A3.27 Reserved for Future Use

A5. CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

A5.3 Charges for Unusual Installations (Cont'd)

A5.3.2 Special Types of Installation

When a special type of installation is desired by a subscriber or where the individual requirements of a particular situation make the installation unusually expensive, the subscriber is required to bear the excess cost of such installation.

A5.3.3 Temporary Installation

When an installation is required for temporary service and there is no immediate prospect of reusing the plant provided, the subscriber may be required to bear all or a portion of the cost of such installation, over and above all other regular charges for service and equipment.

A5.4 Special Service Arrangements

A5.4.1 General

- A. Where practicable, special equipment and arrangements, not otherwise provided for in this Guidebook, are furnished if they are in accord with authorized service offerings and if they are to be used in connection with and not detrimental to any of the services furnished by the Company. Charges for such special service arrangements will be based on the estimated costs of furnishing them.
- B. Initial service periods exceeding one month may be necessary for facilities and equipment provided under a special service arrangement.
- C. The rates, charges and contract terms for the following items have been established as specified above to meet the particular requirements of certain subscribers. Inclusion of the rates and codes herein in no way constitutes authorization for any subscriber other than those specified. Service charges apply to installation of SSA subsequent to the initial installation of associated equipment.

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.31 ESSX ISDN Service

A112.31.2 Terms and Conditions (Cont'd)

- G.** ESSX ISDN service subscribers with mixed or flat rate Digital ESSX service must choose circuit switched B channels designated for use with Mixed or Flat Rate systems. These B channel rates include a usage surcharge in lieu of the usage charges in Section A3.

ESSX ISDN service subscribers with measured rate Digital ESSX service must choose circuit switched B channels designated for use with all measured systems. Usage charges defined in A3.2.3 are applicable for transmission outside of the subscriber's system or the subscriber's serving central office.

- H.** Each ESSX ISDN service Basic Rate Access Arrangement line will be counted as a Digital ESSX service line in determining the total system size.
- I.** Telephone numbers transmitted via the Calling/Called Number Display feature are intended solely for the use of ESSX ISDN service subscribers. Resale of this information is prohibited.

- J. (DELETED)**

(D)

A112.31.3 Definitions

B Channel

A bidirectional synchronous channel capable of supporting 64 Kbps of digital transmission.

D Channel

A 16 Kbps digital signaling channel also capable of supporting 9.6 Kbps of packet information for the Basic Rate Interface (BRI).

64 Kbps Clear Channel Capacity (CCC)

A B channel connection that provides end-to-end digital connection in which all 64 Kbps of bandwidth are available for customer use.

Packet Switching

ISDN packet switching service is a data transport service based on CCITT (Consultative Committee on International Telegraph and Telephony) X.25 protocol.

Configuration Groups (5ESS)

Configuration Groups use a similar software assignment concept to associate physical buttons of ISDN terminals to feature and actions. Since Configuration Groups use a group assignment process, it is necessary to group ISDN terminals together by type and common button action, so that terminals assigned to the same Configuration Group will operate in the same manner. Call appearances and features on one terminal's buttons will then appear on the same button numbers on any other terminal in the same Configuration Group, as long as the same features/call appearances are used on each terminal. If not, the buttons cannot be used for a different feature or function. Variations in terminal types, features, call appearances, and feature button location will necessitate multiple Configuration Groups.

GENERAL EXCHANGE GUIDEBOOK FOR THE STATE OF SOUTH CAROLINA

EXPLANATION OF SYMBOLS

When changes are made on any page, a revised page will be issued canceling the page affected; such changes will be identified through the use of the following symbols:

(B)	To signify rates established under bond
(C)	To signify a changed term and condition
(D)	To signify discontinued rate, term and condition or text
(I)	To signify increase in rate
(M)	To signify a move from one page to another with no change to text or term and condition
(N)	To signify new rate and/or new term and condition, and/or new text
(O)	To signify obsoleted rate, term and condition or text
(R)	To signify reduction in rate
(S)	To signify matter already appearing in another part of the Guidebook and repeated for clarification
(T)	To signify a change in text but no change in rate or term and condition
(U)	To signify USOC added or changed only
(V)	To signify vintaged offering

The preceding symbols will apply except where additional symbols are identified at the bottom of an individual page or at the beginning or end of a section or paragraph.
