## A142. OBSOLETE SERVICE OFFERINGS-INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

### A142.4 ISDN - Business Service (IBS) (Cont'd)

#### A142.4.3 Definitions (Cont'd)

##### FEATURE KEY MAPS

A Feature Key Map is a software profile stored in the EWSD switch that defines the features that are available to a particular Terminal Service Profile. The switch uses this software profile to allow activation of specific features via "key Type" action and to indicate the status of these features.

##### DIRECTORY NUMBERS (DN)

The telephone numbers associated with B or D channel access.

- Primary Directory Number (PDN) is a directory number included with each access to a B or D channel.
- Secondary Directory Number is a directory number that is not the Primary DN on any terminal. Secondary Directory Numbers may be purchased separately.
- Shared Directory Number, either Primary or Secondary, is a directory number that appears on more than one terminal. Shared Directory Numbers may be purchased separately.
- Unique Directory Number is a Primary Directory Number that is not shared with any other B or D channel service on the same profile.

##### REDIRECTING NUMBER DELIVERY

- Redirecting Number Delivery (RND) is a terminating feature. If the received call has been previously forwarded, the first and last forwarding DNs will be delivered to the called party who subscribes to RND in a Redirecting Number Information Element (RNIE) unless delivery is blocked by the calling party through Per Line or Per Call Blocking. (Available in DMS-100 only)
