A112.1.12 Optional Service Features

A. Station Message Detail Recording - Premises

(Obsoleted February 3, 1993, Type 4) Not available for new subscribers to this feature. Subsequent additions, deletions, and/or rearrangements to an existing system are permitted, subject to the capacity of the central office from which it is provided. Additionally, obsoleted SMDR-P may be provided on a new ESSX® Service system added by a customer who already subscribes to SMDR-P on other ESSX® Service systems. Existing customers paying obsoleted rates and charges will have the option of moving to the new restructured Station Message Detail Recording (SMDR) feature located in Section A112. and the new Station Message Detail - Premises functions located in Section A32. or continuing with the terms and conditions of the obsoleted Station Message Detail Recording - Premises feature as outlined following. (T)

1. General

a. Station Message Detail Recording - Premises (SMDR-P) is an arrangement to provide a record, by main station line number, of originating traffic routing over local lines, tie lines, WATS, Interexchange Carrier access lines and/or the toll network.

b. The station message detail will include the calling main station line number, the called number, connect time and date, call duration, facility used, disconnect time, digits out-pulsed by switch, and end of dialing. SMDR-P data provided to customers using the ETS feature will include incoming facility identification, outgoing facility used, midnight passed, prefix digits, interLATA carrier, ARS, ARS-D, or ARS-B pattern group, and call event code where these features are ***available***. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.1 ESSX® Service (Cont'd)

A112.1.12 Optional Service Features (Cont'd)

A. Station Message Detail Recording - Premises (Cont'd)

1. General (Cont'd)

c. Station Message Detail Recording - Premises (SMDR-P) is designed for either an ETS or non-ETS ESSX® Service customer.

d. The SMDR-P data may be delivered as Dial-In/Dial-Out, asynchronous or synchronous, or Direct Output. In Dial-In/Dial-Out asynchronous, the data may be delivered to a customer's collection device via DDD facilities or an ESSX® service main station line. The delivery can be initiated by a customer call or can be initiated by the application processor software as specified by the customer. In Dial-In/Dial-Out synchronous, the data may be delivered to a customer's collection device over DDD facilities or an ESSX® service main station line. The two methods of delivery are Direct File Transfer and Remote Job Entry. Direct Output is similar to Dial-In/Dial-Out in delivery modes. The Direct Output requires a dedicated port on the application processor and a dedicated modem. Also, a two or four wire facility will be required.

e. The SMDR-P data provided will be delivered to the customer as raw data.

f. It should be noted that this feature was shown as part of the ETS A112.27.3.D. which has been deleted.

2. Terms and Conditions (T)

a. The Station Message Detail Recording - Premises (SMDR-P) may be offered on ESSX® service main station lines of customers where facilities and technology permit.

b. Customer provided premises equipment is required. Channel charges specified in the Private Line Guidebook for a Voice Grade Local Channel also apply. (T)

c. Station message detail will be provided through the use of telephone central office equipment that will interface with the appropriate type line connections as specified by the customer.

d. During collection or distribution of the customer's SMDR-P data, if data is destroyed, the Company shall not be liable, directly or indirectly, for damages, unless caused by the negligence of the Company in failing to maintain reasonable standards of maintenance and inspection and to exercise reasonable supervision.

e. A customer whose SMDR-P service is provided under the terms, rates, and conditions found in Section A112. may continue with the terms and conditions of the obsoleted Station Message Detail Recording - Premises feature at the current rates subject to the following conditions: (T)

No credit will be given for payments made during the formally selected period.
Nonrecurring charges will not be reapplied.
The new payment period begins with the billing date following the date the new payment is requested.
No termination charge applies for the former payment period.
A Secondary Service Charge will apply.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.1 ESSX® Service (Cont'd)

A112.1.12 Optional Service Features (Cont'd)

A. Station Message Detail Recording - Premises (Cont'd)

3. Conversion

Customers subscribing to the obsoleted Station Message Detail Recording - Premises (SMDR-P) feature rates and (T) charges out of this section may convert to the new restructured Station Message Detail Recording (SMDR) feature in Section A112 and new Station Message Detail - Premises function in Section A32. without applicable nonrecurring charges, provided the following conditions are met:

a. The customer must subscribe to a payment period equal or greater than the amount of time remaining in his existing payment period (no termination charge applies for the former payment period and no service charge is applicable).

b. The customer must continue to be served by the same central office equipment.

c. There must be no interruption of service.

d. There are no moves, changes, or additions to existing service requested by the customer.

4. Rates and Charges

a. Term Payment Plan

		Term Payment Plan Monthly Rate				
	Installation Charge	1 Month	36 Months	60 Months	84 Months	USOC

(a) Per system, per occasion	-	-	-	-	-	RCHMF

A112.2 Digital ESSX Service - Vintage 2 Feature - Simplified Message Desk Interface (SMDI)

(Obsoleted 04-28-93, Type 4) Service and rates in this section are available for existing customers at existing locations for the remainder of the current contract period.

A112.2.1 General

1. The definitions, terms, and conditions in Section A112. for ESSX service and Digital ESSX service apply to these offerings except as stated following. (T)
2. Existing subscribers to this feature may convert to the SMDI features in Section A112. For such conversions, neither the termination charges for the feature in this Section nor the installation charges for those features in Section A112. will apply.

A112.2.2 Rates and Charges

(1) Digital ESSX service Simplified Message Desk Interface (I) (SMDI)[1]

	Installation Charge	Term Payment Plan Monthly Rate 1 Month	36 Months	60 Months	84 Months	USOC
(a) Per Link[2]	$200.00	$150.00	$110.00	$100.00	$90.00	SMG
(b) Per UCD main station line arranged for SMDI[3]	7.75	-	-	-	-	SMH

Note 1: Requires customer-provided terminal equipment.

Note 2: Includes I/O Port to the central office Network Interface. Appropriate Private Line charges apply for the associated channel. (T)

Note 3: Rates and charges for the UCD feature in Section A12. also apply.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(M1)

A112.3 Customized Dialing Package (CDP) (T)

(Obsoleted 02-09-94, Type 3) Rates and services are available only to existing customers at existing locations. Existing customers will be required to discontinue service when the customer's serving central office is converted to new tec

A112.3.1 General (M2)

A. A Customized Dialing Package (CDP) is a group of expanded central office features provided in association with individual flat rate Business and Residence exchange access lines served by electronic switching equipment located in Company buildings. It is offered as a customer option and may be provided subject to the availability of facilities. A combination of Business and Residence Lines in a CDP service arrangement is allowed. CDP is offered as a customer option. CDP rates and charges, as applicable, are in addition to rates and charges for individual exchange access line.

B. A CDP arrangement may be established for any group of customers having a minimum of 10 Individual Business and/or Residence exchange access lines. The billing record of toll calls on lines using CDP service will not be affected by the application of the features of this service.

C. Exchange access lines terminating at different locations may be combined into a single CDP arrangement. All exchange access lines terminating in a CDP arrangement, however, must be served by the same central office. Admission to the CDP arrangement is granted by the authorizing agent as specified in K. following.

D. CDP lines may utilize Dial Pulse or Touch-Tone signaling. The rates and charges for Touch-Tone service apply as appropriate in addition to CDP rates and charges.

E. Service availability and/or operation may vary depending upon the type of central office and/or the current generic program operating in that central office.

F. CDP standard and optional features are not permitted on the same line with existing Prestige or Custom Calling Service described in other sections.

G. A telephone number change will be required in order for a customer to subscribe to CDP service. Upon disassociating the exchange access line from the CDP arrangement, a telephone number change is required. When a telephone number change is required, the Line Change Charge as specified in Section A4 will apply.

H. Suspension of exchange line service will result in suspension of CDP service. Suspension of CDP service only is not permitted. Suspension is addressed in Section A2.

I. The quality of transmission for calls utilizing CDP Call Forwarding Variable or Conferencing may vary depending on the distance and routing involved. The Company makes no representation as to the quality of the transmission on such calls.

J. Calls forwarded from CDP lines via the Call Forwarding Busy Line feature or the Alternate Answering feature can be routed to a specified CDP line which may be established by the Authorizing Agent to serve as a common call answering point.

K. The Authorizing Agent is responsible for allowing admission of subscribers to the CDP arrangement. The Authorizing Agent shall do so by providing the potential subscriber with a letter of admission which in turn is presented to the Company. The Authorizing Agent title may be transferred from an existing holder to a new party. (See Section A2 for applicable procedures and charges.) If the Authorizing Agent of a CDP arrangement ceases to exist, no new subscribers will be added to that CDP arrangement. Existing service, as established, would be allowed to continue.

L. A subscriber has no responsibility to the Authorizing Agent. Each subscriber is responsible for paying to the Company all rates and charges, as applicable, associated with his service.

M. All calls from within the CDP arrangement to destinations outside the CDP arrangement must be preceded by a one-digit access code. This includes calls to 0 (Operator) and 911 (emergency). It shall be the Authorizing Agent's responsibility to notify all CDP subscribers in writing that the access code is required.

N. The Company shall not be liable to any person for damages of any nature or kind arising out of, resulting from, or in connection with the provision of Customized Dialing Package service offered herein, including, without limitation, the inability of the station user, with or without dialing the one digit access code, to reach the operator, 911, or other emergency services for any purpose.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.3 Customized Dialing Package (CDP) (Cont'd)

A112.3.2 Service Description (Cont'd)

B. Optional Features (Cont'd)

10. Distinctive Ringing and Call Waiting Tone

Distinctive Ringing and Call Waiting Tone are furnished in two classes which permit a CDP exchange line user to identify the source of a call:

Class	Call Source
A	Intercommunication (call from within the CDP originated via the Speed Dial feature)
B	Direct inward dialed local and toll (call from outside the CDP or non-Speed Dial call originated within the CDP)

Distinctive ringing is furnished to indicate the source of calls to idle exchange lines. Distinctive tone is furnished to indicate the source of calls to busy exchange lines equipped for the optional Call Waiting feature.

A distinctive ring or tone is furnished for each class and is used to identify all call sources within that class.

11. Loudspeaker Paging Access

The Loudspeaker Paging feature allows CDP station users to access loudspeaker paging equipment. Capability is provided to allow multizone paging where a separate access code is provided for each zone within the customer's location. Optional arrangement may be provided to allow the paged party to be connected to the calling party by dialing an answer code from any exchange line within the CDP arrangement. The customer is responsible for providing all paging equipment.

A112.3.3 Rates and Charges

The following rates and charges are for CDP service only and are in addition to the applicable service charges, monthly rates and nonrecurring charges for exchange access lines and other services or equipment with which they are associated.

A. Monthly Rates

1. CDP Service

	Feature Establishment Charge	Monthly Rate	USOC	
a. Authorizing Agent				
(1) Common Equipment				
(a) Per initial installation	$-	$-	C6PCD	
(b) Per revision[1]	-	-	C6NCD	
b. Standard Features[2]				(T)(M)
(1) Each exchange residence line terminated in a CDP arrangement				(M)
(a) Per Line	$22.00	$5.00	ETNCD	(M)
(2) Each exchange business line terminated in a CDP arrangement				(M)
(a) Per Line	28.00	7.00	ETNCD	(M)

Note 1: The term "revision" means any customer (Authorizing Agent) requested change to the established common service which requires work within Company equipment. The charges for making a revision shall be determined per individual case based on costs.

Note 2: Includes Speed Dial, Call Hold, Speed Call 6, User Transfer and Conferencing. (T)(M)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

3. Auxiliary Attendant Services (Cont'd)

i. Dial "O" Calling

Dial "O" calling permits a main station line to reach the attendant by dialing the single digit "O". The call is routed to the attendant over the same console access loops as provided for other incoming calls unless the position is furnished with discrete identification.

j. Dial Thru Attendant (DTA)

The ESSX-1 DTA feature allows main station line users to complete dialing on other than station-to-station calls after the attendant selects the trunk facility on attendant-handled outgoing calls.

k. Electronic Message Registration Service

Provides for automatic counting, storage and display of stored message unit count for local message units generated from individual main station lines arranged for this feature. An Inquiry and Display Console (IDC) is used to retrieve and display message unit usage. An optional tape printer is available where printed tape is desired in addition to the visual display.

l. Flexible Incoming Call Restriction

Permits the customer to route incoming calls for preselected main station lines to the attendant, to an announcement, or to a designated main station line. This feature may be activated by the attendant or by a control key.

m. Group Use Service

Group use service is an optional service feature whereby different ESSX-1 systems which are served by the same central office equipment may be arranged for intercommunication calling between main station lines and attendant positions of those systems.

n. Outgoing Trunk Queuing - Wats (OTQ) - Phase 1

Outgoing Trunk Queuing - WATS is an ESSX-1 optional feature, available where facilities permit that allows main station line users, by dialing a pre-selected code, to have their call held in queue (stored), if all the associated WATS facilities are in use for prior calls. The call is completed, without further dialing, when a facility becomes available; or on reaching the time limit in queue, is advanced to the pre-selected option. The main station line must remain off-hook to retain the call in queue. Where compatible, tie trunks may be given access to queuing.

Options available with OTQ-WATS Phase I are:

(1) Customer specified time limit in queue,

(2) Overflow calls routed to the Message Telecommunications System-Toll or to overflow tone,

(3) Routing calls to the optional feature of the Automatic Route Selection (ARS)-Basic before routing to OTQ-WATS,

(4) Recorded announcements to calls held in queue, or

(5) Music (customer supplied) to calls held in queue, or

(6) Silence to calls held in queue.

(7) Priority queuing, on an individual main station line, (M)

(8) Attendant control of calls where two or more separate queues are provided - (Inflow/Outflow) (M)

Material appearing on this page previously appeared on page(s) 39 of this section.

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

3. Auxiliary Attendant Services (Cont'd)

(M1)

o. Selected Customer Control of Facilities

Selected Customer Control of Facilities is an optional feature which allows an ESSX-1 attendant to control dial access to an individual facility group. The facility group may be real or simulated facilities. Attendant Control of Facilities, a previously developed feature, allows for attendant control of all facilities accessed through a particular 1XX code. The attendant can access the facilities for completion of selected calls. In contrast, Selective Customer Control of Facilities allows an attendant to control access to a particular facility group through activation and deactivation of a key connected to the Master Scan Point of the facility group. One key is associated with one facility group. All traffic, regardless of source, is denied access to the affected facility group once Selected Customer Control of Facilities is activated. When the facility group is part of an Automatic Route Selection - Basic or ARS - Deluxe route pattern, calls will automatically route to the next facility group in the routing pattern. If there is no alternate route, the call will receive normal reorder treatment.

p. Source Billing of Attendant Handled Calls

The Source Billing of Attendant Handled Calls feature causes the attendant's billing directory number recorded to be replaced with the source party's billing directory number in all automatic Message Accounting records which result from ESSX-1 Attendant extending a call. This change in billing directory numbers in the Automatic Message Accounting record only occurs if the source party belongs to the same master ESSX-1 as the attendant.

q. Station Direct Inward Dialing Restriction

Permits the customer to have selected main station lines restricted from receiving Direct-In-Dialed calls from the MTS network. Direct-In-Dial call attempts will be routed to the attendant.

r. Station Number Correlation

Permits main station line numbers to be the same as numeric room numbers, where facilities permit.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

4. Optional Features (T)

a. ESSX-1 Primary Feature Packages (T)

(1) Three-way calling, consultation hold and call transfer. An ESSX-1 main station line user can, by flashing while on a 2-party call, effect a 3-way conference and/or transfer. After flashing, the main station line user dials the third party for private consultation while the second party is held. By flashing a second time, the second party is added on and a 3-way conference is affected. Subsequently, a transfer is accomplished when the original main station line user goes on-hook. At least one of the parties remaining on a transferred call must be an ESSX-1 main station line user. (M1)

This Primary Feature Package is provided with either of the following options[1]:

- Three-Way Calling, Consultation Hold and Call Transfer - INDIVIDUAL. This option allows Three-Way Conference Transfer on incoming calls only.
- Three-Way Calling, Consultation Hold and Call Transfer - ALL CALLS.[2] This option allows Three-Way Conference Transfer on both incoming and outgoing calls.

(2) Call Forwarding-Variable, Call Forwarding-Busy Line, Call Forwarding-Don't Answer, Call Hold, Call Pickup and Speed Calling 6 Customer Changeable List.[3]

5. Secondary Optional Features

a. Automatic Callback

Automatic Callback permits a main station line user who attempts an intercommunication call to a busy main station line to be automatically connected to that main station line when both called and calling main station lines are subsequently idle. Automatic Callback is only operational for intercommunication calls between main station lines served by the same No. 1 or 1A ESS customer group.

A calling main station line is permitted only one Automatic Callback request at a time. The called main station line is limited to only one request at a time for Automatic Callback. Once requested, Automatic Callback will remain active for a period not to exceed thirty minutes unless deactivated by the calling main station line.

b. Call Forwarding – Variable[4] (T)(M2)

When activated by a main station line user, automatically routes calls intended for his main station line to any other main station line selected within the same ESSX-1 system or optionally outside the Centrex-ESS system. The main station line selected may also be the attendant. The attendant may also activate call forwarding for a main station line.[5] (T)(M2)

Note 1: Consultation Hold and Call Transfer - INDVIDUAL may not be furnished to any ESSX-1 system having main station lines arranged for Consultation Hold and Call Transfer - ALL CALLS unless such main station lines are segregated by the Split Service Feature (USOC EBS).

Note 2: An ESSX-1 system or split service group of an ESSX-1 system arranged for Call Transfer - ALL CALLS and served by a central office equipped with the appropriate generic program may subscribe to the Added Call Transfer Option feature. Added call transfer option provides the capability on an ESSX-1 group basis to allow any main station line, non-Data Link Attendant, trunk dial transfer tie trunks and release link lines/trunks with originating major class to extend direct inward dialed (DID) to direct outward dialed (DOD) calls.

Note 3: For this feature package capability see definitions for individual features as specified herein.

Note 4: Call Forwarding Reminder Ring Option is an enhancement to Call Forwarding - Variable and Call Forwarding over Private Facilities and is optionally available on a per main station line basis. It may be ordered through a Service Order. Call Forwarding Reminder Ring option provides a reminder ring at the forwarding station line prior to the forwarding of a call to the distant location. Call Forwarding, Reminder Ring Option is a 1E6 base generic feature and is offered at no additional monthly rate. (T)(M2)

Note 5: Call Forwarding "outside" option is a 1E5 base generic feature and is offered at no additional monthly rate. (T)(M2)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

5. Secondary Optional Features (Cont'd)

(M)

c. Call Forwarding - Don't Answer

Automatically routes in-dialed calls to the attendant or preselected main station line number when the called main station line doesn't answer within three ringing cycles. The selection of ringing cycle options is available on a per main station line basis and may be changed by Service Order.

d. Call Forwarding - Busy Line

Automatically routes in-dialed calls to the attendant or preselected main station line number when the called main station line is busy.

e. Call Forwarding over Private Facilities

Call Forwarding over Private Facilities (CFPF) is an optional feature which includes and expands Call Forwarding - Variable (CFV) capabilities. CFPF allows an ESSX-1 main station line user to have incoming calls forwarded to a location outside the Centrex group using a specific, selectable distant network which may include CCSA, EPSCS, ETS, WATS, Foreign Exchange, senderized tie lines and DDD. Automatic Route Selection (ARS) may also be selected for optimum routing. Activation of CFPF is identical to activation of CFV. To activate CFPF, a user goes off-hook, dials a CFV (CFPF) activation code plus the selected distant network access code plus the called number. When the called number answers, the calling user hangs up. From that point all calls to the calling user's main station line are forwarding to the distant location. To deactivate CFPF, the calling user dials a CFV (CFPF) deactivation code.

f. Call Hold

Allows a main station line user to place any call involving his main station line on hold by flashing and dialing a special code. The main station line user is then free to originate another call. The first call is retrieved by dialing the hold code a second time.

Note 1: Call Forwarding Reminder Ring Option is an enhancement to Call Forwarding - Variable and Call Forwarding over Private Facilities and is optionally available on a per main station line basis. It may be ordered through a Service Order. Call Forwarding Reminder Ring option provides a reminder ring at the forwarding station line prior to the forwarding of a call to the distant location. Call Forwarding, Reminder Ring Option is a 1E6 base generic feature and is offered at no additional monthly rate.

(M)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

5. Secondary Optional Features (Cont'd)

g. Call Pickup

Allows a main station line to answer calls directed to another main station line within the same preset call pickup group.

h. Call Transfer Inter ESSX-1 Screening

Call Transfer Inter ESSX-1 Screening is an extension of ESSX-1 Dial Transfer Screening which may be used in ESSX-1 complexes that may have overlapping extension ranges. With this feature, it is possible to optionally restrict transfers of external calls to main station lines outside the customer group of the controller party.

i. Call Waiting - Terminating

Informs a busy main station line, when the line is so equipped, that an incoming call is waiting (burst of tone) and permits holding the present connection while answering the new call and return to the original connection.

j. Call Waiting - Originating

Allows the application of the call waiting tone from the originating main station line to any busy main station line in the same ESSX-1.

Call Waiting - Originating options are available as follows: audible ringing (no additional charge), music and recorded announcement.

k. Call Waiting - Dial (DCW)

The Dial Call Waiting (DCW) feature provides the ability for originating ESSX-1 main station lines to invoke call waiting service on selected intragroup calls by dialing the dial call waiting access code followed by the number of the main station line to be call waited. Call Waiting - Dial also includes the features of Call Waiting - Originating. Call Waiting - Originating options may be provided with Call Waiting - Dial Feature.

l. Call Waiting - Intragroup

Permits intragroup calls to a busy main station line equipped with the feature to be answered while the existing call is held. Call Waiting - Intragroup also includes the features of Call Waiting - Terminating.

(M)

Material appearing on this page previously appeared on page(s) 43 of this section.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

5. Secondary Optional Features (T)

m. Code Restriction Arrangements (Cont'd)

A Code Restriction Arrangement automatically denies a portion or all main station lines of an ESSX-1 system direct (T) outward dialing access to one or more three-digit Company central office and/or service codes within the local exchange service calling area in which the ESSX-1 system is located. Code restriction provides a distinctive tone to indicate that access is not permitted on call attempts.

(1) The three-digit central office and service codes which may be restricted constitute those codes to which Public Announcement and Directory Assistance Services are assigned. The term "Public Announcement Services" as used herein are those services which, in the judgement of the Company, furnish advertised recorded announcement messages to the general public (e.g., time, weather, sport scores and stock market reports). The Public Announcement Service central office codes arranged for code restriction will be determined by the Company and will be commonly denied access in the central office serving ESSX-1 systems subscribing to this service arrangement.

(2) At the time a code restriction arrangement is installed, the ESSX-1 system will be arranged for the code restriction specified by the customer and the main station lines designated by the customer will be so equipped. When the customer requests the subsequent addition or removal of code restriction on a main station line, the appropriate Service Change as specified for a change in line termination applies per main station line affected except that no such charge applies when the code restriction arrangement is disconnected in its entirety.

(3) Code restriction is not furnished in connection with the attendant access lines of an ESSX-1 system.

(4) Where code restriction applies to a particular central office code, direct outward dialed main station line access is denied to telephone numbers associated with that central office code.

n. Conference Calling - Station

Allows a main station line user to establish a conference connection of up to six conferees (including the originator) without the aid of the attendant.

o. Directed Call Pickup

Allows calls directed to a main station line with the Directed Call Pickup feature to be answered by any main station line in the ESSX-1 group. This is accomplished by dialing an access code followed by the number of the main station line to which the call was directed. If the main station line has already answered, a three-way connection is established. To be arranged for Directed Call Pickup, the main station line must also be arranged for regular Call Pickup. Directed Call Pickup may be used for trunk answer any station purposes. Charges for Directed Call Pickup are applicable to the terminating or "called" main station line.

p. Directed Call Pickup - Nonbarge-In

The Directed Call Pickup - Nonbarge-In feature allows a ESSX-1 main station line to pick up an unanswered call to another ESSX-1 main station line equipped with Directed Call Pickup by dialing a special answer code plus the number of the main station line being rung. If the main station line being rung has already answered, busy tone will be returned to the main station line user dialing the answer code and main station line number. To be arranged for Directed Call Pickup - Nonbarge-In, the main station line does not have to be arranged for regular Call Pickup or Directed Call Pickup. Charges for Directed Call Pickup - Nonbarge-In are applicable to the originating or "calling" main station lines.

Material appearing on this page previously appeared on page(s) 42 of this section.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

5. Secondary Optional Features (Cont'd)

q. Distinctive Ringing and Call Waiting Tone

Distinctive Ringing and Call Waiting Tone are furnished in different classes which permit main station line users to identify the source of calls. These three classes identify:

Class	Call Source
A	Intercommunication
B	Direct inward dialed local and toll
	Attendant completed
	CCSA Access dialed
	Tie line
C	Preemptible SCAN access line
	Dial Call Waiting
	Call Waiting-Originating
	Data Link Console Night Service Arrangement

Distinctive ringing is furnished to indicate the source of calls to idle main station lines. Distinctive tone is furnished to indicate the source of calls to busy main station lines equipped for Call Waiting optional service features.

A distinctive ringing/tone is furnished to each class and is used to identify all call sources within each class.

Class A ringing/tone is not furnished separately and is included at no additional charge to main station lines arranged for Class B ringing/tone. Class C ringing/tone may be furnished separately or in association with Class B ringing/tone.

Class C tone associated with Call Waiting-Originating or Dial Call Waiting will only be provided where all such main station lines in the same No. 1 ESS customer group are commonly arranged for Class C tone.

Where a customer's system is equipped with Data Link Console and is arranged for Class B ringing/tone, Class C ringing will be provided to identify night service arrangement extended calls to main station lines at no additional charge.

r. Single Digit Dialing or Abbreviated Dialing for Services

Provides ESSX-1 main station lines the ability to dial a one or two-digit code to reach selected lines within the ESSX-1 system. Also provides the ability to use variable length codes by means of timing. Abbreviated dialed calls are completed to predesignated ESSX-1 administrative main station lines. This feature may also be used to reach particular internal facilities such as dial dictation equipment. Abbreviated dialing is not required where regular "1XX" or "level" access codes are utilized without conflict in the numbering plan.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

5. Secondary Optional Features (Cont'd)

t. Split Service Offering

This feature permits segregation of ESSX-1 main station lines for a customer into separate groups, thereby enabling each group to have a different set of common features. In a hotel this arrangement is quite valuable in that the administrative main station lines have usage characteristics and feature requirements similar to basic ESSX-1 main station lines. Typically administrative main station lines will utilize DID, AIOD, consultation hold, add-on and call forwarding features. The guest room main station lines usually will not be equipped with these features and a split service offering should be used at appropriate ***guidebook*** rates. Splitting the service in this manner allows all other No. 1 ESS main station line features on an optional basis, thus enhancing the versatility of the administrative main station lines and reducing the need for key telephones and equipment. (T)

u. Station Dial Code Screening

Station Dial Code Screening permits designated ESSX-1 main station lines to be used to originate calls to specified Message Telecommunications Systems (MTS) telephoned in Number Plan Areas and Central Office Codes within the Continental U.S., and restricts these main station lines from originating calls to other MTS telephones. Three or six digit screening is provided.

Two arrangements are available:

(1) Arrangement I permits main station line originated calls to be completed to telephone numbers with selected Central Office Codes (NNX's) in the Home Numbering Plan Area (HNPA) or other Numbering Plan Areas (NPA's) using the Message Telecommunications Network (MTS).

(2) Arrangement II permits main station line originated calls to be completed via private network facilities which have been arranged for uniform numbering, senderized operation and other network stations and offnet to telephone numbers with selected NPA and Central Office Codes.

v. Station Hunting Arrangements

Circular Hunt, Uniform Call Distribution and Preferential Hunt are optional main station line hunting arrangements for searching over and distributing calls in a hunt group. These hunts are extensions of the basic hunting feature included in basic ESSX-1 service.

(1) Circular Hunt permits a complete hunt over all the terminals in the group starting with the dialed number.

(2) Uniform Call Distribution provides an even distribution of incoming network and intercom calls among the individual main station lines of a hunt group and includes circular hunt.

- Call Queueing is an option that may be added to the UCD arrangement. Queueing permits calls, in excess of main station lines in a UCD group, to be held in the central office and distributed in their order of arrival to main station lines in the UCD group as the main station lines become available.

(3) Preferential Hunt permits a pre-hunt over a subset or preferential group of main station lines before hunting through the entire group. The hunt through the group may be a regular or circular hunt. Each main station may have its own preferential group or list. (M)

(4) Make-Busy Arrangement allows terminals (main station lines) to appear busy to incoming calls by the use of control keys, and still allow the main station line to originate calls. (M)

- A terminal make busy arrangement functions on individual main station lines. (M)
- A group make-busy arrangement functions on all main station lines in the hunt group. (M)
- A random make-busy arrangement functions only on selected main station lines in the hunt group. (M)
- A stop hunt arrangement (break in Rotary) functions to prohibit incoming calls to terminals beyond a specified point in a hunt group. (M)

5. Secondary Optional Features (Cont'd)

(M1)

w. Station Restriction

Various types of restrictions may be assigned as options to ESSX-1 main station lines. An ESSX-1 main station line may be provided with a combination of the various types of restrictions.

(1) Full Restriction:

From Incoming Calls Only - Allows the main station lines to receive only intra ESSX-1 (including tie line and other customer-oriented facilities) calls, except calls from the attendant. In-dialed calls from the exchange network are routed to intercept.

From Outgoing Calls Only - Allows the main station line user to originate calls to ESSX-1 main station lines, tie lines, and FX lines, but cannot call the attendant or use the call transfer feature.

From Incoming and Outgoing Calls - Combination of the above, and in effect, Interior Service without attendant access capability.

(2) Semi-restriction:

From Incoming Calls Only - Allows the main station line to receive only intra ESSX-1 (Including tie line and other customer-oriented facilities) calls, including calls from the attendant. In-dialed calls from the exchange network are routed to intercept.

From Outgoing Calls Only - Allows the main station line user to originate calls to ESSX-1 main station lines, tie lines, and FX lines, including calls to the attendant.

From Incoming and Outgoing Calls - Combination of the above, and in effect, Interior Service with attendant access capability.

(3) Denied Service:

From Incoming Calls Only - The main station line is used for outgoing calls only and cannot receive incoming calls. All incoming calls are routed to common intercept announcement.

From Outgoing Calls Only - The main station line is used for incoming calls only and no outgoing calls can be originated from the main station line. (M2)

(4) Denied Access to ESSX-1 facilities with Unique Access Codes (trunk level access): (M2)

This feature prevents the main station line user from dial access to certain miscellaneous lines and other customer-oriented facilities by means of treatment codes. An ESSX-1 system is limited to a maximum of eight treatment codes. This feature does not prevent intra ESSX-1 main station line calling. (M2)

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

5. Secondary Optional Features (Cont'd)

(M)

x. Station Toll Restriction

This feature prevents the main station line user from placing calls over the toll network. The calling attempt is not sent to the attendant or operator; it is routed to reorder tone.

y. Station Toll Diversion

This feature prevents the main station line user from placing calls over the toll network. The calling attempt is diverted to the ESSX-1 attendant.

z. Manual Originating Line Feature

The manual originating line feature is for ESSX main station(s) used with Electronic Tandem Switching (ETS). This feature simulates a dialed digit for access to ETS Automatic Route Selection (ARS) dial tone. No access to local exchange service or ESSX features is provided. An additional split service common block is required for each ESSX system using this feature.

6. Miscellaneous Line Terminations

a. Miscellaneous lines are those lines not a basic part of the ESSX-1 system; i.e., CCSA, Tie Lines, WATS, Foreign Exchange, etc., but require ESSX-1 switching capabilities in order to function with ESSX-1 service.

(1) Trunk Equipment

Provides access to the ESSX-1 system by means of a simulated line group and permits dialing of calls over miscellaneous lines to and from ESSX-1 main station lines.

(2) Basic Terminations

Provides terminations (senderized) for miscellaneous lines interconnecting an ESSX-1 system to distant switching systems and access to Foreign Exchange and WATS lines, etc. This arrangement does not provide for switching (Tandem) through the ESSX-1 for connection to miscellaneous lines of the distant switching system.

Material previously appearing on this page now appears on page(s) 46 of this section.

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

6. Miscellaneous Line Terminations (Cont'd)

a. (Cont'd)

(3) Optional Dial Cut-Through Arrangements (Tandem)

Provides for the switching (non-senderized) of calls which either originate within the ESSX-1 and terminate in distant systems over certain miscellaneous lines, and/or switch tandem through the ESSX-1 between certain miscellaneous lines where the digits dialed by the calling party are transmitted to the distant system directly as they are dialed by the calling party.

(4) Advanced Private Line Termination (APLT)

The APLT unit is used to terminate tie lines, private line facilities and access lines from switched private line services, such as Enhanced Private Switched Communications Service (EPSCS), and access lines furnished by Other Common Carriers to the ESSX-1 dial switching equipment.

The following service features will be obtained when a facility is terminated on a APLT unit only if these features are subscribed to by the customer as part of the ESSX-1 service and/or the facility involved.

Cut-through operation

Variable digit out-pulsing

Use of switched private line authorization codes

Call tandem via the Centrex/ESS switcher

Call Transfer - Individual

Call Transfer - Individual - All Calls

Attendant call transfer[1]

Attendant completion

Attendant camp-on

Call Forwarding - All Calls

Call Forwarding - Don't Answer

Call Hold

Automatic Calling Station Identity on access lines to Enhanced Private Line Switched Communications Systems.

(M)

Note 1: On calls incoming to main station line only.

Material previously appearing on this page now appears on page(s) 49 of this section.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.2 ESSX-1 Payment Schedules (T)

A. ESSX Term Payment Plan (ETPP) (T)

1. The following services will be furnished under the ESSX Term Payment Plan (ETPP). (T)
   a. ESSX-1 Group "A" and "B" main station lines (M1)
   b. ESSX-1 Group "B" main station line Distance Charges (M1)
   c. Extension Station Lines
   d. Primary Feature Packages
2. ESSX-1 service will be furnished under the ESSX Term Payment Plan (ETPP) as specified in this guidebook. The ETPP rates are payable over a period selected by the customer from those available. All terms and conditions pertaining to the ETPP are included in Section A122, except as specified following. (T)
3. Options and Conditions under ETPP
   a. Additions
      (1) Equipment can be added to an existing system at the customer's option, and the payment of rates and charges in the currently effective guidebooks for such service will be applied. (T)
      (2) At the customer's option, additions may be paid for over the remainder of the existing system's payment period, and be added onto the existing agreement, providing at least 30 days remain in the customer's existing payment period. The addition and installed system payment periods will then have a common expiration date. The charge(s) for the addition(s) will be the current filed rate(s) for the equipment for the same payment period as the installed system's existing payment period. If the installed system's payment period is not in the current guidebook, the rate charged for the addition will be that of the next shorter filed payment period. If less than 30 days remain in the current payment period, additions may only be placed on the one-month payment period at the current rates in effect for the one-month period. (T)
      (3) If the coterminous option for additions (described in (2) preceding) is not elected by the customer, additions may only then be placed on the one-month payment period at the current rates in effect for the one-month period.
   b. Disconnects
      (1) When equipment and/or facilities, i.e., station lines, etc., are disconnected from a system for which the current payment period is longer than one month, the expiration date of the remaining equipment and service will not be affected.
      (2) Equipment and/or facilities disconnected from a system prior to the expiration date of the payment period for such equipment, will require termination charges for premature disconnection if applicable.

(M2)

M1 - Material appearing on this page previously appeared on page(s) 48 of this section.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.2 ESSX-1 Payment Schedules (Cont'd)

A. ESSX Term Payment Plan (ETPP) (Cont'd)

3. Options and Conditions under ETPP (Cont'd)

c. Termination Liability (T)

The Termination Liability applicable to ESSX-1 service is dependent upon the payment period selected by the (M)
customer. Termination for the optional payment periods is as follows:

(1) 1-Month Term Option (M)

Main Station Lines, Extension Station Lines, Distance Charges and Primary Feature Packages - No (M)
Termination Liability

(2) 36-Month Term Option

Main Station Lines and Distance Charges - 90% of the remaining amount due for each main station line disconnected when the customer's total main station line count falls below 80% of the total main station lines initially installed or of the annually adjusted total.

Extension Station Lines and Primary Feature Packages - No Termination Liability

B. Conventional Payment Plan

1. All other ESSX-1 services/features offered in Section A112. will be furnished under the Conventional Payment Plan. (T)
2. The Initial Service Period for all conventional rated ESSX-1 services/features is one month.

A112.8.3 ESSX-1 Minimum Monthly Charges

A. A minimum charge for 10 main station lines, equivalent main station lines, or Telephone Numbers Reserved for Future Use applies for each ESSX-1 system. Main station lines of the ESSX-1 system may be provided at different locations. Such main station lines, however, must be routed to the ESS central office from which the switching capability for the ESSX-1 system is provided.

A112.8.4 Reserved For Future Use

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.5 Distance and/or Mileage Charges

A. Distance Charges applicable to ESSX-1 main station lines or Zone Charges applicable to PBX trunk lines do not apply to ESSX-1 Network Access Registers.

B. Group "A" Station Lines only

1. "On-premises" extension line mileage charges as outlined in Section A13.1, "Extension Line Mileage", apply to each station line at the principal or secondary location not located in the same building as the central measuring point which, at both the principal and secondary locations, shall be the principal cable distribution point.

2. "Off-premises" extension line mileage charges do not apply to stations at secondary locations, however, where service involves locations in more than one central office area of an exchange "Foreign Central Office" mileage applies to each circuit required, measured between the central offices involved. Off-premises extension station lines may be provided where facilities permit at Group "B" ESSX-1 main station line rates.

C. Group "B" Station Lines only

"On-premises" extension line mileage and local channel charges as outlined in Section A13.1, "Extension Line Mileage", apply to each extension station line not located in the same building as the ESSX-1 main station line.

"Off-premises" extension station lines may be provided, where facilities permit, at Group "B" main station line rates.

Distance Charges for each Console Access Line, ESSX-1 main station line and Off-premises extension station line apply for each circuit required to provide service located in excess of one mile (airline distance) from the central office.

The Basic ESSX-1 Service Area is located within the local exchange Base Rate Area (BRA) and comprises the geographical area situated within a one-mile radius of the serving ESS central office location and within the fundamental serving area of the ESS central office. Mileage for each circuit and/or subscriber loop is measured (airline distance) between the station line location on the customer's premises and the normal serving central office.

1. Within the same exchange

a. Within the same ESS central office serving area

Basic main station line charge for ESSX-1 service includes locations within a distance of one airline mile of the serving ESS central office.

A monthly Distance Charge in addition to the basic main station line charge applies to each circuit and/or ESSX-1 loop termination located outside the Basic ESSX-1 Serving Area.

(1) First one-mile band within serving ESS central office, per ESSX-1 main station line - No additional rate.

	ESSX Term Option 36 Month Monthly Rate	Monthly Rate	USOC	
(2) Next two-mile band, per ESSX-1 main station line				
(a) First 1/2 mile or fraction thereof	$5.80	$5.90	1LVF+	
(b) Each additional 1/2 mile or fraction thereof	6.30	6.30	1LVG+	
(3) Beyond three-mile band, per ESSX-1 main station line				(M)
(a) Each additional 1/2 mile or fraction thereof	7.00	8.45	1LVH+	(M)

Material appearing on this page previously appeared on page(s) 52 of this section.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.5 Distance and/or Mileage Charges (Cont'd)

C. Group "B" Station Lines only (Cont'd)

1. Within the same exchange (Cont'd)

(M1)

b. In a different central office serving area of multi-office exchange

(1) The rate of ESSX-1 service in a foreign central office area is the monthly rate for the ESSX-1 service desired, plus a foreign central office mileage charge and a distance charge.

(2) When ESSX-1 main station lines are connected by facilities which are routed between two or more central offices in the same exchange the foreign central office mileage charge is computed separately on an airline basis between the ESS central office from which the ESSX-1 system is served and the central office from which exchange service normally would be rendered.

(3) Between ESSX-1 central office and the central office from which the subscriber location would normally be served, for each interoffice channel charges apply as specified in Section A9. for Foreign Central Office service. (T)

(4) Between subscriber's location and the central office which normally would provide telephone service at the location, no additional rate applies for the first one mile. Each one-half mile or fraction in excess of the first one mile, charges apply as shown in A112.8.5.C.

c. The rates specified above are based upon the utilization of two-wire, voice grade exchange facilities. When the Company incurs additional expenses in order to provide adequate transmission due to the remote location of the customer or due to the requirement for specially constructed facilities or high cost facilities, charges based on costs may apply.

2. In a Different Exchange

a. The rate of ESSX-1 service in a foreign exchange service area is the monthly rate for the ESSX-1 service desired, plus a foreign exchange mileage charge as specified in Section A9. (T)

(M2)

M1 - Material previously appearing on this page now appears on page(s) 51 of this section.
M2 - Material previously appearing on this page now appears on page(s) 53 of this section.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.6 Classification of Basic ESSX-1 Service (T)

A. ESSX-1 Intercommunication (T)

1. Main Station Line - Intercommunication between all main station lines of the same ESSX-1 system. Main station lines (M1) may be arranged to originate or receive local and long distance calls directly, or through the attendant when console operation is provided.
2. Extension Station Line - An additional station line on an ESSX-1 main station line.
3. Console Access Loop - A main station line equivalent to an ESSX-1 Main Station Line that terminates in Attendant Console(s) or telephone set(s) used as consoles.

B. ESSX-1 Exchange Access

Exchange access is provided each ESSX-1 system by means of Network Access Registers, utilizing software and simulated facilities of the ESS central office from which the ESSX-1 system is served. Network Access Registers simulate physical hardware facilities and may be arranged individually or in groups with the same options available to PBX trunks.

C. Dormitory Stations

(Refer to Dormitory Communications Service as offered in Section A13.) (T)

A112.8.7 Rates

A. General

The rate elements for basic ESSX-1 service are exchange access, intercommunication and main station line, extension station line and station set.

1. ESSX-1 Stations
   a. The rates and charges specified herein for ESSX-1 main stations provide for an ESSX-1 main station line component. The ESSX-1 main station line consists of all facilities, including intercommunication and outside plant facilities, from the ESSX-1 system dial switching equipment to the Network Interface of the ESSX-1 main station line.
   b. The rates and charges specified herein for ESSX-1 extension stations provide for an ESSX-1 extension station line component. The ESSX-1 extension station line consists of usage of traffic sensitive central office equipment.
   c. The rates and charges specified herein for ESSX-1 main station lines and extension station lines are applicable to each ESSX-1 main station location and ESSX-1 extension station location, respectively, for which a customer-provided instrument can be connected.
   d. Monthly net billing for interstate end user access charges will be equal to the interstate business end user access charge times the number of Network Access Registers provided each subscriber.
2. ESSX-1 Exchange Access
   a. ESSX-1 Exchange Access is provided by means of Network Access Registers which are furnished at the rates, terms, and conditions specified in Section A3 for PBX trunks. (T)

(M2)

M1 - Material appearing on this page previously appeared on page(s) 52 of this section.
M2 - Material previously appearing on this page now appears on page(s) 54 of this section.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.7 Rates (Cont'd)

B. Nonrecurring (Cont'd)

1. The following nonrecurring charges for ESSX-1 service are in addition to any applicable regular service, move, change (T)(M1)
and installation charges provided for in other sections.

a. Service Establishment and Change Charge

(1) Initial Service Establishment Charge

	Nonrecurring Charge	USOC
(a) Each system	$580.00	NA

b. Feature Establishment Charges

(1) These charges apply, as specified, when an optional feature is entered or changed. These charges apply in addition to other applicable nonrecurring charges.

(2) One or more optional features may be provided at the same time and in such instances the specified feature establishment charge will apply for each feature provided.

c. Installation Charges

(1) These installation charges are in addition to other appropriate nonrecurring charges for the ESSX-1 service.

d. Service Charges (T)

(1) Service charges as specified for business service in Section A4 are applicable for each ESSX-1 main station line, console access loop, extension station line, etc.

C. Recurring

1. Common Equipment

	Installation Charge	Monthly Rate	USOC
(a) Each ESSX-1 System	$2,924.25	$72.60	ESS

2. ESSX-1 Intercommunication Charge

a. Main Station Lines of an ESSX-1 System in all Exchange Rate Groups:

(1) Each ESSX-1 Group "A" main station line [1]

	ESSX Term Option		
	Nonrecurring Charge	36 Month Monthly Rate	USOC
(a) Main Station Line, each	-	$12.75	EXA

(2) Each ESSX-1 Group "B" main station line [1] (M2)

	ESSX Term Option			
	Nonrecurring Charge	36 Month Monthly Rate	Monthly Rate	USOC
(a) Main Station Line, each	-	$12.15	$12.40	EXM (M2)

Note 1: ESSX-1 Group "A" main station lines are not offered for new installations and may remain at Group "A" rates and charges only as long as they remain in service. If a Group "A" main station line is disconnected, any subsequent reinstatement of the main station line will be at rates and charges as specified for ESSX-1 Group "B" main station lines.

M1 - Material appearing on this page previously appeared on page(s) 53 of this section.
M2 - Material appearing on this page previously appeared on page(s) 55 of this section.

	36 Month Monthly Rate	Monthly Rate	USOC
(a) Located on same premises as main station line, each	$ 3.25	$ 3.25	EX3
(b) Located on different premises from main station line on non-continuous property, each[2]	12.15	12.40	EC8
(c) Located on different premises from main station line on same continuous property, each[2]	3.25	3.25	EX5

5. Main Station Lines Terminated as Trunks

a. Where an ESSX-1 main station line terminates as a trunk in a PBX system, order turret, automatic call distributor or similar concentrating device, rates and charges apply as set forth below:

(1) ESSX-1 Group "B" main station line rates, ESSX distance charges and optional feature charges apply as appropriate.

(2) All PBX equipment associated with "PBX behind ESSX-1 service " will be rated at rates and charges as set forth in Sections A11 or A111. (T)

Note 1: Apply rates and charges for Long Distance Trunks arranged for connection to either toll switchboard positions or the DDD network (USOC: TTTXA) as specified in Section A13.. (T)

Note 2: ESSX-1 Group "B" main station line and associated distance charges apply.

Note 3: Apply rates and charges specified in this Guidebook for extension line mileage. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.8 Auxiliary Services

(Obsoleted 11-01-95, Type 4) Service rates and charges in this section are not available for new installations, moves, transfer of service or replacements or additions to existing service.

Obsolescence Rules

1. ESSX-1 service subscribers under a month-to-month payment option will be allowed to maintain their existing service at month-to-month rates.
2. ESSX-1 service subscribers under contract will be allowed to maintain their ESSX-1 service under the rates and charges outlined in this Section. (T)

A. Attendant Services

1. 50A Consoles

(Obsoleted 9-2-81, Type 3)

(Obsoleted 12-19-79, Type 2)

a. General

(1) The 50A Consoles are provided only where the central office serving the ESSX-1 System has been arranged for use with such consoles.

(2) One-way call splitting is provided and allows the attendant to exclude only the incoming calling party while announcing the incoming call to the called party.

(3) The Direct Station Selection (DSS) capability is only available with the 151 and 151 type console and is included in the console rate. The ESSX-1 station lines equipped for DSS must be in consecutive one hundred station number group(s). Station lines equipped for DSS may, as an option, be equipped for station line visual busy indication on a "per key" basis. Where more than one console is equipped for the DSS and station busy lamp indication feature, the DSS and station busy indication on the second console are a multiple appearance of the first console. Only two consoles may be equipped with the DSS-Busy Lamp Field (BLF). The DSS-BLF feature can be provided only to the main stations at the same location as the consoles.

(4) The ESSX-1 Primary Feature Package at rates as specified in Section A112.26.8.C.1. is required with each ESSX-1 circuit designated as a Console Access Loop. (C)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8.8 Auxiliary Services (Cont'd)

A. Attendant Services (Cont'd)

1. 50A Consoles (Cont'd)

a. General (Cont'd)

(5) Each ESSX-1 circuit (Console Access Loop), terminating on a console loop key requires a Loop Terminating Equipment.

(6) Console Access Loops are required between the No. 1 ESS serving the ESSX-1 System and the console location. These facilities are used to complete incoming calls for the listed directory number and may be arranged for completing dial "0" traffic. In addition, Console Access Loops have the same capabilities as ESSX-1 station lines. Console Access Loops terminate directly on apparatus of a specific console. Multiple appearances of a Console Access Loop are not provided.

(7) Night Service is provided by use of Directed Call Pickup optional feature of the ESSX-1 System on the listed directory number.

(8) Control channels are required for various console optional features as indicated and are provided at the appropriate rates and charges as specified.

b. Rates

(1) Common Equipment for 50A Consoles

	Monthly Rate	USOC
(a) Attendant Access Circuit, each[1]	$4.55	EAS
(2) Console Access Loop		
(a) Each (maximum of 14 per console)[1]	12.40	EAR
(3) Common Equipment for Optional Features		
(a) Circuit group busy (one required per circuit group busy indication), each	2.55	EAX
(b) Position busy (position busy may not be provided for one position arrangement), per console[1]	.90	CXJ
(c) Multiple Position Hunt for ESSX-1 systems provided with more than one 50A Console, per system[2]	27.60	CXH
(d) Fixed night service[1]	4.35	CXX

c. Customer Premises Equipment... Consoles etc.

See Section A114. for rates and charges for 50A Consoles and associated customer premises equipment. (T)

Note 1: See A112.26.8.C.1. for charges applicable for associated ESSX-1 Primary Feature Package and optional features.

Note 2: Charges for the appropriate line hunting arrangements associated with multiple position hunt (T) are specified in A112.26.8.C.2.b.(16).

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.8 Auxiliary Services (Cont'd)

A. Attendant Services (Cont'd)

Central office attendant console operation is offered as an auxiliary service with ESSX-1 service.

The Call Transfer - Attendant feature is furnished with non-Data or Data Link Console operation.

As an alternative the subscriber may designate a selected main station line or main station lines to perform attendant functions. Incoming calls to the listed directory number are connected to the selected main station line and then completed to the desired party by operation of the Call Transfer Feature as offered in the ESSX-1 Primary Feature Package in A112.8.8.C.1.b.(1) following.

2. Central Office Components Rates and Charges for non-Data Link Consoles operations.

a. General

(1) Consoles may be provided only where the Central Office serving the ESSX-1 system has been arranged for use with such consoles.

(2) Each Attendant Access Line terminating on the console requires an Attendant Access Circuit (USOC EAS).

(3) Attendant Access lines are required between the No. 1 ESS serving the ESSX-1 System and the console location. These facilities are used to complete incoming calls for the listed directory number and may be arranged for completing dial "0" traffic. In addition, Attendant Access Lines have the same capabilities as ESSX-1 station lines. Attendant Access Lines terminate directly on apparatus of a specific console. Multiple appearances of an Attendant Access Line are not provided.

(4) The ESSX-1 Primary Feature Package, at rates as specified in A112.8.8.C.1.b.(1), is required with each ESSX-1 circuit designated as an Attendant Access Line. (T)

(5) Night Service is provided by use of the Directed Call Pickup optional feature of the ESSX-1 System on the listed directory number.

(6) Control channels are required for various console optional features as indicated and are provided at the appropriate rates and charges as specified.

b. Rates

	Installation Charge	Monthly Rate	USOC
(1) Central office Common Equipment for Consoles			
(a) Attendant access circuit (one required per Attendant Access Line), each	-	$4.35	EAS
(2) Attendant Access Line			
(a) Each[1]	-	-	EAR

Note 1: ESSX-1 Group "B" month-to-month main station charges apply. In addition, see A112.8.8.C.1 for charges applicable for associated ESSX-1 Primary Feature Package and optional features.

(4) Multiple Position Hunt for ESSX-1 systems provided with more than one Console.			
(a) Per system (charges for the appropriate line hu arrangements associated with multiple position are specified in A112.8.8.C.2.b.(15) following)	-	27.60	CXH
(b) Fixed night service[1]	-	4.35	CXX
(5) Optional Features for non-Data Link Consoles			
(a) Auxiliary attendant features[2]	-	-	-

c. 50B Customer Premises Equipment, Consoles, etc.

(1) Rates and charges as specified in Section A14 apply as appropriate. (T)

3. Central Office Components Rates and Charges For Universal Data Link Console Operations.

a. General

(1) Data Link Console operation utilizes universal cordless telephone consoles and is provided only where the central office serving the ESSX-1 system has been arranged for use with such console operation.

(2) Console Access Loops are required for each ESSX-1 system equipped for data link console operation. These facilities are used to complete incoming calls for the listed directory number and may be arranged for completing dial "O" traffic. In addition, console access loops have the same capabilities as ESSX-1 main station lines. Console access loops terminate on the data link common equipment.

(3) The ESSX-1 Primary Feature Package at rates as specified in A112.8.8.C.1.b.(1) is required with each ESSX-1 circuit designated as a Console Access Loop. (T)

(4) The Night Service feature is provided by means of a Nite Key on the console.

(5) The console can be made to appear busy on incoming calls by the operation of the busy key on the console or by the removal of the attendant headset.

Note 1: See Private Line Guidebook for charges applicable for associated Supervisory Control Channel. (T)

Note 2: As specified in A112.8.8.B (T)

3. (Cont'd)

a. General (Cont'd)

(6) Busy Verification is a console attendant position optional service arrangement which permits the ESSX-1 system attendant to verify the status of main station lines, CCSA, SCAN, EPSCS, ETS and tie line terminations associated with that system.

(7) Call Waiting is provided to inform the attendant that calls are waiting to be answered.

- The optional feature "Variable Trigger" on calls waiting lamps provides a more dynamic representation of the length of queue for data link console positions.

(8) Incoming call identification provides the attendant with a means of identifying the source and type of incoming calls to be answered.

(9) Trunk group busy lamps inform the attendant that all trunks in a particular trunk group are busy.

b. Rates and Charges for Central Office Components

(1) Data Link Frame/Common Equipment

	Installation Charge	Monthly Rate	USOC
(a) Per control cabinet	$1,389.50	$428.00	EDX

(2) Data link circuit - duplex (one required per control cabinet) - See Private Line applicable for Series 2100, Type 2103 local Channel. Guidebook for charges (T)

(3) Console Access Loop

	Monthly Rate	USOC
(a) Each[1]	$12.40	EDA

(4) Optional Features for Data Link Console

	Feature Establishment Charge	Monthly Rate	USOC
(a) Busy Verification of Main Station Lines and Trunks by Attendant, Per ESSX-1 System When provided with initial installation	$77.50	$5.65	EDSVC
(b) Busy Verification of Main Station Lines and Trunks by Attendant, Per ESSX-1 System Subsequent installations	155.00	5.65	EDSVC
(c) Auxiliary Attendant Features[2]	-	-	NA

Note 1: The monthly rate is the same as the ESSX-1 Group "B" month-to-month main station line charge.

Note 2: As specified in A112.8.8.B. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(4) Optional Features for Data Link Console (Cont'd)

	Feature Establishment Charge	Monthly Rate	USOC
(d) Variable Trigger on Calls Waiting Lamps console (applicable to each console in multiple)	$-	$2.10	EWV

c. Customer Premises Equipment, Consoles, etc.

(1) Rates and charges as specified in Section A14 or A114 apply as appropriate. (T)

4. Use of Non-Key Telephone Set or Key Telephone System in lieu of Console Operation

a. General

(1) Non-Key Telephone Sets or Key Telephone Systems may be used for attendant operations. Each main station line terminated for attendant use must be provided with the ESSX-1 Primary Feature Package at rates as specified in Section A112.8.8.C.1. b.(1). (T)

(2) Each ESSX-1 circuit designated as an Attendant Access Loop, terminating in a Key Telephone System requires a Line Termination in the Key System.

(3) Attendant Access Loops are required between the No. 1 ESS serving the ESSX-1 system and the answering location. These facilities are used to complete incoming calls for the listed directory number and may be arranged for completing Dial "0" traffic. In addition, Attendant Access Loops have the same intercept as ESSX-1 station lines. Access Loops terminate in the Key System and multiple appearances of an Access Loop may be provided within the limits of the associated Key Telephone System.

(4) Recorded intercept is provided utilizing common announcement facilities located within the Central Office.

b. Rates

(1) Non-Key or Key Telephone System Access Loop

	Monthly Rate	USOC
(a) Each [1]	$12.40	EAL

Note 1: The monthly rate is the same as the ESSX-1 Group "B" month-to-month main station charge.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.8 Auxiliary Services (Cont'd)

B. Auxiliary Attendant Features

		Feature Establishment Charge	Monthly Rate	USOC
1.	Attendant Control of Facilities			
	(a) Non-Data Link Consoles, per group of lines to which access is denied[1], each group	$227.50	$6.50	CFC
	(b) Data Link Consoles, per group of lines to which access is denied[1], each group	227.50	6.50	CFU
2.	Selected Customer Control of Facilities[1,2,3,4]			
	(a) Common equipment, per system	237.25	13.05	SFY
	(b) Per facility group to which access is denied[1]	17.50	5.80	SFF
3.	Attendant Conference			
	(a) Each arrangement	193.75	99.75	RKT
4.	Attendant Camp-On			
	(a) Per Console Access Loop, each	-	1.45	1CO
	(b) Per System, each installation	22.25	-	NA
5.	Dial "O" Calling			
	(a) Per access loop, so equipped[5]	-	5.90	EEO

Note 1: In addition, apply same rates and charges as specified for a Type 1105 Local Channel as contained in A13.1 between the serving central office and the customer premises and for the Key Telephone Service transfer key associated with that channel. (C)

Note 2: Selected Customer Control of Facilities is a non-Data Link and Data Link Console attendant position optional service arrangement which permits the attendant to restrict the access of all main station lines to specific facility groups which are a part of a predetermined routing pattern.

Note 3: When the Selected Customer Control of Facilities optional service arrangement is activated for a facility group, calls directed to that group will automatically proceed to the next idle route designed in the routing pattern.

Note 4: When a facility group is restricted by use of the Selected Customer Control of Facilities optional service arrangement, access to that group is restricted whether the call attempt is via a predetermined routing or normal access code.

Note 5: Dial "O" calling charge is in addition to charges applicable for console access loops and other associated items, except for data link console loops. In such cases, charge applies per data link console rather than per access loop.

6. Attendant Emergency Override per ESSX-1 System[1,2]			
(a) Data link console operation	$67.75	$4.95	ERU
(b) Non-Data Link Console or key telephone system operation arranged for attendant use[1]	67.75	5.55	ERV
7. Group Use Service			
(a) Per system arranged to initiate outgoing calls	60.00	-	NA
(b) Per main station line (applicable to each main station line of the system)	-	.65	EGR
8. ESSX-1 Access Lines to Customer-Oriented Facilities[1,2,3,4,5,6]			
a. Access to Recorded Telephone Dictation Equipment			
(1) First line equipped for dial access			
(a) each	242.00	40.65	EWA
(2) Per additional line equipped			
(a) Each[7]	155.00	40.65	EWB

Note 1: Feature establishment charge applicable only when provided subsequently to provision of Data Link Console.

Note 2: Dial "O" calling charge is in addition to charges applicable for connecting access lines and other associated items, except for data link console loops. In such cases, charge applies per data link console rather than per access loop.

Note 3: See Private Line Guidebook for rates and charges applicable for control channels when required for supervisory purposes with equipment and/or apparatus located on customer premises. (T)

Note 4: The above items are required whether access lines and access codes are connected to terminal equipment provided by the customer or by the Company.

Note 5: ESSX-1 main station line charges also apply to each access line or access code arranged (originate or answer) for connection to customer oriented facilities.

Note 6: All rates and charges for the above features are in addition to existing rates and charges for ESSX-1 and other services with which they are associated.

Note 7: Feature Establishment Charge applicable only when provided subsequently to the provision of the initial arrangement.

(a) Per customer premises location[7]	$193.75	$97.40	PLC
c. Access to Loudspeaker Paging Equipment			
(1) Loudspeaker Paging Origination, for dial access to paging equipment, per main station line equipped with access code			
(a) Each	225.50	60.05	EWJ
(2) Additional for zone paging option			
(a) Per zone	-	2.30	EWG
(3) Loudspeaker Paging Answer, per main station line equipped with access code			
(a) Each[8]	140.50	8.70	EWK

Note 1: Dial "O" calling charge is in addition to charges applicable for connecting access loops and other associated items, except for data link console loops. In such cases, charge applies per data link console rather than per access loop.

Note 2: Feature establishment charge applicable only when provided subsequently to provision of Data Link Console.

Note 3: See Private Line Guidebook for rates and charges applicable for control channels when required for supervisory purposes with equipment and/or apparatus located on customer premises. (T)

Note 4: The above items are required whether access lines and access codes are connected to terminal equipment provided by the customer or by the Company.

Note 5: ESSX-1 main station line charges also apply to each access line or access code arranged (originate or answer) for connection to customer oriented facilities.

Note 6: All rates and charges for the above features are in addition to existing rates and charges for ESSX-1 and other services with which they are associated.

Note 7: In addition, apply same rates and charges as specified for an ESSX-1 Main Station Line. Code Calling Equipment and auxiliary signal equipment will be provided by the customer.

Note 8: Feature Establishment Charge applicable only when answer option is provided subsequent to initial installation.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.8 Auxiliary Services (Cont'd)

B. Auxiliary Attendant Features (Cont'd)

9. Centralized Attendant Service

a. General

(1) Description

Centralized Attendant Service (CAS) allows a customer with a number of locations that are served by either a PBX or ESSX-1 system to concentrate all attendants at a single centralized location (Main). Incoming calls over a local exchange trunk to an unattended location (Branch) are routed to the main location, via a Release Link Trunk (RLT), where a CAS attendant completes the call by dialing the called party's extension number over the same Release Link Trunk facilities.

(2) Types of Equipment With Which CAS is Associated

The main location must be an ESSX-1 system that is equipped for this service and utilizes data link console operation.

The branch locations must be one of the following:

- An ESSX-1 System
- A location that has switching equipment that is customer-provided or is in an area that is served by another company can be interconnected as a branch location only if the switching equipment is compatible with the Company's.

(3) Basic Service Features

Incoming Call Identification Lamp (ICL) - A visual indication will be given for the source of all calls directed to the attendant.

Remote Hold - Enables the attendant to hold a call without holding an RLT. The call is temporarily placed on hold at the originating PBX and automatically routed to an attendant after approximately 30 seconds.

Customer Testing of Release Link Trunks - Permits each RLT to a PBX branch to be dial accessed by the centralized attendant to insure it is in service and that the transmission performance is adequate.

Attendant Call Distribution - Queues and distributes calls to the CAS attendants. This provides administrative control over the team of attendants and enables the calls from the branch locations to be handled in their approximate order of arrival, as attendant positions become available.

Attendant Recall on "Station Don't Answer" - All PBX type branch locations provide a timed reminder, generally after 30 seconds, to automatically recall the attendant if a called main station line does not answer.

(1) Release Link Trunk Terminal Equipment, Main Location			
(a) Per ESSX-1 system	$185.00	-	NA
(b) Per Release Link Trunk group[1]	50.00	-	NA
(c) Release Link Trunk, each termination	19.25	$135.55	EC6
(2) Release Link Trunk Terminal Equipment, Branch Location			
(a) Per ESSX-1 system	365.00	-	NA
(b) Per release link trunk group[1]	50.00	-	NA
(c) Release link trunk, first two terminations	38.75	36.80	EC4
(d) Release link trunk, additional terminations after the first two, each	19.25	18.40	EC5

Each of the above rate elements provide only the basic release link trunk termination equipment facilities located at the central office where the basic ESSX-1 service is provided and is in addition to other rates and charges applicable for the associated ESSX-1 service and Private Line Service and Channels.

Each Release Link Trunk termination requires 2 channels between the Main and Branch locations.

Release Link Trunk Termination Equipment charges are in lieu of Tie Line and Miscellaneous Line Termination charges.

(3) CAS Attendant

Console Equipment as specified in A112.8.8.A. for Data Link Console(s). (T)

(4) Uniform Numbering

(a) Per ESSX-1 location	16.00	-	NA
(b) Each 100 numbers or fraction thereof	11.00	-	NA
10. Dial Thru Attendant, per ESSX-1 System			
(a) Data link console operation	63.00	8.35	EWM
(b) Non-Data Link Console or key telephone system operation arranged for attendant use	63.00	7.35	EWP

Note 1: One Feature Establishment Charge applies when any number of release link trunk groups of the same type are installed at the same time at the same location.

B. Auxiliary Attendant Features (Cont'd)

16. Outgoing Trunk Queuing - WATS (OTQ) - Phase 1[1,2]

	Feature Establishment Charge	Monthly Rate	USOC
a. Common Equipment			
(1) Per OTQ Arrangement			
(a) Each	$1,321.75	$203.35	OTQ
(b) Queue, each	237.25	5.35	OTT
(c) Queue Slot, each	-	25.20	OTU
b. Optional Features			
(1) Attendant Key Control to Inhibit Inflow/Outflow[3,4]			
(a) Common Equipment for Inhibit Inflow, each	159.75	2.30	OTA
(b) Common Equipment for Inhibit Outflow, each	159.75	2.30	OTB
(2) Recorded Announcment[5]			
(a) Each	140.50	35.85	OTC
(3) Music on Queue Common Equipment[6]			
(a) Each	140.50	125.90	OTD

Note 1: The OTQ - Phase 1 feature is only available for ESSX-1 systems equipped with Customer Facility Group Network Access Registers from No. 1 ESS central offices equipped with the 1E5 or later generics. This feature can only be offered to serve main station lines (excluding the attendant) that are co-located in the same ESSX-1 as the WATS simulated facilities.

Note 2: Calls in queue may overflow to the MTS (Toll) or to tone; customer option.

Note 3: The Inhibit Inflow/Outflow optional features require separate control channel(s) between the central office and the control key(s) at the customer premises, one per Guidebook6.3(ility)22.4(0 063
