- (1) Tandem-Switched Transmission/Common Transport has two rates: a per access minute of use rate and a per access minute of use per mile rate. Tandem Switched Transmission/Common Transport rate elements are billed as Originating, Terminating to Telephone Company's own end office and Terminating to non-Telephone Company 3rd party locations based on call recordings. Non-Telephone Company 3rd party locations are all offices or other locations not owned by the Telephone Company. Examples of 3rd party locations include terminations to other local exchange and wireless carriers. The per access minute of use rate applies to the non distance sensitive portion of the Tandem-Switched Transport for the termination of both ends of the facility. The per access minute of use per mile rate applies to the distance sensitive portion of the Tandem-Switched Transport facility. When the mileage for Tandem-Switched Transmission/Common Transport is zero, these rates will not apply.
- (2) The per access minute of use and a per access minute of use per mile rate also applies to interoffice links that are provided for the common use of all customers but which are not switched through an access tandem. The Company will identify this application of Tandem-Switched Transmission as Common Transport.

Common Transport may be associated with both tandem routed services (such as when Tandem-Switched Transport is ordered to a host office to access remotes) and with direct routed services (as set forth in 6.8.3(F)(2)(b)). Mileage for Common Transport is always measured separately from Tandem-Switched Transmission and Direct-Trunked Transport.

- (3) Mileage measurement is described in 6.8.5 (Determining Switched Transport Mileage and Charges).

(b) Host Remote Transmission

- (1) A per access minute of use and a per access minute of use per mile rate also applies to interoffice links that are provided for the common use of all customers but which are not switched through an access tandem.

Host Remote Transmission may be associated with both tandem routed services and direct routed services such as when Tandem-Switched Transport is ordered to a host office to access remotes (as set in 6.8.3(E)(2)(b)). Mileage is always measured separately from Tandem-Switched Transmission and Direct-Trunked Transport.

- (2) Mileage measurement is described in 6.8.5 (Determining Switched Transport Mileage and Charges).

(c) Tandem Switching

A per access minute of use rate applies to each Tandem-Switched Transport facility for the switching functions provided by the access tandem.

Examples of 3rd party locations include terminations to other local exchange and wireless carriers.

(e) Dedicated Tandem Trunk Port

A monthly rate applies, per port for each in service dedicated trunk on the serving wire center side of the access tandem.

Dedicated Tandem Trunk Port is billed as originating and terminating based on a Percent Originating Usage (POU) factor of 50%.

Originating Calculation = PIU x Originating Rate x Quantity x POU

Terminating Calculation = PIU x Terminating Rate x Quantity x (100 – POU)
