**A. Description**

Centrex Service is a local exchange telecommunications service, provided by a telecommunications system located in a Company central office, which controls the switching of:

- Calls from the exchange network to the Centrex lines,
- Calls from the Centrex lines to the exchange network,
- Intercommunicating calls between Centrex lines.

Direct Inward Dialing is provided to the Centrex by line selection in the central office.

Identification of outward dialing is provided for Centrex lines by individual line identification in the central office for those inter-exchange carriers for which the Company renders billing services.

Integrated voice/data communication capability is provided for the transmission of Circuit Switched Voice and Circuit Switched Data, signals on an incoming, outgoing and intercom basis utilizing Integrated Services Digital Network (ISDN) architecture.

Centrex Service offers four types of lines:

- Basic Lines
- Electronic Key Lines
- ISDN Lines (Custom and National)

Centrex Service is offered only as a complete service. The network access and intercommunication portions of the Centrex station line are not provided separately.

5. Transmission Specifications

Basic Line Standard Transmission

The standard transmission specification for basic lines consists of: dial pulse signaling or Dual Tone Multi-Frequency (DTMF) signaling - approximate bandwidth of 300 to 3,000 Hz, loss of 0 to 8.5 dbm at 1004 Hz.

Loop Start Signaling

Basic lines and Electronic Key lines are provided on a single two-wire facility with loop start signaling.

Electronic Key Line Standard Transmission (Non-ISDN)

Electronic Key Lines are provided on a non-loaded loop for access by preprogrammed push button features on compatible Customer Provided Equipment (CPE). The distance limitations from the Company's switching equipment is approximately 2.5 miles. If a customer's premises does not meet transmission requirements in the Technical Reference, Distance Extension will apply in addition to Centrex service charges.

The following prices for Virtual Route Selection are in addition to charges for CVN.

The following equation based on CCS and distance is used to determine the applicable monthly price. The number of remote lines located 0 to 15 miles and 15 or more miles from the hub are used. The price per remote line is applied to each remote line in the network.

$$\begin{aligned}
 & (\text{Total remote lines within 0-15 miles}) (\$CCS) / (\text{Total remote lines in the Network}) \\
 & + (\text{Total remote lines within 15+ miles}) (\$CCS) / (\text{Total remote lines in the Network}) \\
 & + \$1.50 \\
 & = \text{Price per remote line per month (Rounded to the nearest multiple of $.05) /16KFX/}

**A. Description**

A dormitory station is a station of a Centrex system provided in student dormitory rooms or suites (excluding those for married couples) and in common areas of a dormitory of a college, university or accredited school of nursing of a hospital. Such stations are arranged for inward and outward dialing and access to and from the attendant position of the Centrex system.

A dormitory individual line is a main station of a central office line provided as described above. Dormitory individual lines are arranged for inward and outward dialing only and, except as described under "Tie Lines" following, do not have access to and from an attendant position.

Dial Intercommunication (Intercom) Capabilities

When furnished from central offices having Centrex capabilities, dial intercommunication between dormitory individual lines within the educational institution's complex may be provided.

When furnished from central offices not having Centrex capabilities, all communications, including those within the educational institution's complex, must be completed using normal dialing procedures.

Billing Arrangements

Dormitory stations and dormitory individual lines will be furnished under the following arrangements regarding the responsibility for billing and collecting toll charges associated with such stations:

- Arrangement A

The college, university or hospital (hereinafter referred to as the customer) is responsible for the billing and collecting of toll charges for messages charged to dormitory stations and dormitory individual lines and the payment of all rates and charges associated with such stations and lines.

- Arrangement B

The Company is responsible for the billing and collecting of toll charges for messages charged to dormitory stations and dormitory individual lines. The customer is responsible for the payment of all other rates and charges applicable to such stations and lines and shall, at its option either:

- be responsible for the payment of toll charges billed to dormitory stations and dormitory individual lines determined by the Company to be uncollectible from the students to whom such charges are billed, or
- render reasonable assistance to the Company in the collection of such charges.
