Sent Paid

(D)

This is a billing option where the Customer originating the call pays for the call by having the call billed to the originating telephone number. This billing option will initially be restricted from coin origination.

3.1.6 Level of Automation

Operator Toll Assistance Services calls may be completed with or without assistance of an operator. There are three (3) levels of automation for Operator Toll Assistance Services. They are:

(A) Operator Dialed

An operator dialed call occurs when the person originating the call has the ability to dial all the digits necessary for call completion but instead asks the long distance operator to place the call. The operator dials the called number and the billing number. The operator dialed per call charge applies in lieu of the operator assisted per call charge.

The rates for the operator dialed per call charges in Section 4.1.1 or Section 4.1.2 of this Price List apply to Station-to-Station calls when the caller has the ability to dial all the digits necessary for call completion but instead asks the long distance operator to place the call. The operator dialed per call charge will not be applied to:

(D)

- .1 a call that cannot be completed by the caller due to equipment failure or trouble on the long distance network or
- .2 a call placed by a party identified as disabled and as a result of that disability cannot complete the call.

(D)

SECTION 3 - DESCRIPTION OF SWITCHED SERVICES

3.1 Operator Toll Assistance Services (continued)

3.1.6 Level of Automation (continued)

(B) Operator Assisted

An operator assisted call occurs when the person originating the call reaches an operator by utilizing an access method that involves dialing the called telephone number, but the operator collects the billing information to complete the call.

(C) Fully Automated

(D)
|
(D)

The fully automated rate also applies if a call placed by a party identified as disabled and as a result of that disability cannot complete the call and the caller requests operator assistance for call completion or; cannot be completed by the caller due to equipment failure or trouble on the long distance network and the caller requests operator assistance for call completion.

3.1.7 Application of Charges

- (A) There are two (2) rate elements which apply to Operator Toll Assistance Services, a usage charge and a per call charge. The rates for a particular call are determined by the the level of automation used (operator dialed, operator assisted, or fully automated).

(D)
|
(D)

For certain Operator Toll Assistance Service calls, usage rates also vary depending on whether the call is classified as residential or business. The business rate per minute applies when the call is billed to a telephone number presubscribed to the Company for a Business Service. The residential rate per minute applies when a call is billed to a telephone number presubscribed to the Company for a Residential Service.
