E2. GENERAL REGULATIONS

E2.4 Payment Arrangements and Credit Allowances (Cont'd)

E2.4.1 Payment of Rates, Charges and Deposits (Cont'd)

- G.** The Company and the IC shall work cooperatively to resolve the dispute.

If additional information from the IC would assist in resolving the dispute, the IC may be requested to provide additional information relevant to the dispute and reasonably available to the customer. This data may include, but is not limited to summarized usage data by time of day. The request for such additional information shall not affect the dispute date established pursuant to E2.4.1.F. preceding.

- H.** For purposes of E2.4.1.B.4., the resolution date is the date on which the Company completes the investigation of the dispute, and the Company's service representative notifies the IC of the disposition and notes the IC's account or when the Company forwards the amount of credit to the customer, depending upon IC preference.

- I.** At the option of the IC or end user, all nonrecurring charges associated with a Standard or Negotiated Interval Access Order may be billed over a three month period subject to the following:

- 50% of the total nonrecurring charges will be billed in the first monthly billing period after the charges are incurred, and 25% of the total nonrecurring charges plus an Extended Billing Plan Charge will be billed in each of the following two monthly billing periods. The Late Payment Penalty as outlined in E2.4.1.B preceding will not apply.
 - The Extended Billing Plan Charge is calculated at a rate of 1.0% per month or 12% annually, on the remaining balance of the nonrecurring charges.
 - The IC or end user must request extended billing at the time the Access Service Request is placed for a Standard or Negotiated Interval Access Order.
 - The IC or end user may elect to pay all or any part of the unbilled charges before the expiration of the Extended Billing Plan. If payment is received by the Company prior to the next monthly billing date, such payment will be reflected in the calculation of the remaining balance to which the Extended Billing Plan Charge will apply. In order for the IC or end user to prepay any part of the remaining balance associated with the Extended Billing Plan, the IC or end user must designate the amount of the payment to be credited to such remaining balance.
 - If the IC or end user disconnects service before the expiration of the plan period, all unbilled charges plus the Extended Billing Plan Charge, if applicable, will be included in the final bill rendered.
- (D)
- If the IC or end user fails to make any of the payments on the payment due date as set forth in Section B2. preceding, these late payment charges as specified, will apply.

E2. General Regulations

E2.5 Connections (Cont'd)

E2.5.7 Connections of Terminal Equipment or Multiline Terminating Systems to Category II Access Services (Cont'd)

B. Connections to Category II Access Services (Cont'd)

The Company will equip those voice grade Category II access (a.k.a. BellSouth SPA DS0 VG) services with the necessary arrangements on the IC or end user access premises to protect the telecommunications network from hazardous voltages and the harmful effects of longitudinal imbalance. In addition, the Company will make the necessary arrangements in its central office to protect against signal power overload resulting from violations of the minimum protection criteria specified in E2.5.10 following. Where there is evidence that IC or End User provided terminal equipment or IC or End User provided systems violate the specified minimum protection criteria, signal level protection may be provided by the Company on the IC's or end user's premises. This regulation applies to all such voice grade access (a.k.a. BellSouth SPA DS0 VG) services except those (1) placed in service on or after February 15, 1973, where the IC or End User provided terminal equipment or system applies ringing below 300 Hertz or (2) the voice grade (a.k.a. BellSouth SPA DS0 VG) services listed in C. following.

C. Minimum Protection Criteria

The minimum protection criteria specified in E2.5.10 following applies to the connection of terminal equipment, multiline terminating systems and communications systems connected to Category II access service.

At this time minimum protection criteria have not been specified for the following services due to the nature of the service and/or the type of channels and equipment used. However, the Company reserves the right to specify such criteria if required.

- Voice Grade (a.k.a. BellSouth SPA DS0 VG) Secure Communications (Type I, II, III, IV)

(D)

E2.5.8 Connections of Access Service to Communications Systems Not Subject to Part 68 of the FCC's Rules and Regulations

A. When an IC or End User provided communications system is connected to Access Service that is arranged for connection to the telecommunications network the connection may be made through:

1. A connecting arrangement provided by the Company, or
2. Registered or grandfathered terminal equipment, multiline terminating system, or protective circuitry which, either singularly or in combination assures that all the requirements of the Registration Program (including signal power) are met at the access interface.
3. In lieu of these requirements for total hardware protection, an optional, alternative method, as described in E2.5.9 following, is available for the control of signal power only.

B. Where the Access Service is arranged for connection to the common user switching equipment located in a Company central office, the connection must be:

1. Through switching equipment or
2. To an IC or End User provided communications system that is arranged to promptly return the access service to an idle (on hook) state should the communications system fail. In addition, the IC or End User must notify the Company when the communications system fails.

C. Minimum Protection Criteria as set forth in E2.5.10 following must be complied with when the connection is made through equipment or systems that are not registered.

D. Such telecommunication system may only be connected at the End User's premises provided that such telecommunications service or customer provided communications system is utilized for the origination or termination of communications at the End User's premises where the connection is made.

E7. SPECIAL ACCESS (A.K.A. BELLSOUTH SPA) SERVICE

E7.1 General (Cont'd)

E7.1.1 Rate Categories (Cont'd)

- D. Self-healing Multi-nodal Alternate Route Topology Ring (SMARTRing^{®3} service [a.k.a. BellSouth Dedicated Ring]) (Cont'd)
8. Internodal Channel
The Internodal Channel provides for the communications path between two directly connected Customer Nodes of a given SMARTRing[®] service (a.k.a. BellSouth Dedicated Ring) located (a) in the same Serving Wire Center area or (b) in the same Office Park/Campus Environment or contiguous property, located in contiguous Serving Wire Center areas. It is available with all capacities of SMARTRing[®] service (a.k.a. BellSouth Dedicated Ring) except OC-1. This rate element does not apply where Customer Nodes are adjacently connected in the same building on the same SMARTRing[®] service (a.k.a. BellSouth Dedicated Ring) for the purpose of providing additional node capacity.
 9. Channel Interface Capacity Reallocation
Channel Interface Capacity Reallocation allows the customer to reallocate STS-1, DS3 capacity interfaces at each node subsequent to the initial service installation.
- E. Channel Types
There are nine types of channels used to provide Special Access (a.k.a. BellSouth SPA) services. Each type has its own characteristics. All are subdivided by one or more of the following:
- Transmission specifications - Speed (i.e., bit rate)
 - Bandwidth - Spectrum

A basic channel and a list of available transmission parameters and channel interfaces, those that they desire to meet specific communications requirements can be ordered.

For purposes of ordering channels, each has been identified as a type of Special Access (a.k.a. BellSouth SPA) service. However, such identification is not intended to limit the use of the channel nor to imply that the channel is limited to a particular use. For example, if an end user's equipment is capable of transmitting voice over a channel that is identified as Metallic² (a.k.a. BellSouth SPA Metallic) service in this Tariff, there is no restriction against doing so.

Following is a brief description of each type of channel:

Metallic² (a.k.a. BellSouth SPA Metallic) - a channel for the transmission of low speed varying signals at rates up to 30 baud.

Telegraph Grade² (a.k.a. BellSouth SPA Telegraph) - a channel for the transmission of binary signals at rates of 0 to 75 baud or 0 to 150 baud.

Voice Grade² (a.k.a. BellSouth SPA DS0 VG) - a channel for the transmission of analog signals within an approximate bandwidth of 300-3000 Hz.

WATS Access Line² (a.k.a. BellSouth SPA WATS Line) (WAL) - a channel from a customer designated premises to a WATS serving office for 800, WATS, or similar services.

(DELETED)

Commercial Quality Video (a.k.a. BellSouth SPA Commercial Quality Video) - a channel for the transmission of video signal(s) for non-broadcast use. The service includes two associated 12 kHz audio signals. (T)

Note 1: **(DELETED)** (T)

Note 2: Effective June 30, 2021, this Service will no longer be available for purchase by new or existing customers. In addition, requests to move, add, change, or renew existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rates until the service is discontinued. The Company currently plans to discontinue this service on or after June 30, 2024.

Note 3: Effective on or after December 1, 2021, neither new nor existing customers will be permitted to purchase new SMARTRing Service (Service). In addition, (A) Service Payment Plans greater than 12-months in length will no longer be available; and (B) requests to move, add, change, upgrade, or downgrade existing service arrangements will not be accepted, with the following exceptions: (1) existing customers will be permitted to modify their existing Service and will be able to add new circuits to their existing Service, but will not be permitted to add new nodes in any locations; and (2) any such new circuits will be subject to the customer's existing term payment plan or term agreement for the Service to which they are added. Following the expiration of a customer's existing term agreement, Service will be provided on a month-to-month basis at the applicable Month-to-Month rates until the Service is discontinued.

Effective November 30, 2023, unless specified to the contrary in their existing Service agreements, existing customers may not renew Term Payment Plans or term agreements for Service. In addition, no move, add, or change orders of any type will be accepted.

E7. SPECIAL ACCESS (A.K.A BELLSOUTH SPA) SERVICE

E7.2 Service Descriptions for Special Access (*a.k.a. BellSouth SPA*) Service (Cont'd)

E7.2.2 Digital Services (Cont'd)

B. High Capacity (a.k.a. BellSouth SPA High Capacity) Service (Cont'd)

4. Optional Features and Functions (Cont'd)

c. Channelization

(1) DS3 to DS1

An arrangement that channelizes a 44.736 Mbps channel to 28 DS1 channels.

(2) DS2 to DS1

An arrangement that channelizes a 6.312 Mbps channel to four DS1 channels.

(3) DS1C to DS1

An arrangement that channelizes a 3.152 Mbps channel to two DS1 channels.

(4) DS1 Basic Channelization System

An arrangement that channelizes a 1.544 Mbps channel to a maximum of twenty-four 64.0 Kbps channels that may be used to activate both analog and digital services, e.g., voice grade, and digital data access service. A DS1 Basic Channelization System requires a Central Office Channel Interface for each channel of lesser capacity. (D)

(5) DS0 Basic Channelization System²

An arrangement that converts a 64.0 Kbps channel to subspeeds of up to twenty 2.4 Kbps, ten 4.8 Kbps, or five 9.6 Kbps channels. A DS0 Basic Channelization System requires a Central Office Channel Interface for each channel of lesser capacity.

d. Channel Interface

(1) DS1 Level Central Office Channel Interface

An arrangement for the connection of DS1 (1.544 Mbps) channels to higher order DS3 (44.736 Mbps) services in Company central office locations.

(2) DS1 Level Customer Channel Interface

An arrangement for the connection of DS1 (1.544 Mbps) channels to higher order DS3 (44.736 Mbps) services at customer locations.

(3) DS0 Level Central Office Channel Interface²

An arrangement for the connection of VG/DS0 (2.4 - 64.0 Kbps) channels to higher order DS1 (1.544 Mbps) services in Company central office locations.

(4) Subrate Level Central Office Channel Interface²

An arrangement for the connection of subrate (2.4 - 9.6 Kbps) channels to higher order DS0 (64.0 Kbps) services in Company central office locations.

Note 1: **(DELETED)**

(T)

Note 2: Effective June 30, 2021, this Service will no longer be available for purchase by new or existing customers. In addition, requests to move, add, change, or renew existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rates until the service is discontinued. The Company currently plans to discontinue this service on or after June 30, 2024.

E7. SPECIAL ACCESS (A.K.A. BELL SOUTH SPA) SERVICE

E7.4 Rate Regulations

This section contains the specific regulations governing the rates and charges that apply for Special Access (a.k.a. BellSouth SPA) service.

E7.4.1 Types of Rates and Charges

- A. There are two types of rates and charges. These are monthly rates and nonrecurring charges. In addition, there are three types of nonrecurring charges. The rates and charges are described as follows:

1. Monthly Rates

Monthly rates are flat recurring charges that apply each month or fraction thereof that a Special Access (a.k.a. BellSouth SPA) service is provided. For billing purposes, each month is considered to have thirty days.

Digital Data Access⁽³⁾ (a.k.a. BellSouth SPA DS0 Digital Data) service is offered under two contract plans. Contract plan rates are available in payment periods from 24 to 42 months and in payment periods 43 to 72 months under conditions specified in the Channel Services Payment Plan (CSPP) in E2.4 of this Tariff.

A termination charge is applicable at the date of termination if the IC terminates or disconnects the service prior to fulfilling the period of the contract plan except as specified in b. and c. following. The termination charge is determined by multiplying the contracted monthly rates times the number of months the service has been installed, multiplied by a factor. The factor is fifty percent (50%) for contracts that have been in effect twelve months (12) or less, or twenty percent (20%) for contracts that have been in effect longer than twelve months (12). An example is provided in a. following.

The following list identifies the individual Special Access (a.k.a. BellSouth SPA) services provided under Section E7. of this Tariff which are eligible for credit of nonrecurring charges under "Service Installation Guarantee" found in E2.4.10 of this Tariff. Customers with these services are not eligible for the Service Installation Guarantee when the requested installation, move or rearrangement service order interval is four days or less as measured from the Application Date of the order.

- Voice Grade⁽³⁾ (a.k.a. BellSouth SPA DS0 VG)

- **(DELETED)**

- Digital Data Access (a.k.a. BellSouth SPA DS0 Digital Data) service⁽¹⁾⁽³⁾

- High Capacity⁶ (a.k.a. BellSouth SPA High Capacity) service

- SMARTRing⁽⁵⁾ service (a.k.a. BellSouth Dedicated Ring)

Provided, however, that the following services are not eligible for such credit.

- BellSouth SPA CNM - FlexServ service

- BellSouth Metro Ethernet⁽⁴⁾ service

- a. An IC subscribes to Digital Data Access⁽³⁾ (a.k.a. BellSouth SPA DS0 Digital Data) service using the 24 to 42 month payment plan. The contract plan period is for 30 months. The subscriber terminates the service after 12 months. The total liability is 30 months times the monthly rate. The amount is then reduced to reflect the number of months the subscriber has had the service, which in this example is 12 months. Therefore, the termination charge is fifty percent (50%) of this amount calculated as follows:

$$\text{Termination Charge} = .50 \times [(30 \text{ months} \times \text{monthly rate}) - (12 \text{ months} \times \text{monthly rate})]$$

Note 1: The Data Over Voice Channel optional feature is not eligible for such credit.

Note 2: **(DELETED)**

Note 3: Effective June 30, 2021, this Service will no longer be available for purchase by new or existing customers. In addition, requests to move, add, change, or renew existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rates until the service is discontinued. The Company currently plans to discontinue this service on or after June 30, 2024.

Note 4: Effective on or after August 22, 2021, this Service will no longer be available for purchase by new or existing customers. In addition, requests to move, add, change, or renew existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rates until the service is discontinued. The Company currently plans to discontinue this service on or after March 31, 2023.

Note 5: Effective on or after December 1, 2021, neither new nor existing customers will be permitted to purchase new SMARTRing Service (Service). In addition, (A) Service Payment Plans greater than 12-months in length will no longer be available; and (B) requests to move, add, change, upgrade, or downgrade existing service arrangements will not be accepted, with the following exceptions: (1) existing customers will be permitted to modify their existing Service and will be able to add new circuits to their existing Service, but will not be permitted to add new nodes in any locations; and (2) any such new circuits will be subject to the customer's existing term payment plan or term agreement for the Service to which they are added. Following the expiration of a customer's existing term agreement, Service will be provided on a month-to-month basis at the applicable Month-to-Month rates until the Service is discontinued.

Effective November 30, 2023, unless specified to the contrary in their existing Service agreements, existing customers may not renew Term Payment Plans or term agreements for Service. In addition, no move, add, or change orders of any type will be accepted.

Note 6: Effective November 1, 2022, customers may not establish new term plans of greater than 24 months for High Capacity Service Channel Service Payment Plans.

E7. SPECIAL ACCESS (A.K.A. BELL SOUTH SPA) SERVICE

E7.4 Rate Regulations (Cont'd)

E7.4.2 Surcharge for Special Access (a.k.a. BellSouth SPA) Service

A. General

In addition to the rates and charges described in E7.4.1 preceding, there is a monthly surcharge of \$25.00 that applies to the termination of Sub-Voice, Voice Grade² (a.k.a. BellSouth SPA DS0 VG) and equivalent voice grade² Special Access (a.k.a. BellSouth SPA) services (e.g., the surcharge for a group level service would be \$300.00 or 12 x \$25.00). For Narrowband, Voice Grade² (a.k.a. BellSouth SPA DS0 VG) and Digital Data Access² (a.k.a. BellSouth SPA DS0 Digital Data) multipoint services, the surcharge applies for each end user location on the service. This surcharge is to compensate the Company for use of the local exchange network by Special Access (a.k.a. BellSouth SPA) services that are classified as intrastate jurisdiction.

B. Exceptions to the Surcharge Application

Recognizing that not all services can utilize the local exchange network, certain uses of Special Access (a.k.a. BellSouth SPA) service are exempt from the surcharge. Following is a listing of the exempt categories:

1. Any termination of an analog service that is used for television transmission. (D)
2. Any termination of a service that is used for Telex service.
3. Any termination of a service that by nature of its operating characteristics could not make use of common lines. The determination of such usage is made based upon the arrangement at the subscriber's end of the channel.
4. Any termination of a WATS² (a.k.a. BellSouth SPA WATS Line) or BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening Service access line.

C. Self Reporting

In order for the Company to determine the application of the surcharge with respect to specific services, the IC must report the intended use of all services when placing orders for Special Access (a.k.a. BellSouth SPA) service. In addition, when ordering high capacity analog or digital services, the IC must also report the use for each voice equivalent channel of the high capacity service. When any service or channel of a service is reported to be the used in any manner described in B. preceding, the surcharge will not apply. If the intended use is not reported, the Company will automatically bill the appropriate surcharge on each Special Access (a.k.a. BellSouth SPA) service installed.

The Company reserves the right to audit the use of the service at any time. If the service is found to be used for a type of operation other than that reported by the IC, and a surcharge would apply for that type of operation, the Company will notify the IC and will begin to apply the surcharge.

D. A Message Station Equipment Recovery Charge is a charge to recover that portion of message station equipment that is assigned to Special Access (a.k.a. BellSouth SPA) service.

This charge is assessed only to those customers to which the Special Access (a.k.a. BellSouth SPA) Surcharge applies. The rate for the Message Station Equipment Recovery Charge is set forth in E7.5.11.

E7.4.3 Minimum Periods

Special Access (a.k.a. BellSouth SPA) service is provided for a specified minimum period *as stated in E5.2.5*.

Minimum periods and minimum period charges are described in detail in *Section E5*. preceding.

E7.4.4 Moves

A. A move involves a change in the physical location of one of the following:

1. The point of interface at the IC terminal location
2. The IC terminal location
3. The network interface at the end user premises
4. The end user premises
5. The WATS² (a.k.a. BellSouth SPA WATS Line) serving office (WATS Access Line² (a.k.a. BellSouth SPA WATS Line) service only)

Note 1: *(DELETED)*

Note 2: Effective June 30, 2021, this Service will no longer be available for purchase by new or existing customers. In addition, requests to move, add, change, or renew existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rates until the service is discontinued. The Company currently plans to discontinue this service on or after June 30, 2024.

(T)

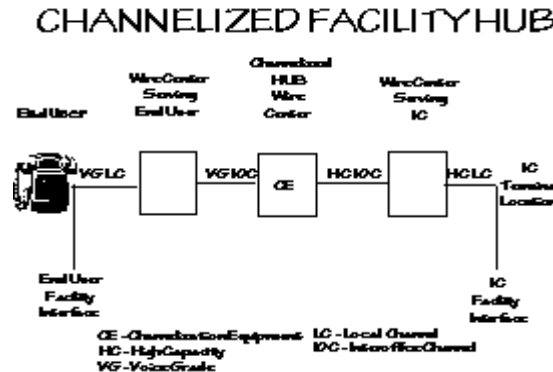

E7. SPECIAL ACCESS (A.K.A. BELL SOUTH SPA) SERVICE

E7.4 Rate Regulations (Cont'd)

E7.4.7 Facility Hubs

1. An IC has the option of ordering high capacity analog or digital facilities (i.e., DS1, DS1C, DS2 or DS3) to a facility Hub for channelizing to individual services requiring lower capacity facilities (e.g., Voice² (a.k.a. BellSouth SPA DS0 VG), etc.).

(D)

2. The Company will designate the facility Hub locations. Different locations may be designated as Hubs for different facility capacities, e.g., channelization from digital to digital may occur at one location while channelization from digital to analog may occur at a different location. The IC will choose the desired Hub from a list that the Company will make available.
3. Some of the types of channelization provided include the following:
 - From higher to lower bit rate
 - From higher to lower bandwidth
 - From digital to Voice Grade² (a.k.a. BellSouth SPA DS0 VG) service
4. The transmission performance for the end to end service provided from the IC terminal location to the end user premises will be that of the lower capacity or bit rate. For example, when a 1.544 Mbps service is channelized to voice frequency channels, the transmission performance will be voice grade², not high capacity.
5. The Company will commence billing the monthly rate for the Local Channel and the Interoffice Channel for the high capacity facility to the Hub as soon as it is provided, even though individual services utilizing those facilities may not be ordered and installed until a later date. If the IC has designated the type of channelization to be provided, the nonrecurring charge for the Basic Channelization System will be billed to the IC at that time and the billing for the monthly rate will begin. DS1 and DS0 Basic Channelization Systems² require a Central Office Channel Interface for activation of each lesser capacity channel. DS3 to DS1 channelization arrangements, for transport of intrastate DS1 service high capacity channels via services such as LightGate service (a.k.a. BellSouth SPA Point to Point Network) and SMARTRing³ service (a.k.a. BellSouth SPA Dedicated Ring), require a DS1 channel interface for activation of each DS1 channel.
6. Individual service rates (by service type) will apply for the Local Channel, and additional Interoffice Channel and Central Office Channel Interface(s) (as required) for each channelized service. These will be billed to the IC as each individual service is installed.

(D)

Note 1: (DELETED)

(T)

Note 2: Effective June 30, 2021, this Service will no longer be available for purchase by new or existing customers. In addition, requests to move, add, change, or renew existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rates until the service is discontinued. The Company currently plans to discontinue this service on or after June 30, 2024.

Note 3: Effective on or after December 1, 2021, neither new nor existing customers will be permitted to purchase new SMARTRing Service (Service). In addition, (A) Service Payment Plans greater than 12-months in length will no longer be available; and (B) requests to move, add, change, upgrade, or downgrade existing service arrangements will not be accepted, with the following exceptions: (1) existing customers will be permitted to modify their existing Service and will be able to add new circuits to their existing Service, but will not be permitted to add new nodes in any locations; and (2) any such new circuits will be subject to the customer's existing term payment plan or term agreement for the Service to which they are added. Following the expiration of a customer's existing term agreement, Service will be provided on a month-to-month basis at the applicable Month-to-Month rates until the Service is discontinued.

Effective November 30, 2023, unless specified to the contrary in their existing Service agreements, existing customers may not renew Term Payment Plans or term agreements for Service. In addition, no move, add, or change orders of any type will be accepted.
