Speed Calling-Expanded Number Group

Allows a station user to place calls to a list of numbers by dialing an access code. The size of the list depends on the serving technology type.

Speed Calling-Long

Allows a station user to place calls to a list of 30 numbers by dialing an access code.

Speed Calling-Short

Allows a station user having access to place calls to a list of 6 or 10 numbers by dialing an access code.

Speed Call Pause Insertion

Allows users to insert pauses into the signaling digit string as they program a 24-digit (maximum) speed call cell.

Station Call Through Test

Allows a pre-designated Centrex station line (test station) to determine the availability status of individual tie trunks.

Station Controlled Conference

Allows a station user to establish a conference call consisting of up to six or thirty conferees without the assistance of the attendant.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**2. Line Features (cont'd)****Stop Hunt**

This feature may be assigned to any hunt line, directory number, multi-line hunt line, or distributed hunt line and activated by one of the following options:

Access Code

The feature is activated when the customer dials an access code.

Key

The feature is activated by using a customer provided external key.

Time and Date Display

Allows time and date to be displayed. Time and date are provided by the Central Office.

Touch Tone

Provides for dialing a telephone number using Dual Tone Multi-Frequency (DTMF) signaling.

Transfer Calls to Restricted Station

Allows incoming calls, initiated from outside the Centrex system to be transferred by a designated station user to a Centrex line that is restricted from receiving incoming calls.

Usage Billing by Line Number

Calls outside of the business system which incur message units or toll charges are billed by individual telephone number when the company is the billing entity.

800 Call Transfer

Provides capability to terminate an 800 line on a single line set and for that set user to transfer the call.

1. CENTREX SERVICE (cont'd) (C)**D. FEATURES (cont'd)** (C)**3. ISDN Services and Features****SERVICES****Alternate Circuit Switched Voice/Circuit Switched Data Service**

Provides the capability to originate and receive either Circuit Switched Voice or Circuit Switched Data calls over a single "B" channel, but not simultaneously.

The standard capabilities and features are the same as those shown for Circuit Switched Voice and Circuit Switched Data.

Circuit Switched Data Service

Provides the ability to originate and receive circuit switched data calls over the 64 Kbps "B" channel.

Circuit Switched Voice Service

Provides the ability to originate and receive circuit switched voice calls over the 64 Kbps "B" channel.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**3. ISDN Services and Features (cont'd)****FEATURES – VOICE****Increase Shared Directory Number (DN) Group Size**

Increases the number of Customer Provided multi-button sets that can share call appearances of a directory number from eight to thirty-two. One of the stations sharing a DN may be an analog set. This arrangement is provided only in association with ISDN National lines. Additionally, the number of station users who can bridge onto a conference call is subject to the restriction that the number of conferees plus conference bridges cannot exceed six.

Pickup Held Conference Call from Shared Directory Number (DN) Call Appearance

Allows a user, with a customer provided multi-button set that shares a call appearance of a directory number with another user, to establish a conference call, place it on hold, and have the other user pick it up.

Shared Directory Number (DN) Bridging with Conference Calls

Allows users, with customer provided multi-button sets with shared call appearances of a directory number, to bridge onto a conference call established on a shared call appearance directory.

This arrangement is provided only in association with ISDN lines. Additionally, the number of users who can bridge on to a conference call is subject to the restriction that the number of conferees plus conference bridge cannot exceed six.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**3. ISDN Services and Features (cont'd)****FEATURES - VOICE (cont'd)****Terminal Management**

Provides for the management of ISDN terminals by designating the capability of:

Adjunct control automatically turns on the speaker phone at the station set, if appropriate for the particular feature.

Automatic-Hold/Drop Preference automatically determines how to handle a call active on one call appearance when the user shifts to another appearance. Two types of treatment are provided:

- auto-drop
- auto-hold

Button Management provides software release buttons that can be used for features or call appearances.

Call Appearance Selection for Implicit Conference and Transfer-Automatically selects an idle call appearance for the Implicit Conference and Transfer features.

Display for Ringing Call Appearances Only activates the display on customer provided multi-button sets only for ringing call appearances.

1. CENTREX SERVICE (cont'd) (C)**D. FEATURES (cont'd)****3. ISDN Services and Features (cont'd)****FEATURES - VOICE (cont'd)****Terminal Management (cont'd)**

Idle Call Appearances Preference automatically selects an idle call appearance, if available, when a station user equipped with multiple call appearances goes off-hook. The idle call selection occurs when other call appearances are alerting the station set.

Ringling Call Appearance Preference automatically selects the call appearance that has been alerting the longest when the station user goes off-hook and other call appearances are alerting the station set.

Inspect for ISDN Terminals Retrieves and displays call-related information on any call appearance that has an associated call.

FEATURES – DATA**Alternate Access**

Allows designation of an alternate host to be used to complete a call in the event that the primary host does not answer when the host is out of service.

Far End Disconnect Supervision

Provides automatic disconnect of one end of a data connection when the other end disconnects. (C)

1. CENTREX SERVICE (cont'd) (C)**D. FEATURES (cont'd) (C)****3. ISDN Services and Features (cont'd)****FEATURES - VOICE (cont'd)****Hunt Group for Shared Data Access**

Provides automatic search of a group of shared ports to find an available port in response to a connection request.

Queuing

Permits calls, in excess of the available lines in a hunt group, to be held in the central office and distributed in their order of arrival to the hunt group as the line becomes available.

1. CENTREX SERVICE (cont'd)

D. FEATURES (cont'd)

4. System Features

Announcement Services

Provides announcements periodically to assure callers that their calls will be answered and provides for delay periods between announcements and the type of treatment callers will receive between announcements (ringing, silence or music).

Announcements can be utilized with various Centrex services, such as UCD, ACD, Special Intercept, ARS, Queue Slots and Music on Hold. Two announcement arrangements are available:

Customer Premises Announcements provides an interface to the customer premises for recorded announcement or music.

- Central Office Recorded Announcements** provides a standard Company announcement. (C)
- (D)
- (D)
- (D)
- (D)

Area Wide Networking (AWN)

Allows subscribers to originate calls within geographically different locations using abbreviated dialing where Ameritech is the intraLATA usage provider. The called party and the calling party may be in locations served by different Central Office switches and different telecommunications systems.

AWN operates across the public network or private facilities and can be provided to subscribers with PBX, ISDN-Direct, or other basic exchange services.

AWN is compatible with Centrex Mate.

(D)
(D)

1. **CENTREX SERVICE (cont'd)** (C)

D. **FEATURES (cont'd)** (C)

4. **System Features (cont'd)** (C)

Area Wide Networking (AWN) (cont'd)

AWN may include In Network Numbers and Out of Network Numbers. In Network numbers are all the telephone numbers that participate in the AWN dialing plan. Out of Network numbers are locations that may be dialed on an abbreviated basis but cannot dial back on the abbreviated dialing plan. Out of Network numbers may include telephone numbers that are not part of the subscriber's telecommunications system or that are served from areas where the service is not available. /1/(C)

Two dialing plan formats are available: Extension Dialing and Custom Dialing. A combination of both dialing plans may be provided. Extension Dialing utilizes sequential digits from the North American Numbering Plan (the seven digit telephone number) to originate a call, typically the last four digits of the telephone number. Custom Dialing utilizes a number pattern designed by the customer and may be unrelated to the actual telephone number. If the Custom Dialing format is used it is the option of the customer to define the dialing format and input all Custom Dialing numbers associated with their dialing plan. /2/

Additional business or residence telephone numbers may be added to the abbreviated dialing plan as Out of Network numbers designated for terminating calls only.

Out of Network numbers may be administered by the subscriber via Centrex Mate or a customer provided VT 100 compatible terminal by accessing the Service Management System (SMS). The subscriber is responsible for any usage charges incurred when accessing the SMS system. /2/

AWN provides subscribers with call management reports. These reports will generate daily, weekly, or monthly information for the dialing plan based on originating, terminating or total dialing plan utilization. Customers may access the report feature via the SMS with Centrex Mate or a customer provided VT 100 compatible terminal. /3/

Appropriate usage charges will apply to AWN calls routed over the public network.

Some central office features will require the dialing of the complete telephone number when the AWN feature is utilized. AWN dialing will also impact some line restrictions provided by certain central office features. /3/

1. CENTREX SERVICE (cont'd) (C)**D. FEATURES (cont'd)** (C)**4. System Features (cont'd)** (C)**Assume Dial "9"**

An arrangement that allows station users to originate network calls by dialing the appropriate seven or 10 digit network telephone number without first dialing "9" for access to the public network.

/1/

Attendant Console

A special customer provided telephone instrument used by the attendant(s) to perform functions such as answering incoming calls, completing outgoing calls for restricted stations, etc. Console Arrangements are available for use with Digital and ISDN Centrex. Each digital console arrangement requires three Centrex lines. Each ISDN console Arrangement requires one ISDN line. A console Arrangement and associated Centrex lines are required for each console position.

Available Standard features are:

Access to Paging, Code Calling, etc. allows an attendant to access customer provided code call, paging, etc. equipment by dialing an access code and a called party code.

/1/

/1/ Material formerly appeared on Original Sheet 69 in this Section.

1. **CENTREX SERVICE (cont'd)** (C)

D. FEATURES (cont'd) (C)

4. **System Features (cont'd)** (C)

Attendant Console (cont'd) /1/

Available Standard features are: (cont'd)

Attendant Call Park allows the attendant to park calls against any directory number in the attendant customer group. The parked call may be retrieved from any station by dialing the feature access code for retrieval plus the directory number. The attendant may also retrieve calls parked by stations and by attendants.

Attendant Camp On allows an attendant to extend an incoming call to a busy station. When the busy station becomes idle, it automatically rings and is connected to the waiting call.

Attendant Conference Capability enables an attendant to establish a 6-port conference (not including the attendant).

Attendant Console Screen Management provides management services for the attendant console.

Attendant Control of Call Forward Busy Line and Don't Answer allows an attendant to change station user Call forward Busy and Don't Answer designation number from a remote position.

Attendant Position Busy allows the attendant to make the console unavailable to additional queued calls. The attendant can originate calls and use or program the feature available while the console is in the Position Busy state.

Attendant Recall from Satellite allows line users located at remote Centrex Service locations without attendants to generate a recall of an incoming call back to the main location attendant. /1/

Attendant Recorded Announcement provides callers a recorded announcement when calling the attendant and held in queue longer than the selected delay threshold. /2/

Attendant to UCD Transfer enhances the UCD feature by enabling an attendant to originate or extend calls to UCD directory numbers. /2/

/1/ Material formerly appeared on Original Sheet 70 in this Section.

1. **CENTREX SERVICE (cont'd)** (C)

D. FEATURES (cont'd) (C)

4. **System Features (cont'd)** (C)

Attendant Console (cont'd) /1/

Available Standard features are: (cont'd)

Attendant Transfer enables an attendant to transfer a call to another attendant.

Autodial permits an attendant to dial frequently called numbers by pressing the Autodial feature key, which is programmed with a particular number.

Automatic Recall provides automatic recall timers for unanswered calls, call waiting recalls, and camped-on calls.

Busy Verification of Station/Trunk allows an attendant to determine whether stations or trunks are busy or idle.

Call Hold allows an attendant to manually hold a call on the loop by depressing the hold/release key, or automatically hold the call on the loop by depressing another loop key.

Call Hold with Recall provides automatic recall timers for calls on hold. /1/

Call Park Recall Timer provides a separate timer for calls parked by the attendant. The timer defines the maximum time period that a call can spend in the parking lot. /2/

Call Selection allows an attendant to answer calls as queued or manually select specific call types.

Call Splitting allows the attendant to talk privately to either the calling party or the called party. The attendant can alternate between the parties as required. Either party can be excluded; both cannot be excluded simultaneously.

Call Through Tests allows an attendant to access specific trunks within a Centrex trunk group for testing. /2/

/1/ Material formerly appeared on Original Sheet 71 in this Section.

/2/ Material formerly appeared on Original Sheet 72 in this Section.

1. **CENTREX SERVICE (cont'd)** (C)

D. FEATURES (cont'd)

4. **System Features (cont'd)** (C)

Attendant Console (cont'd)

Available Standard features are: (cont'd) (C)

Console Display Capability allows the attendant to handle calls more efficiently by providing an alphanumeric display, LED indications and multiple line key board. /1/

Console Test allows an attendant or maintenance personnel to test the functional operations of a console.

Control of Trunk Group Access allows the attendant to control access of all stations and incoming trunks to various trunk groups by operating corresponding keys.

Control of Virtual Facilities Groups allows the attendant to control access from all stations and trunks to various trunk groups by operating corresponding keys. /1/

Delayed Operations enables the attendant to place a call for a calling station while the calling station waits on-hook. When the called station answers, the attendant can recall the calling station by depressing the signal source key. On answering, the calling station and the called station are connected. /2/

Direct Trunk Group Selection allows the attendant to select an idle trunk for an outgoing call by pressing a single button on the console.

End to End Signaling allows the attendant console to send Dual Tone Multi Frequency (DTMF) signals.

Emergency Access to Attendant allows a station user to dial an emergency access code to gain immediate access to the attendant. /2/

D. FEATURES (cont'd)

4. **System Features (cont'd)**

Attendant Console (cont'd) (C)

Available Standard features are: (cont'd) (C)

Emergency Override allows an attendant to complete incoming calls to stations that: are busy from activating the make busy key, have a series completion or multi-line hunt arrangement, have call forwarding activated, or have terminating restrictions. /1/

Extended Calls to Busy/No Answer allows extended calls to a station with Call Forwarding Busy and Don't Answer to be forwarded to a predetermined path.

Foreign Exchange (FX) Termination provides the ability to terminate an FX line on a console. /1/

Flexible Console Alerting alerts the attendant to a call requiring attention by an alert tone through the headset instead of the console speaker. /2/

Incoming Call Identification assigns incoming call information in one of four categories:

- Direct Calls
- Directory Assistance Calls
- INWATS Calls
- Precedence Calls

Information/Display Calls in Queue provides the attendant with a visual indication of the number of calls waiting in queue.

Interposition Calling enables an attendant to call and speak to another attendant.

Locked Loop Operation allows the attendant to hold a call on a loop.

Lockout denies an attendant the ability to reenter a call unless the attendant is recalled by a station user or by Automatic Recall. /2/

/3/

/1/ Material formerly appeared on Original Sheet 73 in this Section.

1. CENTREX SERVICE (cont'd)

D. FEATURES (cont'd)

4. System Features (cont'd)

Attendant Console (cont'd)

Available Standard features are: (cont'd)

Message Waiting Control allows the attendant to activate/deactivate message waiting indication for station users. /1/

Multiple Console Operation allows for a multiple number of consoles and loops. /1/

Multiple Listed Directory Numbers allows the customer to have many listed directory numbers. To handle this efficiently, each number has a unique Incoming Call Identification (ICI) lamp so that the attendant can answer appropriately. /2/

Night Service

Fixed permits the forwarding of an incoming call to a predesignated station at night or time when attendant positions are unattended or inoperative. This feature is activated/deactivated by a button on the console.

Flexible uses the Centrex Call Forwarding Variable Feature to activate or cancel night service.

Power Failure Transfer routes calls destined for an attendant to a preassigned directory number during a communications failure or loss of power to the attendant console.

Queuing with Call Waiting Indication permits incoming calls to be held awaiting the availability of an idle line, and to be delivered from the queue on a first in, first out basis. Additionally, on properly equipped customer premises equipment, a visual signal on each attendant position is provided to indicate when calls are waiting to be served.

Release Upon Completion of Dialing allows an attendant to extend a call to a trunk, then release the call after the dialing is completed and before out-pulsing to the trunk is completed. /2/

/1/ Material formerly appeared on Original Sheet 74 in this Section.

/2/ Material formerly appeared on Original Sheet 75 in this Section.

1. CENTREX SERVICE (cont'd)

D. FEATURES (cont'd)

4. System Features (cont'd)

Attendant Console (cont'd)

/1/

Available Standard features are: (cont'd)

Secrecy allows the attendant to talk to a called party (destination) without the calling party (source) hearing the conversation. When the Attendant releases from the call, the source and the destination are connected.

Serial Calling allows an attendant to extend a call to more than one station.

Speed Calling allows an attendant to dial frequently dialed numbers by depressing a speed calling key and dialing one or two digits. The frequently dialed number may be a directory number, authorization code, account code or access code.

Straightforward Outward Completion allows an attendant to extend a call outside the customer group while the station user may remain off-hook.

Supervisory Console allows an attendant to call a supervisor for assistance and to extend a call to a supervisor for subsequent call handling. It also allows the supervisor to monitor the progress of an attendant and to give assistance while the attendant is handling a call.

Switched Loop Operation (virtual loop concept) trunks and lines do not have direct termination on the consoles.

/1/

Through Dialing allows the attendant to select the trunk facility for a station in the same customer group and send dial tone to the station user. The station user then dials the called number. This feature provides an override of station restrictions in the same customer group.

/2/

Time of Day and Date provides a display of the time of day and date.

/2/

/1/ Material formerly appeared on Original Sheet 76 in this Section.

/2/ Material formerly appeared on 1st Revised Sheet 77 in this Section.

1. CENTREX SERVICE (cont'd)**D. FEATURES (cont'd)****4. System Features (cont'd)****Attendant Console** (cont'd)

Available Standard features are: (cont'd)

Timed Reminder provides a timer whose length is specified by the customer. The timer is started when a call is camped-on a busy station. When the called party has not answered, or when a call is on hold, and the timer expires, the attendant is recalled and can pick up the call to talk to the calling party.

Toll Diversion to Attendant reroutes toll calls, which are attempted by toll restricted stations, to the attendant for assistance.

Trunk Busy Identification provides a display of the trunk group status on the attendant console. The lamp state is:

- off, when one or more trunks in the group is idle,
- on, when all trunks in the group are busy.

Trunk Group Busy/Access Control Key provides special keys to serve as a common interface for Trunk Group Busy and Trunk Group Access Control for all trunk groups allocated to the customer group.

Trunk Group Identification/Indicators provides a display of the trunk group and member number of the incoming or outgoing trunk in use either at the request of the attendant or automatically on incoming trunk calls.

UCD from Queue provides for a uniform distribution of calls from the attendant queue to a group of attendant positions.

Verification of Authorization Codes allows customer group attendants to validate authorization codes.

Wild Card Key enables the attendant to invoke special features not directly available through a feature key on the console. Any special feature normally available through the use of a feature key may be invoked through the Wild Card Key, with the exception of intercom caller identification.

800 Termination provides capability of terminating an 800 service call into a UCD group or on a compatible console.

D. FEATURES (cont'd)

4. **System Features (cont'd)**

Attendant Console (cont'd)

Available Standard features are: (cont'd)

Attendant Conference (30 Port) enables the attendant to establish a 30 port conference (not including the attendant).

Direct Station Selection and Busy Lamp Field allows the attendant to monitor, via a busy lamp field, the status of directory numbers that appear in the group. It will also provide direct dialing to a monitored station by depressing a key.

Multi Position Hunt (MPH) distributes calls over a group of up to 16 line-loop attendant positions each of which can handle up to six types of calls. Incoming calls are rerouted only to idle positions with a loop for that type of call. Only Multi Line Hunt Group (MLHG) lines can be used with the MPH features.

Authorization Codes

An arrangement used to identify callers for billing purposes to assign network class of service and to control network access. Available for both voice and data in initial 100 count. Additional codes are available in counts of 25.

Station Specific Codes is an arrangement that allows up to ten Authorization Codes to be assigned for use on a specific line.

Automatic Call Distribution Basic (ACD)

Allows a large volume of incoming calls to a business to be distributed among a group of available agent positions.

Automatic Route Selection-Basic

Allows for the completion of calls to a public network telephone number by automatically scanning the digits and selecting a first choice completion route when available, or a subsequent route if the first choice route is not available. Routes may include Foreign Exchange lines, WATS lines, Carrier access lines, the DDD network, or other compatible arrangements. The final completion route may be the public network.

Automatic Route Selection-Basic (cont'd)

It is the responsibility of the customer to notify the Company regarding updates to the customer's ARS patterns whether caused by changes in the customer's private network or the public switched network.

/1/
|
/1/

Automatic Route Selection-Deluxe

Allows for the completion of calls to a public network telephone number by automatically scanning the digits and selecting a first choice completion route when available, or a subsequent route if the first choice route is not available. Routes may include Foreign Exchange lines, WATS lines, Carrier access lines, the DDD network, the IDDD network, or other compatible arrangements.

/2/

It is the responsibility of the customer to notify the Company regarding updates to the customer's ARS patterns whether caused by changes in the customer's private network or the public switched network.

The final completion route may be the public network, or at the direction of the customer, the call attempt can be routed to Expensive Route Warning Tone.

Facility Restriction Levels (FRL) are required with ARS-D and are required on each Centrex line and incoming tie line to determine both the type of call and type of facility within the privileges of the associated user.

Authorization codes are required to allow a station user to dial a code to override the restriction level associated with the dialing Centrex line or tie line. The Centrex requests the Authorization code when the default FRL has insufficient privileges to complete the call. The Authorization code is also inspected for validity as a security check.

/2/

D. FEATURES (cont'd)

4. **System Features (cont'd)**

/1/

Automatic Route Selection-Deluxe (cont'd)

Time of Day routing, an option, permits the pre-programming selection of alternate routing pattern groups for off-network calls on a time of day and day of the week basis.

/2/

Automatic Alternate Routing for tie lines provides automatic routing of calls to alternate tie line routes when the primary tie line route is in use.

Automatic Overflow to DDD provides completion of on-network calls via the toll network when all primary and alternate tie line routes are busy.

Deluxe queuing permits station users to be placed in a queue whenever all facilities in the first choice route in a pattern for completing a particular call are already in use.

ARS-Deluxe can be optionally equipped to scan up to 10 digits or provide IDD Dialing.

/2/

Call Detail Recording Service (CDRS)

Provides customers with Centrex customers network calling information that is generated at the central office and saved on a central storage medium for retrieval by the customer. An identifier is included which indicates the number of attempted and completed calls. An alternative access arrangement utilizing File Transfer Protocol (FTP) may be used.

(C)

/2/ Material formerly appeared on Original Sheet 82 in this Section.

1. **CENTREX SERVICE (cont'd)** (C)

D. FEATURES (cont'd)

4. **System Features (cont'd)**

Call Forwarding Multi Path

Provides for the simultaneous forwarding of multiple incoming calls to a predesignated telephone number. Adequate facilities are required for their termination. One such Multi Path feature is required for each type of call forwarding feature such as Variable, Busy, Don't Answer, and each line with which it is associated. Availability is limited to an intraoffice basis except where inter-office forwarding is available and facilities permit.

/1/
|
/1/

Centrex Mate

The Centrex Mate feature is provided as a standard feature for customers selecting a 7-line category or higher and as an optional feature for customers selecting less than a 7-line category. The Centrex Mate feature allows a Centrex customer to make changes in the station line and/or feature configuration of the Centrex System as an alternative to the standard Company service order process. Centrex Mate allows the customer to manage feature assignments per line, exchange station numbers between like station lines, verify the assignment of features on an individual station line or bulk basis, sort for stations that have particular features, and to obtain internal directory information for stations in the Centrex Mate database. Centrex Mate is offered subject to availability of facilities and compatibility of the serving central office.

(C)
(C)
(C)

The customer is responsible for any charges incurred to access the Centrex Mate system.

Centrex Mate customers may elect to continue to use standard service order procedures at any time and the service will be implemented by the Company at the prevailing charges and service intervals as specified elsewhere.

Customers may elect to have a third party other than the customer implement and manage its system for them. If this option is elected, the customer assumes responsibility for all changes executed by its authorized agent.

/1/ Material formerly appeared on Original Sheet 82 in this Section.

1. CENTREX SERVICE (cont'd) (C)**D. FEATURES (cont'd)****4. System Features (cont'd)****Centrex Mate** (cont'd) (C)

The Company reserves the right to withhold the service if it is determined to be incompatible with existing Switching Systems. Also, some functions of the central office switching system will have priority over execution of customer change requests. The Company assumes no responsibility for change requests delayed by priority central office functions.

Not all features and capabilities are included in Centrex Mate. A service order will be required to rearrange some items. These include but are not limited to:

- swaps of off-premises lines in different wire centers;
- lines not included in Centrex Mate such as attendant lines, multi-line hunt lines, and lines with special equipment.

Responsibility of the Company

The Company will provide training to these customers who elect to utilize Centrex Mate themselves and decline to elect an authorized agent. Training will be provided by the Company at the time Centrex Mate is activated without charge. Subsequent training can be provided for the customer at an additional charge as specified elsewhere in this offering.

The Company will provide the customer or the designated authorized agent with the security password access codes for the customer's Centrex Mate System.

1. CENTREX SERVICE (cont'd) (C)**D. FEATURES (cont'd)****4. System Features (cont'd)****Centrex Mate** (cont'd) (C)**Responsibility of the Customer**

The customer is responsible for the administration and protection of the Centrex Mate password and access code and will be responsible for any charges arising out of unauthorized use of the password. Customers electing to use an authorized agent to administer and manage their Centrex System shall be responsible for that agent's use and protection of the password and access codes.

The customer will designate at the time of installation whether it will manage its Centrex Mate system itself or through an authorized agent. If the authorized agent is selected, the customer will provide the Company with a signed and dated letter authorizing the agent to manage the Centrex Mate system on its behalf. The customer accepts responsibility for all changes made on its behalf by its agent. (C)
(C)

Centrex Message Signal Interface (CMSI) (C)

Provides for the transmission at 1200 and 9600 baud rates of certain called number and other identification information via a data link connecting the CMSI input/output port located in the Company central office to Customer Provided Equipment. (C)

1. CENTREX SERVICE (cont'd) (C)**D. FEATURES (cont'd)****4. System Features (cont'd)****Centrex Message Signal Interface (CMSI)** (cont'd)

CMSI service consists of three features: Call History Package Delivery, Remote Activation of Message Waiting Indicator and Message Waiting Indication.

(C)
(C)

Call History Package Delivery provides detailed information of calls forwarded from Centrex lines via a Centrex multi-line hunt group and associated data link from the Company's central office to the customer provided Message System Interface.

Remote Activation of Message Waiting Indicator allows the Centrex customer to activate/deactivate an audible message waiting tone on Centrex lines or a visual LED indication on electronic business sets.

Message Waiting Indication Audible provides an audible tone signal on a Centrex line or, where technology permits, a visual LED indication on an electronic business set. The Message Waiting Indication Audible feature is provided as part of the Centrex Basic Line on a per line basis.

1. CENTREX SERVICE (cont'd) (C)**D. FEATURES (cont'd)** (C)**4. System Features (cont'd)****Centrex Message Signal Interface-Expanded (CMSI-E)** (C)

Centrex Message Signal Interface-Expanded (CMSI-E) is a Centrex feature designed to link a Centrex customer's premise equipment (CPE) to the Company's central office in order to pass signaling and message detail information. This service will allow a customer with operations located in multiple Central Office locations, operations located in multiple Central Office locations and an alternate Carrier's service, or operations located in a single Central Office and an alternate Carrier's service in the same LATA to use a single data (CMSI-E) link. (C)

This service is available at both a low speed (1200 baud) and a high speed (9600 baud).

CMSI-E service consists of three features: Call History Package Delivery, Remote Activation of Message Waiting Indicator and Message Waiting Indication. (C)

Call History Package Delivery provides detailed information of calls forwarded from Centrex lines via a Centrex multi-line hunt group and associated data link from the Company's central office to the customer provided Message System Interface.

Remote Activation of Message Waiting Indicator has two options.

Remote Activation of Message Waiting Indicator:

- allows the Centrex customer to activate/deactivate an audible message waiting tone on Centrex lines or a visual LED indication on electronic business sets.

Remote Activation of Message Waiting Indicator-Alternate Network Delivery:

- allows the Centrex customer to activate/deactivate an audible message waiting tone on Centrex lines or a visual LED indication on electronic business sets, and
- send MWI messages to one pre-defined SS7 Point Code of its suitably equipped alternate network provider. The alternate network telephone numbers must be in the same LATA as the customer's ACMSI-E link.

The Remote Activation of Message Waiting Indicator-Alternate Network Delivery option is limited to customers with operations in five or less Central Office locations in the LATA.

1. CENTREX SERVICE (cont'd) (C)**D. FEATURES (cont'd)****4. System Features (cont'd)****Centrex Message Signal Interface-Expanded (CMSI-E) (cont'd)** (C)

Message Waiting Indication Audible provides an audible tone signal on a Centrex line or, where technology permits, a visual LED indication on an electronic business set. The Message Waiting Indication Audible feature is provided as part of the Centrex Basic Line on a per line basis.

The following terms and conditions apply for CMSI-E: (C)

- CMSI-E may be provided only from Central Offices equipped for this service, subject to the technical limitations and availability of equipment and facilities. (C)
- A modem is required in the central office and a compatible modem is required at the customer's premises.
- Multi-line hunt groups will be required at the host Central Office only.
- All customer locations linked by the CMSI-E link must be located in the same LATA. (C)
- A System Feature Change Charge applies for customer requested changes (e.g., Remote Activation of Message Waiting Indicator to Remote Activation of Message Waiting Indicator-Alternate Network Delivery) to the feature.

If a customer upgrades from CMSI to CMSI-E or from 1200 to 9600 baud, only the incremental difference in nonrecurring charges will be charged. (C)

1. CENTREX SERVICE (cont'd)**D. FEATURES (cont'd)****4. System Features (cont'd)****Centrex Network Manager^{/1/}**

(C)

Centrex Network Manager is an integrated platform which provides customer access to the central office to obtain specific data and make changes in the switch. The platform provides the vehicle to deliver the services listed below. The platform allows customers to obtain call information, operational measurements and Map Pass Thru access across the network provided by the Company. CNM data is not indicative of billing data.

An alternative access arrangement utilizing File Transfer Protocol (FTP) may be used. This option is referred to as Virtual Access.

Centrex Network Manager is only available where facilities permit and Central Office capacity exists. The following capabilities are available with Centrex Network Manager:

Map Pass Thru provides the customer with access to the service order portion of the DMS 100 Servord. The customer may use this access to make changes to their existing Centrex stations using the DMS 100 Servord language. The customer can add, change and delete standard Centrex Service features. The changes take effect immediately.

Optional features for Map Pass Thru include:

- a database of centrex stations which can be used for generating presubscribed reports or ad hoc reports using Standard Query Language (SQL).

/1/ Effective January 30, 2009, Centrex Network Manager is no longer available for new installations. Existing customers may keep current arrangements in place until they move, but may not add any additional capabilities or features with Centrex Network Manager.

(N)
|
(N)

1. CENTREX SERVICE (cont'd)**D. FEATURES (cont'd)****4. System Features (cont'd)****Centrex Network Manager (cont'd)**^{1/}

(C)

Operational Measurements provide reports that give customers the peg count and usage information for Trunk groups, Peak Trunk Groups, Virtual Facility Groups, Peak Virtual Facility Groups, Customer Group Usage, Subgroup and Attendant Console, Off Hook Call Back Queuing, Call Park and Integrated Business Network (IBN) Calls. The customer is provided with information (such as total call attempts, total failures and duration) that can be used to size and monitor their Centrex operation. The reports may be browsed on-line or spooled to a printer on demand or on a scheduled basis. The report information is stored for 7 calendar days after which time the data is overwritten. The number of concurrent Subscriber Line Usage Reports (SLU Reports) is limited based on switch capacity.

Optional features for Operational Measurements include:

- Subscriber Line Usage Reports provides information on an individual station
- Killer Trunk Reports provide the customer with a tool for analysis of their private network. The information flags potential calling failures that the customer's end users may be experiencing

/1/ Effective January 30, 2009, Centrex Network Manager is no longer available for new installations. Existing customers may keep current arrangements in place until they move, but may not add any additional capabilities or features with Centrex Network Manager. (N)
|
(N)

1. CENTREX SERVICE (cont'd)**D. FEATURES (cont'd)****4. System Features (cont'd)****Centrex Network Manager (cont'd)**^{1/}

(C)

SMDR-Premium provides information on calls originating from Centrex Service lines. The calling information, generated at the central office, is provided in a data stream format and is delivered to the customer's premise via a dedicated leased line or a dial up connection to the customer provided equipment. Customers can make their own requests for resending data. The calling information is not rated. The calling information is stored for 10 calendar days after which time the data is overwritten.

Optional features for SMDR-Premium include:

- The Company resending data for customers
- 30 or 45 days of storage
- Centrex Station-to-Station call information
- Centrex Group Intercom call information

Centrex Routed Number

This feature routes calls to a Centrex System telephone number to an answering point at the customer location. Centrex Routed Number includes the Centrex telephone number and the routing facility. Calls must be routed within the customer's common block.

Centrex Station Identification (CSI)

Provides the automatic transmission of a ten digit number and information digits to the customer's tie trunk for calls originating in the Centrex system, to identify the calling Centrex station for purposes of billing administration within a private network. The feature is a central office software function which is associated on a call-by-call basis with all individual transmission paths connected to a trunk group provisioned with CSI. CSI may be provided subject to the availability of facilities and the compatibility of serving central office technology. The ten digit CSI telephone number, consisting of the NPA plus the seven digit CSI telephone number, will be transmitted on all calls except those identified a CSI failure, in which case only the NPA will be transmitted. The CSI telephone is the telephone number of the calling station and is not the listed telephone number of the customer.

/1/ Effective January 30, 2009, Centrex Network Manager is no longer available for new installations. Existing customers may keep current arrangements in place until they move, but may not add any additional capabilities or features with Centrex Network Manager.

1. CENTREX SERVICE (cont'd) (C)**D. FEATURES (cont'd)****4. System Features (cont'd)****Centrex Virtual Network (CVN)**

Centrex Virtual Network (CVN) extends intercom calling geographically within a LATA, providing virtual connectivity among all types of Centrex lines using the public network. (C)
(C)

All lines in the Centrex system and at each premises location must be included in a customer's CVN. Multiple customers sharing Centrex Common Blocks cannot be part of an CVN. A minimum of 50 lines is required to establish CVN except with OmniPresence. CVN applies to only Company-provided Centrex lines using the Company as their intraLATA usage provider. Systems exceeding 25,000 lines may require special construction charges except with OmniPresence. See the OmniPresence description elsewhere in this offering for exceptions to the above. (C)
(C)

All lines in the network must terminate at an authorized premises location of the Customer of Record. Authorized locations include branches, factories, plants, etc., of the Customer of Record, or a subsidiary of the Customer of Record. A network may not be shared among unaffiliated end users.

CVN requires a measurement of the customer's usage busy hour represented by CCS value. A CCS is defined as a measure of traffic usage expressed in Hundred Call Second Increments (where the Roman numeral C represents one hundred). One call which lasts 100 seconds constitutes one CCS. There are 36 CCS in one hour. (C)

When CVN is provided through resale, all lines in each CVN network must terminate at an authorized premises location of the same end user customer of the reseller. All other terms and conditions as stated above including the requirement of a minimum of 50 lines per end user customer apply. (C)

1. CENTREX SERVICE (cont'd) (C)**D. FEATURES (cont'd)****4. System Features (cont'd)****Centrex Virtual Network (CVN)** (cont'd) (C)**OmniPresence CVN** (C)

OmniPresence CVN provides a virtual local presence from multiple remote Centrex locations to a hub location of the same end user customer of record. OmniPresence is a Centrex Virtual Network (CVN) feature and CVN service parameters apply. The customer must subscribe to both Remote OmniPresence and Hub OmniPresence. (C)

The OmniPresence network requires a minimum of 26 lines/channels. All remote location lines/channels in the OmniPresence network are OmniPresence Centrex Basic lines or OmniPresence Centrex National ISDN lines with a Circuit Switched Data "B" channel.

Circuit Switched Data Service standard capabilities: Call Diverting, Hunt Group for Shared Data Access, Intercom Calling, and Speed Calling - Short are not available when used with OmniPresence CVN. The Centrex line feature Call Forwarding - Busy is provided as a standard Circuit Switched Data Service capability when used with OmniPresence CVN. (C)

Each remote location requires a dedicated Centrex System and the Centrex system feature, Call Forwarding MultiPath. (C)

Centrex Mate is not available on OmniPresence Lines.

Digital Transport Service and/or ISDN Prime Service are/is required at the hub location to provide termination of calls to the customer premises. (C)

1. **CENTREX SERVICE (cont'd)** (C)

D. FEATURES (cont'd)

4. **System Features (cont'd)**

Centrex Virtual Network (CVN) (cont'd) (C)

OmniPresence CVN (cont'd) (C)

OmniPresence service must terminate on Customer Premises Equipment in the LATA where Centrex OmniPresence service is provided. Additional lines/channels at the OmniPresence hub location are not required to be a part of a customer's OmniPresence CVN. (C)

Networks exceeding 2,000 lines/channels may require special construction charges.

Regional CVN (RCVN) (C)

Regional CVN is a regional virtual network service for on-net calling using abbreviated/customized dialing. It interconnects a maximum of five (5) CVNs in multiple LATAs within the Midwest region. RCVN requires private facility terminations into the hub Centrex. Private facilities (provided by an interexchange carrier (IXC)) facilitate transport of calls interLATA. All intraLATA transport is virtual and is carried by the Company. All CVN parameters apply for Regional CVN. (C)

Virtual Route Selection (VRS)

Virtual Route Selection is a Centrex Virtual Network (CVN) option that provides multi-location customers the means to redirect all their direct dialed interLATA off-net and out-of-network calling to a single or multiple location(s). (C)

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**4. System Features (cont'd)****Conference Services**

A Six Port Conference circuit allows attendants and station users to establish conference calls beyond the standard Three Way Calling feature up to six conferees.

A Six Port conference circuit may be expanded to accommodate up to 30 conferees by adding Conference Linking arrangements. One Conference Linking arrangement provides four additional ports.

Meet Me conferencing allows station users to hold a conference by dialing a directory number associated with a specific conference bridge at a predetermined time.

Station Controlled allows a station user to establish a conference without attendant assistance by dialing a conference access code.

Privacy Release Conference Control

Provides conference circuits designated for the exclusive use of MADNs and allows them to use three port as well as six port conference circuits.

Preset Conference

Allows a Centrex station line, trunk, or attendant console, to establish a conference call with a maximum of 25 conferees by dialing a specific directory number. The dialing of the DN invokes simultaneous ringing of the preselected conferees. The conferees are specified and notified in advance.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**4. System Features (cont'd)****Customized Call Diverting**

Enables the customer to block or allow one or more NPA and/or NXX numbers when these numbers are dialed by selected stations within the customer group.

Dial Plan for Advanced Solutions(DPAS)

Converts an abbreviated number to the 10-digit telephone number used for direct calls. DPAS allows a Centrex customer to use an abbreviated dialing plan for intraLATA calls:

- between Centrex systems' stations ("in-network"); and/or,
- from a Centrex station to an out-of-network number.

In-network numbers can be dialed and can dial back on an abbreviated basis. DPAS customers can dial out-of-network numbers on an abbreviated basis; however, the DPAS feature itself does not provide a means for an out-of-network number to dial back on an abbreviated basis. The total number of out-of-network numbers cannot exceed the sum of the number of Centrex stations in use when the DPAS feature was established plus the number of Centrex stations added to the system(s) at a later date. All stations in a Centrex System Dialing Plan must be equipped with the DPAS feature but not all Dialing Plans must be equipped with the DPAS feature. All in-network and out-of-network numbers must be assigned to the Customer of Record or a subsidiary of the Customer of Record.

Two dialing plan formats are available: Extension Dialing and Location Dialing.

The Extension Dialing Plan uses sequential digits from the seven digit telephone number (the "extension number") to identify an in-network or out-of-network number. Typically, the extension number is the last four digits of the telephone number. Each extension number in the dialing plan must be unique.

The Location Code Dialing Plan uses a leading digit (the "location code") plus an extension number to identify an in-network or out-of-network number. Location code(s) permit duplication of extension numbers.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**4. System Features (cont'd)****Dial Plan for Advanced Solutions(DPAS)(cont'd)**

The customer can choose between two DPAS billing alternatives, the Basic Dial Plan option or the Deluxe Dial Plan option. Customers who choose the Basic Dial Plan option will be assessed normal usage charges for both in-network (inter-Centrex) and out-of-network messages. Customers who choose the Deluxe Dial Plan option will be charged a flat rate for both in-network (inter-Centrex) messages and out-of-network messages completed to telephone numbers in the same Rate Center as the originating Centrex telephone number. If a Deluxe DPAS customer calls an out-of-network telephone number in a Rate Center that is different from that of the originating Centrex telephone number, the Company will assess normal usage charges.

The Company will charge a DPAS Change Charge for modifications to the customer's DPAS feature. Neither a DPAS Change Charge nor a Service Order Charge will apply for changing an in-network number to an out-of-network number.

DPAS is only available where equipment, features, and facilities are available. DPAS may conflict with the following Centrex features: Automatic Callback, Automatic Recall, Repeat Dialing, Account Codes, Attendant Consoles, and ISDN Data Calls. Other restrictions and limitations may apply. No charges will apply for removing incompatible Centrex features.

Do Not Disturb

An arrangement that intercepts incoming calls to a Centrex line(s) during specified periods of time when a station user(s) does not want to be disturbed. This arrangement can be provisioned for individual lines or groups of lines. This feature may be activated/deactivated via a key by the attendant or a designated station user.

D. FEATURES (cont'd)

(D)

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**4. System Features (cont'd)****High Speed Data Service**

An arrangement that provides digital, full-duplex synchronous data transmission within a Centrex Service System, at speeds of 1.2 Kbps to 56 Kbps and asynchronous data transmission at speeds of 100 bps to 19.2 Kbps over a standard twisted pair loop. High Speed Data Service requires appropriately equipped Customer Provided Equipment.

High Speed Data Service may be used to access Public Switched Digital Services.

Music On Hold Interface

An arrangement that allows access to Customer Provided Equipment that provides a continuous broadcast of music when a caller is placed on hold. Customer Premises Announcements are required per unique music source.

Network Speed Calling

Allows up to 1000 numbers per system to be accessed via individual lists of up to 100 numbers each.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**4. System Features (cont'd)****Number Retention Service (NRS)**

Allows calls placed to telephone numbers equipped with NRS to be automatically forwarded to a dialable telephone number served by the same central office switch or by a different central office switch located in the same central office area building serving the same exchange. The calling party pays only the applicable charges to call the number equipped with an NRS feature.

Each NRS feature allows simultaneous forwarding of up to a maximum of twelve (12) calls or an unlimited call path threshold with a 1,000 message cap per NRS line. Messages exceeding the cap per line will be billed at the local usage rate.

The customer of record must subscribe to sufficient facilities at the terminating station to adequately handle calls without impairing, disrupting, or deteriorating services offered by the Company.

D. FEATURES (cont'd)

4. System Features (cont'd)

Private Facility Access Termination**Line Side Access Connections**

Code Call Access permits station users and attendants to dial an access code and a called party code to activate customer provided audible and visible signaling devices.

Dial Dictation Access provides station users access to customer provided dictation recording equipment by dialing an access code.

Loudspeaker Paging Access allows stations and attendants to access customer provided loudspeaker paging equipment located on the customer's premises by dialing an access code.

Radio Paging Access allows stations and attendants to access customer provided and radio paging equipment located on the customer's premises by dialing a Centrex station number.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**4. System Features (cont'd)****Private Facility Access Termination (cont'd)****Trunk Side Access Connections**

The following trunk side access connections are available in either analog or digital format as outlined below.

Advanced Private Line Access connects tie lines, private line facilities and access lines from switched private line services to Centrex dial switching equipment. It may also be used when compatible with and required for termination of facilities by Other Common Carriers (OCC's).

Radio Paging Access provides station users and attendants the capability to access customer provided and radio paging equipment located on the customer's premises via an access code.

Tandem Tie Line Access allows tandem connection of special service circuits dedicated to a customer group.

Tie Line Access allows connection of special service circuits dedicated to a customer group.

DS1 Connection is a termination used to connect dial type tie lines or Other Common Carrier (OCC) private communication services to a Centrex System. The termination can accommodate twenty-four channels, each dedicated to a specific service.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**4. System Features (cont'd)****Private Facility Access Termination (cont'd)****Trunk Side Access Connections (cont'd)**

PRI Connection is an ISDN Primary Rate 1.544 Mbps termination between two (2) central offices. It is used to connect tie lines, private switched network access lines, and Inter Exchange Carrier (IXC) private communication services to a Centrex system. The termination can accommodate twenty-three 64 Kbps "B" channels for circuit switching and one 64 Kbps "D" channel (23B+D) or twenty-four 64 Kbps "B" channel where "D" channels can be shared by several terminations. (C)

Optional Features:

Channel Backup Arrangement provides backup for primary "D" channel under those circumstances where three or more PRI Connections share a single "D" channel. A predetermined channel on another PRI Connection would automatically take over call control and signaling functions.

Network Ring Again allows a station user that places a call over the PRI Connection to a busy station line at a distant PRI terminating location to be connected to the called station line without redialing when both the called and calling station lines become available.

Network Name Display allows a station user that places a call over the PRI Connection to a station line at a distant PRI terminating location to view the caller's name on a properly equipped customer provided set.

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**4. System Features (cont'd)****Private Facility Access Termination (cont'd)****Other Private Facility Access Connections**

Foreign Exchange/Feature Group A (FX)/FGA provides access to/from an FX/FGA line. Station users have the ability to transfer a foreign exchange call.

OUTWATS Access allows a station user access to OUTWATS services dedicated to a customer group by dialing an access code.

Queue Slots

Queue slots are dedicated time slots in the central office, used to hold calls in a delayed state until a call can be further processed. A queue slot is required for each call to be held in queue. Calls in Queue may be provided a recorded announcement or music.

1. CENTREX SERVICE (cont'd)

4. System Features (cont'd)

(D)

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**4. System Features (cont'd)****Station Message Detail Recording - Central Office (SMDR-CO)^{/1/}**

Provides Centrex customers with network calling information that is processed by the Company billing system which is then delivered to the customer's location via magnetic tape media. The information that is generated by the Company billing system can be rated or non-rated call information from the prior billing period. Terminations are required for Tie lines, FX lines, WATS and Toll lines to secure billing information.

Station Message Detail Recording Service - Premises (SMDR-P)^{/1/}

Provides information on calls originating from Centrex Service lines to locations outside of the Centrex Service system. The calling information, generated at the Company's central office, is provided in a data stream format and is delivered to the customer's premises via a data link that is connected to Customer Provided Equipment. The calling information is not rated.

Trunk Verification from Designated Station

An arrangement that provides audible transmission level testing for originating and terminating trunk groups or a trunk within a trunk group for trunks associated with a Centrex system by a designated station user(s).

/1/ Effective December 18, 1998, this feature is no longer available to new *Centrex Service* customers or to existing customers expanding their current systems.

(C)

1. CENTREX SERVICE (cont'd)

(C)

D. FEATURES (cont'd)**4. System Features (cont'd)****Uniform Call Distribution (UCD)**

Provides for the even distribution of incoming calls to all groups of lines arranged in a special hunting arrangement. Queuing may be provided with the addition of queue slots. The UCD capability may be provided with Electronic Key Line Service.

Virtual Routing

Provides routing and call completion over 24 software defined access paths (virtual/simulated facility group) for ValueLink Premiere intraLATA toll service.

(C)

1. CENTREX SERVICE (cont'd)

(C)

E. TECHNICAL REFERENCES

Customer Provided Equipment (CPE) compatibility requirements are listed in Company Technical References. All Customer Provided Equipment used to interface with Centrex Service is required to conform with the Technical Reference Specifications as used by the Company and found in the following Technical references:

Subject	Technical Reference
Caller ID – Display	AM-TR-TSY-000030 AM-TR-TSY-000031

(C)
(C)

1. CENTREX SERVICE (cont'd) (C)**F. PRICES**

The following prices are applicable to standard installations of Centrex Service and are in addition to all other charges for associated services and equipment necessary to provide telecommunications service. (C)

The total charge per Primary Station is the sum of the appropriate Network Access and Intercommunication charges (Basic lines, Electronic Key lines, ISDN Custom and National lines.)

When the customer's premises and the central office providing Centrex Service are located in different Service Areas, Base Rate, DS1 or DS3 Service charges will apply. (See Other Applicable Charges). Customers provided this service arrangement will require Channel Mileage (CM) and Channel Mileage Terminations (CMT) for each Centrex line. For ISDN Centrex lines having this service arrangement, three Channel Mileage (CM) and six Channel Mileage Terminations (CMT) are applicable when using Ameritech Base Rate. (C)

Refer to the Other Applicable Charges section for additional charges associated with the provision of Centrex Service. (C)

System Charge (C)

The System Charge is applicable to the establishment of any new Centrex system and to any relocation of an entire Centrex system, unless the customer's relocation is within the serving central office boundary. The System Charge will be determined at time of installation based on the total number of equipped telephone numbers. A System Charge applies to each Centrex Service arrangement or common block. (C)

1. CENTREX SERVICE (cont'd)

(C)

F. PRICES**System Conversion Charges**

When a carrier converts existing service as a billing conversion only, service remains configured exactly as it currently exists, with no additional features (Centrex Mate is not provided). The following charges apply:

- Service Order Charge
- Recurring System Charge

When a carrier converts service, adding new features, and the carrier programs the new line features with Centrex Mate. The following charges apply:

- Service Order Charge
- Nonrecurring System Conversion Charge
- Recurring System Charge

When the carrier converts service, adding new features, and the Company programs the new line features. The following charges apply:

- Service Order Charge
- Nonrecurring System Conversion Charge
- Recurring System Charge
- Appropriate Line Programming Charge

Effective September 1, 2013, the 60-month TPP term period is no longer available for new installations or renewals of Centrex Service. Centrex customers currently on a 60 month or 84-month TPP term period may continue service at their existing TPP rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service at the then-current month-to-month rates. If the customer does not request discontinuance of the service, the month-to-month rates in effect at such time will automatically apply month-to-month rates in effect at such time will automatically apply.

Centrex Virtual Network (CVN)

The following equation based on CCS and distance is used to determine the applicable monthly charge. The number of remote lines located 0 to 15 miles and 15 or more miles from the Hub location are used in the equation.

$$(\text{Total remote lines within 0 to 15 miles})(\$CCS)/(\text{Total remote lines in Network}) + (\text{Total remote lines beyond 15 miles})(\$CCS)/(\text{Total remote lines in Network}) + \$1.00 = \text{Price per line per month (Rounded to the nearest multiple of $.05)}$$

CCS Values

CCS	0-15 Miles	15+Miles
Max. 2.5	/X 16KFX/ \$2.20	/X 16KFX/ \$ 5.40
Max. 3.5	/X 16KFX/ 3.30	/X 16KFX/ 8.10
Max. 4.5	/X 16KFX/ 4.40	/X 16KFX/ 10.80
Max. 5.5	/X 16KFX/ 5.50	/X 16KFX/ 13.50
Max. 8.0	/X 16KFX/ 7.70	/X 16KFX/ 18.90

The Company reserves the right to reassess the pricing of the customer's network if the negotiated CCS is exceeded.

Nonrecurring Charges and charges/prices for optional Out Of Network Numbers are found under the Area Wide Networking feature described elsewhere in this offering.

/1/ Effective December 31, 2011, the 84 month Term Payment Plan (TPP) term period is no longer available for new installations or renewals of Centrex Service. Centrex Virtual Network (CVN) (cont'd) (C)

Virtual Route Selection

The following prices for Virtual Route Selection are in addition to charges for CVN. (C)

The following equation based on CCS and distance is used to determine the applicable monthly price. The number of remote lines located 0 to 15 miles and 15 or more miles from the hub are used. The price per remote line is applied to each remote line in the network.

$$\begin{aligned}
 & (\text{Total remote lines within 0-15 miles}) (\$CCS) / (\text{Total remote lines in the Network}) \\
 + & (\text{Total remote lines within 15+ miles}) (\$CCS) / (\text{Total remote lines in the Network}) \\
 + & \$1.50 \\
 = & \text{Price per remote line per month (Rounded to the nearest multiple of $.05) /16KFX/}
 \end{aligned}$$

CCS Values

CCS	0-15 Miles	15+Miles
Max. 2.5	\$3.50	\$ 7.00
Max. 3.5	4.50	9.00
Max. 4.5	5.50	12.00
Max. 5.5	6.50	15.00
Max. 8.0	8.50	20.00

The Company reserves the right to reassess the pricing of the customer's network if the negotiated CCS is exceeded. (C)

Nonrecurring Charges and charges/prices for optional *Out Of Network Numbers* are found under the Area Wide Networking feature described elsewhere in this offering.

Regional CVN (RCVN)

The following equation is used to determine the monthly price:

$$\text{RCVN}^{1/}, \text{ per line} = (1.5) * (\text{weighted average price of CVNs in customer's network}) \quad (C)$$

/1/ Use a factor of 1.2 if customer subscribes to VRS. The price for VRS is in addition to the price for RCVN. All remote locations must have VRS for the 1.2 factor to apply.

Network Access

See Part 5 Section 1 for terms and conditions, except for OPTI-Centrex lines Basic and OmniPresence applications. OmniPresence applications do not use Network Access. (C)

OPTI-Centrex lines require Company Transport facilities and central office multiplexing as specified in Part 15, Section 3 of this Guidebook.

OPTI-Centrex lines must terminate at a customer premises within the serving wire center boundaries.

End User Common Line (EUCL)

See terms and conditions Part 5, Section 1. For Centrex OPTI-Centrex lines see Ameritech Operating Companies Access Service Tariff F.C.C. No. 2, Section 4.1.7. (C)

Usage

Centrex may be provided where facilities permit, including exchanges that have only flat rate business capability. However, in all cases the measured business message unit rate specified in Part 4, Section 2 is applicable for each call within the local calling area of the system, excluding intra system calls between affiliated end users and calls from dormitory station lines. /1/ | /1/

3. Payment Plans

- **Month to Month**

The minimum period is one month, unless otherwise specified.

- **Term Payment Plans**

The Contract Plan is a payment plan that allows customers to pay a fixed price for equipment and service over optional payment periods (terms). A different monthly price applies for the duration of each payment period. The monthly price varies inversely with the length of the payment period, e.g., the monthly price for a shorter period is greater than that for a longer period.

Contract Plans are available for payment periods of 12 Months, 24 Months, 36 Months, 60^{/1/} Months or 84^{/1/} Months. (C)

The 12 Month term is also available as a 12 Month verbal agreement. The customer will receive written notification of their selection outlining the details of the agreement.

During the effective term of a Contract Plan period, the monthly price is not subject to Company-initiated changes for payment periods longer than one month.

Service covered by a 12 or 24 months contract includes:
Centrex Intercommunication lines

Services covered by a 36, 60^{/1/} or 84^{/1/} months contract include: (C)
Centrex Intercommunication lines
Centrex Local Loops (The duration for a local loop TPP must be identical to the duration of the TPP for the basic and optional features. The local loops will be priced at the prices specified in the Centrex Local Loop Matrix (Section 5.2 of the Tariff) on the day of the signing of the contract.)
Optional System Features (no Termination Liability applies)
Optional Line Features (no Termination Liability applies)

The same payment plan must apply to Intercommunication lines and features

Service not covered by a 12, 24, 36, 60^{/1/} or 84^{/1/} months contract includes: (C)
End User Common Line Charge (EUCL)

/1/ Effective December 31, 2011, the 84 month Term Payment Plan (TPP) term period is no longer available for new installations or renewals of Centrex Service. Effective September 1, 2013, the 60 month TPP term period is no longer available for new installations or renewals of Centrex Service. Centrex customers currently on a 60 month or 84 month TPP term period may continue service at their existing TPP rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service at the then-current month-to-month rates. If the customer does not request discontinuance of the service, the month-to-month rates in effect at such time will automatically apply month-to-month rates in effect at such time will automatically apply. (C)
(C)

1. CENTREX SERVICE (cont'd)

(C)

F. PRICES (cont'd)**3. Payment Plans (cont'd)****• Term Payment Plans (cont'd)**Minimum Line Capacity Categories

Centrex provides 7 digit telephone numbers in Line Categories with the following capacities:

Number of Lines

2+
7+
25+
50+
100+
200+

Additions

Customers may add additional lines and/or features to existing Centrex service anytime during the contract period. All additions of Centrex lines will be added at contracted prices. All additions to existing Centrex service will be coterminous with the original contract.

Upon growth to a higher Line Category, the customer may commit to a new term commitment that is equal to or longer than the remaining term of the existing contract. The customer will become liable for the new Line Category at the designated Term Payment Plan's current monthly price. These prices will not be subject to Company-initiated increases for the duration of the new term payment plan selected.

If the customer chooses not to contract for a higher Line Category, the monthly price for the additional Centrex lines will be the price appropriate to the Line Category of the customer's existing Term Payment Plan.

1. CENTREX SERVICE (cont'd)**F. PRICES (cont'd)****3. Payment Plans (cont'd)**

- Term Payment Plans (cont'd)

Contract Options

Prior to the completion of a contract, a customer may enter into a new contract with the same or a larger Line Category for a term equal to, or greater than, the term remaining on the original contract at the prices currently in effect at the time of the new contract. The customer will begin paying the new contract prices on the day of signing the new contract.

'Thank You For Renewing' Credit Option

Eligible customers are

- month-to-month Centrex customers, or
- renewing Centrex term payment plan contract customers, or
- new customers

who choose either a three, five or seven year term payment plan period. Eligible customers will receive a one-time bill credit of \$50.00 per line, up to a maximum of \$1,500.00 per contract. Existing customers must have 12 months or less on an existing contract or currently be on month-to-month rates. The customer must commit to the highest line category possible given the number of Centrex lines purchased under contract. In addition to the eligibility criteria noted above, the customer must not have had service disconnected for nonpayment, and not have any past due bills for regulated service owed to the Company. This option is not available to customers with Centrex provided under an Individual Case Basis (ICB) offering.

During the last twelve months of a term contract, the customer may extend its contract with the same Line Category for either an additional 12 month or 24^{/1/}-month period at the same rates provided under the original contract. Subject to the Company's right to seek to discontinue this option to extend the contract period or to otherwise change the terms and conditions of this option, the customer may exercise this option up to three separate times. Customers who exercise the option to extend the term of the contract are not entitled to a different rate based on the overall term of the contract as extended (e.g., customers who initially have a 36-month contract and extend it by an additional 24 months are not entitled to the rates allowed under a 60-month contract). An extension will begin on the expiration date of the existing contract or, if applicable, of the contract as extended. Requests to terminate contract extensions will be governed by the terms and conditions found in 1.F.3. following. (C)

Upon expiration of a contract or contract extension, if the customer does not elect to subscribe to a new contract and does not request discontinuance of the service, service will be continued on a month-to-month basis. The month-to-month prices currently in effect at the time of expiration of the contract will apply. Once on a month-to-month basis, the customer will have no additional service commitment and will no longer be subject to termination charges. The month-to-month service prices will be subject to Company-initiated price changes.

/1/ Effective October 1, 2013, the 24-Month option will no longer be available for customers seeking to extend their contract under this option.

3. Payment Plans (cont'd)

Term Payment Plans (cont'd)

Contract Options (cont'd)

Nonrecurring Charge Waiver Options

The following Waiver Options are available (given the specified conditions are met), but are not applicable to customers covered under an Individual Case Basis (ICB) contract.

New Service

Nonrecurring charges associated with the installation of new Centrex service will be waived for new, winback and win customers. In addition, existing Centrex subscribers moving their Centrex service to a new location are eligible. Customers must agree to sign a 24-month or greater Term Payment Plan and install a minimum of 8 stations. Nonrecurring charges will be waived for each analog or ISDN BRI station connected during installation of the Centrex system.

Additional Lines

Nonrecurring charges associated with the installation of new Centrex stations will be waived for existing customers who agree to install a minimum of 3 additional stations and add the stations to an existing agreement.

The nonrecurring charges to be waived under these Waiver Options are as follows:

- Line Connection Charge
- System Charge
- Basic Centrex and Electronic Key Line NRC Charges
- ISDN National Line and ISDN Custom Line NRC Charges

/1/ Material now appears on Sheet 142.1.

1. CENTREX SERVICE (cont'd)

(C)

F. PRICES (cont'd)

3. Payment Plans (cont'd)

- **Term Payment Plans (cont'd)**

1. CENTREX SERVICE (cont'd)**F. PRICES (cont'd)****3. Payment Plans (cont'd)****• Single Payment Option (SPO)**

At the customer's option, a lump sum payment may be made of all, or a portion of the remaining monthly prices in the TPP. The payment to be charged will be determined by the Company using a factor equivalent to the prevailing cost of short term debt on the first business day of the quarter.

Prior to the receipt of the lump sum payment by the Company, TPP prices are applicable.

• Deferred Payment Option (DPO)

Payment of the following nonrecurring charges may be deferred, subject to conditions outlined in this Guidebook. (C)

- All Nonrecurring Charges, Service Charges and Installation Charges
- Service Establishment Charge

The deferral period must be equal to or shorter than the customer's chosen TPP. The deferral agreement must be negotiated and implemented with the Centrex Contract and be effective with the first bill. The customer must select a payment period exceeding one month on the equipment or service for which charges are deferred.

The total amount of the eligible nonrecurring charges may be deferred, with a minimum of \$200.00 per customer agreement, for the initial establishment of service. Subsequently a minimum of \$200.00 may be deferred for later additions to the service but the deferred period must be equal to or less than the period remaining in the customer's chosen TPP payment period.

1. CENTREX SERVICE (cont'd)

(C)

F. PRICES (cont'd)**3. Payment Plans (cont'd)****• Deferred Payment Option (DPO) (cont'd)**

The interest rate to be charged on deferred payment of nonrecurring charges will be determined by the Company at the time of execution of the deferred payment plan agreements and is not subject to change during the term of the deferred payment plan. Interest rates shall be the prevailing cost of short-term debt on the first business day of the quarter during which the agreement is signed. However, in no case will the interest rate exceed the maximum interest rate allowed by law.

If, in the judgment of the Company, the maximum interest rate allowed by law is insufficient to cover the costs of providing the deferred payment option on new agreements, the Company may suspend the offering of new deferred payment agreements until the costs can be recovered through the application of a lawful interest rate. Such suspension of the offering of new deferred payment options will not affect existing customer's deferred payment agreements which were executed prior to the suspension's effective date.

The deferred payment of nonrecurring charges including calculated interest will be prorated on a monthly basis over the selected deferral period.

Deferred charges must be paid in full at the option of the Company when the customer:

- Converts the system on which charges were deferred.
- Discontinues service prior to expiration of the selected deferral period.
- Fails to pay any charge applicable to the service within 30 days of its due date.

Customers may prepay all or part of the total outstanding deferred charges during the selected deferral period and will be given a credit for the amount of unearned interest.

1. CENTREX SERVICE (cont'd)**F. PRICES (cont'd)****3. Payment Plans (cont'd)****• System Conversion**

When the Company replaces existing central office equipment with another type of switching equipment, where possible the change will be transparent to the customer; the operation of some basic and optional features may be modified by use of the new technology.

- Not all features will work with all types of switching equipment
- Feature prices for month-to-month and for new TPPs may vary based upon the type of serving switching equipment.

The Company will provide reasonable notice to affected customers when a central office replacement will cause a feature to become modified or inoperative or will cause an increase in the price for the feature.

- If the feature is inoperative, a suitable alternative will be provided, where possible, at the same or a lesser price, for the balance of the TPP. No additional nonrecurring charge would apply for the alternative feature.
- If a price increase is required to provide the same feature in the new switching equipment, month-to-month customers shall have 90 days to (1) discontinue the feature or (2) agree to pay the new price. In the interim, the old price will continue to be billed.

In a multi-Central Office environment, the customer may initiate a transfer of service from one central office switch to another Central Office switch to obtain additional or different features, within the same wire center where available facilities exist.

- In this case, a service establishment conversion charge specified elsewhere in this Guidebook is applicable.

(C)

F. **PRICES (cont'd)**

3. **Payment Plans (cont'd)**

• **System Conversion (cont'd)**

Conversion Charges will apply on system conversions to Centrex Services (CS) from all other Centrex Service offerings. (C)
(C)

- When a customer converts their existing Centrex Service to CS and they choose to retain their exact service configuration with no changes and CentrexMate is not activated, a nonrecurring **System Conversion Charge** of \$35.00 will apply. (C)
- When a customer converts their existing Centrex service to CS and they add new features (standard or optional), and the customer programs the new line features with CentrexMate, the following charge will apply: (C)

Number of Lines	Nonrecurring Charge
2 - 50	\$100.00
51 - 100	200.00
101 - 200	275.00
201 - 500	500.00
501+ lines	750.00

When the customer requires the Company to program any line with features, line programming charges of \$10.00 per line are applied in addition to the above charges.

In all cases above, a Monthly Charge of \$20.00 will be incurred to cover common equipment.

(C)

F. **PRICES (cont'd)**

3. **Payment Plans (cont'd)**

• **Termination Charges**

Under Utilization

In the event the actual number of lines that are billed in a given month is less than 80% of the Line Category Commitment, customer will be billed an Under Utilization charge equal to the monthly rate (Centrex Local Loop + Intercom) for 80% of the Line Category Commitment minus the actual lines billed.

Full Termination

If customer terminates service prior to the expiration of the contract or contract extension period, in addition to any unpaid Special Construction or nonrecurring charges (excluding any waived charges), the customer will be required to pay charges calculated as follows:

$$\begin{array}{rcccl}
 \text{Number of Station Lines} & & \text{Central Local} & & \text{Number of Months} \\
 \text{Below the 80\% Level of} & & \text{Loop} & & \text{Remaining in} \\
 \text{the Line Category} & \times & \text{+} & \times & \text{Contract} \\
 \text{Commitment} & & \text{Intercom Monthly} & & \text{Period} \\
 & & \text{Rates} & & \times \quad 50\%
 \end{array}$$

Termination without Liability

Election of a larger Line Category and/or payment term that is equal or greater than the existing payment plan.

Centrex Service requires that the customer's principal service location continue to be located in the same serving wire center for the duration of the TPP or the service shall be deemed to have been terminated in its entirety. An existing Centrex customer who moves the principal service location will not be subject to termination charges if:

The primary location of the Centrex Service is moved to a new location within the serving central office boundary. The existing contract remains in effect.

/1/ Material now appears on 2nd Revised Sheet 147 in this Section.

1. CENTREX SERVICE (cont'd)

F. PRICES (cont'd)

3. Payment Plans (cont'd)

- Termination Charges (cont'd)

Termination without Liability (cont'd)

The primary location of the Centrex Service is moved to a new location in a different central office serving area. The customer must elect a new Line Category equal to or greater than the existing Line Category and a payment term that is equal to or greater than the time remaining on the existing TPP. A payment plan minimum of 36 months must be selected.

Move of a secondary location.

The customer is responsible for all applicable nonrecurring installation charges (including line connection and system establishment) for Centrex Service at a new location.

Assumption of Existing Contract

The customer shall not assign or otherwise transfer its rights or obligations under any Centrex arrangement provided under this Guidebook without prior written consent of the Company. Such consent will not be unreasonably withheld or delayed. Any provisions to the contrary found elsewhere in this Guidebook are superseded.

Upon prior written concurrence by the Company and payment of a transfer charge of \$500.00 by the new customer, service may be transferred to a new customer at the same location. The original customer remains responsible for the service until concurrence is obtained and the transfer fee is paid.

The new customer assumes full responsibility for payment of the prices for the remainder of the TPP, and assumes the conditions applicable to the system. The new customer also accepts all terms and conditions of any existing contract and TPP. Any service or equipment rearrangements or additions are subject to the applicable prices.

Service Migration and Early Termination Charges

If Customer migrates an AT&T Centrex Service or Service Component (referred to as the "Terminated ILEC Service") to a qualifying AT&T Business Voice over IP (BVoIP) Service (referred to as the "Replacement Service"), then the Early Termination Charge associated with the Terminated ILEC Service will be waived provided:

- The Terminated ILEC Service has been installed at the Customer site for no fewer than 12 months;
- The Term of the Replacement Service agreement is equal to or greater than the remaining term for the Terminated ILEC Service; and (C)
- The Replacement Service is installed at the same Customer sites as the Terminated ILEC Service. (D)

It is at the Company's sole discretion whether a product change satisfies these requirements. (D)
