PART 20 - Grandfathered Services
SECTION 15 - Dedicated Telecommunications / Private Line Services

8th Revised Sheet 50

SPECIAL SIGNALING SERVICE - SERIES 100 (cont'd)

C. Transmission Characteristics

Transmission characteristics of Types 101 and 102 are as follows:

1. Type 101 service has a two-wire interface with two-wire facilities suitable for use with direct current transmission (metallic continuity). Customers may order two two-wire services to achieve four-wire service.

Transmission specifications and limitations are described in the Bell System Technical Reference on the transmission specification for private line metallic circuits which include the following:

Current applied by CPE - AC and DC components per conductor, not to exceed .150 amperes rms.

Magnitude of the peak of the voltage between any conductor and ground - not to exceed 70.7 volts except continuous DC voltage not to exceed 135 volts.

2. Type 102 service has a two-wire interface with two-wire facilities suitable for low speed, undirectional series - operated signaling, and may be implemented by either metallic channels or by other means at the Company's option. If provided by "other means," the transmission specifications are described in a Bell System Technical Reference for low speed signaling channels.

D. Rates - Intraexchange Series 100

	<u>USOC</u>	<u>Monthly Rate</u>	<u>Nonrecurring Charge</u>
1. Local Channel, each, Per first termination on a premises ^{/1/}			
Type 101.....	1LMCY, 1L3QY	\$13,618.00 (I)	\$130.00 ^{/2/}
Type 102.....	1LMCY, 1L3QY	13,618.00 (I)	\$160.00 ^{/2/}

/1/ The application of rates for service within the same building applies for services between premises not more than one mile apart which are connected by an enclosed passageway as of November 13, 1980. This application of rates is restricted to existing service installations at existing locations for existing customers. Existing service installations refers to existing enclosed passageways connecting buildings on different premises as of November 13, 1980.

/2/ Additional charges may apply as outlined in paragraph G. 'Method of Applying Rates' in Part 15, Section 1.

VOICE GRADE SERVICE - SERIES 300 AND 400 (cont'd)**H. Foreign Serving Office and Centrex Station Service (with switching equipment located on Company premises)**

1. This service is furnished to a maximum of two serving offices (in addition to the serving office in which the exchange service is furnished) within the exchange or metropolitan exchange in which the exchange or Centrex service is furnished.
2. Service is furnished on the condition that additional costs to the Company may be necessary to provide a type of signaling suitable for operation with the serving office from which service is furnished, or to provide, at the customer's request, a type of signaling other than the type the Company would elect to furnish. In such cases, additional charges shall apply.
3. Customers, for the exchange or Centrex portion of the service, are subject to Local Exchange Service or Centrex C.O. Service charges, rules and regulations; and for the private line portion of the service, are subject to the private line charges, rules and regulations in this Guidebook.
4. Off-premises extensions are provided only where facilities and conditions permit. Type 315 (1LLRY) and (1LLHY) local channel rates and charges apply for off-premises extensions.
5. Rates

/1/ In addition, private line charges apply between the serving office of the customer premises and the serving office from which the local exchange or Centrex service is provided. Local channel charges do not apply to the main station of local exchange service but do apply to Centrex main stations and extensions.

/2/ Local channel charges do not apply when the exchange service terminates in a channel port of an Access Advantage Plus Service.

/3/ Local channel charges do not apply to the main station and one extension of local exchange service but do apply to Centrex main stations and extensions.
