A42. INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

A42.1 ISDN - Business Service (IBS) (Cont'd)

A42.1.3 Definitions (Cont'd)

FEATURE KEY MAPS

A Feature Key Map is a software profile stored in the EWSD switch that defines the features that are available to a particular Terminal Service Profile. The switch uses this software profile to allow activation of specific features via "key Type" action and to indicate the status of these features.

DIRECTORY NUMBERS (DN)

The telephone numbers associated with B or D channel access.

- Primary Directory Number (PDN) is a directory number included with each access to a B or D channel.
- Secondary Directory Number is a directory number that is not the Primary DN on any terminal. Secondary Directory Numbers may be purchased separately.
- Shared Directory Number, either Primary or Secondary, is a directory number that appears on more than one terminal. Shared Directory Numbers may be purchased separately.
- Unique Directory Number is a Primary Directory Number that is not shared with any other B or D channel service on the same profile.

REDIRECTING NUMBER DELIVERY

- Redirecting Number Delivery (RND) is a terminating feature. If the received call has been previously forwarded, the first and last forwarding DNs will be delivered to the called party who subscribes to RND in a Redirecting Number Information Element (RNIE) unless delivery is blocked by the calling party through Per Line or Per Call Blocking. (Available in DMS-100 only)
