A142. OBSOLETE SERVICE OFFERINGS - INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

A142.1 ISDN - Business Service (IBS) (Pre-1996) (T)

(Obsoleted 10-28-96 Type 4) Service rates in this section are available for existing lines at existing locations only. Not available for new service, additions to existing service or moves of existing service to new location.

Obsolescence Rules

1. Inward activity for ISDN - Business Service in this section will not be allowed except that features may be added or deleted on existing lines at their current location.
2. Existing ISDN - Business Service subscribers will be allowed to maintain their ISDN - Business Service at their current location until the expiration date of their Term Payment Plan. Upon expiration of their Term Payment Plan subscribers must either, 1) convert to the month to month rate for ISDN - Business Service; or 2) subscribe to an alternate service.
3. ISDN - Business Service subscribers upon moving to a new location must either 1) convert to the Flat Rate Threshold Pricing Plan for ISDN - Business Service; or 2) subscribe to an alternate service.
4. Nonrecurring charges will not apply for conversion of ISDN - Business Service subscribers to the Flat Rate Threshold Pricing Plan.
5. Existing ISDN - Business Service subscribers will reference Section **A142.4** for Interoffice Circuits and Optional Features. (T)

A142.1.1 General

- A. The definitions, terms and conditions in **A142.4** will apply to these offerings except as stated following: (T)
- B. Service will be allowed as Flat Rate or Message Rate as indicated in this section. Usage rates as appropriate are specified in Section A3.

A142.1.2 Rates and Charges

A. Interface

1. Basic Rate DSL Access Arrangement

			Rate Stability		
	Installation	Month	Monthly Rate		
	Charge	to	24-59	60-120	
		Month	Mos. Plan	Mos. Plan	USOC
(a) ISDN Access (5ESS/DMS)	\$130.00	\$55.00	\$55.00	\$55.00	LTBLB

(D)

A142. OBSOLETE SERVICE OFFERINGS - INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

A142.2 ISDN - Residence Service (IRS)

(Obsoleted 10-28-96 Type 4) Service rates in this section are available for existing lines at existing locations only. Not available for new service, additions to existing service or moves of existing service to new location.

Service will be allowed as Flat Rate as indicated in this Section.

Obsolescence Rules

1. Inward activity for ISDN - Residence Service in this Section will not be allowed except that features may be added or deleted on existing lines at their current location.
2. ISDN - Residence Service subscribers upon moving to a new location must either (1) convert to the Flat Rate Threshold Pricing Plan for ISDN - Residence Service; or (2) subscribe to an alternate service.
3. Nonrecurring charges will not apply for conversion of ISDN - Residence Service subscribers to the Flat Rate Threshold Pricing Plan.
4. Existing ISDN - Residence Service subscribers will reference *this* Section for Interoffice Circuits and Optional Features. (T)

Effective December 15, 2015, ISDN – Residence Service (IRS) is obsoleted. IRS will not be available for new service, additions or changes to existing service, or moves of existing service to a new location. Customers may retain the service for existing IRS lines at existing locations. (N)

(M)

A142.2.1 General

- A. Effective October 28, 1996, ISDN - Residence Service (IRS) will be offered only under a Flat Rate Threshold Pricing Plan. (O)
This plan allows up to 200 hours of use each month per DSL at the flat rate. Minutes of use rates will apply for all usage above the 200 hours per DSL threshold. (O)
A minimum service period of three months will be required on the Flat Rate Threshold Pricing Plan. Termination Charges as defined herein will apply if the subscriber terminates or disconnects the service prior to fulfilling the three months period. (O)
- B. ISDN - Residence Service (IRS) is a new intraLATA group of offerings supported by the Integrated Services Digital Network (ISDN) architecture. IRS supports simultaneous transmission of voice, data, and packet services on the same exchange access line. Calling/Called Number Delivery, Calling Name Delivery, and Call Hold are included with this service where facilities permit. (O)
- C. IRS provides a new method of access to the telephone network called Basic Rate Access. Basic Rate Access will consist of the ability to access up to two 64 Kbps (B) channels and one 16 Kbps (D) channel at the service delivery point. (O)
- D. IRS is provided through Basic Rate Access. Features are available to increase the capability of the Bearer Alternative Service and may be subscribed to on an as-needed basis. (O)
- E. B channel circuit switched services offer up to 64 Kbps intra-office transmission of voice or data. This option permits the customer to utilize either circuit voice or data transmission paths on a per call selection basis. Transmission on the B channel will be circuit switched at 64 Kbps within the switch and/or equipped facilities between ISDN compatible central offices. ISDN interconnection to non-ISDN equipped central offices will be potentially subjected to analog transmission or sub-rated to 56 Kbps. This option includes one directory number (DN). (O)
- F. IRS will consist of the following components: (O)
 - Basic Rate Digital Subscriber Line (DSL) Access (O)
 - Two B channels CSV/CSD and one D channel Low Speed Packet Switched Data. Optional B channel packet services may be purchased in place of the B channel CSV/CSD. A maximum of two simultaneous B channels can be in use per Basic Rate Access. (O)
 - Minimum of one and maximum of eight User Profiles per Basic Rate Digital Subscriber Line (DSL) Access Arrangement. (O)
- G. IRS lines under the Flat Rate Threshold Pricing Plan will be an exception to Section A2. and can be mixed with either flat rate, message or measured lines at the same location. (O)

A142. OBSOLETE SERVICE OFFERINGS - INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

A142.2 ISDN - Residence Service (IRS) (Cont'd)

(M)

A142.2.2 Terms and Conditions

(T)(O)

- A. Customer Premises Equipment (CPE) that is compatible with the ISDN Interface is the responsibility of the user for provisioning. (O)
- B. The Company will be responsible for publishing and maintaining ISDN Interface Specifications. (O)
- C. The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provision of Basic Rate Access render any facilities provided by the customer obsolete or require modification or alteration of such equipment or system, or otherwise affect its use or performance. (O)
- D. Suspension of service is not allowed. (O)
- E. Service Charges in Section A4. are applicable per Basic Rate DSL access in addition to rates and charges following. (O)
- F. Installation charges in A42.1 will be waived for ISDN Residence Service customers transferring existing service to ISDN Business Service. Appropriate installation charges will be charged for any additions to the service completed at the time of transfer. (O)
- G. Usage rates will apply for total local usage minutes over the 200 hours allowed under the Flat Rate Threshold Plan. Usage rates, as appropriate, are specified in this Section. (O)
- H. IRS will be available where central office and outside plant facilities permit. (O)
- I. IRS served from a central office other than the central office the subscriber would normally be served from will require interoffice facilities as provided in this Section per DSL. Any non-ISDN interoffice facilities connecting to this service will follow the terms and conditions in Section A9. (O)
 At the Company's option, when the normal serving central office is not equipped for ISDN, a customer may be served with ISDN from another central office. IRS customers to be served under this arrangement must sign an agreement the service will be moved back to his normal serving central office and to a probable number change when/if that office is equipped with ISDN. When the Company elects this serving arrangement, the interoffice charges will not apply. Should the customer request to be served from an ISDN equipped central office other than the normal serving central office, the appropriate interoffice or interexchange charges will apply. (O)
- J. Each ISDN Basic Rate DSL Access Arrangement will be counted as one line in determining the application of the Service Charges specified in A4. and the End User Charges as specified in the End User Common Access Service section of BellSouth Telecommunications, Inc., FCC No. 1., Section 4. (T)(O)

A142.2.3 Definitions

(T)(O)

- B CHANNEL (O)
 A bidirectional synchronous channel capable of supporting 64 Kbps of digital transmission. (O)
- D CHANNEL (O)
 A 16 Kbps digital signaling channel also capable of supporting 9.6 Kbps of packet information for the Basic Rate Interface. (O)
- 64 KBPS CLEAR CHANNEL CAPACITY (CCC) (O)
 A B channel connection that provides end-to-end digital connection in which all 64 Kbps of bandwidth are available for customer use. (O)

E. Packages

(O)

- 1. Packages EZ1, EZ1A, EZ2 and EZ2A are available for use with IRS on National ISDN lines. The packages will not be available on Custom ISDN lines. A credit will be applied to the monthly billing for customers purchasing IRS via one of these packages. Packages must be ordered exactly as stated in the descriptions of the packages. If any feature listed in the package is deleted or provisioning options are changed, the package credit will no longer apply.

(O)

Additional optional features compatible with the package configurations are allowed with the packages. Additional features may be added only on the User Profile already provisioned with features.

(O)

The addition of one D-Channel Low Speed Packet is allowed per package.

(O)

- 2. Description of Packages -

(O)

- a. Package EZ1 - Low Speed DSL, 2 B-channel CSV/CSD - Channel Activation, 2 B-channel CSV/CSD - User Profile, 2 Additional Call Appearances, 1 Conference, Drop, Hold & Transfer, 1 Call Forwarding Variable - Button.

(O)

- b. Package EZ1A - Low Speed DSL, 2 B-channel CSV/CSD - Channel Activation, 2 B-channel CSV/CSD - User Profile, 2 Additional Call Appearances, 1 Conference, Drop, Hold & Transfer, 1 Call Forwarding Variable - Button, Visual Message Waiting, Call Forwarding Busy Line, Call Forwarding Don't Answer. Voice mail service will be allowed with this package.

(O)

- c. Package EZ2 - Low Speed DSL, 2 B-channel CSV/CSD - Channel Activation, 2 B-channel CSV/CSD - User Profile, 2 Additional Call Appearances, 1 Conference, Drop, Hold & Transfer, 1 Call Forwarding Variable - Button, 2 Secondary DN's.

(O)

- d. Package EZ2A - Low Speed DSL, 2 B-channel CSV/CSD - Channel Activation, 2 B-channel CSV/CSD - User Profile, 2 Additional Call Appearances, 1 Conference, Drop, Hold & Transfer, 1 Call Forwarding Variable - Button, 2 Secondary DN's, Visual Message Waiting, Call Forwarding Busy Line, Call Forwarding Don't Answer. Voice Mail service will be allowed with this package.

(O)

- 3. Packages Rates and Charges

(O)

(c) Package EZ2 Credit	-	6.50	LPEO2	(O)
(d) Package EZ2-A Credit	-	7.00	LPE2A	(O)

F. Termination Charges

(O)

IRS lines placed in service under a Rate Stability Plan will incur a Termination Charge at the date of termination if the customer terminates or disconnects the service prior to fulfilling the minimum service period. Termination Charges will not apply for IRS lines upgrading to another service offered by the Company with a contract period equal to or longer than the existing ISDN contract.

(O)

- 1. Rate Stability Plan of 24 months

(O)

Termination Charge if service disconnected within

(O)

	Termination Charge	USOC	
(a) 1 - 12 months ¹	\$200.00	LPER1	(O)
(b) 13 - 23 months	100.00	LPER2	(O)

Note 1: This Termination Charge also applies at the date of termination if a customer terminates or disconnects prior to fulfilling the three months minimum service period.

(O)

A142. OBSOLETE SERVICE OFFERINGS - INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

A142.2 ISDN - Residence Service (IRS) (Cont'd)

(T)(O)

A142.2.5 Optional Features

(T)(O)

Customers are required to subscribe to ISDN - Residence Service (IRS) before ordering these features. Calling/Called Number Delivery, Calling Name Delivery, and Call Hold are provided with this service. Features are available to increase the capability of IRS and may be subscribed to on an as needed basis. Availability of features are limited to where facilities permit and may be limited by central office type and switch load. (O)

Where facilities permit, Call Forwarding features will provide for one calling path. Up to nine (9) additional call forwarding paths may be added with a monthly charge per calling path. (O)

A. Optional Features

(O)

Availability of features as described in 1. and 2. following is dependent upon whether the central office is equipped with Custom ISDN or National ISDN. (O)

1. Features for use with Electronic Key Telephone Service (EKTS):

(O)

This option provides a group of features that increase the user's voice terminal flexibility and offers the functionality of a key system to groups of users with EKTS equipment. (O)

a. Shared Primary DN - This is a primary DN that appears on one or more terminals. (O)

b. Secondary-Only DN - This is a secondary DN that appears on one or more terminals, but is not the primary DN on any of those terminals. (O)

c. Shared Secondary-Only DN - First Appearance - the first appearance of a secondary DN that appears on more than one terminal but is not the primary DN on any of those terminals. (O)

d. Key Short Hunt - This feature enhances call coverage by delivering key-set DN Short Hunt Capability to standard-feature ISDN Voice terminals. (O)

e. Shared Non-ISDN DN - This feature allows call coverage for an analog set. This service allowed only if ISDN and Non-ISDN account owned by same customer and where facilities permit. (O)

f. Privacy Release - This is a privacy feature that allows a customer to specify, on an EKTS group basis, that no other user can bridge on to calls. On a call by call basis, this feature can be disabled to allow bridging to occur. (O)

g. Manual Exclusion - This is the opposite of Privacy Release. On a call by call basis the user can restrict bridging. (O)

h. EKTS Intercom Calling - Dial - This feature allows an EKTS user to call other terminals in the EKTS group with one or two-digit dialing. (O)

i. EKTS Intercom Calling - Automatic - This feature allows an EKTS user to call another terminal in the EKTS group by activating a button on the EKTS set. (O)

j. EKTS Intercom Calling - Call Appearance. This feature allows EKTS Intercom Calling to be provisioned on a Call Appearance. (O)

A142. OBSOLETE SERVICE OFFERINGS - INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

A142.2 ISDN - Residence Service (IRS) (Cont'd)

(T)(O)

A142.2.5 Optional Features (Cont'd)

(T)(O)

A. Optional Features (Cont'd)

(O)

2. The following features are available with either Custom ISDN or National ISDN. National ISDN customers may purchase these features for use with either EKTS sets or non-EKTS sets. (O)
 - a. Call Forwarding Variable - This feature allows the ISDN user to have the ability to forward all incoming calls to a user specified directory number. (O)
 - b. Call Forwarding Variable Feature Button - This feature is the same as Call Forwarding Variable except that it is activated by a feature button. (O)
 - c. Call Forwarding Busy Line - This feature automatically routes calls to a preselected number when the called line is busy. This feature may be either Fixed (changeable by service order only) or Programmable (customer changeable) by station user via Feature activation code. (O)
 - d. Call Forwarding Don't Answer - This feature automatically routes calls to a preselected number when the called line does not answer in a preset ringing cycle. This feature may be either Fixed (changeable by service order only) or Programmable (customer changeable) by station user via Feature activation code. (O)
 - e. Call Forwarding Multiple Simultaneous - This feature allows a station line to forward more than one call at a time. (O)
 - f. Call Pickup - Allows a user to answer calls directed to another line in the same preset Call Pickup Group. (O)
 - g. Conference, Drop, Hold, Transfer - (O)
 - Conference - allows the user to add a third party to an existing conversation. This feature is for use with voice calls only. (O)
 - Drop - This central office based feature allows the user to disconnect the last party added to a conference call. (O)
 - Hold - allows the user to place a call on hold by pressing the function button. Any set with the call appearance for the call on hold can pick up the call by pressing the call appearance button. (O)
 - Transfer - This feature allows the user to transfer a call to another DN. This feature is for use with voice calls only. (O)
- This feature may require an additional call appearance or an additional DN. (O)

A142. OBSOLETE SERVICE OFFERINGS - INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

A142.2 ISDN - Residence Service (IRS) (Cont'd)

(T)(O)

A142.2.5 Optional Features (Cont'd)

(T)(O)

A. Optional Features (Cont'd)

(O)

2. (Cont'd)

(O)

- h. Six-Way Conference, Drop, Hold, Transfer - This feature has the same functionality as Conference, Drop, Hold, Transfer feature except that six-way conference is allowed. (O)
- i. Speed Calling - This feature allows each user to assign up to thirty telephone numbers to a two-digit code for the purpose of enabling abbreviated dialing. (O)
- j. Calling/Called Number Delivery/Calling Name Delivery- National ISDN - This feature provides the user who is receiving/originating a call with information about the calling/called party and the facility or destination and is provided with IRS. Some "privacy" options may be in effect in certain areas and will be located in Section A13. (O)
- k. Visual Message Waiting Indicator - Provides the user of a message service with a visual indication that a message is waiting. (O)
- l. Audible Message Waiting Indicator - Provides the user of a message service with an audible indicator that a message is waiting. (O)
- m. Additional Call Appearance - PDN or DN - This feature allows the terminal to have more than one DN button assigned to the same DN or Primary Directory Number (PDN). (O)
- n. Call Tracing - This feature enables the customer to initiate an automatic trace of the last call received. Upon activation by the customer, the network automatically sends a message to the Company's Security Department indicating the calling number, the time the call was received, and the time the trace was activated. The customer using this feature would be required to contact the local business office for further action. (O)
- o. Call Return - This feature enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered or the number is known. The customer can dial a code or press a feature button to request that the network place the call. (O)

If the called line is not busy, the call is placed. If the called line is busy, a confirmation announcement is heard. Once the customer hangs up, the network will monitor the busy/idle status of both lines every forty-five seconds for up to thirty minutes. If during the queuing process both lines become idle, the customer is alerted that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed. If unanswered by the customer the alerting will repeat every five minutes until answered, or for the remainder of the thirty minute monitoring interval. Multiple numbers may be placed in queue. The first idle number will be connected first. Both the customer and the called party may originate and receive calls without affecting the call return feature status. (O)
- p. Selective Call Forwarding - Allows the customer to transfer selected calls to another telephone number. A screening list of up to six numbers is created by the customer and placed in the network memory via an interactive dialing sequence. Subsequently, calls are forwarded to the Call Forwarding telephone number only if the calling number can be obtained and is found to match a number on the screening list. (O)

If the customer also subscribes to Call Block and the same telephone number is entered on both screening lists, the Call Block feature must be deactivated to allow the call to be forwarded. (O)

This feature will not work if the incoming call is from a telephone number in a Hunt Group unless the telephone number is the main number of the hunt group, or is Telephone Number identified. (O)

(T)(O)

A142.2.5 Optional Features (Cont'd)

(T)(O)

A. Optional Features (Cont'd)

(O)

2. (Cont'd)

(O)

- q. Call Block - This feature provides the customer the ability to prevent incoming calls from up to six different telephone numbers. (O)

A screening list is created by the customer either by adding the last number associated with the line (incoming or outgoing), or by preselecting the telephone numbers to be blocked. When a call is placed to the customer's number from a number on the screening list, the caller receives an announcement indicating that the party he is attempting to call does not wish to receive calls at this time. (O)

If the customer also subscribes to Selective Call Forwarding and/or Personalized Ring 6 and the same telephone numbers appear on those screening lists, Call Block will take precedence. (O)

This feature will not work if the incoming call is from a telephone number in a Hunt Group unless the telephone number is the main number of the hunt group, or is Telephone Number identified. (O)

- r. Personalized Ring 6 - This feature provides an alerting to the subscribing customer for up to six specific telephone numbers. (O)

The customer creates a screening list of up to six telephone numbers through an interactive dialing sequence. When a call is received from one of the predetermined telephone numbers, the customer is alerted. Calls from the telephone numbers not included on the screening list will produce a normal ring. (O)

When a telephone number on the Personalized Ring 6 screening list also appears on the Selective Call Forwarding list, the Selective Call Forwarding will take precedence. Likewise, when the same number is shown on the Call Block list, the call will be blocked. (O)

The customer's line will not produce an alert if the incoming call is from a telephone number in a Hunt Group unless the telephone number is the main number of the hunt group, or is Telephone Number identified. (O)

- s. Repeat Dialing - Repeat Dialing, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed. (O)

If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next thirty minutes both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is alerted that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed. (O)

- t. Automatic Line/Direct Connect - Station specially programmed to dial specific internal station number or "0" or the attendant when the station user goes off-hook. (O)

- u. Selective Call Acceptance - Allows customers to accept incoming voice calls only from certain telephone numbers selected by the customer. (O)

- v. Station Restriction - Allows a station line to be assigned various type of restriction. (O)

- Denied Termination allows the station line to be used for outgoing calls only. It cannot receive incoming calls. All incoming calls are routed to common intercept announcement. (O)

- Denied Origination from Outgoing Calls allows the station line to be used for incoming calls only. No outgoing calls can be originated from it. (O)

- w. Redirected Number Feature – Redirected number delivery may be provided as a termination feature. If the received call has been previously forwarded, the first and last forwarding DN's will be delivered to the called party who subscribes to redirected number delivery. (O)

A142.3 Primary Rate ISDN (T)

A142.3.1 Reserved for Future Use

A142.3.2 Terms and Conditions

- A. Primary Rate ISDN is available under variable rate periods, with rates based on lengths of twelve to twenty-three months, twenty-four to forty-eight months or forty-nine to seventy-two months under conditions specified in the Channel Services Payment Plan in B2.4 of the Private Line Guidebook and as stated following: (T)
1. A volume discount schedule is available to customers under contract rates as described in A42.3.4.E. A rate discount for Primary Rate ISDN Interfaces is calculated based upon the quantity of Primary Rate ISDN Interfaces on a billing account. In addition, a discount for Primary Rate ISDN B-Channels is calculated based upon the number of Primary Rate ISDN B-Channels on a billing account. (T)
 2. A Termination Liability Charge is applicable if service is terminated prior to expiration of the contract. The applicable charge is equal to fifty percent (50%) of the monthly charges times the number of months remaining in the contract.
 3. A Termination Liability Charge shall not apply for the termination of B-Channels prior to the expiration of the contract.
- B. (Obsoleted 05-28-2008, Type D. Beginning May 28, 2008, Calling Number Delivery Blocking - Permanent is not available as part of Primary Rate ISDN service for new customers, new service arrangements, rearrangements, moves or transfers. Customer arrangements with calling number delivery blocking may keep the capability for arrangements existing prior to May 28, 2008. For new customers, new service arrangements, rearrangements, moves or transfers purchased on or after May 28, 2008, calling number delivery blocking is the responsibility of the customer, i.e., to be performed through their PBX or other customer premises equipment, as appropriate.) A142. OBSOLETE SERVICE OFFERINGS-INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**A142.4 ISDN - Business Service (IBS)**

(T)(O)

Effective September 1, 2021, ISDN - Business Service (IBS) will no longer be available for purchase by new or existing customers. In addition, requests to move, add, change, or renew existing service arrangements will not be accepted. The Company will continue to provide existing service to existing customers until the expiration of a customer's term agreement. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Month-to-Month rates until the service is discontinued. The Company currently plans to discontinue this service on or after August 1, 2023.

(N)

A142.4.1 General

(T)(O)

- A.** ISDN - Business Service (IBS) will be offered under a Flat Rate Threshold Pricing Plan or a Usage Option Plan. (O)
1. The Flat Rate Threshold Pricing plan allows up to 320 hours of use each month per DSL at the flat rate. Minutes of use rates will apply for all usage above the 320 hours per DSL threshold. (O)
 2. Usage Option Plans will be available for various thresholds of local use only on National ISDN lines. (O)
 - a. Usage Option Plan A - The Basic Local Calling area for Usage Option Plan A will be the LATA boundary. Local usage under Usage Option Plan A will be recorded on originating calls terminating within the LATA. Minutes of use rates will apply for all calls terminated within the LATA. This plan is limited to outward only service. (O)
 - b. Usage Option Plan B will have unlimited usage inside the Extended Local Calling Area. The Extended Local Calling Area for Usage Option Plan B will be the Basic Local Calling Area plus the Extended Calling Area as described in Section A3. (O)
 3. The following stipulations apply only when the IBS line from which the call originates subscribes to a Usage Option Plan. (O)

Calls completed with operator assistance within the Basic Local Calling Area and Extended local calling area will be rated at the Usage Option Plan usage charges in addition to the appropriate Operator Assisted Local Call surcharges. Such calls are itemized on the subscriber's billing statement and are billed outside any applicable usage allowances or caps. (O)
 4. Reduced toll rates as specified in this Section will be applied to toll calls outside the Extended Local Calling Area but within the LATA for all calls billed to an IBS line subscribing to Usage Option Plan B. Operator assisted charges as specified in A3. apply to operator handled calls in addition to the usage charges specified. (O)
- All IBS lines in an earning account must be in the same type Plan, i.e., all Usage Option Plan A's, Threshold, etc. Hunting between various types of plans will not be allowed. (O)
- A minimum service period of three months will be required on IBS lines whether established under a Flat Rate Threshold Pricing Plan or a Usage Option Plan. Termination Charges as defined herein will apply if the customer terminates or disconnects the service prior to fulfilling the three months period. (O)
- B.** ISDN - Business Service (IBS) is a new intraLATA group of offerings supported by the Integrated Services Digital Network (ISDN) architecture. IBS supports simultaneous transmission of voice, data, and packet services on the same exchange access line. Calling/Called Number Delivery, Calling Name Delivery, and Call Hold are included with this service. IBS is available where facilities permit. (O)
- C.** IBS provides a new method of access to the telephone network called Basic Rate Access. Basic Rate Access will consist of one or two 64 Kbps (B) channels and one 16 Kbps (D) channel at the service delivery point. (O)
- D.** IBS is provided through Basic Rate Access. Features are available to increase the capability of the Bearer Alternative Service and may be subscribed to on an as-needed basis. (O)
- E.** B channel circuit switched services offer up to 64 Kbps intra-office transmission of voice or data. This option permits the customer to utilize either circuit voice or data transmission paths on a per call selection basis. Transmission on the B channel will be circuit switched at 64 Kbps within the switch and/or equipped facilities between ISDN compatible central offices. ISDN interconnection to non-ISDN equipped central offices will be potentially subjected to analog transmission or sub-rated to 56 Kbps. This option includes one directory number (DN). (O)
- F.** IBS will consist of the following components: (O)
- Basic Rate Digital Subscriber Line (DSL) Access (O)
 - At least one channel, either B or D, must be activated. A maximum of two simultaneous B channels can be in use per Basic Rate Access. (O)
 - Minimum of one and maximum of eight User Profiles per Basic Rate Digital Subscriber Line (DSL) Access Arrangement. (O)
- G.** Grouping Service (Hunting) is available for ISDN Individual Service. (O)
- H.** IBS lines under the Flat Rate Threshold Pricing Plan or the Usage Option Plans will be an exception to Section A2. and can be mixed with either flat rate, message or measured lines at the same location. (O)

A142. OBSOLETE SERVICE OFFERINGS-INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**A142.4 ISDN - Business Service (IBS)**

(T)(O)

A142.4.2 Terms and Conditions

(T)(O)

- A. Customer Premises Equipment (CPE) that is compatible with the ISDN Interface is the responsibility of the user for provisioning. (O)
- B. The Company will be responsible for publishing and maintaining ISDN Interface Specifications. (O)
- C. The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provision of Basic Rate Access render any facilities provided by the customer obsolete or require modification or alteration of such equipment or system, or otherwise affect its use or performance. (O)
- D. Suspension of service is not allowed except for IBS lines associated with MultiServ service or MultiServ PLUS service. Suspension at the request of the subscriber will be allowed on the B-channel portion of these main station lines at 50 percent of the rate regularly charged. Optional features outlined in A12. and this Section will be suspended at no recurring charge during the period of suspension unless otherwise noted. Other rules and restrictions as outlined in Section A2. apply. (O)
- E. Service Charges in Section A4. are applicable per Basic Rate DSL Access in addition to rates and charges following. (O)
- F. Installation Charges in **A142.4** will be waived for ISDN Residence Service customers transferring existing service to ISDN Business Service. Appropriate Installation Charges will be charged for any additions to the service completed at the time of transfer. (T)(O)
- G. Usage rates will apply for originating all minutes of use over the 320 hours allowed under the flat rate Threshold Plan. Usage rates will apply for all originating minutes of use under Usage Option Plan A. Usage rates, as appropriate, are specified in this section. (O)

A142. OBSOLETE SERVICE OFFERINGS-INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**A142.4 ISDN - Business Service (IBS)**

(T)(O)

A142.4.2 Terms and Conditions (Cont'd)

(T)(O)

H. IBS will be available where central office and outside plant facilities permit. (O)

I. IBS served from a central office other than the central office the subscriber would normally be served from will require interoffice facilities as provided in this Section per DSL. Any non-ISDN interoffice facilities connecting to this service will follow the terms and conditions in Section A9. (O)

At the Company's option, when the normal serving central office is not equipped for ISDN, a customer may be served with ISDN from another central office. When the Company elects this serving arrangement, the interoffice charges will not apply. IBS customer's to be served under this arrangement must sign an agreement the service will be moved back to the normal serving central office and to a probable number change when/if that office is equipped with ISDN. Should the customer request to be served from an ISDN equipped central office other than the normal serving central office, the appropriate interoffice or interexchange charges will apply. (O)

Charges for Interoffice Circuits will apply for any IBS line associated with MultiServ service or MultiServ PLUS service that is served from a central office other than the normal service central office. (O)

J. IBS lines may be purchased to be associated with MultiServ service or MultiServ PLUS service, located in A12.20 and A12.21. Terms and conditions of MultiServ service or MultiServ PLUS service will apply to these IBS lines except as otherwise stated in this Section. (O)

IBS lines associated with MultiServ service or MultiServ PLUS service may purchase Optional Features compatible with ISDN from the MultiServ service Optional Features section of the MultiServ service section as well as features unique to ISDN lines from the Optional Features in this section. When a feature is listed in the Optional Feature sections of both the MultiServ service and IBS offerings, the IBS version of the feature should be ordered. MultiServ service Feature Groups are not available for use with these IBS lines. (O)

Only 36-120 months contract periods are available under the Rate Stability Plan¹ in this section for IBS lines associated with MultiServ service or MultiServ PLUS service as those lines must be coterminous with the MultiServ service or MultiServ PLUS service main station lines. (O)

IBS lines associated with MultiServ service or MultiServ PLUS service will purchase Basic Rate DSL Access Arrangements, Channels Activated - Flat Rate and Interface Users rate elements for provisioning the IBS lines, except as indicated in this Section. (O)

K. Each ISDN Basic Rate DSL Access Arrangement will be counted as a MultiServ service or MultiServ PLUS service line in determining the total system size. (O)

Each ISDN Basic Rate DSL Access Arrangement will be counted as one line in determining the application of the Service Charges specified in Section A4. and the End User Charges as specified in the End User Common Access Service section of BellSouth Telecommunications, Inc., FCC No. 1. Section 4. (O)

A142.4.3 Definitions

(T)(O)

B CHANNEL (O)

A bidirectional synchronous channel capable of supporting 64 Kbps of digital transmission. (O)

D CHANNEL (O)

A 16 Kbps digital signaling channel also capable of supporting 9.6 Kbps of packet information for the Basic Rate Interface. (O)

64 KBPS CLEAR CHANNEL CAPACITY (CCC) (O)

A B channel connection that provides end-to-end digital connection in which all 64 Kbps of bandwidth are available for customer use. (O)

Note 1: As of August 31, 2011, Rate Stability Plans are no longer available for new or renewing subscribers. (O)

A142.4.4 Rates and Charges (Cont'd)

(T)(O)

F. Termination Charges

(O)

IBS lines placed in service under Rate Stability Plans after the effective date of this guidebook will incur a Termination charge at the date of termination if the customer terminates or disconnects the service prior to fulfilling the period of the Rate Stability Plan. IBS lines associated with MultiServ service or MultiServ PLUS service will apply Termination Charges as listed for MultiServ service and MultiServ PLUS service instead of the Termination Charges listed in this section.

(O)

Termination Charges will not apply for IBS lines upgrading to another service offered by the Company with a contract period equal to or longer than the existing ISDN contract.

- 1. Termination Charge for 24-59 Mos. Rate Stability Plan if disconnected within

A142.4.5 Optional Features

(T)(O)

Customers are required to subscribe to ISDN - Business Service (IBS) before ordering these features. Calling/Called Number Delivery, Calling Name Delivery, and Call Hold are provided with this service. Features are available to increase the capability of IBS and may be subscribed to on an as needed basis. Availability of features are limited to where facilities permit and may be limited by central office type and switch load.

(O)

Where facilities permit, Call Forwarding features will provide for one calling path. Up to nine (9) additional call forwarding paths may be added with a monthly charge per calling path.

(O)

A. Optional Features

(O)

Availability of features as described in 1. and 2. following is dependent upon whether the central office is equipped with Custom ISDN or National ISDN.

(O)

- 1. Features for use with Electronic Key Telephone Service (EKTS):

(O)

This option provides a group of features that increase the user's voice terminal flexibility and offers the functionality of a key system to groups of users with EKTS equipment.

(O)

- a. Shared Primary DN - This is a primary DN that appears on one or more terminals.

(O)

- b. Secondary-Only DN - This is a secondary DN that appears on one or more terminals, but is not the primary DN on any of those terminals.

(O)

- c. Shared Secondary-Only DN - First Appearance - the first appearance of a secondary DN that appears on more than one terminal but is not the primary DN on any of those terminals.

(O)

- d. Key Short Hunt - This feature enhances call coverage by delivering key-set DN Short Hunt Capability to standard-feature ISDN Voice terminals.

(O)

- e. Shared Non-ISDN DN - This feature allows call coverage for an analog set.

(O)

Note 1: This Termination Charge also applies at the date of termination if a customer terminates or disconnects prior to fulfilling the three months minimum service period.

(O)

A142. OBSOLETE SERVICE OFFERINGS-INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**A142.4 ISDN - Business Service (IBS)**

(T)(O)

A142.4.5 Optional Features (Cont'd)

(T)(O)

A. Optional Features (Cont'd)

(O)

1. (Cont'd)

(O)

- f. Privacy Release - This is a privacy feature that allows a customer to specify, on an EKTS group basis, that no other user can bridge on to calls. On a call by call basis, this feature can be disabled to allow bridging to occur. (O)
 - g. Manual Exclusion - This is the opposite of Privacy Release. On a call by call basis the user can restrict bridging. (O)
 - h. EKTS Intercom Calling - Dial - This feature allows an EKTS user to call other terminals in the EKTS group with one or two-digit dialing. (O)
 - i. EKTS Intercom Calling - Automatic - This feature allows an EKTS user to call another terminal in the EKTS group by activating a button on the EKTS set. (O)
 - j. EKTS Intercom Calling - Call Appearance - This feature allows EKTS Intercom Calling to be provisioned on a Call Appearance. (O)
2. The following features are available with either Custom ISDN or National ISDN. National ISDN customers may purchase these features for use with either EKTS or non-EKTS sets. (O)
- a. Call Forwarding Variable - This feature allows the ISDN user to have the ability to forward all incoming calls to a user specified directory number. (O)
 - b. Call Forwarding Variable - Feature Button - This feature is the same as Call Forwarding Variable except that it is activated by a feature button. (O)
 - c. Call Forwarding Busy Line - This feature automatically routes calls to a preselected number when the called line is busy. This feature may be either fixed (changeable by service order only) or programmable (customer changeable) by station user via feature activation code. (O)
 - d. Call Forwarding Don't Answer - This feature automatically routes calls to a preselected number when the called line does not answer in a preset ringing cycle. This feature may be either fixed (changeable by service order only) or programmable (customer changeable) by station user via feature activation code. (O)
 - e. Call Forwarding Multiple Simultaneous - Allows a station line to forward more than one call at a time. (O)
 - f. Call Pickup - Allows a user to answer calls directed to another line in the same preset Call Pickup Group. (O)

A142. OBSOLETE SERVICE OFFERINGS-INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**A142.4 ISDN - Business Service (IBS)**

(T)(O)

A142.4.5 Optional Features (Cont'd)

(T)(O)

A. Optional Features (Cont'd)

(O)

2. The following features are available with either Custom ISDN or National ISDN. National ISDN customers may purchase these features for use with either EKTS or non-EKTS sets. (Cont'd)

(O)

g. Conference, Drop, Hold, Transfer

(O)

- Conference - allows the user to add a third party to an existing conversation. This feature is for use with voice calls only. (O)
- Drop - This central office based feature allows the user to disconnect the last party added to a conference call. (O)
- Hold - allows the user to place a call on hold by pressing the function button. Any set with the call appearance for the call on hold can pick up the call by pressing the call appearance button. (O)
- Transfer - This feature allows the user to transfer a call to another DN. This feature is for use with voice calls only. (O)

This feature may require an additional call appearance or an additional DN.

- h. Six-Way Conference, Drop, Hold, Transfer - This feature has the same functionality as Conference, Drop, Hold, Transfer feature except that six-way conference is allowed. (O)

(O)

- i. Hunting - This feature provides for a predefined search for an idle directory number to which a call can be completed. Directory Numbers subscribing to hunting may not have multiple call appearances. (O)

(O)

- j. Speed Calling - This feature allows each user to assign up to thirty telephone numbers to a two-digit code for the purpose of enabling abbreviated dialing. (O)

(O)

A142. OBSOLETE SERVICE OFFERINGS-INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**A142.4 ISDN - Business Service (IBS)**

(T)(O)

A142.4.5 Optional Features (Cont'd)

(T)(O)

A. Optional Features (Cont'd)

(O)

2. (Cont'd)

(O)

k. Calling/Called Number Delivery/Calling Name Delivery-National ISDN - This feature provides the user who is receiving/originating a call with information about the calling/called party and the facility or destination and is provided with IBS. Some "privacy" options may be in effect in certain areas and will be located in Section A13. (O)

l. (DELETED)

(O)

m. Visual Message Waiting Indicator - Provides the user of a message service with a visual indication that a message is waiting. (O)

n. Audible Message Waiting Indicator - Provides the user of a message service with an indication that a message is waiting. (O)

o. Additional Call Appearance - PDN or DN - This feature allows the terminal to have more than one DN button assigned to the same DN or Primary Directory Number (PDN). (O)

p. Call Tracing - This feature enables the customer to initiate an automatic trace of the last call received. Upon activation by the customer, the network automatically sends a message to the Company's Security Department indicating the calling number, the time the call was received, and the time the trace was activated. The customer using this feature would be required to contact the local business office for further action. (O)

q. Call Return - This feature enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered or the number is known. The customer can dial a code or press a feature button to request that the network place the call. (O)

If the called line is not busy, the call is placed. If the called line is busy, a confirmation announcement is heard. Once the customer hangs up, the network will monitor the busy/idle status of both lines every forty-five seconds for up to thirty minutes. If during the queuing process both lines become idle, the customer is alerted that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed. If unanswered by the customer the alerting will repeat every five minutes until answered, or for the remainder of the thirty minute monitoring interval. Multiple numbers may be placed in queue. The first idle number will be connected first. Both the customer and the called party may originate and receive calls without affecting the call return feature status. (O)

r. Preferred Call Forwarding - Allows the customer to transfer selected calls to another telephone number. A screening list of up to six numbers is created by the customer and placed in the network memory via an interactive dialing sequence. Subsequently, calls are forwarded to the Call Forwarding telephone number only if the calling number can be obtained and is found to match a number on the screening list. (O)

If the customer also subscribes to Call Block and the same telephone number is entered on both screening lists, the Call Block feature must be deactivated to allow the call to be forwarded. (O)

This feature will not work if the incoming call is from a telephone number in a hunt group unless the telephone number is the main number of the hunt group or is Telephone Number identified. (O)

A142. OBSOLETE SERVICE OFFERINGS-INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**A142.4 ISDN - Business Service (IBS)**

(T)(O)

A142.4.5 Optional Features (Cont'd)

(T)(O)

A. Optional Features (Cont'd)

(O)

2. (Cont'd)

(O)

- s. Call Block - This feature provides the customer the ability to prevent incoming calls from up to six different telephone numbers. (O)

A screening list is created by the customer either by adding the last number associated with the line (incoming or outgoing), or by preselecting the telephone numbers to be blocked. When a call is placed to the customer's number from a number on the screening list, the caller receives an announcement indicating that the party he is attempting to call does not wish to receive calls at this time. (O)

If the customer also subscribes to Preferred Call Forwarding and/or Call Selector and the same telephone numbers appear on those screening lists, Call Block will take precedence. (O)

This feature will not work if the incoming call is from a telephone number in a hunt group unless the telephone number is the main number of the hunt group or is Telephone Number identified. (O)

- t. Call Selector - This feature provides an alerting to the subscribing customer for up to six specific telephone numbers. (O)

The customer creates a screening list of up to six telephone numbers through an interactive dialing sequence. When a call is received from one of the predetermined telephone numbers, the customer is alerted. Calls from the telephone numbers not included on the screening list will produce a normal ring. (O)

When a telephone number on the Call Selector screening list also appears on the Preferred Call Forwarding list, the Preferred Call Forwarding will take precedence. Likewise, when the same number is shown on the Call Block list, the call will be blocked. (O)

The customer's line will not produce an alert if the incoming call is from a telephone number in a hunt group unless the telephone number is the main number of the hunt group or is Telephone Number identified. (O)

- u. Repeat Dialing - Repeat Dialing, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed. (O)

If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next thirty minutes both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is alerted that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed. (O)

- v. Automatic Line/Direct Connect (O)

Station specially programmed to dial specific internal station number or "0" or the attendant when the station user goes off-hook. (O)

- w. Make Set Busy (O)

Provides the individual station user the option of making the line or directory number appear busy/unavailable to incoming calls. The All Calls feature enables the user to make the line appear busy to all types of incoming calls. (O)

- x. Selective Call Acceptance (O)

Allows customers to accept incoming voice calls only from certain telephone numbers selected by the customer. (O)

A142. OBSOLETE SERVICE OFFERINGS-INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**A142.4 ISDN - Business Service (IBS)**

(T)(O)

A142.4.5 Optional Features (Cont'd)

(T)(O)

A. Optional Features (Cont'd)

(O)

2. (Cont'd)

(O)

y. Station Restriction

(O)

Allows a station line to be assigned various types of restriction.

(O)

- Denied Termination allows the station line to be used for outgoing calls only. It cannot receive incoming calls. All incoming calls are routed to common intercept announcement.

(O)

- Denied Origination from Outgoing Calls allows the station line to be used for incoming calls only. No outgoing calls can be originated from it.

(O)

z. Redirected Number Feature – Redirected number delivery may be provided as a terminating feature. If the received call has been previously forwarded, the first and last forwarding DN's will be delivered to the called party who subscribes to redirected number delivery.

(O)

aa. Call Park/Call Retrieve – The Call Park feature allows a user, active on a call, to park a call against the user's DN. When parked, the call is in a state similar to Hard Hold. After being parked, the call can be retrieved by the user.

(O)

ab. Call Transfer System Exception – This feature allows the user to have Call Transfer capabilities that differ from the capabilities established for the customer group. The different capabilities may include the type of call that can be transferred and/or the destination to which it can be transferred.

(O)

ac. Dial Call Waiting – The Dial Call Waiting feature provides the ability for originating main station lines to invoke call waiting service on selected intragroup calls by dialing an access code followed by the extension number of the main station line to be call waited.
