C5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS
INTERCONNECTION SERVICE

5.1 GENERAL

This section sets forth the regulations and order related charges for Access Orders for Switched and Special Access and Wireless Interconnection Services. These charges are in addition to other applicable charges as set forth in other sections of this tariff.

An Access Order is an order to provide the customer with Switched and Special Access Service and Wireless Interconnection Service or to provide changes to existing services.

5.1.1. ORDERING CONDITIONS

A customer may order any number of services of the same type and between the same premises on a single Access Order. All details for services for a particular order must be identical except for those for multipoint service.

The customer shall provide all the information necessary for the Utility to provide and bill for the requested service. In addition to the order information required in C5.2 following, the customer must also provide:

- Customer name and premises address(es)
- Billing name and address (when different from customer name and address).
- Customer contact name(s) and telephone number(s) for the following provision activities: order negotiation, order confirmation, interactive design, installation and billing.
- Orders for Entrance Facilities or Direct Trunked Transport shall be ordered at a DS1 or DS3 level when ordered separately from Feature Groups.
- Orders for Entrance Facilities or Direct Trunked Transport in conjunction with Feature Groups shall be ordered at a DS0/DS1 level. The number of DS1s provisioned will be determined by the Utility based on the number of lines/trunks ordered by the customer.
- Direct Trunked Transport shall be ordered with or without Entrance Facilities.
- Tandem Switched Transport shall be ordered in trunks.

Orders for ALA or Feature Group A Switched Access Service shall be in lines. (C)

Orders for ATA950 or Feature Group B Switched Access Service shall be in trunks. (C)

Order for ATANEA or Feature Group C (AT&T only) or ATAXXX or Feature Group D Switched Access Service shall be in HMCs or trunks. (C)
(C)

Orders for Wireless Interconnection Service shall be in trunks.

Issued: June 14, 2002
Effective:
Advice No.: 1880

C5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS
INTERCONNECTION SERVICE

5.1 GENERAL (Cont'd)

5.1.1 ORDERING CONDITIONS (Cont'd)

Orders for virtual end-to-end connections ordered by the customer, shall be expressed in terms of Data Line Connection identifiers (DLCIs) and shown on the port order. The customer must order the Channel Termination (from Section 7, following) at the same bandwidth speed.

The Utility will establish a confirmed due date when the customer has provided a firm commitment for the service and sufficient information to allow for the processing of the Access Order. The date on which the confirmed due date is established is considered to be the Application Date. The Utility will provide a firm order confirmation to the customer and will advise the customer of the Application Date and the Confirmed Due Date.

The time required to provision the service (i.e., the interval between the Application Date and the Confirmed Due Date) is known as the service interval. Such intervals will be established in accordance with service date interval guidelines.

Schedules that specify installation intervals will also specify the services and quantities of the services that can be provided as specified in Section 5.1.1.1(B) and (C). The Utility will adhere to the intervals as specified in Section 5.2.2(D)(1), except during circumstances beyond its direct control (i.e., acts of God, governmental requirements, work stoppage and civil commotions). Standard Intervals only apply when facilities and equipment are available.

(N)
(N)

Certain Utility critical dates are associated with the service interval. These dates provide a means to determine the provisioning costs incurred at any point during the service interval. The critical dates for each Access Order will be provided to the customer on the firm order set forth in C5.2.3 following. Cancellation charges are calculated by determining the provisioning costs the Utility has incurred as of the last critical date completed.

Access Service

C5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS INTERCONNECTION SERVICE

5.1 GENERAL (Cont'd)

5.1.1 ORDERING CONDITIONS (Cont'd)

Access Services will be installed during Utility business days. If a customer requests that installation be done outside of normally scheduled work hours, and the Utility agrees to this request, the customer will be subject to applicable charges described in 13.2 (Additional Labor).

5.1.1.1 Negotiated Interval

The Utility will negotiate a service date interval with the customer when:

- (A) There is no standard interval for service, or
- (B) The quantity of Access Services ordered exceeds the quantities specified in Section 5.2.2(D) (1), or
- (C) The customer requests a service date beyond the applicable standard interval service date.

Analog/Voice Grade/DS0	10 days
DS1	7 days
DS3	15 days

(N)

The Utility will offer a service date based on the type and quantity of Access Services the customer has requested. The negotiated interval may not exceed by more than six months the standard interval service date, or, when there is not a standard interval, the Utility offered service date.

C5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS
INTERCONNECTION SERVICE

(N)

5.1 GENERAL (Cont'd)

5.1.1 ORDERING CONDITIONS (Cont'd)

- (2) The following criteria are satisfied for each combined circuit, including each DS1 circuit, each DS1 enhanced extended link, and each DS1-equivalent circuit on a DS3 enhanced extended link:
- (i) Each circuit to be provided to each end user customer will be assigned a local number prior to the provision of service order to that circuit;
 - (ii) Each DS1-equivalent circuit on a DS3 enhanced extended link must have its own local number assignment, so that each DS3 must have at least 28 local voice numbers assigned to it;
 - (iii) Each circuit to be provided to each end user customer will have 911 or E911 capability prior to the provision of service over that circuit;
 - (iv) Each circuit to be provided to each end user customer will terminate in a collocation arrangement that meets the requirements detailed below;
 - (v) Each circuit to be provided to each end user customer will be served by an interconnection trunk that meets the requirements detailed below;
 - (vi) For each 24 DS1 enhanced extended links or other facilities having equivalent capacity, the requesting telecommunications carrier will have at least one active DS1 local service interconnection trunk that meets the requirements detailed below; and
 - (vii) Each circuit to be provided to each end user customer will be served by a switch capable of switching local voice traffic.

Note 1.: In the event the commission or a court, pursuant to any regulatory or judicial review of the Commission's Review of the Section 251 Unbundling Obligations of Incumbent Local Exchange Carriers, Report and Order and Order on Remand and Further Notice of Proposed Rulemaking, CC Docket No. 01-338, FCC 03-36, para. 582 (released Aug 21, 2003) (Triennial Review Order), vacates, stays, remands, reconsiders, or rejects the portion of the Triennial Review Order requiring ILECs to permit commingling, the terms and conditions of this tariff authorizing commingling, which are identified with a footnote, shall cease to be effective as of the effective date of the Commission order or the issuance of the court's mandate. In that event, the Telephone Company will provide customers that have commingled UNE(s) and/or UNE Combination(s) with wholesale services obtained under this Tariff written notice that, within 30 days, customers must either convert such UNE(s) or UNE Combination(s) to a comparable service, or disconnect such UNE(s) and/or UNE Combination(s) from those wholesale services. Failure to provide the Telephone Company instructions to convert or disconnect such UNE(s) and/or UNE Combination(s) within 30 days, as described above, shall be deemed authorization to convert the UNE(s) and/or UNE Combination(s) to comparable access services at month-to-month rates.

Issued: December 17, 2003
Effective:
Advice No.: 1924

Issued by
Sylvia Samano
President-Nevada

C5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS
INTERCONNECTION SERVICE

5.1 GENERAL (Cont'd)

5.1.1 ORDERING CONDITIONS (Cont'd)

(3) A collocation arrangement meets the requirements in (iv) above if it is: (T)

- (1) Established pursuant to section 251(c)(6) of the Act and located at the Utility's premises within the same LATA as the customer's premises, when the Utility is not the collocator; and
- (2) Located at a third party's premises within the same LATA as the customer's premises, when the Utility is the collocator.

An interconnection trunk meets the requirements of (v) and (vi) above in this certification if the requesting telecommunications carrier will transmit the calling party's number in conjunction with calls exchanged over the trunk and the trunk is located in the same LATA as the customer premises served by the EEL.⁽¹⁾

5.1.1.1 Negotiated Interval

The Utility will negotiate a service date interval with the customer when:

- (A) There is no standard interval for service, or
- (B) The quantity of Access Services ordered exceeds the quantities specified in Section 5.2.2(D)(1), or
- (C) The customer requests a service date beyond the applicable standard interval service date.

Analog/Voice Grade/DS0	10 days
DS1	7 days
DS3	7 days

The Utility will offer a service date based on the type and quantity of Access Services the customer has requested. The negotiated interval may not exceed by more than six months the standard interval service date, or, when there is not a standard interval, the Utility offered service date. (C)

Note 1.: In the event the commission or a court, pursuant to any regulatory or judicial review of the Commission's Review of the Section 251 Unbundling Obligations of Incumbent Local Exchange Carriers, Report and Order and Order on Remand and Further Notice of Proposed Rulemaking, CC Docket No. 01-338, FCC 03-36, para. 582 (released Aug 21, 2003) (Triennial Review Order), vacates, stays, remands, reconsiders, or rejects the portion of the Triennial Review Order requiring ILECs to permit commingling, the terms and conditions of this tariff authorizing commingling, which are identified with a footnote, shall cease to be effective as of the effective date of the Commission order or the issuance of the court's mandate. In that event, the Telephone Company will provide customers that have commingled UNE(s) and/or UNE Combination(s) with wholesale services obtained under this Tariff written notice that, within 30 days, customers must either convert such UNE(s) or UNE Combination(s) to a comparable service, or disconnect such UNE(s) and/or UNE Combination(s) from those wholesale services. Failure to provide the Telephone Company instructions to convert or disconnect such UNE(s) and/or UNE Combination(s) within 30 days, as described above, shall be deemed authorization to convert the UNE(s) and/or UNE Combination(s) to comparable access services at month-to-month rates.

C5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS
INTERCONNECTON SERVICE

5.1 GENERAL

5.1.2 PROVISIONS OF OTHER SERVICES

A. REGULATIONS

1. In addition to Switched and Special Access services, other services offered under the provisions of this tariff may be ordered with an Access Order or as set forth in 2. following. The rates and charges for these services, as set forth in other sections of this tariff, will apply in addition to the ordering charges set forth in this section and the rates and charges for the Access Service with which they are associated.
2. With the agreement of the Utility, other services set forth in 1. preceding may subsequently be added to the order at any time, up to and including the service date for the Access Service. When added subsequently, charges for a design change as set forth in C5.2.2.C. following will apply when an Engineering review is required.
3. Additional Engineering is not an ordering option, but will be applied to an Access Order when the Utility determines that Additional Engineering is necessary to accommodate a customer request. Additional Engineering will only be required as set forth in C13.1 following. When it is required, the customer will be so notified and will be furnished with a written statement setting forth the justification for the Additional Engineering as well as an estimate of the charges. If the customer agrees to the Additional Engineering, a firm order will be established. If the customer does not want the service or facilities after being notified that Additional engineering of Utility facilities is required, the order will be withdrawn and no charges will apply. Once a firm order has been established, the total charge to the customer for the Additional Engineering may not exceed the estimated amount by more than 10%.

The regulations, rates and charges for Additional Engineering are as set forth in C13.1 following and are in addition to the regulations, rates and changes specified in this section. (T)

5.1.3 SPECIAL CONSTRUCTION

The regulations, rates and charges for Special Construction are set forth in Pacific Bell's Tariff F.C.C. 2 and are in addition to the regulations, rates change charges specified in this section. (T)

President-Nevada

C5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS
INTERCONNECTION SERVICE

5.2 ACCESS ORDER

An Access Order is used by the Utility to provide to a customer Access Service as follows:

- Switched Access Services as set forth in C6. following,
- Special Access Services as set forth in C7. following, and
- Other Services as set forth in C5.1.2 preceding.
- Wireless Interconnection Service as set forth in C18.

A. The following applies when placing an order for all Switched Access Services:

1. When ordering EF the customer shall specify:

- a. Whether DSO, DS1 or DS3.
- b. The multiplexing required for DS3 to DS1 or DS1 to DSO.
- c. Customer designated premises, hub, type of service, Interface and technical specifications.

2. When ordering DTT the customer shall specify:

- a. Whether DSO, DS1 or DS3.
- b. The multiplexing required for DS3 to DS1 or DS1 to DSO.
- c. Customer designated premises, hub, switch location (i.e., Access Tandem or End Office), type of service, Interface and technical specifications.
- d. The channel facility assignment when Direct Trunked Transport is interconnected with an existing Entrance Facility.

3. When ordering TST the customer shall specify:

- a. The number of trunks.
- b. The Access Tandem location.
- c. Switched Transport options and Local Switching options desired.
- d. Customer designated premises, type of service, Interface and technical specifications.
- e. The channel facility assignment when Tandem Switched Transport is interconnected with an existing Entrance Facility.

C5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS
INTERCONNECTION SERVICE

5.2 ACCESS ORDER

4. For Feature Group A Lines, the customer shall specify:
- a. the number of lines and the first point of switching (i.e., dial tone office),
 - b. the directionality of the service and the Switched Transport options and Switching options desired,
 - c. whether the off-hook supervisory signalling is provided by the customer's equipment before the called party answers, or is forwarded by the customer's equipment when the called party answers,
 - d. which lines are to be arranged in multiline hunt group arrangements and which lines are to be provided as single lines.
5. For Feature Group B, C and D Trunks, the customer shall specify:
- a. the number of trunks and the end office when direct routing to the end office is desired, or the access tandem switch when routing is desired via an access tandem switch, and the desired Switched Transport and Local Switching options,
 - b. When ordering FGB, FGC, or FGD trunks to an access tandem, the customer has the option to provide the Utility an estimate of the amount of traffic it will generate to and/or from each end office subtending the access tandem to assist the Utility in its own efforts to project further facility requirements,
 - c. the customer is responsible to assure that sufficient access facilities have been ordered to handle its traffic,
 - d. the traffic type using the same categories as described in 6.1.1(C) following, to enable efficient provisioning and billing functions.

C5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS
INTERCONNECTION SERVICE

5.2 ACCESS ORDER (Cont'd)

For Feature Group D Switched Access Service with Common Channel Signaling Access Capability (CCSAC), the customer shall work cooperatively with the Telephone Company to determine the number of SS7 Signaling Connections the customer must order to handle its signaling traffic. The customer shall reference existing SS7 Signaling Connections or related Signaling Connection orders. The customer must also provide any CCSAC Common Switching optional features.

For Feature Group D trunks ordered with SS7 Signaling, the customer shall provide STP point codes, switching point codes, trunk circuit identification codes, and switch type.

For SS7 Signaling Connections, the customer shall specify the level of diversity in its network, as defined in Bellcore Common Channel Signaling Network Specification Technical Reference TR-TSV-000905. Customers who specify signaling point interface premises where utilities meeting these requirements do not exist have the option of ordering Special Construction out of Pacific Bell's Tariff F.C.C. No. 2.

(T)

CCSAC Testing requirements are as described in section 6.1.7 following.

All orders for CCSAC and SS7 Signaling Connections will be provisioned on negotiated service intervals.

Issued: October 24, 2005
Effective:
Advice No.: 1983

Sylvia Samano
President-Nevada

C5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS
INTERCONNECTION SERVICE

5.2 ACCESS ORDER (Cont'd)

For 800 or 900 Access Service, the customer shall order in the same manner which is set forth preceding for ordering Feature Group D. Additionally, when new NXX(s) are to be opened in the LATA or when existing NXX(s) are to be deleted, and such change is to occur coincident with the service date established for the order, the customer shall provide such information when placing the order for service. If the change is to occur absent the requirement for additional capacity (i.e., busy hour minutes of capacity or quantities of trunks), the customer shall notify the Utility of the change as set forth in C6.6.1 following.

(L)

All 800 or 900 number assignments and administration shall be in accordance with the North American Numbering Plan (NANP).

Special Access Service may be ordered for connection with FGA, FGB, FGC or FGD Switched Access Service at Utility designated WATS Serving Offices (WSOs) for the provision of WATS or WATS-type Services and may be ordered separately by a customer other than the customer which orders the FGA, FGB, FGC or FGD Switched Access Service. For the Special Access Service the customer shall specify the customer designated premises at which the Special Access Service terminates, the type of line (i.e., two-wire or four-wire), the type of calling (i.e., originating terminating, or two way) and the type of Supervisory Signaling. When the optional screening, switching and/ or recording functions are not provided at the customer serving wire center, Channel Mileage as set forth in C7.2.1 following, must be ordered between that wire center and the nearest WSO where the screening, switching and/or recording functions can be provided.

C5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS
INTERCONNECTION SERVICE

5.2 ACCESS ORDER (Cont'd)

- For Directory Assistance Service, the customer shall specify which Feature Group B, C or D Switched Access Service or Wireless Interconnection Service is to be associated with the Directory Assistance Service. The customer then specifies the Directory Transport options. (T)
- For originating 1+ or 011+ Sent-Paid traffic from a Utility pay telephone, the customer must specify the equal access end offices they want to serve. The customer will determine the number of trunks and the routing, either direct or to the coin tandem, when ordering Exchange Access Operator Service System (EAOSS) trunks. When ordering Modified Operator Services (MOS) trunks, the customer will determine the number of direct trunks from each designated equal access end office to their specified location. MOS trunks are not provisioned via the access or coin tandems. The customer is responsible for providing all other operator services signaling capabilities, as described in the Pacific Bell Network Interface Document PUB L-780085-NB. (L)
- B. The following applies when placing an order for Special Access Services: (C)
 - For all Special Access Services, the customer must specify the customer designated premises or hubs involved, the type of service (e.g. Voice Grade, High Capacity, etc.), the channel interface, technical specification package and optional features and functions desired. For multipoint services, the channel interface at each premises may, at the request of the customer, be different but all such interfaces shall be compatible.
 - For WATS Access Line Service, the customer must also specify the type of calling (i.e., originating only, terminating only or two way calling) for which service is to be provided. Additionally, when the wire center which serves the customer premise is not a WATS serving office, the Utility will provide the service to the nearest wire center where the screening function exists. In these circumstances, the customer will be so notified and the order will be changed to designate the appropriate premises. No service order change charge will apply. (L)

(T)

5.2 ACCESS ORDER (Cont'd)

Where the Special Access Service is exempt from the Special Access surcharge, as set forth in C7.3 following the customer shall furnish with the order the certification as set forth in C7.3.3 following.

(L)
|
(L)

- For Wireless Interconnection Service, the customer shall specify the number of trunks and the end office or access tandem switch. The customer is responsible to assure that sufficient access facilities have been ordered to handle its traffic. The traffic types must also be specified using the same categories as described in C18.2.2 to enable efficient provisioning and billing functions.

(N)
|
(N)

5.2.1 ACCESS ORDER SERVICE DATE INTERVALS

The Utility will provide the Access Service in accordance with the customer's requested service date, subject to the following conditions:

A. STANDARD INTERVAL

The Utility shall make available to all customers, upon request, a schedule of applicable service intervals for Switched and Special Access Services. The schedule shall specify the applicable service interval for services and the quantities of services that can be provided by a requested service date. Any associated material will be provided upon request and within a reasonable period of time.

The Utility will not accept orders for service dates which exceed the applicable service date by more than six months.

All part-time Video and Program Audio services are subject to a service inquiry. Service inquiry is a request to the Utility to determine if facilities exist to provide the service ordered and to determine the service date on which service can be provided to the customer.

Access Services will be installed during Utility business days. If a customer requests that installation be done outside of scheduled work hours, and the Utility agrees to this request, the customer will be subject to applicable Additional Labor Charges as set forth in C13.2.6.A. following.

R. C. Blanz
President

5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS
INTERCONNECTION SERVICE

5.2 ACCESS ORDER (Cont'd)

5.2.2 ACCESS ORDER MODIFICATIONS

The customer may request a modification of its Access Order prior to the service date. The Utility will make every effort to accommodate a requested modification when it is able to do so with the normal work force assigned to complete such an order within normal business hours. If the modification cannot be made with the normal work force during normal business hours, the Utility will notify the customer. If the customer still desires the Access Order modification, the Utility will schedule a new service date. All charges for Access Order modifications will apply on a per occurrence basis.

Any increase in the number of Special Access Service channels or Switched Access Service lines or Wireless Interconnection Service trunks or SS7 Signaling connections or busy hour minutes of capacity will be treated as a new Access Order (for the increased amount only).

If order modifications are necessary to satisfy the transmission performance for a Special Access Service ordered by a customer, these changes will be made without order modification charges being incurred by the customer.

A. SERVICE DATE CHANGE CHARGE/DISPATCH CHARGE (C)

The customer may request a change of the confirmed due date on a pending Access Order prior to the service date. A change of service date is a change of the scheduled service date by the customer to either an earlier date or a later date which does not exceed 30 calendar days from the original service date. (T)

If the Utility determines that the customer's request can be accommodated without delaying the service dates for orders of other customers, the service date will be changed and the Service Date Change Charge applied to the order. (T)

If the service date is changed to an earlier date, and the Utility determines additional labor or extraordinary costs are necessary to meet the earlier service date requested by the customer, the customer will be notified by the Utility that Expedited Order Charges as set forth in D. following apply. Such charges will apply in addition to the Service Date Change Charge.

INTERCONNECTION SERVICE

5.2 ACCESS ORDER (Cont'd)

5.2.2 ACCESS ORDER MODIFICATIONS (Cont'd)

A. SERVICE DATE CHANGE CHARGE/DISPATCH CHARGE (Cont'd)

(C)

If the requested service date exceeds 30 calendar days following the original service date, and the Utility determines that the customer's request can be accommodated, the Utility will cancel the original order and apply the Cancellation Charges as set forth in C5.2.3 following. A new Access Order with the new service date will be issued. The Service Date Change Charge will not apply.

(T)

If the service date is changed due to a Design Change as set forth in C. following, the Service Date Change Charge will apply.

(T)

Failure to notify, as noted below, the Utility prior to the original service date to request a different service date will result in the application of a Service Date Change Dispatch Charge for installation, moves and rearrangement of services. If the Utility technician is dispatched to the customer's premises on the scheduled service date and the customer is not ready to accept service or the customer has failed to notify the Utility before 3:00 PM (PT) on the business day prior to the scheduled service date that the service date needs to be changed, a Service Date Change Dispatch Charge will apply.

(N)

If the customer reschedules the service date, a Service Date Change Charge as set forth following will also apply. If the customer cancels the service date, cancellation charges will also apply in accordance with terms and conditions for cancellation charges as set forth in 5.2.3 following. Cancellation of the order will not preclude the application of the Service Date Change Charge and/or the Service Change Dispatch Charge assessed for prior occurrences on the same order.

(N)

A Service Date Change Charge will apply, on a per order per occurrence basis, for each service date changed. A service Date Change Dispatch Charge will apply per occurrence when a technician is dispatched to the customer's premises and the customer is not ready for service. The application charge is:

(N)

(N)

(N)

	<u>Charge</u>	<u>USOC</u>	
- Service Date Change Charge, per order	\$26.50	OMC	(R)
- Service Date Dispatch Charge, per occurrence	\$200.00	VT6DN	(N)

B. PARTIAL CANCELLATION CHARGE

Any decrease in the number of ordered Special Access Service channels or Wireless Interconnection Service or Switched Access Service lines, trunks, SS7 Signaling Corrections or busy hour minutes of capacity will be treated as a partial cancellation and the charges as set forth in C5.2.3 following will apply.

ACCESS SERVICE

C5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS
INTERCONNECTION SERVICE

- 5.2 ACCESS ORDER (Cont'd)
- 5.2.2 ACCESS ORDER MODIFICATIONS (Cont'd)

C. DESIGN CHANGE CHARGE

The customer may request a design change to the service ordered. A design change is any change to an Access Order which requires engineering review. An engineering review is a review by Utility personnel, of the service ordered and the requested changes to determine what changes in the design, if any, are necessary to meet the changes requested by the customer. Design changes include such things as the addition or deletion of optional features or functions or a change in the type of Transport Termination (Switched Access only), type of channel interface, type of Interface Group, technical specification package, type of traffic on Wireless Interconnection Service. Design changes do not include a change of customer designated premises, end office switch, Feature Group type, Switched Transport type and capacity or Special Access Service channel type. Changes of this nature will require the issuance of a new order and the cancellation of the original order with appropriate cancellation charges applied.

The Utility will review the requested change, notify the customer whether the change is a design change, if the change can be accommodated and if a new service date is required. If the customer authorizes the Utility to proceed with the design change, a Design Change Charge will apply in addition to the charge for Additional Engineering as set forth in C13.1.1 following. If a change of service date is required, the Service Date Change Charge as set forth in A. Preceding will also apply. The Design Change Charge will apply on a per order per occurrence basis, for each order requiring a design change. The applicable charge is:

	<u>Rate</u>	<u>USOC</u>	
-Design Change Charge, per order	\$60.00	H28	(R)

ACCESS SERVICE

C5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS INTERCONNECTION SERVICE

5.2 ACCESS ORDER (Cont'd)

5.2.2 ACCESS ORDER MODIFICATIONS (Cont'd)

D. EXPEDITED ORDER CHARGE

- (1) Analog (Video), Voice Grade, DS0 (Digital Data) and High Capacity DS1 and DS3 Access Services

(C)
(C)

If a customer desires that service be provided on a due date earlier than the standard interval, the customer may request that service be provided on an expedited service interval. To qualify for an expedited interval the customer must provide End User premises access, where needed, until 11PM (PT), Monday-Friday.

If, upon reviewing availability of equipment, facilities and scheduled workload, the Utility agrees to provide service on an expedited basis and the customer accepts this proposal, an Expedite Order Charge (in case of DS0, Voice Grade/DS1 Entrance Facilities and High Capacity DS1 Access Services) or an Expedite Circuit Charge (in case of DS3 Entrance Facilities and High Capacity DS3 Access Services) will apply.

(C)
(C)
(C)
(C)
(C)

The maximum number of circuits, which may be expedited, is limited to twelve (12) two-point or six (6) multi-point Analog/DS0 circuits at the same location; a limit of nine (9) DS1 circuits at the same location; and a limit of two (2) DS3 circuits at the same location. When the number of access circuits exceeds the maximum threshold the interval will be negotiated.

(T)
(C)
(C)
(D)
(D)

If the Utility determines that service can be provided on an expedited basis, the following charges will apply based upon agreed upon expedited service interval. The Expedited Order Charge (in case of DS0, Voice Grade, DS1 Entrance Facilities and High Capacity DS1 Access Services) applies on a per order basis, regardless of the number of circuits. The Expedited Circuit Charge (in case of DS3 Entrance Facilities and High Capacity DS3 Access Services) applies on a per circuit basis.

ACCESS SERVICE

C5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS INTERCONNECTION SERVICE

5.2 ACCESS ORDER (Cont'd)

5.2.2 ACCESS ORDER MODIFICATIONS (Cont'd)

D. EXPEDITED ORDER CHARGE (Cont'd)

- (2) For all Access Services, excluding Analog, Voice Grade, DS0 and DS1, DS3 Access Services

If the customer desires that service be provided on an earlier date than that which has been established for the access order or the provision of the Access Service, the customer may request that service be provided on an expedited basis.

If the Utility determines that service can be provided on the requested date and that additional labor costs or extraordinary costs are required to meet the requested service date, the customer will be notified and will be provided with an estimate of the additional charges involved. The total charge to the customer for the Additional Engineering may not exceed the estimated amount by more than 10%. If the customer instructs the Utility to proceed, such additional charges will be determined and billed to the customer as follows:

To calculate the additional labor charges, the Utility will, upon authorization from the customer to incur the additional labor charges, keep track of the additional labor hours used to meet the request of the customer and will bill the customer at the applicable additional labor charges as set forth in 13.2.6(A) following.

- (a) Extraordinary Costs: The special construction terms and conditions specified in Pacific Bell's Tariff F.C.C. No. 2 will be used by the Utility to determine charges to recover the extraordinary costs which may be involved. Authorization to incur the costs and to bill the customer will be in accordance with the terms and conditions of Pacific Bell's Tariff F.C.C. No.2.
- (b) When the request for expediting occurs subsequent to the issuance of the Access Order, a Service Date Change Charge as set forth in (A) preceding also applies.
- (c) If the Utility is subsequently unable to meet an agreed upon expedited service date, no Expedited Order Charge will apply, unless the missed service date was caused by the customer.
- (d) The Utility will adhere to the expedite intervals as specified above, except during circumstances beyond its direct control (i.e., acts of God, governmental requirements, work stoppages and civil commotions).

5.2 ACCESS ORDER (Cont'd)

5.2.3 CANCELLATION OF AN ACCESS ORDER

(L)

A. REGULATIONS

1. A customer may cancel an Access Order for the installation of service on any date prior to the service date. The cancellation date is the date the Utility receives written or verbal notice from the customer that the order is to be cancelled. The verbal notice must be followed by written confirmation within 10 days. If a customer or a customer's End user is unable to accept Access Service within 30 calendar days after the original service date, the customer has the choice of the following options:

(L)

- The Access Order shall be cancelled and charges set forth in 2. following will apply, or
- Billing for the service will commence.

In such instances, the cancellation date or the billing date, depending on which option is selected by the customer, shall be the 31st day beyond the original service date of the Access Order.

2. When a customer cancels an Access Order for the installation of service, a Cancellation Charge will apply as follows:
 - a. Installation of Switched or Special Access Service facilities is considered to have started when the Utility incurs any cost in connection therewith or in preparation thereof which would not otherwise have been incurred.
 - b. Where the customer cancels an Access Order prior to the start of the installation of access facilities, no charges shall apply.
 - c. Where installation of access facilities has been started prior to the cancellation, the charges specified in 1. or 2. following, whichever is lower, shall apply.
 1. A charge equal to the costs incurred in such installation, less estimated net salvage. Such charge is determined as detailed in d. following.
 2. The nonrecurring charge for installation of Switched or Special Access Service ordered by the customer.
 3. A separate charge will be assessed for Switched Transport (i.e., EF, DTT, TST) and Switched Access lines or trunks.
 - d. Charges applicable as specified in C.1. preceding include the nonrecoverable cost of equipment and material ordered, provided or used, plus the nonrecoverable cost of installation and removal including the costs of engineering, labor, supervision, transportation, rights-of-way and other associated costs.

INTERCONNECTION SERVICE

(T)
(T)

5.2 ACCESS ORDER (Cont'd)

5.2.3 CANCELLATION OF AN ACCESS ORDER (Cont'd)

A. REGULATIONS (Cont'd)

e. In no event will cancellation charges be applied until the customer is notified of such charges. Cancellation charges as set forth in 3.b. preceding are determined from the last critical date completed. Such dates are provided to the customer on the firm order confirmation at the time the order is placed.

3. When a customer cancels an order for the discontinuance of service, no charges apply for the cancellation.

4. If the Utility misses a service date by more than 30 days due to circumstances over which it has direct control (excluding, e.g., acts of God, governmental requirements, work stoppages and civil commotions), the customer may cancel the Access Order without incurring cancellation charges.

5.2.4 SELECTION OF PLANNED FACILITIES FOR ACCESS ORDERS

A. REGULATIONS

1. When there are High Capacity facilities to a Hub on order or in service for the customer's use, the customer must request a specific channel or transmission path be used to provide the Switched or Special Access Service requested in an Access Order. The Utility will make a reasonable effort to accommodate the customer request.

2. For all other Access Orders, the option to request a specific transmission path or channel is not provided except as provided for under Special Facilities Routing as set forth in C11. following.

5.2.5 MINIMUM PERIOD

A. REGULATIONS

1. Except as set forth in 2. and C9.4. following, the minimum period for which Access Service is provided and for which charges are applicable, is one month.

2. The minimum period for part-time video and Program Audio Special Access Services is one day even though the service will be provided only for the duration of the event specified on the order (e.g., one-half hour, two hours, five hours, etc.).

INTERCONNECTION SERVICE

5.2 ACCESS ORDER (Cont'd)

5.2.5. MINIMUM PERIOD (Cont'd)

A. REGULATIONS (Cont'd)

3. Service Rearrangements as set forth in C6.7.1 and C7.2.3 following for Switched and Special Access Services respectively, may be made without a change in minimum requirements.
4. Changes other than those identified in C6.7.1 and C7.2.3 following will be treated as a discontinuance of the existing service and an installation of a new service. All associated nonrecurring charges will apply for the new service. A new minimum period will be established for the new service. The customer will also remain responsible for all outstanding minimum period obligations associated with the disconnected service.

The changes listed below are those which will be treated as a discontinuance and installation of service for which a new minimum period will be established.

- a. A move to a different building as set forth in C6.7.7 and C7.2.4 following.
- b. A change in type of service (i.e., Switched Access to Special Access, one type of Special Access to another, or one type of Switched Access Service to another, except as set forth in C6.7.6 following).
- c. A change in the type of Special Access Service Channel Termination.
- d. A change in Switched Access Service or Directory Assistance Service Interface Group as set forth in C15.1 following.
- e. Change in Switched Access Service traffic type as set forth in 6.1.1.E.1. following.
- f. Change in Switched Access capacity (i.e., DS1 to DS3). (N)
- g. Change from two-point to multipoint Special Access Service or from multipoint to two-point Special Access Service. (T)

C5-A. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS AND WIRELESS
INTERCONNECTION SERVICE

5.2 ACCESS ORDER

5.2.6 MINIMUM PERIOD CHARGES

A. REGULATIONS

When Access Service is disconnected prior to the expiration of the minimum period, charges are applicable for the balance of the minimum period. A disconnect constitutes facilities being returned to available inventory.

The Minimum Period Charge for monthly billed services will be determined as follows:

1. For Switched Access Service, the charge for a month or fraction thereof is equal to the applicable recurring plus any nonrecurring charges as set forth in C6.7.4 following and/or special construction charge(s) that may be due.
2. For Special Access Service, the charge for a month or fraction thereof is the applicable monthly rates for the appropriate channel type plus any optional features, nonrecurring charges, as set forth in C7.5 through C7.11 following and/or special construction charge(s) that may be due.

The Minimum Period Charge for part-time video and Program Audio Services is the applicable daily rate for the appropriate channel type as set forth in C7.9 and C7.10 following.

5.2.7 SHARED USE FACILITIES

Shared Use (i.e., Switched and Special Access Services provided over the same analog or digital High Capacity facilities) is allowed. Shared use facilities to a Hub will be ordered and provided as Special Access Service only. While shared use is allowed, individual services utilizing these facilities must be ordered either as Switched Access Service or Special Access Service depending on the intended use. When placing the order for individual service(s), the customer must specify a channel assignment for each service ordered. Rate regulations for Shared Use Facilities are set forth in C6.7.13 and C7.2.8 following.

5.2 ACCESS ORDER

5.2.8 AVAILABLE INVENTORY

Available inventory is limited and does not include facilities previously ordered. The Utility will make every reasonable effort to maintain sufficient available inventory to provide Access Service in accordance with customers' requested service date intervals. To the extent that service can be provided, Access Orders will be satisfied from available inventory.

5.2.9 ACCESS ORDERS FOR SERVICES PROVIDED BY MORE THAN ONE EXCHANGE UTILITY

Access Services provided by more than one Utility are services where one end of the Switched Transport or Channel Mileage element is in the operating territory of one Utility and the other end of the element is in the operating territory of a different Utility. (T)

The ordering procedure for this service is dependent upon the billing arrangement, as set forth in C2.4.8 preceding, to be used by the Utilities involved in providing the Access Service. The ordering and design arrangements will be consistent with the provisions contained in this section. The Utilities will notify the customer which of the ordering procedures will apply.

A. NON MEET POINT BILLING

1. Single Company Billing Ordering

The Utility receiving the order from the customer will arrange to provide the service and bill the customer as set forth in C2.4.8. The customer will place the order with the Utility as follows:

- a. For Switched Access Services the customer will place the order with the Utility in whose territory the first point of switching is located. The first point of switching is:
- FGA - dial tone office
 - FGB - access tandem or end office

When the first point of switching is not in the same Utility's territory as the Interexchange Carrier premises, the customer must supply a copy of the order to the Utility in whose territory the Interexchange Carrier premises is located.

5.2 ACCESS ORDER (Cont'd)

5.2.9 ACCESS ORDERS FOR SERVICES PROVIDED BY MORE THAN ONE EXCHANGE
UTILITY (Cont'd)

A. NON MEET POINT BILLING (Cont'd)

- b. For Special Access Services without the use of a hub the customer will place the order with the Utility in whose territory the customer designated premises is located.
- c. For Special Access Services with a hub, the customer will place the order with the Utility in whose territory the hub is located.
- d. For Directory Assistance Service, the customer will place the order with the Utility in whose territory the Directory Assistance Location is located.

2. Primary Exchange Carrier/Secondary Exchange Carrier Billing Ordering

When FGB is ordered in a multi-Utility access tandem arrangement, the customer must provide a copy of the order to all Secondary Exchange Carriers identified as billing Secondary Exchange Carriers in Section 16 of Nevada Bell's F.C.C. No. 1 Tariff. Each Exchange Utility will bill as set forth in C2.4.8.A.1.b. preceding.

B. MEET POINT BILLING ORDERING

Each utility will provide its portion of the Access Service within its operating territory to an interconnection point(s) (IP) with the other Utilities. The interconnection point(s) Billing Percentages will be determined by the Utilities involved in providing the Access Service and listed in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. No.

4. Each Utility will bill the customer for its portion of the service as set forth in C2.4.8(A)(2). All other appropriate charges in each Utility tariff are applicable.

1. For Feature Group A and B Switched Access Services, the customer must place an order with the Utility in whose territory the first point of switching is located, (i.e., FGA-dial tone office, FGB - access tandem or end office).

5.2.9 ACCESS ORDERS FOR SERVICES PROVIDED BY MORE THAN ONE EXCHANGE
UTILITY (Cont'd)

B. MEET POINT BILLING ORDERING (Cont'd)

2. For Feature Group C and D Switched Access Services, the customer must place an order with the Utility in whose territory the end office is located. Customers may, at their option, order FGD to the access tandem. When ordered to the access tandem, and the access tandem and end office are not in the same Utility operating territory, the customer must also supply a copy of the order to each additional Utility subtending the access tandem.
3. Customers ordering Special Access Service to be interconnected with Switched Access Services at Utility designated WATS Serving Offices for the provision of WATS of WATS-Type Services must place an order with each Utility in whose territory the end office and the WATS Serving office are located if they are not co-located.
4. Except for Special Access Service as set forth in c. above or as set forth in 2. below, the customer may place the order for a Special Access Service with either Exchange Utility.
5. For Special Access Service involving a hub(s) the customer must place the order with the Utility in whose territory the hub(s) is located.
6. For Directory Assistance Service, the customer must place an order with the Utility in whose territory the Directory Assistance Location is located.
- 7.

(D)
|
(D)

For the service(s) ordered as set forth preceding, the customer must also supply a copy of the order to the Utility in whose operating territory a customer designated premises is located and any other Utility(s) involved in providing the service.
