

SECTION 4 - Pricing

Pricing (P)

P-1 Rate Elements

Except as set forth below, monthly recurring charges for Service Ports and associated CIR are set forth in Section P-4 and vary by Port type, CIR, CoS, and term. (T)
(T)

P-2 Ethernet Payment Plan (EPP)

To subscribe to Service, the Customer must select one of the EPP options below. Customers may not subscribe to Service on a month-to-month basis. (T)
(T)

Ethernet Payment Plan Options				
12 Months	24 Months	36 Months	48 months	60 months

- (1) Nonrecurring charges shown in Sections P-4.1.1, P-4.1.3, P-4.2.1, P-4.2.10, and P-4.3 will be waived for Customers subscribing to new Service under an EPP, and subject to Section P-2(3) and Section P-2(5), or for Customers renewing Service under an EPP on an existing circuit. For moves of Service and Service reconfigurations, nonrecurring charges will apply as specified in Sections P-2(6) and (7). (T)
(T)
- (2) During the Customer's EPP term, AT&T initiated rate changes (i.e., rate increases or decreases) will be automatically applied to the Customer's EPP rates for the months remaining in the Customer's EPP term. However, at no time during the Customer's EPP term will rates exceed the Customer's initial EPP rates.
- (3) When an EPP term expires, the Customer may select a new EPP term from among any EPP options which are then available to Customers under this Service Guide. EPP rates in effect at the time the new EPP term starts will apply. If the Customer orders such new EPP term at least 10 days, but not more than 90 days, in advance of the existing EPP term expiration date, the new EPP term will begin immediately after the order is processed. (T)
(T)

If the Customer selects such new EPP term, but does not do so at least 10 days in advance of the existing EPP term expiration date, the Term Extension Month-to-Month Rates may apply between the expiration of the existing EPP term and the date upon which AT&T implements the new EPP term in its billing system.

- (4) The Term Extension Month-to-Month (MTM) rates in Section P-4 will apply when a Customer's EPP term expires. The Customer will be billed the MTM rates in effect until such time as the Customer selects a new EPP or the Service is disconnected. (T)

SECTION 4 - Pricing

- (5) Termination Liability will apply if the Customer disconnects Service (or AT&T disconnects Service for default by Customer) prior to the end of the selected EPP. Termination Liability will be determined based on the number of months remaining in the EPP term times 50 percent of the applicable EPP monthly charges, calculated as follows:

[(EPP Monthly Rates) X (Months Remaining in EPP Term)] X 50% = Termination Liability

In addition, the Customer must pay all nonrecurring charges that AT&T waived, as specified in Section 4 P-2(1). (T)

- (6) Moves involve a change in the physical location of one of the following:
- Point of service demarcation in the same building; or
 - Change of Customer Premises to a new building

When the move is to a different location within the same building (i.e., results in a different point of service demarcation in the same building, such as a move to a different floor), previously waived nonrecurring charges associated with the existing Service (if still under term) will be charged for all Service components affected.

A new EPP term is not required (if still under EPP term) and Termination Liability will not apply for such a move. For move requests for Service that is currently being billed MTM rates, the Customer must select an EPP term for the Service at the new location. The new EPP term will be subject to the rates in effect at the time of the move. (T)

When the move is to a different building (i.e., a different Customer Premises), such a move is treated as a disconnection of Service and an activation/installation of new Service. If the disconnected Service is under an EPP term, AT&T will bill the Customer for any previously waived nonrecurring charges for the Service. Termination liability will apply for such a move (if the EPP term has not expired) except where all of the following conditions apply: (T)

- The existing and new Service locations must be in the same serving wire center; (T)
- The Customer's existing Service must have been in place for at least 12 months; (T)
- The Customer must select a new EPP, subject to the rates in effect at the time of the move, for the new Service at the new location that has a term that is equal to or greater than the remainder of the existing EPP; (N)
- Orders from the Customer to disconnect the existing Service and reestablish Service at the new location must be placed by the Customer and received by AT&T on the same date; and (T)
- No lapse in billing will occur for moves of Service under an EPP. If the Customer requests that both the existing Service and the new Service be in service at same time, such "overlapping" Service shall be provided for no more than 90 days, and all applicable charges will be billed for both Services during the period of overlapping Service. (T)

(D)

SECTION 4 - Pricing

(7) The Customer may rearrange/reconfigure Service, subject to the conditions below: (T)

Upgrade: An "Upgrade" for purposes of this P-2(7) consists of one or more of the following: (T)
(T)

- A reconfiguration to a higher speed Port without a simultaneous change in Port type from a PPCoS or Basic Port to a Broadband Port;⁽¹⁾ or (T)
(T)
- A reconfiguration from a Broadband Port to a Basic Port or PPCoS Port, or from a Basic Port to a PPCoS Port, without a simultaneous change to a lower Port speed. (T)
(T)

EPP Termination Liability will not apply to an Upgrade, provided that the following conditions apply: (N)

- The new and existing Services must be billed to the same Customer at the same Customer Location; and
- The Customer must select a new EPP term with a term that is equal to or greater than the remainder of the EPP term of the disconnected Service. (N)

If Customer Upgrades Service during an EPP term, AT&T will bill Customer for any previously waived nonrecurring charges associated with the existing Service for all Service components affected by such reconfiguration. An example of such upgrade would be a change from a 1 Gbps to a 10 Gbps Port. The higher speed Port under this provision may be ordered with a different Ordering Process than the one it is replacing. (T)
(T)
(T)
(T)
(T)
(D)

Downgrade: A "Downgrade" for purposes of this P-2(7) is a reconfiguration that consists of one or more of the following: (N)

- A reconfiguration to a lower speed Port; or
- A reconfiguration from a PPCoS Port to a same or lower speed Basic Port, or from a PPCoS Port or Basic Port to a Broadband Port.

Downgrades are subject to EPP Termination Liability and nonrecurring charges will apply, as set forth in Section P-2(5), to all Service components affected. Customer must select a new EPP term for the reconfigured Service. The new EPP term will be subject to the rates in effect at the time of the reconfiguration. (N)

⁽¹⁾ Effective September 4, 2020, AT&T will no longer offer the Broadband Port Arrangement to new or existing customers. Refer to Section 2, SD 3.3. (T)

SECTION 4 - Pricing

Change of Ordering Process: A “Change of Ordering Process” for purposes of this P-2(7) is a reconfiguration from standard ordering processes to the AT&T Network on Demand (NoD) ordering process (see SD-1.4.8), or a reconfiguration from the AT&T NoD ordering process to standard ordering processes. EPP Termination Liability will not apply to a Change of Ordering Process, provided that the following conditions apply:

- Existing Service must have completed at least one full EPP term;
- New Service must include the same or higher speed Port as existing Service;
- New Service must be billed to the same Customer of record at the same Customer Location;
- The Customer must select a new EPP term with a term that is equal to or greater than the remainder of the EPP term of the disconnected Service; and
- No lapse in billing will occur for reconfigurations of Service under an EPP. If the Customer requests that both the existing Service and the new Service be in service at same time, such “overlapping” Service will be billed for both Services during the period of overlapping Service.

Reconfigurations that require changes only to the CoS, PPCoS CIR Package, Broadband Speed Tier, or CIR are not subject to EPP Termination Liability but the nonrecurring charges associated with the new CoS, PPCoS Package, Broadband Speed Tier, or CIR service components will apply subject to the following exception. AT&T will waive the nonrecurring charges for Service ordered using the On Demand ordering process.

The term effective dates associated with the Port shall apply to the associated CIR/CoS or Broadband Speed Tier. For example, a Customer with a 60-month EPP term on a Port and CIR configuration may change the CIR in month 48, without changing the original EPP expiration date associated with both the Port and CIR.

(N)

(N)

SECTION 4 - Pricing

For reconfigurations of interface type, or Port configuration (Port-based or VLAN-based) (N)
 involving the same Port speed, Port type, and version of Service, the nonrecurring (N)
 charge associated with the Port will apply. An example of such change would be a
 Customer-requested change at the Customer's Premises from a multi-mode fiber (T)
 interface to a single-mode fiber interface. EPP Termination Liability will not apply to
 such reconfiguration changes.

For any of the reconfigurations described above, other than Downgrade: (i) if Customer (T)
 has completed an EPP term, Customer must select a new EPP term for the (T)
 reconfigured Service; (ii) for reconfigurations which require an order to disconnect (T)
 Service and an order to add Service, AT&T must receive the request from Customer as (N)
 a single request, and there may be no lapse in billing; and (iii) new and previously
 existing Service may overlap to the extent required, with both Services incurring
 charges during the overlap period. (N)

(8) Upgrades to a Higher Level of Service

A Customer may upgrade from Service to a different service AT&T provides. EPP (T)
 Termination Liability will not apply if all of the following conditions are met:

1. Either:

- a) The new service as requested by the Customer must be at a transport speed (T)
 or capacity greater than the speed or capacity of Service; or
- b) The new service must offer the same transport speed or capacity as available (T)
 with Service and include technology or functionality not available with
 Service;

2. The new service and existing Service must be billed to the same Customer of (T)
 record at the same Customer Premises/Customer Location;

3. The Customer's existing Service must have been in place for at least 12 months; (T)

- 4. The minimum term for the new service must be equal to or greater than the remainder of the Customer's existing EPP term;
- 5. The Customer must place, and AT&T must receive, the order for the new service and the disconnect order for the existing Service on the same date; and (T)
- 6. If the Customer requests that both the existing Service and the new higher-level service be in service at the same time, such "overlapping" service shall be provided for no more than 90 days, and all applicable charges will be billed for both services during the period of overlapping service. (T)

Nothing in this Section P-2(8) shall prohibit upgrades within Service as allowed under the terms contained elsewhere in this Service Guide. (T)

(9) Conversion of DS1 and DS3 Services to Service (T)

The replacement of interstate DS1 or DS3 special access services provided by AT&T with Service will not be deemed to be a termination or disconnection of the relevant DS1 or DS3 special access service for purposes of applying termination liability charges, provided that all of the following conditions are satisfied: (T)

- 1. The length of the EPP for Service must be equal to or greater than the remainder of the term commitment of each DS1 or DS3 circuit being replaced; (T)
- 2. Each replaced DS1 and/or DS3 special access service must:
 - a) Have been in service for at least twelve (12) months; and
 - b) Have been provided to the same Customer Premises/Customer Location as the Service; and (T)
- 3. The Customer must issue a disconnect order for the replaced DS1 and/or DS3 special access service to be effective within ninety (90) days after the Service installation date. (T)

For the purposes of this Section P-2(9), one Service Port may replace multiple existing DS1 or DS3 special access services provided by AT&T. (T)

P-3 Administrative Charge

The Administrative Charge (also known as an Order Charge) is a nonrecurring charge that applies for each order. AT&T will waive the Administrative Charge for new Service ordered under an EPP or renewed Service under an EPP on an existing circuit as specified in Section 4, P-2(1). (N)

SECTION 4 - Pricing

P-4 Rates and Charges

P-4.1 Customer Port Connection

P-4.1.1 Customer Port Connection (All Port Types) - Nonrecurring Charges and Term Extension MTM Rates

Customer Port Connection – Nonrecurring Charges and Term Extension MTM Rates
