C13-A. ADDITIONAL ENGINEERING, ADDITIONAL LABOR AND MISCELLANEOUS SERVICES

(D)
(D)
(D)
(D)

Section 13 addresses Additional Engineering, Additional Labor and Miscellaneous Services (e.g., Maintenance of Service, provision of Access Service billing Information, etc.).

(N)

The specific rates and charges for these activities are set forth in subsequent sections.

For purpose of Section 13, the terms "Basic Time," "Overtime" and "Premium Time" are defined as follows:

- **Basic Time** - Work related efforts of the Telephone Company performed during a normal business day, (8:00 a.m. - 5:00 p.m., Monday through Friday).
- **Overtime** - Work related efforts of the Telephone Company performed outside of a normal business day, (Monday through Friday), and on Saturdays.
- **Premium Time** - Work related efforts of the Telephone Company performed on Sundays and/or holidays (i.e., New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, the day after Thanksgiving and Christmas Day).

(N)

A Miscellaneous Service Order Charge applies to any service, or combination of services ordered simultaneously from this section of the Tariff for which a service order is not already pending [with the exception of Presubscription (C13.3.3) which does not have the charge applied]. The Miscellaneous Service Order Charge is an administrative charge designed to compensate for the expenses associated with service order issuance.

The charge always applies to the following services since a pending service order would not exist; Standby (C13.2.3), Testing and Maintenance with Other Utilities other than when in conjunction with Acceptance Testing (C13.2.4) Other Labor (C13.2.5) and Maintenance of Service (C13.3.1). The Miscellaneous Service Order Charge will also apply to the following services if they are ordered subsequent to the initial installation of the associated access service thereby necessitating the issuance of another service order: Restoration Priority (C13.3.2), Standard Jacks (C13.3.4) and Controller Arrangement (C13.3.8.A).

(D)

The charge does not apply to the following service since there would exist a pending service order; Additional Engineering (C13.1), Overtime Installation (C13.2.1), Standby Acceptance Testing (C13.2.3), Testing and Maintenance with Other Utilities when in conjunction with Acceptance Testing (C13.2.4), and Additional Cooperative Acceptance Testing (C13.3.5.A.1 and C13.3.5.B.1). This charge is as follows:

PUBLIC UTILITIES COMMISSION OF NEVADA

C13-A. ADDITIONAL ENGINEERING, ADDITIONAL LABOR AND MISCELLANEOUS SERVICES

13.1 ADDITIONAL ENGINEERING

Additional Engineering will be provided by the Utility at the request of the customer only when:

- a. A customer requests additional engineering technical information after the Utility has already provided the technical information normally included on the Design Layout Report (DLR) as set forth in C6.1.5 and C7.1.6 preceding.
- b. Additional engineering time is incurred by the Utility to engineer a customer's request for a customized service as set forth in C7.1.1 preceding.
- c. A customer requests a Design Change, additional engineering time is incurred by the Utility for the engineering review as set forth in C5.2.2.C. The charge for additional engineering will apply whether or not the customer authorizes the Utility to proceed with the design change.

The Utility will notify the customer that additional engineering charges, as set forth in C13.1.1 following, will apply before any additional engineering is undertaken.

13.1.1 CHARGES FOR ADDITIONAL ENGINEERING

The charges for additional Engineering are as follows:

<u>Additional Engineering Periods</u>	<u>Each Half Hour or Fraction Thereof</u>	<u>USOC</u>
	N01	
Basic Time,		
- per engineer	\$42.94	AEHNF/AEH++
Overtime,		
- per engineer	\$64.40	AEHXF/AEH++

C13-A. ADDITIONAL ENGINEERING, ADFDITIONAL LABOR AND MISCELLANEOUS SERVCIES

13.2 ADDITIONAL LABOR

Additional labor is that labor requested by the customer on a given service and agreed to by the Utility as set forth in C13.2.1 through C13.2.5 following. The Utility will notify the customer that additional labor charges as set forth in C13.2.6 following will apply before any additional labor is undertaken.

A callout of a Utility employee requiring additional labor will be charged a minimum of four (4) hours on an Overtime and/or Premium Time basis when the call-out is attributed to a customer request/problem. However, at no time will the customer be charged if trouble is found to be on the Utility side of the demarcation point.

(N)
(N)
(N)
(N)
(N)

13.2.1 OVERTIME INSTALLATION

Overtime installation is that Utility installation effort outside of normally scheduled working hours.

13.2.2 RESERVED FOR FUTURE USE

(C)
(D)
(D)

13.2.3 STANDBY

Standby includes all time in excess of one-quarter (1/4) hour during which Utility personnel stand by to make installation acceptance tests or cooperative tests with a customer to verify facility repair on a given service.

(C)

13.2.4 TESTING AND MAINTENANCE WITH OTHER UTILITIES

Additional testing or maintenance of facilities which connect to facilities of other Utilities, is that which is in addition to normal effort required to test or maintain facilities provided solely by the Utility.

(D)
(D)

13.2.5 OTHER LABOR

Other labor is that additional labor not included in C13.2.1 through C13.2.4 preceding and labor incurred to accommodate a specific customer request that involves only labor which is not covered by any other section of this tariff.

13.3.2 RESTORATION PRIORITY

The Utility will arrange a Special Access Service for Restoration Priority on receipt of certification in conformance with Part 64, Subpart D, Appendix A of the Federal Communication Commission's Rules and Regulations. A charge applies when a request to provide or change a Restoration Priority is received subsequent to the issuance of an Access Order to install the service. No charge applies when a Restoration Priority is discontinued, or when ordered coincident with an access order to install service.

	<u>Nonrecurring Charge</u>	<u>USOC</u>
Restoration priority, - per service	\$54.63	RSPXX

13.3.3 PRESUBSCRIPTION

A. DESCRIPTION

1. Presubscription

Presubscription is a procedure whereby an end user or an agent of pay telephones may select and designate to the Utility an IC to access, without an access code, for intrastate interLATA and interstate calls. This IC is referred to as the end user's or agent's primary IC.

This procedure may also be used by an end user or an agent of pay telephones to select and designate to the Utility an IC to access, without an access code, for intraLATA calls. This IC is referred to as the end user's or agent's LATA primary IC (LPIC).

(N)
|
(N)

The Presubscription procedure applies to Telephone Exchange Service lines and/or trunks, Feature Group A lines and Centrex lines. It also applies to pay telephones served by end offices converting to equal access on or after April 1, 1989.

2.

B. PROVISIONS

Presubscription of residence and business lines and/or trunks is furnished in accordance with the detailed provisions of the Federal Communications Commission's Allocation Plan as set forth in Appendix B of its Memorandum Opinion and Order in CC Docket No. 83-1145, Phase I, adopted May 31, 1985, and released June 12, 1985. Principal provisions of the Allocation Plan and associated Utility provisions follows.¹

(T)

Presubscription of public and semipublic pay telephones will follow the detailed provisions of the Federal Communications Commission's Allocation Plan as set forth above, except the six-month notification provided to interexchange carriers of end offices converting to equal access prior to April 1, 1989.¹

(T)

3. Procedure for customers who fail to choose LPIC

Customers who do not specifically make an LPIC choice will not have an LPIC carrier and will not be able to make intraLATA long distance calls on a 0+ or a 1+ basis until they do make a choice. A subscriber may indicate that they do not want to predesignate a toll service provider for intraLATA toll. This choice will be considered a valid selection. An LPIC change charge will apply to any subsequent change to the LPIC.

B. PROVISIONS (Cont'd)

4. Initial or Change Charge Application

a. Presubscription

Customer orders to change LPIC and applicable charges

A customer may place an order to establish or to change an LPIC directly with Nevada Bell or through an intraLATA long distance service provider of the customer's choice. Nevada Bell will accept orders from toll service providers on behalf of their subscribers through the Nevada Bell Industry Market group.

When a customer establishes new service with Nevada Bell, a service representative will advise the customer of the options available for toll dialing and request that the customer choose both an interLATA and an intraLATA service provider. The choice could be the same for both.

A non-recurring charge, as set forth in 13.3.3(B)(4)(e) following, to process a change in Presubscription is bifurcated into two (2) separate non-recurring charges and applies as follows:

- i) A non-recurring charge applies when the request to change Presubscription is submitted through mechanized methods.
- ii) A non-recurring charge applies when the request to change Presubscription is submitted through manual methods.

As used above, manual methods are (i) personal interaction between an End User or Agent and a Telephone Company employee; and (ii) any written submission from an End User or Agent to a Telephone Company service center. Mechanized methods shall include all other methods. If a request utilizing a mechanized method results in manual processing, the mechanized non-recurring charge shall apply upon the completion of the request.

C13-A. ADDITIONAL ENGINEERING, ADDITIONAL LABOR AND MISCELLANEOUS SERVICES

13.3 MISCELLANEOUS SERVICES (Cont'd)

13.3.3 PRESUBSCRIPTION AND PRESELECTION (Cont'd)

B. PROVISIONS (Cont'd)

c. New End Users/Agents, who request service in an end office equipped with equal access, will be asked to select a primary IC at the time they place an order with the Utility for Telephone Exchange Service, Feature Group A Switched Access Services, or Public or Semi-public Pay Telephone Service. New end users or agents will be sent an informational package, upon request, to aid their selection of a primary IC. They may select either of the following options. There will be no additional charge for this selection.

- Designate an IC as primary IC and dial 101XXXX or other access codes (i.e., 950-0XXX or 950-1XXX) to reach services of the same IC or to reach other ICs.¹

- Designate that they do not want to be presubscribed to any IC and choose to dial 101XXXX or other access codes (i.e. 950-0XXX or 950-1XXX) for all calls to all ICs.

(D)

Should new end users or agents return confirmation notices identifying primary ICs different from those given verbally, the Utility will process such written selections without charges.

After the End User's/Agents initial primary IC selection, for any change thereafter, a nonrecurring charge, as set forth in C13.3.3.B.4.e. following, applies.

d. If an IC elects to discontinue Feature Group D service in the converting end office prior to the conversion date or within two years after the introduction of Feature Group D in the converting end office, the IC is obligated to contact in writing all end users or agents who have selected, or have been allocated to, the cancelling IC as their designated IC, inform these end users or agents of the cancellation, request the end users or agents to select a new IC and state that the cancelling IC will pay for the change charge. The Utility will bill the IC an amount equal to the product of the Presubscription Charge, as set forth in e. following, multiplied by the total number of end users or agents assigned to the IC at the time the IC notifies the Utility of discontinuance of Feature Group D.

NOTE: 1: For pay telephones, 101XXXX dialing applies to operator assisted calls only.

C13-A. ADDITIONAL ENGINEERING, ADDITIONAL LABOR AND MISCELLANEOUS SERVICES

13.3 MISCELLANEOUS SERVICES (Cont'd)
13.3.3 PRESUBSCRIPTION (Cont'd)
B. PROVISIONS (Cont'd)

e. Non recurring charges for presubscription are as follows:

	<u>Nonrecurring Charge</u>	<u>USOC</u>	(D)
			(D)
Presubscription - IntraLATA (LPIC) Billed to End User, Agent or IC			(C)
--per Telephone Exchange Service line or trunk manual charge	\$2.50	P6XLX	(R)
--per Telephone Exchange Service line or trunk mechanized charge	\$1.60	P6KFX	(R) (C)

NOTE 1: This charge is billed to the End User/Agent which is the subscriber to the Telephone Exchange Service except as set forth in B.4.d. preceding, when such charge(s) will be billed to an IC. In the event an end user/agent is incorrectly presubscribed due to misassignment on the part of the Utility, no charge shall apply.

In the case of an End User/Agent authorization dispute, the IC will be responsible for payment of the presubscription change charge associated with the EAT submitted in error as well as the presubscription change charge associated with restoring the End User/Agent to the previous primary interexchange carrier in those cases where the EAT has been completed by the Utility and the IC has no letter of authorization from the end user. The presubscription charges shall apply.

NOTE 2: The Interexchange Carrier Pays (IC Pays) Billing Option is an agreement between the Telephone Company and an Interexchange Carrier (IC) under which the InterLATA Presubscription (PIC) or IntraLATA Presubscription (LPIC) change charge is assessed to the IC instead of the being charged to the end user customer when the Telephone Company changes an end user's primary IC assignment.

The PIC/LPIC change may either be requested via an IC-provided end user or agent list submitted in the Customer Account Record Exchange (CARE) format (IC Pays - Carrier Initiated) or by the end user customer directly to the Telephone Company (IC Pays - Customer Initiated).

ICs that subscribe to "IC Pays - Carrier Initiated" must populate position 405 of the PIC change order with "Y" to redirect billing of the PIC/LPIC change charge.

NOTE 3: Presubscription change charges for interLATA and interstate (PIC) will be billed at the applicable rates listed in the utility's interstate tariffs approved by the Federal Communications Commission.

- B. PROVISIONS (Cont'd)

NOTE 2: (Cont'd)

For ICs that subscribe to "IC PAYS - Customer Initiated," all end user PIC/LPIC changes to the IC's CIC and at the IC's option changes from its CIC to "No PIC" initiated through the Telephone Company will be redirected to the IC. (T)
(T)

The IC submitting the PIC/LPIC change must sign an IC Pays Billing Option agreement with the Telephone Company for either of the IC Pays Billing Options to apply.

When these conditions have been met, the end user customer will not be assessed the Presubscription change charge for the PIC/LPIC change. The IC participating in the IC Pays Billing Option will be charged the Presubscription change charge per line or trunk as set forth in Section 13.3.3.B.4.e preceding.

13.3 MISCELLANEOUS SERVICES (Cont'd)

13.3.4 STANDARD JACKS - REGISTRATION PROGRAM

Standard jacks are provided by the Utility to connect Registered Equipment to those services that are subject to the Registration Program as set forth in C2.5 preceding. The use of jacks is covered in Part 68 of the F.C.C.'s Rules and Regulations. Specific jacks are described in the document on file with the FCC entitled "Descriptions of Standard Registration Program Connection Configurations Supplementing Configurations Described in Subpart F of Part 68 of the FCC's Rules and Regulations."

These jacks are used to terminate services provided by the Utility. Other services or facilities provided by the Utility or by others may also be terminated in any spare capacity of the jacks remaining after installation without additional charge for the use of such capacity.

The nonrecurring charges, which include installation, for standard jacks and their typical uses are set forth following:

13.3.5 TESTING SERVICES

Testing Services offered under this section of the tariff are optional and subject to rates and charges as set forth in C13.3.5.C. following. Other testing services as described in C6. and C7. preceding are provided by the Utility in association with Access Services and are furnished at no additional charge.

Testing services are normally provided by Utility personnel at Utility locations. However, provisions are made in A and B following for a customer to request Utility personnel to perform testing services at the customer's premises.

Issued: **MAR 25 1987**

Effective: **APR 1 1987**

Advice No. **7459**

Issued by
R. K. Van Allen
President

C13-A. ADDITIONAL ENGINEERING, ADDITIONAL LABOR AND MISCELLANEOUS SERVICES

13.3 MISCELLANEOUS SERVICES (Cont'd)

13.3.5 TESTING SERVICES (Cont'd)

The offering of Testing Services under this section of the tariff is made subject to the availability of the necessary qualified personnel and test equipment at the various test locations mentioned in A., B. and C. following:

A. SWITCHED ACCESS SERVICE

Testing Services for Switched Access are comprised of (a) tests which are performed during the installation of a Switched Access Service, i.e., Acceptance Tests and (b) tests which are performed after acceptance of such access services by a customer which are without charge, i.e., routine testing and (c) additional tests which are performed during or after acceptance of such access services by a customer for which additional charges apply, i.e., Additional Cooperative Acceptance Tests and in-service tests.

Routine tests are those tests performed by the Utility on a regular basis as set forth in C6.1.6 preceding which are required to maintain Switched Access Service. Additional in-service tests may be done on an automatic basis (no Utility or customer technicians involved), on a manual basis (Utility technician(s) involved at Utility office(s) and Utility or customer technician(s) involved at customer's designated premises).

Testing services are ordered to the Dial Tone Office for FGA, to the access tandem or end office for FGB (wherever the FGB service is ordered) and to the end office for FG's C and D. Testing Services for Directory Assistance Service not routed through an access tandem is ordered to a Directory Assistance Location for each NPA.

1. Additional Cooperative Acceptance Testing (ACAT)

Additional Cooperative Acceptance Testing (ACAT) of Switched Access Service involves the Utility provision of a technician at its office(s) and the customer provision of a technician at its premises, with suitable test equipment to perform the required tests.

Issued: MAR 25 1987

Effective: APR 1 1987

Advice No. 1459

President

C13-A. ADDITIONAL ENGINEERING, ADDITIONAL LABOR AND MISCELLANEOUS SERVICES

13.3 MISCELLANEOUS SERVICES (Cont'd)
13.3.5 TESTING SERVICES (Cont'd)
A. SWITCHED ACCESS SERVICE (Cont'd)

Additional Cooperative Acceptance Tests may, for example, consist of the following tests:

- . Impulse Noise
- . Phase Jitter
- . Signal to C-Notched Noise Ratio
- . Intermodulation (Nonlinear) Distortion
- . Frequency Shift (Offset)
- . Envelope Delay Distortion
- . Dial Pulse Percent Break

2. Additional Automatic Testing

Additional Automatic Testing (AAT) of Switched Access Services (Feature Groups B, C, and D), is a service where the customer provides remote office test lines and 105 test lines with associated responders or their functional equivalent. The customer may order, at additional charges, gain-slope and C-notched noise testing and may order the routine tests (1004 Hz loss, C-Message Noise and Balance) on an as needed or more than routine schedule.

The Utility will provide an AAT report that lists the test results for each trunk tested. Trunk test failures requiring customer participation for trouble resolution will be provided to the customer on an as-occurs basis.

3. Additional Manual Testing

Additional Manual Testing (AMT) of Switched Access Services (Feature Groups A, B, C, and D and Directory Access Service not routed through an access tandem), where the Utility provides a technician at its office(s) and the Utility or customer provides a technician at the customer designated premises, with suitable test equipment to perform the required tests, will normally consist of gain-slope and C-notched noise testing. However, the Utility will conduct any additional tests which the IC may request.

The Utility will provide, an AMT report listing the test results for each trunk tested. Trunk test failures requiring customer participation for trouble resolution will be provided to the customer on a per occurrence basis.

13.3.5 TESTING SERVICES (Cont'd)

A. SWITCHED ACCESS SERVICE (Cont'd)

4. Obligations of the Customer

- a. The customer shall provide the Remote Office Test Line priming data to the Utility, as appropriate, to support routine testing as set forth in C6.1.6 preceding or AAT as set forth in C13.3.5 preceding.
- b. The customer shall make the facilities to be tested available to the Utility at times mutually agreed upon.

B. SPECIAL ACCESS SERVICE

The Utility will provide assistance in performing specific tests requested by the customer.

1. Additional Cooperative Acceptance Testing (ACAT)

When a customer provides a technician at its premises or at the End User's premises, with suitable test equipment to perform the requested tests, the Utility will provide a technician at its office for the purpose of conducting Additional Cooperative Acceptance Testing on Voice Grade Services. At the customer's request, the Utility will provide a technician at the customer's premises or at the End User premises. These tests may, for example, consist of the following:

- Attenuation Distortion (i.e., frequency response)
- Intermodulation Distortion (i.e., harmonic distortion)
- Phase Jitter
- Impulse Noise
- Envelope Delay Distortion
- Echo Control
- Frequency Shift

13.3.6 PROVISION OF ACCESS SERVICE BILLING INFORMATION

- A. The customer may receive one copy of its monthly bills in a standard paper format or, if requested by the customer, on magnetic tape (cartridge), CDROM*, DVD*, or via electronic data transmission (Connect: Direct formerly NDM) or other electronic means, in lieu of paper at no charge. Electronic versions of the bill will include the face page (front and back) and mandated bill inserts and messages. (C)
(N)
- B. Once billing has begun, the customer may request to change the medium on which the bill is provided. An Access Billing Change charge, as set forth below, will apply for each request to change the medium once the initial medium selection has been made and billing has begun. The Access Billing Charge will apply per billing period, per ACNA and Revenue Accounting Office (RAO). (N)

	USOC	Rates	
Access Billing Change Charge per Billing period, per ACNA and per RAO	WCP	\$7.25	(N) (N)

- C. At the option of the customer, and for an additional charge: (C)
 - 1. Customer's monthly bills may be provided on magnetic tape, and or;
 - 2. Additional copies of the customer's monthly bill or service and features record may be provided in standard paper format, CDROM*, DVD* or via electronic data transmission (Connect:Direct). (C)

- D. The rates and charges for the provision of Access Service Billing Information are as follows: (D)

	USOC	FID	RATES	
1. Provision of Standard Billing Detail and/or Information in Magnetic tape format,				(D) (D)
- per record		DMT	\$ 0.015	
- per tape	WCP2X		\$50.000	
2. Additional copies of customer monthly bill or service and features record				(D)
- per single page	WCP1X/NOB/NEL		\$0.03	
- per double page	NOB/NET		0.06 ¹	
3. Electronic data transmission per record	WCP4X		ICB charges apply	(N) (N)
4. CDROM (per CDROM disk)	WCP6X		\$10.00	(N)
5. DVD (per DVD disk)	WCP7X		\$10.00	(N)

* CD and DVD options are available to customers billed on the Carrier Access Billing System (CABS) platform.

¹ Should always be double the single rate

A. CONTROLLER ARRANGEMENT

This arrangement enables the customer to control up to 48 transfer functions at a Utility central office via a remote keyboard terminal capable of either 300 or 1200 bps operation. Included as part of the Controller Arrangement is a dial-up station located at the Utility central office to provide access to the Controller Arrangement. This dial-up data station consists of a 212A DATAPHONE data set and an appropriate Utility provided channel.

The Controller Arrangement must be located in the same Utility central office as the transfer functions which it controls.
