

PRIMARY RATE ISDN: SELECTDATA

Effective May 1, 2014, no further installations, moves, rearrangements, or changes of any type will be made to Primary Rate ISDN: SelectData services. Customers of record on May 1, 2014 may continue their service as long as such service remains at the location at which it was being furnished on the aforementioned date. In the event that these services are discontinued at their present location for any reason, they will not be reestablished.

A. General

/1/

1. This Guidebook section contains rules, regulations, terms, conditions and prices uniquely applicable to services furnished or made available by the Company in its authorized territories within the state of Oklahoma.
2. Such rules, regulations, terms, conditions and prices contained herein are in addition to other applicable rules, regulations, terms, conditions and prices specified in other service publications of the Company and are hereby made part of this Guidebook. In the event of conflicting rules, regulations, terms or conditions, those of this Guidebook shall be controlling.

B. Service Description

Primary Rate ISDN SelectData (herein after referred to as SelectData or SelectData service) is an IntraLATA dial-up switched digital data service. Network access to SelectData is via fully configured ISDN Primary Rate Interfaces (PRI). SelectData is an inbound-calling-only service, which provides ISDN PRI functionality for digital data transport and/or analog modem calls (voice grade), on a single channel basis. Individual calls may be received at transmission speeds up to 64 Kbps. Outbound calls may not be placed with SelectData service.

C. Definitions

Bandwidth

The amount of information a customer can send or receive over a single connection in a specified period of time. Bandwidth is typically specified in Kilobits per second (Kbps).

B Channel (Bearer Channel)

A communication path capable of transmitting information at a speed of up to 64 Kbps. This communication path may be used to provide data communications between customer specified locations. It may also be used for analog data (voice grade) modem calls.

D Channel (Delta Channel)

A communications path designated to send and receive signaling messages.

Fully Configured ISDN Primary Rate Interface

A fully configured PRI is one where all 24 channels are equipped for service.

ISDN (Integrated Services Digital Network)

A network architecture which allows the simultaneous transmission of information over a single facility.

/1/

/1/ Material formerly appeared in Part 17, Section 2.

PRIMARY RATE ISDN: SELECTDATA (cont'd)

/1/

C. Definitions (cont'd)ISDN Primary Rate Interface (PRI)

Denotes the connection of a 1.544 Mbps digital facility to the ISDN-PRI capable central office switch. The twenty-four channels are typically divided into twenty-three "B" Channels plus one "D" Channel. Software in the ISDN-PRI equipped central office switch defines the type of services (e.g., Primary Rate ISDN SelectData service) that will be carried within the 1.544 Mbps digital facility.

D. Service Components1. Primary Rate ISDN SelectData Arrangement

Provides the communication path capable of transmitting bandwidth from the demarcation point at the customer's premises to the SelectData serving office. A SelectData arrangement may consist of Control Links and Communication Links. A minimum of one Control Link is required per SelectData arrangement. This minimum configuration will provide digital connections of up to 64 Kbps only.

a. Primary Rate ISDN Interface Control Link

An ISDN PRI termination and a digital multichannel transmission path between the central office and the customer's premises, which is configured with one D Channel, or a back-up D Channel and 23 B Channels.

b. Primary Rate ISDN Interface Communication Link

An ISDN PR termination and a digital multichannel transmission path between the central office and the customer's premises, which is configured with 24 B Channels.

c. Primary Rate ISDN Port Control Link

An ISDN PRI connection that does not include the facility between the customer's premises and the Primary Rate ISDN Serving Office, which is configured with one D Channel or a back-up D Channel and 23 B Channels. The connection is made using a Company provided facility purchased separately. This facility must be at a minimum of DS1 level and must conform to technical specification listed in Paragraph E.2. The same customer of records is required for both the Primary Rate ISDN Port Control Link and the associated Company provided facility. Sharing of common transport or Primary Rate ISDN arrangements between multiple customers is not permitted.

d. Primary Rate ISDN Port Communication Link

An ISDN PRI connection that does not include the facility between the customer's premises and the Primary Rate ISDN Serving Office, which is configured with 24 B Channels. The connection is made using a Company provided facility purchased separately. This facility must be at a minimum of DS1 level and must conform to technical specification listed in Paragraph E.2. The same customer of records is required for both the Primary Rate ISDN Port Communication Link and the associated Company provided facility. Sharing of common transport or Primary Rate ISDN arrangements between multiple customers is not permitted.

/1/

/1/ Material formerly appeared in Part 17, Section 2.

PRIMARY RATE ISDN: SELECTDATA (cont'd)

/1/

D. Service Components (cont'd)2. Link Extension

Provides the additional central office hardware and facility required to provide SelectData service to a customer located in an exchange outside the non-optional local calling scope of the SelectData-equipped serving office. Application of this rate element is dependent upon both the customer's location and the fact that the customer is served from the SelectData serving office designated by the Company.

3. Optional Features

a. Back-Up D Channel (BD-C)

Allows enhanced survivability of the SelectData arrangement by providing automatic takeover for a failed D Channel.

b. Additional Numbers

Provides additional numbers to the SelectData user.

c. Calling Line Identification (CLID)

Allows the number and name (where technically capable) of the calling party to be delivered to the called party as part of the called party set-up message.

d. Loop Protection

Provides automatic restoration of the SelectData service Control Link or Communication Link facility and physical route redundancy from the demarcation point at the customer's premises to the customer's normal serving office in the event of a transmission failure caused by a single facility break or a single electronics failure. The automatic restoration capabilities are provided through the use of intelligent components which are capable of sensing transmission failures. The primary and secondary transmission paths are separately routed in geographically and physically separate fiber optic cables up to the nearest point to the customer's premises that route redundancy can be achieved. In the event of a transmission failure, the intelligent components will automatically switch the SelectData service from the primary to the secondary transmission path within 2.0 seconds.

e. Additional Call Handling Groups

Provides the capability of grouping B channels by utilizing simulated facility groups.

f. Trunk Group Overflow

Provides the ability to direct incoming calls to another Primary Rate ISDN SelectData service arrangement when all B Channels are in use. Each overflow arrangement consists of 2 to 10 spans as selected by the customer.

PRIMARY RATE ISDN: SELECTDATA (cont'd)

/1/

E. Regulations

1. SelectData service, as provided per this Guidebook, is furnished pursuant to Part 2, Section 2, "Rules and Regulations Applying to All Customers' Contracts", and is subject to all the rules and regulations therein. The following rules and regulations are in addition to other rules and regulations as stated in this and other service publications of the Company.
 - a. SelectData provides for the transmission of data mode calls, as well as analog modem (voice grade) calls.
 - b. SelectData service does not have available the local calling scopes of any optional extended area calling service plan.
 - c. SelectData service does not have available any of the Optional Toll Calling Plans.
 - d. SelectData service, when furnished at the same premises in combination with other local exchange service, shall not be considered to be in conflict with the rules of paralleling service.
 - e. SelectData service is for the exclusive use of the customer and shall not be shared or jointly used. Resale is prohibited.
 - f. Temporary suspension of service at the request of the customer, either partial or complete is not applicable for this offering.
 - g. Alternate billing is not available for SelectData service.
2. Technical Specifications
 - a. Primary Rate ISDN SelectData requires the use of customer provided equipment (CPE) which must be compatible with the Company's equipment and facilities, and is subject to the interface specifications in TR-TSY-000776 (Network Interface Description for ISDN Customer Access) and TR-NWT-001203 (Generic Requirements for the Switched DS1/Switched Fractional DS1 Service Capability from an ISDN Interface (SelectData/ISDN)). These documents may be obtained from:

Telcordia Document Register
445 South Street, Room 2J-125
P.O. Box 1910
Morristown, NJ
Telephone: 1-800-521-2673
 - b. Compatible CPE must be provided at both the originating and terminating locations to successfully complete a SelectData call.

/1/

/1/ Material formerly appeared in Part 17, Section 2.

PRIMARY RATE ISDN: SELECTDATA (cont'd)

/2/

E. Regulations (cont'd)

3. Service Terms^{/1/}
 - a. All SelectData service components have a minimum service term of one month.
 - b. The customer shall select a service term for each Control Link and Communication Link of either month-to-month, 12, 24, 36, 48 or 60 continuous months^{/1/}. Customers selecting a 12-, 24-, 36-, 48- or 60-month service term^{/1/} will be required to sign a contract per order. When a Link Extension is required, it will be provided under the same service term as the associated Control Link/Communication Link.
 - c. Customers selecting the Month-to-Month service term may convert to the 12-Month service term at current Guidebook rates. Customers converting from a Month-to-Month service term within 60 days from the date their SelectData service is established will receive a credit equal to the difference in installation charges associated with the Month-to-Month service term and the newly selected 12-month billing period.
 - d. Customers converting to a new service term will be required to sign a new contract.
 - e. Conversion from a 12-, 24-, 36-, 48- or 60-month service term^{/1/} other than as described above will be considered a disconnection of service prior to the expiration and subject to charges described herein.
 - f. Upon expiration of the 12-, 24-, 36-, 48- or 60-month service term^{/1/}, the customer may:
 1. Continue service at the current Month-to-Month service term rate. That rate will be subject to any future changes.
 2. Continue service by selecting a new 12-month service term for the Control Link and/or Communication Link at the current rates. The rates for the Control Link and/or Communication Link and any associated Link Extensions will not be subject to rate increases for the duration of the new service term selected by the customer. The customer will be required to sign a new 12-month contract.
 3. Disconnect the service.

/1/ Effective January 25, 2013, 24-, 36-, 48- and 60-Month Service Terms are no longer available for new installations or renewals of Primary Rate ISDN SelectData service. Customers currently on a 24-, 36-, 48- or 60-Month Service Term may continue service at their existing rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service by entering into a new 12-month Service Term agreement at the then current applicable 12-month rates. If the customer does not enter into a new 12-month Service Term agreement, or requests discontinuance of the service, the Month-to-Month rates in effect at such time will automatically apply.

/2/ Material formerly appeared in Part 17, Section 2.

/2/

PRIMARY RATE ISDN: SELECTDATA (cont'd)

/2/

E. Regulations (cont'd)

4. Moves

a. Different Central Office

Customer moves which require the SelectData Control Link or Communication Link to be provided from a different central office will be considered a disconnection of service for each Control Link and Communication Link moved. Charges will apply as described in "Disconnection of Service Prior to Expiration of Service Term", herein. Installation charges per the Rates and Charges section will apply for the re-establishment of the customer's SelectData service.

b. Same Central Office

Customer moves which do not require the Select Data Control Link or Communication Link to be provided from another central office will not constitute a disconnection of service provided the service is not interrupted. Nonrecurring charges will apply.

5. Disconnection of Service Prior to the Expiration of the Service Term

- a. If the customer disconnects a SelectData Control Link or Communications Link prior to the expiration of the 12-, 24-, 36-, 48- or 60-month service term^{/1/}, the customer shall pay a termination charge for each SelectData Control Link or Communication Link disconnected. Payment of the termination charge does not release the customer from other previous amounts owed to the Company. The termination charge shall be all unpaid nonrecurring charges (excluding any waived charges); plus fifty percent (50%) of all recurring charges for the remaining months of the customer's term. Additional charges will not be applied for any Link Extensions disconnected prior to the expiration of the service term.
- b. If the customer disconnects a SelectData Control Link or Communication Link prior to the expiration of the 12-, 24-, 36-, 48- or 60-month service term^{/1/} and the Installation Charges and/or Special Construction Charge were deferred at the time service was established, the customer shall pay a charge equal to the remaining principal on the deferred payment term for each Control Link or Communication Link disconnected.

The provisions as stated above in this paragraph do not apply when a customer with an existing contract converts to another Company digital service under a contract term which is equal to or greater than the number of months remaining on the primary Rate ISDN contract being terminated.

/1/ Effective January 25, 2013, 24-, 36-, 48- and 60-Month Service Terms are no longer available for new installations or renewals of Primary Rate ISDN SelectData service. Customers currently on a 24-, 36-, 48- or 60-Month Service Term may continue service at their existing rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service by entering into a new 12-month Service Term agreement at the then current applicable 12-month rates. If the customer does not enter into a new 12-month Service Term agreement, or requests discontinuance of the service, the Month-to-Month rates in effect at such time will automatically apply.

/2/ Material formerly appeared in Part 17, Section 2.

/2/

PRIMARY RATE ISDN: SELECTDATA (cont'd)

/1/

F. Responsibility of the Customer

1. Where SelectData service is available for use in connection with terminal equipment or communication systems located on the customer's side of the demarcation point, the operating characteristics of such equipment or systems shall be such as not to interfere with any of the services offered by the Company. Such use is subject to the further provisions that the equipment located on the customer's side of the demarcation does not endanger the safety of Company employees or the public; damage or require alteration of the equipment or other services of the Company; interfere with the proper functioning of such equipment or services; impair the operation of the Company's equipment; or otherwise injure the public in its use of Company services. Upon notice from the Company that the equipment located on the customer's side of the demarcation point, is causing, or is likely to cause, such hazard or interference, the customer shall immediately take such steps as shall be necessary to remove or prevent such hazard or interference. All customer equipment must comply with FCC Rules and Regulations Part 68.
2. The customer, upon request, shall furnish such information as may be required to permit the Company to design and maintain the SelectData service it offers and to assure that the service arrangement is in accordance with the regulations contained herein.
3. The customer shall insure the continuing compatibility of the customer provided terminal and data unit equipment that is used in conjunction with the SelectData service.

G. Responsibility of the Company

1. The responsibility of the Company shall be limited to the furnishing of network equipment suitable for SelectData service and the maintenance and operation of such equipment in a manner proper for such service. Subject to this responsibility the Company shall not be responsible for the through-transmission of signals generated by equipment or systems located on the customer's side of the demarcation point or for the quality of, or defects in, such transmission or the reception of signals by such equipment or systems. The Company shall not be responsible for installation, operation or maintenance of any terminal equipment, data unit, cable or communications systems located on the customer's side of the demarcation point. The Company is not responsible for adapting SelectData service to the technological requirements of any specific customer equipment.
2. The Company shall not be responsible to the customer or user, if changes in any of the equipment, operations, or procedures of the Company used in the provision of SelectData service render any facilities located on the customer's side of the demarcation point obsolete or require modifications or alteration of such equipment or system or otherwise affect its use or performance, provided the Company has met any applicable information disclosure requirements.
3. The Company shall maintain and repair the service which it furnishes up to and including the network interface. The customer or user may not rearrange, disconnect, remove, attempt to repair, remote test or interfere with any network equipment installed by the Company without prior written consent of the Company.

/1/

/1/ Material formerly appeared in Part 17, Section 2.

PRIMARY RATE ISDN: SELECTDATA (cont'd)

/1/

G. Responsibility of the Company (cont'd)

4. The Company does not undertake to originate data, but offers the use of its service components, where available, to customers for the purpose of transporting customer originated data.
5. The Company shall not be liable for any loss or damage as described in Part 2, Section 2, "Rules and Regulations Applying to all Customer Contracts".

H. Service Availability

1. The Company will designate the SelectData-equipped central office(s) used to physically provision SelectData service to customers in each exchange. In many cases, a customer's designated SelectData serving central office will be different from the normal serving office designated for basic local exchange service.
 - a. If the customer's normal serving office is within the non-optional local calling scope of the designated SelectData serving office, Link Extension charges will not apply.
 - b. If the customer's normal serving office is not within the non-optional local calling scope of a SelectData-equipped central office, the customer will be provided with SelectData service from the designated SelectData equipped central office and the rates and charges for Link Extension, as specified herein, will apply.
 - c. In cases a and b, when there is a change in the central office designated as the SelectData serving office for a customer's location, the customer's SelectData service will continue to be provided from the original SelectData serving office, if possible. Should the customer subsequently request that their SelectData service be provisioned from the new designated service, the provisions and charges specified herein, will apply. The Company may request that the customer, at the customer's option, have the customer's SelectData service provided from the new designated serving office and, in conjunction therewith, may offer to waive move and/or disconnect charges.
2. If a customer requests SelectData service to be provisioned from an office other than the SelectData serving office designated by the Company, and if agreed to by the Company, SelectData Service may be extended to central offices within the same Local Access Transport Area (LATA) through the application of Primary Rate ISDN Interface Communications and/or Control Links, and High Capacity Service Channel Mileage, MegaLink Custom (DS3) Service, or other suitable Company services. This arrangement is only available within areas where the Company is the incumbent.

/1/

/1/ Material formerly appeared in Part 17, Section 2.

PRIMARY RATE ISDN: SELECTDATA (cont'd)

/1/

H. Service Availability (cont'd)

3. All rates, charges, terms and conditions set forth herein provide for the furnishing of service where suitable facilities and equipment are available in the customer's SelectData serving office and do not create an obligation for the Company to construct such facilities or equipment especially for the provision of this service.
4. Special Construction will be provided under the Special Construction section in Part 2. Special Construction is construction undertaken by the Company where facilities are not available and there is no other requirement for the facilities constructed; of a type facility other than that normally used for this service; over a route other than that which would normally be used; in a quantity greater than what the Company would normally construct for the needs of this service; on a temporary basis until permanent facilities are completed; involving abnormal costs; or in advance of normal construction on an expedited basis.
5. Other Guidebook and Service Publication Offerings
 - a. Other ancillary Guidebook and service publication offerings requested by the customer, which are compatible with and not detrimental to SelectData, may be furnished in accordance with the regulations and at rates and charges specified in the applicable paragraph in this Guidebook or other service publications of the Company.
 - b. For the purpose of these services, where such other rates and regulations apply on a "per line" basis, they shall be interpreted, in these instances, on a "per channel or line termination" basis.
6. Unique Service Arrangements
Unique requests for special or modified service arrangements will be accepted, whenever possible, if not detrimental to this or other services of the Company. Such requests are accepted pursuant to Part 2, Section 7, "Special Service Arrangements", and will be based upon costs.
7. Supersedure
SelectData service may be transferred to a new customer at the same premises upon written concurrence of the Company. The customer to whom service is transferred will be subject to all past indebtedness, liabilities, minimum term provisions and equipment configurations currently in effect for the previous customer. A service charge, as specified in Part 2, Section 2, "Rules and Regulations Applying to All Customers' Contracts", will be applicable in addition to rules therein.

/1/

/1/ Material formerly appeared in Part 17, Section 2.

PRIMARY RATE ISDN: SELECTDATA (cont'd)

/1/

I. Application of Rates and Charges

1. Rules, regulations, and amounts pertaining to advance payments, deposits, guaranty contracts and payments for service are found in Part 2, Section 2, "Rules and Regulations Applying to All Customers' Contracts".
2. In addition to the rates and charges contained in this Guidebook, the customer is responsible for the payment of all related charges for exchange services, miscellaneous and supplemental services as specified in this and other service publications of the Company.
3. Additions of service can be made by the payment of rates and charges effective at the time of the additions for such service.
4. A minimum of one Control Link is required per SelectData arrangement. SelectData provides digital connections of 56/64 kbps only. A SelectData arrangement can consist of any combination of Control Links and Communication Links.
5. The monthly rate for the Link Extension is charged in addition to the monthly rate for each associated Control Link or Communication Link included in the SelectData arrangement. The Link Extension(s) must be associated with and ordered at the same time as the Control Link(s) and Communication Link(s).
6. The SelectData Control Link, Communication Link and Link Extension rates will not be subject to Company initiated rate increases for the duration of the 12-, 24-, 36-, 48- or 60-month term selected by the customer.
7. Optional Deferred Payment of Nonrecurring Charges and/or Special Construction Charges is available only for customers selecting the 12-, 24-, 36-, 48- or 60-month service term.
 - a. Before service is established, the customer may request to spread all the Nonrecurring Charges (including the Installation Charges associated with option features) and/or Special Construction charges over a payment period of 12, 24, 36, 48 or 60 months but not to exceed the 12-, 24-, 36-, 48- or 60-month service term. The customer cannot change the deferred payment term. The deferred monthly charge will equal the Nonrecurring Charges and/or Special Construction Charges multiplied by the appropriate annuity factor as found in Part 2, Section 2, "Rules and Regulations Applying to All Customers' Contracts".
 - b. Upon 30 days prior notification to the Company, the customer may terminate the deferred payment term by paying the remaining principal in full. No credit will be made for interest already paid or accrued.

b. Additional Numbers, each	/ZTN/	^{/7/}	^{/7/}	^{/7/}	(C)
c. Calling Line Identification, each Control Link or Communication Link	/ZCE/	100.00	100.00	100.00	
d. Loop Protection, each Control Link or Communication Link ^{/3/}	/ZLP/	140.00	355.00	355.00	
e. Additional Call Handling Groups, per Group ^{/4/}	/TGNBX/	45.00	100.00	---	
f. Trunk Group Overflow, per Overflow Arrangement ^{/5/}	/ZVOPG/	150.00	250.00	---	

/1/ Applies to the first unit ordered per request, per customer premises, per installation date.

/2/ Applies to all other units ordered in addition to the initial unit per request, per premises, per installation date.

/3/ Loop Protection will be provided where fiber optic facilities are available. Where fiber optic facilities are not available, but could technically be provided, special construction charges may apply.

/4/ Charge applies on a per Link basis but all Links within the same Arrangement must be equipped.

/5/ An Overflow Arrangement consists of 2 to 10 spans as specified by the customer.

/6/ Effective May 1, 2014, SelectData services are grandfathered for existing customers with existing service at existing locations. See Sheet 1.

/7/ See Part 6, Section 1, Paragraph B, "Direct Inward Dialing Service to Customer-Premise Located Switching Systems/Primary Rate ISDN" for Additional Numbers rates. (C)

PRIMARY RATE ISDN: SELECTVIDEO

Effective May 1, 2014, no further installations, moves, rearrangements, or changes of any type will be made to Primary Rate ISDN: Select Video services. Customers of record on May 1, 2014 may continue their service as long as such service remains at the location at which it was being furnished on the aforementioned date. In the event that these services are discontinued at their present location for any reason, they will not be reestablished.

(N)

(N)

A. General

/1/

1. This Guidebook section contains rules, regulations, terms, conditions and prices uniquely applicable to services furnished or made available by the Company in its authorized territories within the state of Oklahoma.
2. Such rules, regulations, terms, conditions and prices contained herein are in addition to other applicable rules, regulations, terms, conditions and prices specified in other service publications of the Company and are hereby made part of this Guidebook. In the event of conflicting rules, regulations, terms or conditions, those of this Guidebook shall be controlling.

B. Service Description

Primary Rate ISDN SelectVideo (herein after referred to as SelectVideo or SelectVideo service) is an IntraLATA dial-up multi-rate switched digital data service. SelectVideo provides digital connections ranging from 64 Kbps to 1536 Kbps (synchronous) in 64 Kbps increments of bandwidth via the public switched network. The specific rate is user-selectable on a per call basis. Network access to SelectVideo is via fully configured ISDN primary rate interfaces (PRI). A minimum of two PRIs (one configured for 23B+D and one configured for 24B) is required for 1536 Kbps calls.

C. DefinitionsBandwidth

The amount of information a customer can send or receive over a single connection in a specified period of time. Bandwidth is typically specified in Kilobits per second (Kbps).

B Channel (Bearer Channel)

A communication path capable of transmitting information at a speed of up to 64 Kbps. This communication path may be used by a SelectVideo customer for data mode calls to provide data and/or video communications between customer specified locations.

D Channel (Delta Channel)

A communications path set up to transmit data in packet forms at speeds up to 64 Kbps. This communications path is designated to send and receive signaling messages.

Fully Configured ISDN Primary Rate Interface

A fully configured PRI is one where all 24 channels are equipped for service.

ISDN (Integrated Services Digital Network)

A network architecture which allows the simultaneous transmission of information over a single facility incorporating the use of Bearer Channels (B Channels) and a Data Channel (D Channel).

/1/

/1/ Material formerly appeared in Part 17, Section 2.

PRIMARY RATE ISDN: SELECTVIDEO (cont'd)

/2/

C. Definitions (cont'd)ISDN Primary Rate Interface (PRI)

Denotes the connection of a 1.544 Mbps digital facility to the ISDN-PRI capable central office switch. The twenty-four channels are typically divided into twenty-three "B" Channels plus 1 "D" Channel. Software in the ISDN-PRI equipped central office switch defines the type of services that will be carried within the 1.544 Mbps digital facility.

Primary Market Area (PMA)

A geographic area which includes all wire centers comprising the flat rate calling scope of a specific metropolitan exchange or local exchange area and is suitably equipped to provide SelectVideo functionality. One or more PMAs may be located within a LATA.

D. Service Components1. SelectVideo Arrangement

Provides the communication path capable of bandwidth aggregation from the demarcation point at the customer's premises to the SelectVideo serving office. A SelectVideo arrangement may consist of Control Links and Communication Links. A minimum of one Control Link is required per SelectVideo arrangement. This minimum configuration will provide digital connections from 64 Kbps to 1472 Kbps in increments of 64 Kbps. In order to transmit at 1536 Kbps, the SelectVideo arrangement must include at least one Control Link and one Communication Link.

a. Control Link

A PRI configured with one D Channel or a back-up D Channel and 23 B Channels to provide up to 1472 Kbps of bandwidth.

b. Communication Link

A PRI configured with 24 B Channels to provide up to 1536 Kbps of bandwidth.

2. SelectVideo Usage

Provides for usage of the Public Switched Telephone Network (PSTN).

a. Payment Option 1 usage is billed on a per minute of use basis as described in "Application of Rates and Charges", herein.

b. Payment Option 2^{/1/} provides a choice of three usage packages, each of which includes a monthly usage allowance of channel minutes. All usage in excess of the allowance is billed on a per minute of use basis. Usage packages are further described in "Application of Rates and Charges", herein.

c. Payment Option 3^{/1/} monthly rates for Control Links and Communication Links include unlimited SelectVideo IntraLATA usage. See "Rates and Charges", herein.

/1/ OBSOLETE: SelectVideo Payment Option 2, Payment Option 3, and the associated Usage Packages are obsolete and only available to existing installations at existing locations for existing customers.

/2/ Material formerly appeared in Part 17, Section 2.

/2/

PRIMARY RATE ISDN: SELECTVIDEO (cont'd)

/1/

D. Service Components (cont'd)

3. Link Extension
Provides connection for customers located outside of a Primary Market Area equipped with SelectVideo (but within the same LATA). One Link Extension is required for each Control Link and Communication Link included in the SelectVideo arrangement.
4. Optional Features
 - a. Back-Up D Channel (BD-C)
Allows enhanced survivability of the SelectVideo arrangement by providing automatic takeover for a failed D Channel.
 - b. Additional Numbers
Provides additional numbers to the SelectVideo user.
 - c. Calling Line Identification (CLID)
Allows the number and name (where technically capable) of the calling party to be delivered to the called party as part of the called party set-up message.

E. Regulations

1. SelectVideo service, as provided per this Guidebook, is furnished pursuant to Part 2, Section 2, "Rules and Regulations Applying to All Customers' Contracts", and is subject to all the rules and regulations therein. The following rules and regulations are in addition to other rules and regulations as stated in this and other service publications of the Company.
 - a. SelectVideo provides for the transmission of data mode calls only.
 - b. SelectVideo service does not have available the local calling scopes of any optional extended area calling service plan.
 - c. SelectVideo service does not have available any of the Optional Toll Calling Plans.
 - d. SelectVideo service, when furnished at the same premises in combination with other local exchange service, shall not be considered to be in conflict with the rules of paralleling service.
 - e. SelectVideo service is for the exclusive use of the customer and shall not be shared or jointly used. Resale is prohibited.
 - f. Temporary suspension of service at the request of the customer, either partial or complete is not applicable for this offering.
 - g. Alternate billing is not available for SelectVideo service.

/1/

/1/ Material formerly appeared in Part 17, Section 2.

PRIMARY RATE ISDN: SELECTVIDEO (cont'd)

/2/

E. Regulations (cont'd)

2. Technical Specifications

- a. SelectVideo requires the use of customer provided equipment (CPE) which must be compatible with the Company's equipment and facilities, and is subject to the interface specifications in TR-TSY-000776 (Network Interface Description for ISDN Customer Access) and TR-NWT-001203 (Generic Requirements for the Switched DS1/Switched Fractional DS1 Service Capability from an ISDN Interface (SelectVideo/ISDN)). These documents may be obtained from:

Telcordia Document Register
445 South Street, Room 2J-125
P.O. Box 1910
Morristown, NJ
Telephone: 1-800-521-2673

- b. Compatible CPE must be provided at both the originating and terminating locations to successfully complete a SelectVideo call.

3. Service Terms^{/1/}

- a. All SelectVideo service components have a minimum service term of one month.
- b. The customer shall select a service term for each Control Link and Communication Link of either month-to-month, 12, 36 or 60 continuous months^{/1/}. Customers selecting either a 12-36- or 60-month service term^{/1/} will be required to sign a contract per order. When a Link Extension is required, it will be provided under the same service term as the associated Control Link/Communication Link.
- c. Customers selecting the Month-to-Month service term may convert to the 12--Month service term at current guidebook rates. Customers converting from a Month-to-Month service term within 60 days from the date their SelectVideo service is established, will receive a credit equal to the difference in installation charges associated with the Month-to-Month service term and the newly 12-month selected service term.

/1/ Effective January 25, 2013, 36- and 60-Month Service Terms are no longer available for new installations or renewals of Primary Rate ISDN: SelectVideo service. Customers currently on a 36- or 60-Month Service Term may continue service at their existing rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service by entering into a new 12-month Service Term agreement at the then current applicable 12-month rates. If the customer does not enter into a new 12-month Service Term agreement, or requests discontinuance of the service, the Month-to-Month rates in effect at such time will automatically apply.

/2/ Material formerly appeared in Part 17, Section 2.

/2/

PRIMARY RATE ISDN: SELECTVIDEO (cont'd)

/2/

E. Regulations (cont'd)

3. Service Terms^{/1/} (cont'd)
 - d. Customers converting to a new service term will be required to sign a new contract.
 - e. Conversion from a 12-, 36- or 60-month service term other than as described above will be considered a disconnection of service prior to the expiration and subject to charges described herein.
 - f. Upon expiration of the 12-, 36- or 60-month service term^{/1/}, the customer may:
 1. Continue service at the current Month-to-Month service term rate. That rate will be subject to any future changes.
 2. Continue service by selecting a new 12-month service term for the Control Link and/or Communication Link at the current rates. The rates for the Control Link and/or Communication Link and any associated Link Extensions will not be subject to rate increases for the duration of the new service term selected by the customer. The customer will be required to sign a new 12-month contract.
 3. Disconnect the service.
4. Moves
 - a. Different Central Office
Customer moves which require the SelectVideo Control Link or Communication Link to be provided from a different central office will be considered a disconnection of service for each Control Link and Communication Link moved. Charges will apply as described in "Disconnection of Service Prior to Expiration of Service Term", herein. Installation charges per the "Rates and Charges" section will apply for the re-establishment of the customer's Select Video service.
 - b. Same Central Office
Customer moves which do not require the Select Video Control Link or Communication Link to be provided from another central office will not constitute a disconnection of service provided the service is not interrupted. The installation of charges associated with the 36-month service term will apply.

/1/ Effective January 25, 2013, 36- and 60-Month Service Terms are no longer available for new installations or renewals of Primary Rate ISDN: SelectVideo service. Customers currently on a 36- or 60-Month Service Term may continue service at their existing rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service by entering into a new 12-month Service Term agreement at the then current applicable 12-month rates. If the customer does not enter into a new 12-month Service Term agreement, or requests discontinuance of the service, the Month-to-Month rates in effect at such time will automatically apply.

/2/ Material formerly appeared in Part 17, Section 2.

/2/

PRIMARY RATE ISDN: SELECTVIDEO (cont'd)

/2/

E. Regulations (cont'd)

5. Disconnection of Service Prior to the Expiration of the Service Term
 - a. If the customer disconnects a SelectVideo Control Link or Communication Link prior to the expiration of the 12-, 36- or 60-month service term^{/1/}, the customer shall pay a termination charge for each SelectVideo Control Link or Communication Link disconnected. Payment of the termination charge does not release the customer from other previous amounts owed to the Company. The termination charge shall be all unpaid nonrecurring charges (excluding any waived charges), plus fifty percent (50%) of all recurring charges for the remaining months of the customer's term. Additional charges will not be applied for any Link Extensions disconnected prior to the expiration of the service term.
 - b. If the customer disconnects a SelectVideo Control Link or Communication Link prior to the expiration of the 12-, 36- or 60-month service term^{/1/}, and the Installation Charges and/or Special Construction Charge were deferred at the time service was established, the customer shall pay a charge equal to the remaining principal on the deferred payment term for each Control Link or Communication Link disconnected.

The provisions as stated in this paragraph do not apply when a customer with an existing contract converts to Primary Rate ISDN SelectData or another Company digital service under a contract term which is equal to or greater than the number of months remaining on the primary Rate ISDN contract being terminated.

6. Payment Options
 - a. All components of a SelectVideo arrangement must be provided under the same payment option.
 - b. Upon notification to the Company, Payment Option 2 and Payment Option 3 customers may change to Payment Option 1 for the same service term or for a longer service term, pursuant to Paragraph E.3. Customers choosing to change Payment Options will be required to sign a new contract. Billing under the newly selected payment option will commence at the beginning of the customer's next billing period at the rates in effect on the billing date.

/1/ Effective January 25, 2013, 36- and 60-Month Service Terms are no longer available for new installations or renewals of Primary Rate ISDN: SelectVideo service. Customers currently on a 36- or 60-Month Service Term may continue service at their existing rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service by entering into a new 12-month Service Term agreement at the then current applicable 12-month rates. If the customer does not enter into a new 12-month Service Term agreement, or requests discontinuance of the service, the Month-to-Month rates in effect at such time will automatically apply.

/2/ Material formerly appeared in Part 17, Section 2.

/2/

PRIMARY RATE ISDN: SELECTVIDEO (cont'd)

/2/

E. Regulations (cont'd)

7. Usage Packages^{/1/}
 - a. Customers selecting Payment Option 2 will be required to select an accompanying Usage Package for their SelectVideo usage.
 - b. The customer may opt to change usage packages upon notification to the Company. Billing under the newly selected usage package will commence at the beginning of the customer's next billing period at the rates in effect on the billing date.

F. Responsibility of the Customer

1. Where SelectVideo service is available for use in connection with terminal equipment or communication systems located on the customer's side of the demarcation point, the operating characteristics of such equipment or systems shall be such as not to interfere with any of the services offered by the Company. Such use is subject to the further provisions that the equipment located on the customer's side of the demarcation does not endanger the safety of Company employees or the public; damage or require alteration of the equipment or other services of the Company; interfere with the proper functioning of such equipment or services; impair the operation of the Company's equipment; or otherwise injure the public in its use of Company services. Upon notice from the Company that the equipment located on the customer's side of the demarcation point, is causing, or is likely to cause, such hazard or interference, the customer shall immediately take such steps as shall be necessary to remove or prevent such hazard or interference. All customer equipment must comply with FCC Rules and Regulations Part 68.
2. The customer, upon request, shall furnish such information as may be required to permit the Company to design and maintain the SelectVideo service it offers and to assure that the service arrangement is in accordance with the regulations contained herein.
3. The customer shall insure the continuing compatibility of the customer provided terminal and data unit equipment that is used in conjunction with the SelectVideo service.

/1/ OBSOLETE: SelectVideo Payment Option 2, Payment Option 3, and the associated Usage Packages are obsolete and only available to existing installations at existing locations for existing customers.

/2/ Material formerly appeared in Part 17, Section 2.

/2/

PRIMARY RATE ISDN: SELECTVIDEO (cont'd)

/1/

G. Responsibility of the Company

1. The responsibility of the Company shall be limited to the furnishing of network equipment suitable for SelectVideo service and the maintenance and operation of such equipment in a manner proper for such service. Subject to this responsibility the Company shall not be responsible for the through-transmission of signals generated by equipment or systems located on the customer's side of the demarcation point or for the quality of, or defects in, such transmission or the reception of signals by such equipment or systems. The Company shall not be responsible for installation, operation or maintenance of any terminal equipment, data unit, cable or communications systems located on the customer's side of the demarcation point. The Company is not responsible for adapting SelectVideo service to the technological requirements of any specific customer equipment.
2. The Company shall not be responsible to the customer or user, if changes in any of the equipment, operations, or procedures of the Company used in the provision of SelectVideo service render any facilities located on the customer's side of the demarcation point obsolete or require modifications or alteration of such equipment or system or otherwise affect its use or performance, provided the Company has met any applicable information disclosure requirements.
3. The Company shall maintain and repair the service which it furnishes up to and including the network interface. The customer or user may not rearrange, disconnect, remove, attempt to repair, remote test or interfere with any network equipment installed by the Company without prior written consent of the Company.
4. The Company does not undertake to originate data, but offers the use of its service components, where available, to customers for the purpose of transporting customer originated data.
5. The Company shall not be liable for any loss or damage as described Part 2, Section 2, "Rules and Regulations Applying to all Customer Contracts".

H. Service Availability

1. SelectVideo service is available within a suitably equipped primary market area (PMA) served by the Company. A customer's premises need not be within the actual SelectVideo serving office area as in the case of a multi-office exchange.
2. SelectVideo is available within the following PMAs: Oklahoma City, Tulsa.
3. SelectVideo is offered to customers outside of the PMA (but within the same LATA) where existing facilities and operating conditions permit. In such cases, the customer will be required to subscribe to a Link Extension for each Control Link and Communication Link included in their SelectVideo arrangement.

/1/

/1/ Material formerly appeared in Part 17, Section 2.

PRIMARY RATE ISDN: SELECTVIDEO (cont'd)

/1/

H. Service Availability (cont'd)

4. All rates, charges, terms and conditions set forth herein provide for the furnishing of service where suitable facilities and equipment are available in the customer's PMA and do not create an obligation for the Company to construct such facilities or equipment especially for the provision of this service.
5. Special Construction will be provided under the Special Construction section in Part 2. Special Construction is construction undertaken by the Company where facilities are not available and there is no other requirement for the facilities constructed; of a type facility other than that normally used for this service; over a route other than that which would normally be used; in a quantity greater than what the Company would normally construct for the needs of this service; on a temporary basis until permanent facilities are completed; involving abnormal costs; or in advance of normal construction on an expedited basis.
6. Other Guidebook and Service Publication Offerings
 - a. Other ancillary Guidebook and service publication offerings requested by the customer, which are compatible with and not detrimental to SelectVideo, may be furnished in accordance with the regulations and at rates and charges specified in the applicable paragraph in this Guidebook or other service publications of the Company.
 - b. For the purpose of these services, where such other rates and regulations apply on a "per line" basis, they shall be interpreted, in these instances, on a "per channel or line termination" basis.
7. Unique Service Arrangements
Unique requests for special or modified service arrangements will be accepted, whenever possible, if not detrimental to this or other services of the Company. Such requests are accepted pursuant to Part 2, Section 7, "Special Service Arrangements", and will be based upon costs.
8. Supersedure
SelectVideo service may be transferred to a new customer at the same premises upon written concurrence of the Company. The customer to whom service is transferred will be subject to all past indebtedness, liabilities, minimum term provisions and equipment configurations currently in effect for the previous customer. A service charge, as specified in Part 2, Section 2, "Rules and Regulations Applying to All Customers' Contracts", will be applicable in addition to rules therein.

I. Application of Rates and Charges

1. Rules, regulations, and amounts pertaining to advance payments, deposits, guaranty contracts and payments for service are found in Part 2, Section 2, "Rules and Regulations Applying to All Customers' Contracts".
2. In addition to the rates and charges contained in this Guidebook, the customer is responsible for the payment of all related charges for exchange services, miscellaneous and supplemental services as specified in this and other service publications of the Company.

/1/

/1/ Material formerly appeared in Part 17, Section 2.

PRIMARY RATE ISDN: SELECTVIDEO (cont'd)

/1/

I. Application of Rates and Charges (cont'd)

3. Additions of service can be made by the payment of rates and charges effective at the time of the additions for such service.
4. A minimum of one Control Link is required per SelectVideo arrangement. This minimum configuration will provide digital connections from 64 Kbps to 1472 Kbps in increments of 64 Kbps. In order to transmit at 1536 Kbps, the SelectVideo arrangement must include at least one Control Link and one Communication Link. A SelectVideo arrangement can consist of any combination of Control Links and Communication Links.
5. SelectVideo usage rates apply per originating minute of use per call.
6. Timing of a SelectVideo call shall begin when an answer signal is received from the called party. Completion of a SelectVideo call is signified when a disconnect signal is received from either the calling or called party.
7. SelectVideo usage charges shall apply per each minute or fraction thereof that each SelectVideo call is connected. The minimum duration for a SelectVideo call shall be one minute.
8. The monthly rate for the Link Extension is charged in addition to the monthly rate for each associated Control Link or Communication Link included in the SelectVideo arrangement. The Link Extension(s) must be associated with and ordered at the same time as the Control Link(s) and Communication Link(s).
9. The SelectVideo Control Link, Communication Link and Link Extension rates will not be subject to a Company initiated rate increase for the duration of the 12-, 36- or 60-month term selected by the customer. Except, however, the customer may experience a rate increase, if the customer chooses to change payment options or usage packages pursuant to "Regulations", herein.
10. Optional Deferred Payment of Nonrecurring Charges and/or Special Construction Charges is available only for customers selecting either the 12-, 36- or 60-month service term^{/1/}.
 - a. Before service is established, the customer may request to spread all the Nonrecurring Charges (including the Installation Charges associated with option features) and/or Special Construction charges over a payment period of either 12, 24, 36, 48 or 60 months but not to exceed the 12-, 36- or 60-month service term^{/1/}. The customer cannot change the deferred payment term. The deferred monthly charge will equal the Nonrecurring Charges and/or Special Construction Charges multiplied by the appropriate annuity factor as found in Part 2, Section 2, "Rules and Regulations Applying to All Customers' Contracts".
 - b. Upon 30 days prior notification to the Company, the customer may terminate the deferred payment term by paying the remaining principal in full. No credit will be made for interest already paid or accrued.

/1/

/1/ Material formerly appeared in Part 17, Section 2.

PRIMARY RATE ISDN: SELECTVIDEO (cont'd)

/2/

I. Application of Rates and Charges (cont'd)11. Usage Packages^{/1/}

- a. Payment Option 2 Usage Packages includes an allowance of channel minutes. The usage allowance applies to SelectVideo Intra-PMA and IntraLATA outside the PMA aggregate usage per SelectVideo arrangement, per month.
- b. IntraLATA Long Distance Message Telecommunications Service (LDMTS) charges apply for all IntraLATA outside the PMA calls regardless of whether they are included in the usage package allowance.
- c. Each call will be converted to channel minutes per call by multiplying the total minutes per call by the number of B channels required for the call. (The number of B channels required for each call can be determined by dividing the call bandwidth by 64.) Channel minutes per call will be accumulated to determine when the usage package allowance has been exhausted for the current billing cycle. The appropriate SelectVideo bandwidth usage rate per minute of use will apply for each subsequent call completed during the billing cycle.
- d. When the usage package allowance of channel minutes is exceeded in the middle of a call, the remaining channel minutes in excess of the allowance will be converted back to minutes of use by dividing the remaining channel minutes by the number of B channels used for the call. The result of this conversion calculation will be rounded to the next whole minute. The appropriate SelectVideo bandwidth usage rate per minute of use will apply for the portion of the call exceeding the usage package allowance.

12. A Billing conversion Charge will apply each time a customer changes payment options or usage packages unless this change is coincident with changing service term pursuant "Service Terms", herein.

/1/ OBSOLETE: SelectVideo Payment Option 2, Payment Option 3, and the associated Usage Packages are obsolete and only available to existing installations at existing locations for existing customers.

/2/ Material formerly appeared in Part 17, Section 2.

36-Months ^{/3/}		4,300.00	1,500.00	955.00
60-Months ^{/3/}		4,000.00	1,500.00	955.00
b. Link Extension, each	/OTV SX/	50.00	0.00	0.00

/1/ Applies to the first unit ordered per request, per customer premises, per installation date.

/2/ Applies to all other units ordered in addition to the initial unit per request, per premises, per installation date.

/3/ Effective January 25, 2013, 36- and 60-Month Service Terms are no longer available for new installations or renewals of Primary Rate ISDN: SelectVideo service. Customers currently on a 36- or 60-Month Service Term may continue service at their existing rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service by entering into a new 12-month Service Term agreement at the then current applicable 12-month rates. If the customer does not enter into a new 12-month Service Term agreement, or requests discontinuance of the service, the Month-to-Month rates in effect at such time will automatically apply.

/4/ OBSOLETE: SelectVideo Payment Option 2, Payment Option 3, and the associated Usage Packages are obsolete and only available to existing installations at existing locations for existing customers.

/5/ Payment Option 3 includes unlimited SelectVideo intraLATA usage. Rates for intrastate, intraLATA Long Distance Message Telecommunication Service (LDMTS) apply in addition to the Payment Option 3 monthly usage rate.

/6/ Effective May 1, 2014, SelectVideo services are grandfathered for existing customers with existing service at existing locations. See Sheet 14.

DIGILINE SERVICE^{/1/}

/3/

Effective September 1, 2021, DigiLine Service will no longer be available for purchase by new or existing customers. In addition, requests to move, add, change, or renew existing service arrangements will not be accepted. The Company will continue to provide existing service to existing customers until the expiration of a customer's term agreement. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Month-to-Month rates until the service is discontinued. The Company currently plans to discontinue this service on or after August 1, 2023.

(N)

(N)

A. General

/3/

1. This Guidebook section contains rules, regulations, terms, conditions and prices uniquely applicable to services furnished or made available by the Company in its authorized territories within the state of Oklahoma.
2. Such rules, regulations, terms, conditions and prices contained herein are in addition to other applicable rules, regulations, terms, conditions and prices specified in other service publications of the Company and are hereby made part of this Guidebook. In the event of conflicting rules, regulations, terms or conditions, those of this Guidebook shall be controlling.

B. Service Description

DigiLine Service is a Basic Rate Interface (BRI) Integrated Services Digital Network (ISDN) based service which offers two 64 Kilobits per second (Kbps) B channels and one 16 Kbps D Channel. One or both B channels may be configured for circuit switching or packet switching^{/2/}. Calls over a B channel configured for circuit switching may be either voice or data. The D channel carries out of band signaling for the B channel(s). DigiLine Service, when configured for circuit switching, provides access to and from the Public Switched Telephone Network (PSTN). DigiLine Service, when configured for packet switching, provides access to the Company's Public Packet Switched Network (PPSN)^{/2/}.

The Company will provide DigiLine Service within a suitably equipped LATA where facilities and equipment are available. This Guidebook section does not create an obligation for the Company to construct such facilities or equipment for this service. Availability of selected optional features may be dependent upon the DigiLine serving central office switching technology.

DigiLine Service Area is defined as a Company exchange with one or more DigiLine-equipped central offices, plus all other Company exchanges and/or zones included in the equipped central office's non-optional local calling area as defined in Part 4, Section 1.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ DigiLine packet switching is only available for installations of B channel packet that do not connect to the DPN packet switch.

/3/ Material formerly appeared in Part 17, Section 1.

/3/

DIGILINE SERVICE^{/1/} (cont'd)

/3/

C. Service Components: Descriptions And Definitions

1. Standard Service Components

Basic Rate Interface

Provides the central office hardware, software and a 144 Kbps facility required to provide DigiLine Service.

Network Rate Element

In addition to the Basic Rate Interface, all DigiLine Service customers must choose at least one Network Rate Element. The Network Rate Element provides the customer the ability to customize their service for specific applications by ordering either Circuit Switched Voice/Circuit Switched Data or Packet Switched Data^{/2/} transport options. The individual transport options include:

Integrated Services Digital Circuit-Switched Voice (CSV)/Circuit Switched Data (CSD) Transport Options

Provides for the circuit switched local use of the PSTN. Only the Integrated Services Digital CSV/CSD Transport Option noted DigiLine Service Compatible in Paragraph H can be associated with DigiLine Service.

Permanent PSD B Channel^{/2/}

Packet switching virtual circuit over a B channel (up to 64 Kbps) using X.25 packet switched data.

2. Optional Service Components

Additional Call Offering

A non-Electronic Key Terminal Service (EKTS) feature that notifies the user of an additional circuit switched voice call that would normally be cleared, because the user's interface is busy. The method of notification to the end-user is customer premises equipment dependent.

Analog Member in a Hunt Group

Provides for an analog interface in a DigiLine Hunt Group.

r

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ DigiLine packet switching is only available for installations of B channel packet that do not connect to the DPN packet switch.

/3/ Material formerly appeared in Part 17, Section 1.

/3/

DIGILINE SERVICE^{/1/} (cont'd)

/2/

C. Service Components: Descriptions And Definitions (cont'd)

2. Optional Service Components (cont'd)

Automatic Callback

Enables the customer to place a call to the number of the last incoming call, whether or not the call was answered or the number is known. The user can dial an activation code or press a feature button to request that the network place the call. If the number of the last incoming call is busy, the Company's equipment will monitor the status of the line being redialed for a maximum of thirty minutes, in an attempt to establish the call. The customer will be signaled with a distinctive ring when the call can be completed. This feature cannot be activated for calls originating from a line that is forwarded or from a line or trunk not associated with a number, e.g., a multi-line hunt group.

Automatic Recall

Enables the customer to automatically redial the last outgoing number by dialing an activation code or pressing a feature button to request that the network place the call. When the recalled number is busy, the Company's equipment will monitor the status of the line being redialed for a maximum of thirty minutes, in an attempt to establish the call. The customer will be signaled with a distinctive ring when the call can be completed.

Basic Electronic Key Terminal Service (Basic EKTS) Features Package

A circuit switched voice option that enhances normal telephone use. It consists of: Bridging, Bridged Call Exclusion, Call Forwarding Don't Answer, Call Forwarding Interface Busy, Call Forwarding Variable, Message Waiting Indicator, Speed Call Long or Speed Call Short and Three-Way Conference Calling. A Basic EKTS terminal supports only one call appearance per number.

Bridged Call Exclusion

A Basic EKTS and CACH EKTS feature that allows a user to prohibit other stations from picking up a call on hold or bridging onto a call that is active at that terminal.

Bridging

A Basic EKTS and CACH EKTS feature that allows the user to join an active call by pressing the active call appearance button and going off hook. This establishes a three-way call. This feature is different from basic three-way calling, because the third party initiates the bridge to the active call. Bridging is inhibited if Bridged Call Exclusion is activated on a terminal engaged in the active call. Only one additional shared call appearance user may bridge to an active two-way call. Bridging cannot be activated on an existing three-way call.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Material formerly appeared in Part 17, Section 1.

/2/

DIGILINE SERVICE^{/1/} (cont'd)

/2/

C. Service Components: Descriptions And Definitions (cont'd)

2. Optional Service Components (cont'd)

Call Appearance

A button on an electronic telephone set that serves as a number designation or appearance. A single number can appear on multiple electronic telephone sets and/or multiple times on the same electronic set. A visual indicator identifies the status of the call appearance (e.g., the lamp may flash for an unanswered call, blink for a call that has been placed on hold, remain dark for an idle call appearance, or remain steady for the currently active call).

Call Appearance Call Handling Electronic Key Terminal Service (CACH EKTS) Feature Package

A circuit switched voice option that allows multiple numbers and call appearances. Other service features included with this package are: Bridging, Bridged Call Exclusion, Call Forwarding Don't Answer, Call Forwarding Interface Busy, Call Forwarding Variable, Intercom, Key System Coverage for Analog Lines, Message Waiting Indicator, Speed Call Long or Speed Call Short and Three-Way Conference Calling. Additional Call offering is inherent with this feature.

Call Forwarding Don't Answer

Directs incoming calls to a preselected number when the called number is not answered after a customer specified number of rings.

Call Forwarding Interface Busy

Permits calls reaching a busy number to be redirected to another number.

Call Forwarding Variable

Allows a user to redirect incoming calls to another number.

Call Pickup

Allows a user to answer an incoming call to another party's telephone in the same user pickup group.

Call Transfer Disconnect

Allows a DigiLine customer to transfer a call to another number and then hang-up, leaving the two remaining parties connected. The DigiLine customer would then be free to accept another call. When transferring a call to the Long Distance Telecommunications Network, the DigiLine Service customer is responsible for the payment of charges between the DigiLine serving office and the telephone to which the call is being transferred.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Material formerly appeared in Part 17, Section 1.

/2/

DIGILINE SERVICE^{/1/} (cont'd)

/3/

C. Service Components: Descriptions And Definitions (cont'd)

2. Optional Service Components (cont'd)

Caller ID

Provides the user who is receiving a call with the number of the calling party and the name associated with that number. Upon special request from a customer, the Company will configure this feature to provide either the number or the name, instead of both. This modification is provided at the same rate as the standard Caller ID feature.

Customer Originated Trace

Allows a customer to initiate an automatic trace of the last circuit switched call received by dialing an activation code or pressing a feature button. If the trace is successful, the Company's equipment will record the incoming call detail (not the conversation). The results of the trace will not be provided to the customer directly. For further action to be taken, the customer is required to contact the Company Service Center during normal business hours.

Delayed and Abbreviated Ringing

A Basic EKTS and CACH EKTS feature that alerts a terminal for a predetermined interval (abbreviated ringing) before ringing another designated EKTS terminal (delayed ringing). The customer can choose from several options for the type of audible and/or visual alerting to be given at each station.

Detailed Call Report

Provides customers subscribing to the Measured Rate Equivalent usage option a monthly report detailing all completed local circuit switched calls during the billing period.

Detailed Report (Digital Packet Switching Usage)^{/2/}

Provides a printout of information associated with each session including, but not limited to, call set-ups, connect time and kilosegments transmitted and received by customer account.

Digital Packet Switching Usage^{/2/}

Provides for use of the Company's Public Packet Switched Network. This service is limited to customers who have purchased a packet switched data option. Digital Packet Switching Usage is not available on a standalone basis.

Distinctive Ringing

Provides distinctive alerting for up to six specific numbers.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Packet switching is only available for installations of B channel packet that do not connect to the DPN packet switch.

/3/ Material formerly appeared in Part 17, Section 1.

/3/

DIGILINE SERVICE^{/1/} (cont'd)

/3/

C. Service Components: Descriptions And Definitions (cont'd)

2. Optional Service Components (cont'd)

Hunt Group for Circuit Switched Data (CSD)

Provides for a predefined search (circular, linear or uniform) for an idle directory number to which a circuit switched data call can be offered.

Hunt Group for Circuit Switched Voice (CSV)

Provides for a predefined search (circular, linear or uniform) for an idle directory number to which a circuit switched voice call can be offered. Directory numbers subscribing to hunting may not have multiple call appearances.

Hunt Group Transfer for Circuit Switched Data (CSD)

Transfers circuit switched data calls that terminate to a circuit switched data hunt group to a backup circuit switched data hunt group.

Intercom

Allows a CACH EKTS user to call other terminals in the CACH EKTS group with one- or two-digit dialing or by activating a button on the CACH EKTS set.

Key System Coverage for Analog Lines

Allows an analog station set to share calls with a CACH EKTS set.

Kilosegment (Digital Packet Switching Usage)^{/2/}

A segment is a means of measuring the volume of transmitted information. The segment size is the number of octets of call user data contained in a packet segment. The standard Company segment size is 64 octets. The number of segments in a packet is determined by dividing the number of octets of call user data in a packet by 64 and rounding up. A kilosegment is one thousand segments.

Link Extension Equipment

Provides the additional central office hardware required to provide DigiLine Service to a customer located outside a DigiLine Service Area or as a Foreign Serving Office/Foreign Exchange (FSO/FX) arrangement.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Packet switching is only available for installations of B channel packet that do not connect to the DPN packet switch.

/3/ Material formerly appeared in Part 17, Section 1.

/3/

DIGILINE SERVICE^{/1/} (cont'd)

/3/

C. Service Components: Descriptions And Definitions (cont'd)

2. Optional Service Components (cont'd)

Link Extension Facility

A 144 Kbps facility that extends from the customer's normal serving central office to their Company designated DigiLine serving office. This rate element is only applicable when the customer's exchange is not located within a DigiLine Service Area and the customer is served from a Company designated DigiLine serving office.

Logical Channel^{/2/}

A packet switched data communication path which allows two-way simultaneous transmission of data packets through the network.

Message Waiting Indicator

Provides the user of a message service with either a visual or audible indication that a message is waiting.

Multiple B Channel Terminals on a BRI

Allows a user to place more than two B channel terminals on a BRI. Because there are only two B channels on a BRI, only two terminals can use the B channels simultaneously. The maximum number of terminals is eight per BRI. When there are two users on a BRI, it would be possible for one user to engage both B channels and, thus, leave the other user without access to a B channel. To prevent this from occurring, Associated Groups may be defined. The first user is assigned to one Associated Group and the other user is assigned to a second Associated Group. Each Associated Group is allowed access to one B channel at any particular time. Both users are allowed access to the D channel. These capabilities are available without additional charge.

Packet Directory Number^{/2/}

This is the "E-164 address" associated with packet capability on the customer ISDN-based service. The number identifies customers originating calls on the packet switching network.

Packet Switching Network^{/2/}

Consists of the packet switched and interswitch facilities within a LATA.

Remote Access to Call Forwarding

Allows a customer at a remote location to activate/deactivate the Call Forwarding features. If DigiLine station CPE is equipped with feature buttons and feature status lamps, the call forwarding status lamp lights when Call Forwarding is activated using remote access.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ DigiLine packet switching is only available for installations of B channel packet that do not connect to the DPN packet switch.

/3/ Material formerly appeared in Part 17, Section 1.

/3/

DIGILINE SERVICE^{/1/} (cont'd)

/3/

C. Service Components: Descriptions And Definitions (cont'd)

2. Optional Service Components (cont'd)

Secondary Only Number

A circuit switched option that allows any number, other than a primary number, to be assigned to a DigiLine station. A Secondary-Only Number does not have to be a primary number at another station. A DigiLine station can have one or more Secondary Only Numbers. Each Secondary Only Number can have multiple call appearances. A Secondary Only Number can be shared among the same DigiLine customer's DigiLine stations.

Selective Call Forwarding

Allows a customer to forward selected calls to another number. A screening list of up to six numbers is created by the user via an interactive dialing sequence. Subsequently, calls are forwarded to the Call Forwarding number only if the calling number can be obtained and is found to match a number on the screening list. If the user also subscribes to Selective Call Rejection and the same number is entered on both screening lists, the Selective Call Rejection feature must be deactivated to allow the call to be forwarded. This feature will not work if the incoming call is from a number in a multi-line hunt group unless the number is the main number of the hunt group, or is telephone identified.

Selective Call Rejection

Allows a customer to reject calls from up to six different numbers. When a call is placed to the user's number from a number on the screening list, the caller receives an announcement indicating that the party he/she is attempting to call does not wish to receive calls at this time. If the user also subscribes to Selective Call Forwarding and/or Distinctive Ringing and the same numbers appear on those screening lists, Selective Call Rejection takes precedence. This feature will not work if the incoming call is from a number in a multi-line hunt group unless the number is the main number of the hunt group, or is number identified.

Session (Digital Packet Switching Usage)^{2/}

The time that common control network facilities are allocated to a specific packet switched call. It begins with call set up and continues until the common control network facilities are released for reuse by the network.

Six-Way Conference Calling

A circuit switched voice option that allows the user to set up a conference call for up to six parties.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Packet switching is only available for installations of B channel packet that do not connect to the DPN packet switch.

/3/ Material formerly appeared in Part 17, Section 1.

/3/

DIGILINE SERVICE^{/1/} (cont'd)

/3/

C. Service Components: Descriptions And Definitions (cont'd)

2. Optional Service Components (cont'd)

Speed Call Long

Allows a user to dial a pre-assigned number by pressing the feature button assigned to speed calling and dialing two digits, or using an interactive dialing sequence. This feature allows for up to thirty numbers in the speed call list.

Speed Call Short

Allows a user to dial a pre-assigned number by pressing the feature button assigned to speed calling and dialing one or two digits, or via an interactive dialing sequence. This feature allows for up to six or ten numbers in the speed call list, depending on the serving office.

Summary Report (Digital Packet Switching Usage)^{/2/}

Provides a monthly total, on paper only, of information associated with each packet session including, but not limited to, call set-ups, connect time and kilosegments transmitted and received by either user identification or originating city.

Three-Way Conference Calling

A circuit switched voice feature that allows the user to establish a conference call for up to three parties.

D. Technical Specifications

1. Technical equipment guidelines for ISDN customer access to DigiLine serving offices are found in SR-NWT-002661, ISDN Basic Rate Interface Generic Guidelines for Customer Premises Equipment. This Document may be obtained from:

Telcordia Document Register
445 South Street, Room 2 J-125
Morristown, NJ
Telephone: 1-800-521-2673

2. DigiLine Service is designed to all relevant International Telecommunications Union-Telephony (ITU-T) standards.
3. The transmission characteristics of DigiLine Service support 64 Kbps Clear Channel Capability.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Packet switching is only available for installations of B channel packet that do not connect to the DPN packet switch.

/3/ Material formerly appeared in Part 17, Section 1.

/3/

DIGILINE SERVICE^{/1/} (cont'd)

/2/

D. Technical Specifications (cont'd)

4. Due to technical limitations, some analog optional features (such as, but not limited to, Call Waiting) may not work properly when a customer chooses to combine an analog local exchange access service with a DigiLine Service arrangement.
5. When DigiLine Service is provided from a central office other than the customer's normal serving office, calls to 911 Emergency Number Service originated over the DigiLine Service may route to a different answering point than 911 calls originating from access lines served by the customer's normal serving office. If so routed, the different answering point may not have the information available to respond to the call as efficiently as possible.

E. Regulations

1. Use of Service and Facilities
Digiline Service as provided per this Guidebook is furnished pursuant to the Rules and Regulations Applying to All Customers' Contracts in Part 2, Section 2 and is subject to all the rules and regulations therein.
2. Availability
All rates, charges, terms and conditions set forth herein provide for the furnishing of service where suitable facilities and equipment are available and do not create an obligation for the Company to construct such facilities or equipment especially for the provisioning of these services.
3. Unique Service Arrangements
Unique requests for special or modified service arrangements will be accepted, whenever possible, if not detrimental to these or other services of the Company. Such requests are accepted pursuant to the Special Service Arrangements in Part 2, Section 7, and will be based upon costs.
4. The following regulations apply in addition to those in other Company Guidebooks and/or service publications. For the purpose of this service, where such other rates and regulations apply on a "per line" basis, they shall be interpreted, in this instance, on a "per channel or line termination" basis.
5. DigiLine Service requires compatible registered CPE under FCC Part 68.
6. For use of the PSTN, only those Integrated Services Digital CSV/CSD Transport Options noted as DigiLine Service Compatible can be used with DigiLine Service.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Material formerly appeared in Part 17, Section 1.

/2/

DIGILINE SERVICE^{/1/} (cont'd)

/2/

E. Regulations (cont'd)

7. Ancillary Services compatible with DigiLine Service (such as Additional Listings) will be furnished under the rates and regulations of their respective service publications in accordance with the customer's residence or business classification as defined by the Rules and Regulations Applying To All Customers' Contracts in Part 2, Section 2. Customers may combine analog local exchange access service at residential or business rates with a DigiLine Service arrangement. Since DigiLine Service provides ISDN signaling, Touch-tone service and charges are not applicable.
8. Resale of DigiLine Service is prohibited.
9. When a customer converts to DigiLine Service from another service, the customer may be required to change the existing number.
10. DigiLine Service is physically provisioned from the DigiLine serving office designated by the Company. The Company will determine a customer's designated serving office based on the location and capacity of DigiLine equipped central offices.
 - a. If the customer's normal serving office is located within a DigiLine Service Area, the customer may be provided DigiLine Service from the designated DigiLine serving office at the rates and charges listed under Rates and Charges following and FSO or Link Extension Equipment and Link Extension Facility charges will not apply.
 - b. If the customer's normal serving office is not located within a DigiLine Service Area, the customer may be provided DigiLine Service from a DigiLine equipped central office in a DigiLine Service Area within the customer's LATA, if agreed to by the Company. In such cases, the charges for the Link Extension Equipment and Link Extension Facility specified in under Rates and Charges following will apply in addition to the other charges for DigiLine Service.
 - c. If, in case a. preceding, a new central office becomes the designated DigiLine serving office for a customer's location, their existing DigiLine Service will continue to be provided from their original DigiLine serving office if technically possible. If necessary, the Company may require that the customer move the existing DigiLine Service to the new designated serving office and, in conjunction therewith, waive the move charges. Such a move may require the customer to change telephone number(s). If the move to the new designated serving office is at the customer's request, the provisions and charges specified in this Guidebook for moves will apply.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Material formerly appeared in Part 17, Section 1.

/2/

DIGILINE SERVICE^{/1/} (cont'd)

/2/

E. Regulations (cont'd)

10. (cont'd)

- d. In case b. preceding, when a central office is equipped so that the customer's normal serving office becomes part of a DigiLine Service Area, the customer's DigiLine Service may be required to be moved from their original DigiLine serving office to the customer's new designated DigiLine serving office. Such a move may require the customer to change number(s), and in conjunction therewith, the Company will waive the provisions and charges for moves specified in this Guidebook. However, if agreed to by the Company, the customer may request that their DigiLine Service not be moved to the new designated serving office. In such case, the Link Extension Equipment and Link Extension Facility charges will continue to apply.
- e. If a customer requests DigiLine Service to be provisioned from an office in their exchange other than the DigiLine serving office designated by the Company, and if agreed to by the Company, the DigiLine Link Extension Equipment charge will apply in addition to the charges for Foreign Serving Office Service, as defined in Part 4, Section 3. Foreign Serving Office charges will apply per B channel.
- f. If a customer requests DigiLine Service to be provisioned from an office outside their exchange other than the DigiLine serving office designated by the Company, and if agreed to by the Company, the DigiLine Link Extension Equipment charge will apply in addition to the charges for Foreign Exchange Service, as defined in Part 4, Section 3. Foreign Exchange Service charges shall apply per B channel.

11. Customers shall use Caller ID solely for the purposes of call processing, billing, and account management and shall not publicize or disclose any calling party number or name without written permission from the party to whom the number has been assigned. By way of illustration, and not limitation, the customer shall not use any calling party number or name for telemarketing or list generation efforts without written permission. Additional restrictions and descriptive information regarding this feature are detailed in Advanced Custom Calling Services, Part 7, Section 2.

12. The regulations specified in the Paralleling Service provisions of 'Rules and Regulations Applying to All Customers' Contracts' in Part 2, Section 2 shall not apply when DigiLine Service and Local Exchange Services are furnished at the same premises.

13. The Call Transfer Disconnect feature cannot be used to expand a local calling scope.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Material formerly appeared in Part 17, Section 1.

/2/

DIGILINE SERVICE^{/1/} (cont'd)

/3/

E. Regulations (cont'd)**14. Moves**

A Move Charge, as specified in this guidebook, will apply when a customer moves his DigiLine Service from one location to another within the Company's territory in Oklahoma except as described in the following paragraphs.

If the customer is moving the service prior to the expiration of a service term^{/2/}, the move will not be considered a disconnection for the purpose of calculating a termination charge if:

- a. the service at the new location is ordered at the same time the customer requests the disconnect at the current location, and
- b. the customer agrees to complete the unexpired term at the new location.

If the customer requests a move prior to the expiration of a Basic Rate Interface Installation Charge service term agreement and the customer elects to move the same quantity of Basic Rate Interfaces to another location within the Company's territory in Oklahoma, the customer may complete the remainder of the original service term at the new location. The Move Charge will apply.

15. Supersedures

DigiLine Service may be transferred to a new customer at the same premises upon written concurrence of the Company. The customer to whom service is transferred must accept all past indebtedness, liabilities, minimum term provisions and equipment configurations in effect for the previous customer at the time of the transfer.

16. Suspension of Service

When the Company initiates a suspension of service (see the Suspension and Restoration of Service in Part 2, Section 4), the business restoration service charge applies per B Channel. Customer-initiated suspensions of service (Vacation Service) are not offered for DigiLine Service.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Effective August 31, 2011, Service Term Agreements are no longer available for new installations or renewals of DigiLine Service. DigiLine Service customers currently on a Service Term Agreement may continue service at their existing rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service at the then current month-to-month rates. If the customer does not request discontinuance of the service, the month-to-month rates in effect at such time will automatically apply.

/3/ Material formerly appeared in Part 17, Section 1.

/3/

DIGILINE SERVICE^{/1/} (cont'd)

/3/

E. Regulations (cont'd)17. Liability

- a. The liability of the Company regarding DigiLine is stated in the Rules and Regulations Applying to All Customers' Contracts in Part 2, Section 2, and is subject to all the rules and regulations therein.
- b. The customer assumes all risks in mistakes, omissions, interruptions, delays, errors or defects in transmission, delivery, interpretation, routing or transliteration, if DigiLine Service is used to originate a call to 911 Emergency Number Services. No liability in any case shall attach to the Company for any mistake, omission, interruption, delay, error or defect in transmission, delivery, interpretation, routing or transliteration, if the customer uses DigiLine Service to originate a call to 911 Emergency Number Services.

18. Digital Packet Switching Usage^{/2/}

The following rules and regulations apply to Digital Packet Switching Usage, and are in addition to the rules, regulations and rates in other service publications:

- a. Customers are responsible for all charges to their packet directory number.
- b. The Company reserves the right to determine the facilities used to provide service and to modify or change such equipment and facilities.
- c. No credit will be made for interruptions due to negligence or failure of customer-provided equipment.
- d. The printed reports will be provided to the customer via first-class U.S. Mail Service unless otherwise agreed upon between the customer and the Company.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Packet switching is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B channel packet that does not connect to the DPN packet switch.

/3/ Material formerly appeared in Part 17, Section 1.

/3/

DIGILINE SERVICE^{/1/} (cont'd)

/3/

F. Service Terms

1. All DigiLine Service components have a minimum service term of one month.
2. Basic Rate Interface Service Term Agreements^{/2/}
Term pricing options are available with the Basic Rate Interface. These options are in addition to the typical month-to-month payment option for the Basic Rate Interface. If a customer commits to retain this service component at one location for a specific term, the customer will not be charged the full Installation Charge for the Basic Rate Interface. Additionally, the monthly rate will not increase during the term of an agreement. If Guidebook changes become effective lowering the rate for a DigiLine Basic Rate Interface for a particular service term agreement pricing option, the Company will also lower this rate for any customer with an unexpired service term agreement. Coterminal additions are not permitted for the service term options. Customers may opt to convert from the original service term to a longer service term prior to the expiration of the original term. Options include a 12- or 24-month term. If a customer chooses a service term and then disconnects the Basic Rate Interface prior to the expiration of that term, the customer will be required to pay a termination charge for each Basic Rate Interface disconnected. Payment of the termination charge does not release the customer from other previous amounts owed to the Company. The termination charge shall be:
 - a. all unpaid nonrecurring charges (excluding any waived charges); plus
 - b. fifty percent (50%) of all recurring charges for the remaining months of the customer's term.
3. If a customer chooses to disconnect DigiLine Service in order to convert to another digital service provided by the Company of equal or greater speed, the Company will waive the termination charge associated with the term agreement if:
 - a. the customer has had DigiLine service for at least six months; and
 - b. the customer enters into a new service term agreement for a comparable quantity of service for a period greater than or equal to the number of months remaining on the DigiLine agreement.
4. Upon the expiration of the 12- or 24-month Service Term^{/2/}, the customer may:
 - a. Continue service on a month-to-month basis at the current month-to-month rate, with no additional service commitment. This rate will be subject to Company-initiated rate changes.
 - b. Discontinue the Service.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Effective August 31, 2011, Service Term Agreements are no longer available for new installations or renewals of DigiLine Service. DigiLine Service customers currently on a Service Term Agreement may continue service at their existing rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service at the then current month-to-month rates. If the customer does not request discontinuance of the service, the month-to-month rates in effect at such time will automatically apply.

/3/ Material formerly appeared in Part 17, Section 1.

/3/

DIGILINE SERVICE^{/1/} (cont'd)

/3/

G. Application of Rates and Charges

1. DigiLine Service will be furnished at the rates contained herein, provided facilities are available. Where facilities are not available or unusual expenditures by the Company are required to make them available, the customer may be required to pay additional charges under the Construction Charges Section in Part 2, Section 5, to cover the unusual expenditure, or to contract for services beyond the service term or both.
2. If the customer cancels an order for service before installation of the equipment and facilities is complete, the customer agrees to pay all expenses incurred by the Company before receipt of notice of cancellation. This charge shall not exceed all charges which would have applied had the service been installed.
3. DigiLine customers may elect to spread the payment of all installation and nonrecurring charges through a series of equal monthly payments over a twelve month period. To compute the value of the monthly deferred charge payment, the installation and nonrecurring charges are multiplied by the twelve month annuity factor as listed in the Rules and Regulations Applying to All Customers' Contracts in Part 2, Section 2. If the service is terminated prior to payment of the deferred charges, a charge equal to the sum of the remaining payments will be due.
4. The application of any distance sensitive rates for services associated with DigiLine Service (e.g., toll rates, private lines, etc.) will be based upon the V & H coordinates of the customer's DigiLine serving office or the customer's normal serving office, if number retention is requested by the customer provided the office has the technical capability.
5. DigiLine Service provides for the usage of the Public Switched Telephone Network (PSTN) on either a flat rate or usage sensitive basis per BRI. The flat rate usage charge applies per B channel activated for CSV/CSD. Customers opting for the usage sensitive option must select a usage package which applies on a per BRI basis. Customers may not combine a flat CSV/CSD option with a usage sensitive CSV/CSD option on the same BRI.
6. The customer may opt to switch usage options or usage packages upon notification to the Company. Billing under the newly selected usage option or usage package will commence with the beginning of the customer's next billing period. The Change a Network Rate Element charge will apply for customers switching usage options or usage packages.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Effective August 31, 2011, Service Term Agreements are no longer available for new installations or renewals of DigiLine Service. DigiLine Service customers currently on a Service Term Agreement may continue service at their existing rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service at the then current month-to-month rates. If the customer does not request discontinuance of the service, the month-to-month rates in effect at such time will automatically apply.

/3/ Material formerly appeared in Part 17, Section 1.

/3/

DIGILINE SERVICE^{/1/} (cont'd)**G. Application of Rates and Charges (cont'd)**7. Payment for Service

- a. Rules, regulations, and amounts pertaining to advance payments, deposits, guaranty contracts and payments for service are found in Rules and Regulations Applying to All Customers' Contracts in Part 2, Section 2.
- b. In addition to the rates and charges contained herein, the customer is responsible for the payment of all related charges for exchange services, miscellaneous and supplemental services as specified in this and other service publications of the Company.
- c. Additions of service can be made by the payment of rates and charges effective at the time of the additions for such service.

H. Rates and Charges

1. Facility and Equipment Rate Elements

<u>Service Components</u>	<u>USOC</u>	<u>Monthly Rate</u>	<u>Installation Charge</u>
Basic Rate Interface, each			
Month-to-Month payment option	/Z22, Z23/	\$3,190.00 (I)	\$250.00
12-Month Service Term option ^{/2/}	/Z22, Z23/	45.50	100.00
24-Month Service Term option ^{/2/}	/Z22, Z23/	45.50	---
Link Extension Equipment per BRI, each	/NC1/	50.00	---
Link Extension Facility per BRI, each	/OTVXX/	25.00	---

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Effective August 31, 2011, Service Term Agreements are no longer available for new installations or renewals of DigiLine Service. DigiLine Service customers currently on a Service Term Agreement may continue service at their existing rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service at the then current month-to-month rates. If the customer does not request discontinuance of the service, the month-to-month rates in effect at such time will automatically apply.

DIGILINE SERVICE^{/1/} (cont'd)

H. Rates and Charges (cont'd)

2. Network Rate Elements

Integrated Services Digital Circuit Switched Voice/Circuit Switched Data Transport Options (CSV/CSD)^{/2/}

The following rate elements provide for digital CSV/CSD transport through central office switching equipment. These rate elements are charged in lieu of the rates for Local Exchange Service. Each non-additive rate element shall constitute a local exchange access arrangement and, for reporting purposes, shall be counted in combination with those in Part 4. These CSV/CSD local service elements are offered only in connection with services provided in this Section. They are not offered on a stand-alone basis.

<u>Service Components</u>	<u>Monthly Rate</u>
a. 1-Party Flat Rate Equivalent	
DigiLine Service Compatible, Payment Option 1 – each B channel, applicable to all rate group classifications	\$678.00 (l)
b. 1-Party Measured Rate Equivalent	
DigiLine Service Compatible, Payment Option 2 – each Basic Rate Interface, applicable to all rate group classifications	
Usage Package A	
- Includes up to 600 minutes of local usage per month	
Monthly Rate	--
Per minute, or fraction thereof, in excess of 600 minutes of local usage allowance	.04
Usage Package B	
- Includes up to 7200 minutes of local usage per month	
Monthly Rate	18.00
Per minute, or fraction thereof, in excess of 7200 minutes of local usage allowance	.02
c. Expanded Calling Scope Additives and Other Fees	
Applicable Local Extended Area Service (EAS) rate additives and fees, as specified Part 4, Section 2, apply in addition to the 1-Party Flat and 1-Party Measured Rate Equivalent rates.	

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Only the Integrated Services CSV/CSD Transport Options which are noted DigiLine Service compatible can be associated with DigiLine Service.

/1/ DigiLine Service is obsolete for residence customers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to residential DigiLine Service as of the effective date. Customers of record on the effective date may continue their Residential DigiLine service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Applies when the customer requests a change or changes to an existing feature package. A maximum of one charge applies per channel, per order, even if more than one change is requested.

/3/ Applies when the customer requests a change or changes to existing Network Options, other than feature packages. A maximum of one charge applies per channel, per order, even if more than one change is requested.

/4/ Applies when the customer requests a change, rearrangement or addition of a Network Rate Element subsequent to the initial installation of the Basic Rate Interface. A maximum of one charge applies per Basic Rate Interface, per order, even if more than one change or addition is requested.
