## **E15. INDIVIDUAL LOCAL EXCHANGE COMPANY (LEC) ACCESS SERVICE TARIFF OFFERINGS**

### **E15.1 General Description**

Services provided in this section of the Access Service Tariff are LEC specific tariff offerings. The LEC providing the service offering identified in this section will be solely responsible for the provision of such service, including billing, customer notification and customer contact. The LECs that concur in other sections of this Tariff, unless otherwise noted in this section, do not offer or concur in any LEC specific tariff offerings in Section E15.

### **E15.2 Central Telephone Company - Public Station - Two Digit Access Code**

#### **E15.2.1 Service Description**

- A. Public Station - Two Digit Access Code is a service whereby an interexchange carrier (IC) can subscribe to abbreviated access dialing on public coin pay stations. The abbreviated dialing enables the end user to access an IC's service without dialing the IC's prescribed access code.
- B. Each IC subscribing to this service will be assigned a two digit access code. Dialing Instructions will be posted at each public coin pay station location having Two Digit Access Code Service.
- C. The sequence for listing participating IC names on the instruction cards located at each set will be determined by the Company.
- D. The minimum service period for Two Digit Access Code Service is one year.
- E. Nonrecurring charges will be applicable to each IC's initial establishment of Two Digit Access Code arrangement. Changes and additions to Two Digit Access Code arrangements after the initial establishment shall also be subject to the applicable business nonrecurring charges for service order, line connection and premises visit per public station as described in the Company's General Subscriber Service Tariff.
- F. Nonrecurring charges will not apply to Company initiated moves or changes.
