A100. OBSOLETE SERVICE OFFERINGS - GENERAL

A100.1 General

- A. Services which are continued in service for existing customers only may be retained by a customer as long as the equipment utilized to provide the service is repairable and the Company is able to obtain repair parts under normal supply conditions. When this equipment becomes unrepairable or repair parts are unobtainable, the service will be discontinued and the equipment removed by the Company.
- B. Service offerings listed herein are classified as obsolete. Conditions applicable to these offerings are set forth in paragraphs following.
 - 1. Basic Local Services
Coding to indicate those classes of basic local service which are not offered at all or which have been obsoleted is shown in Section A3, with appropriate footnotes. The footnotes are keyed to the specific exchanges to which they apply. (T)
 - 2. Service offerings (other than classes of basic local exchange service) which have been made obsolete are classified according to the categories shown following.
 - Type A - Obsolete service offering. Not available for customers as new service offering except in cases where the obsolete service is left in or when transferred to a new location within the same exchange.
 - Type B - Not available for new installations, additions or on transfers of service to new location.
 - Type C - Unit no longer being manufactured; offered for new installations only as obtainable from existing stock.
 - Type D - Any other arrangement; the specific provisions in each case being stated at the beginning of the text for the obsolete service offering affected.
- C. Obsolete services are furnished subject to all *terms and conditions* of the *guidebook* the same as would be applicable if the service offering were not obsolete. For convenience in use, a *Guidebook* reference is provided as an aid in referring the reader to a specific section of the *guidebook* having a bearing on the obsolete service offering. (T)

A103.8 Joint User Service

(Obsoleted 12/13/86, Type D, Guidebook Reference A3.8.)

Existing customers with Joint User Service located at the same address established prior to 12/13/86 may request changes or modifications of existing joint user accounts and/or additions of new joint users and/or moves within the same premises on or after 12/13/86 under the *terms and conditions* described *herein*. Subscribers who relocate, transfer service responsibility and/or establish service after 12/13/86 will be furnished service according to the conditions specified in other sections of this Guidebook. (T)

A103.8.1 Application, Terms and Conditions (T)

- A. In general, business exchange service is furnished for the exclusive use of the business subscriber and his employees, agents, and representatives. Joint User Service is a shared service arrangement which allows the business exchange service of a subscriber to be used, when designated by the primary subscriber, by individuals, firms, or corporations not otherwise permitted use of the subscriber's business service.
- B. Joint User Service is permitted in connection with the following:
 1. Business Individual Line Flat Rate, Measured Rate, or Message Rate.
 2. Commercial PBX Flat Rate or Message Rate Service.
 3. Hotel PBX Service.
 4. ESSX-1 Service.
 5. Centrex Service (excluding Dormitory Centrex).
 6. Foreign Exchange
- C. Where service is furnished at a concession rate to the primary subscriber, Joint User Service will not be provided unless the proposed joint user would himself be entitled to service at a concession rate, if he were a primary station subscriber. No concession is allowed from the regular rates for Joint User Service.
- D. Application for Joint User Service and for changes in service or equipment furnished therewith must be executed by the primary subscriber. The primary subscriber is responsible for payment of all charges incurred, regardless of whether such charges are associated with his usage or that of any of his joint users. Stations, including associated mileage charges, additional listings and miscellaneous equipment are furnished, with the consent of the primary subscriber, for use of the joint user, at regular rates.
- E. Charges for Joint User Service date from the day the Company's information records are posted and are payable monthly in advance. The minimum chargeable period for Joint User Service is the life of the directory issue in which the listing first appears, not to exceed one year from the effective date of the listing. Contracts for Joint User Service are self-renewing for periods of one directory issue, not to exceed one year from the effective date of the directory. In the event the joint user listing does not appear in the directory, the minimum chargeable period is for one month.
- F. Joint User Service is terminated and charges for Joint User Service are automatically discontinued upon termination of the primary subscriber's service. Charges for Joint User Service may be discontinued at the request of the subscriber provided that the joint user no longer utilizes any of the customer service or equipment, and also that the terms of the minimum service period have been satisfied.
- G. The total charges for service allocated by the primary subscriber among the subscriber and his joint users shall not exceed the charges of the Company to the primary subscriber as set forth in this Guidebook.
- H. Joint users of a primary subscriber's service must have the option of obtaining service directly from the Company.
- I. A joint user is entitled to one listing in the alphabetical section of the directory.
- J. Joint User Service is not provided on party lines.

A103.18.3 Churches And Clergymen

(Obsoleted 7/1/2003, Type B – Not available for new installations, additions or on transfers of service to new location).

A. A concession of 25 percent (25%) from the regular business rate is allowed to churches, provided the telephone is located in the church or church study, and listed under the name of the church. (T)

B. A concession of 25 percent (25%) from the regular residence rate is allowed to a regularly ordained clergyman (See definition of terms) actively engaged in the work of a designated church, provided the telephone is located in his residence and is listed in the name of the clergyman. (T)

Concessions are granted to clergymen not as individuals but because of their official connection with a church or group of churches. It is assumed that the clergyman will direct and handle many of the church's activities over his residence telephone and is therefore entitled to such consideration provided the service is located in the clergyman's residence and listed in his name.

C. For the purpose of this section, the ranking officer of the Salvation Army or the volunteers of America in each exchange is allowed the same treatment as a regularly ordained clergyman.

A103.43.1 Plan Descriptions (Cont'd)

- A. BellSouth Business Plus Service (Cont'd)
 - 5. Customers may subscribe to either the standalone BellSouth Business Plus service offering or to the BellSouth Business Choice Package (See A3.44) which includes a BellSouth Business Plus service line or to the Complete Choice for Business Package (See A3.45) which includes a BellSouth Business Plus service line. If BellSouth Business Plus service is subscribed to, the rates of A3.43.2 are applicable. If BellSouth Business Choice Package or Complete Choice for Business package is subscribed to, the rates of A3.44.2 2 or A3.45.2, respectively, are applicable. All of the *terms, conditions* and limitations specified for each offering will apply to the respective services and features. (T)
 - 6. Usage rating is dependent upon the underlying service of the originating call location. When BellSouth Business Plus service usage charges as described in paragraph 2 are applicable, they will also apply to 1+, 0+ and 0- calls made within the LATA. However, for 0+ and 0- calls, usage does not contribute toward the Option 1 usage threshold and each minute of use is rated. The appropriate operator services surcharges will also be charged in accordance with the *terms* and conditions of A.3.14. (T)
 - 7. BellSouth Business Plus service Option 2 customers only may subscribe to Local Usage Detail for billable usage. There is no charge for the Local Usage Detail.
 - 8. Method of Determining Monthly Usage Charges
 - a. Usage is determined for each call based on minutes or fraction thereof, with a minimum call duration of one minute. This value is then multiplied by the rate per minute for the rate option selected by the customer. The resultant amount is truncated to whole cents for each call. The amount of usage billed to the customer is subject to paragraphs b. and c.
 - b. For Option 1, only usage above the first 120 hours (7,200 minutes) of usage allowance is billed to the customer.
 - c. For Option 2, only usage outside the Local Calling Area is subject to the billing as described in *paragraph* a. (T)

A110.1 Centrex Service

(Obsoleted 02-20-96, Type D) Service rates and charges in this Section are not available for new installations, moves, transfers of service or replacements or additions to existing service.

Obsolescence Rules

1. Centrex service subscribers under a month-to-month payment option will be allowed to maintain their Centrex service at month-to-month rates.
2. Centrex service subscribers under contract will be allowed to maintain their Centrex service under the rates and charges outlined in this Section when the contract expires. For expired contracts, the Company may establish a date in the future to begin conversion of subscriber accounts to the month-to-month rates and charges outlined in this Section. (On and after March 2, 1979, Centrex Service provided by dial switching equipment located on Company premises will be provided only to those systems already in service or to those systems for which firm orders were received by the Company prior to March 2, 1979, with service before September 2, 1979. Additions and/or rearrangements to existing Centrex systems will be provided at these rates.) (T)

A110.1.1 General

- A. Centrex Service provides an arrangement of switching equipment and station lines for intercommunicating among the station lines and for connection through the local and long distance network to other subscribers on a dial basis without intermediate handling by an attendant. (T)
- B. Centrex CO service provides the various service features as follows:
 1. Centrex I
 - a. Intercommunication between station lines associated with the same system.
 - b. Dialing of outgoing calls within the local calling area and to other exchanges reached through direct distance dialing.
 - c. Identification of outgoing long distance messages and billing of such messages by station line number.
 - d. Inward dialing of local and long distance calls directly to a station line or attendant.
 - e. Transfer of incoming calls from one station line to another with the aid of an attendant.
 - f. Intercept by either machine or attendant of calls dialed to vacant numbers.
 - g. Night service arrangements.
 - h. Completion of incoming calls to the listed number by the attendant.
 2. Centrex II

The following features are in addition to those shown for Centrex I:

 - a. Transfer of incoming central office trunk calls from one station line to another by the station line user. (T)
 - b. Hold an incoming central office trunk call on the line and originate another call over the station line.
 - c. Addition, by the station line user, of another Centrex station line to an existing incoming trunk call.
 - d. Answer of a call over an incoming trunk from any station line.
 3. Where facilities permit, Centrex I and Centrex II station lines may be combined in the same system at rates specified under *paragraph* A110.1.6.A.2.a.(2). (T)
- C. Centrex service is furnished, subject to the availability of facilities, by dial switching equipment located in a building owned or leased by the Company and the attendant's positions located on the subscriber's premises.

A110. OBSOLETE SERVICE OFFERINGS - CENTREX SERVICE

A110.1 Centrex Service (Cont'd)

A110.1.4 Minimum Monthly Charges

- A. Minimum monthly main station line charges shall be established based on 36 month periods for both initial and subsequent installations of main Centrex station lines. Such charges will become effective only when the level of main Centrex station lines is reduced below the specified minimum which shall be determined in the following manner;
1. When the initial Centrex service is established, the minimum monthly charge shall be determined by reducing the total number of main Centrex station lines installed to the next lower one hundred level and applying a 90 percent (**90%**) factor to this number. The charges associated with this 90 percent (**90%**) total of main Centrex station lines equals the minimum charge in effect for the 36 month period except that it shall not be less than the monthly charge for 100 main station lines. Subsequent minimum charges are established when the main Centrex station line growth exceeds twenty (20) main Centrex station lines beyond the next higher hundred level previously established based on the total main Centrex station lines in service. The subsequent minimum charge is determined in the same manner as the initial minimum charge. (T)

A110.1.5 Termination Charges

- A. Centrex Station Lines
Where a Centrex system is discontinued, termination charges apply in an amount based upon 40 percent (**40%**) of the initial and any subsequent minimum monthly charge amount(s) for the remainder of the initial and any subsequent service period(s). (T)
- B. Tie-Line Terminating Equipment and Auxiliary Services termination charges apply in an amount equivalent to the monthly rate for the remainder of the initial service period.
- C. Cancellation of Order
1. Where an order for Centrex service is cancelled after the installation of the required equipment and facilities, but before service is established, termination charges may be applied as if the service had actually been established.
 2. Where an order is cancelled before the installation is completed all expenses incurred in connection with the handling of the request before notice of cancellation is received may be billed to the subscriber: such charge, however, is not to exceed all charges applicable if the service had been installed.

A110.1.6 Rates

- A. Station Lines
Centrex is offered only as a complete service. The exchange access or intercommunication portions of the Centrex station number access charges are not offered separately. Premises Work Charges and Service Charges in Section A4. are also applicable. Customer-provided facilities and equipment may be required at the customer's premises. (T)
A minimum charge for 100 main station lines applies at one location.
Schedule 1 includes all exchanges which have a local calling scope of from 0 - 85,000 Main Station Lines and PBX Trunks in Local Calling Area.
Schedule 2 includes all exchanges which have a local calling scope of from 85,001 - 300,000 Main Station Lines and PBX Trunks in Local Calling Area.

A111. OBSOLETE SERVICE OFFERINGS – ESSX-1 SERVICE

A111.1 Obsolete ESSX-1 Service

(Obsoleted, 02-20-96, Type D) Service rates and charges in this section are not available for new installations, moves, transfers of service or replacements or additions to existing service.

Obsolescence Rules

1. ESSX-1 service subscribers under a month-to-month payment option will be allowed to maintain their ESSX-1 service at month-to-month rates.
2. ESSX-1 service subscribers under contract will be allowed to maintain their ESSX-1 service under the rates and charges outlined in this Section when the contract expires. For expired contracts, the Company may establish a date in the future to begin conversion of subscriber accounts to the month-to-month rates and charges outlined in this Section. (T)

Obsoleted March 7, 1986, Type D, *Guidebook* Reference Section A112. Not available for installations at new locations. Additional main station lines and the features in A123.2 are available for additions to existing locations at the rates specified in these sections. If the customer requires features not found in A123.2 that are available from Section A112., his entire system's billing will be converted to rates specified in Section A112. (T)

A111.1.1 General

- A. ESSX-1 Service is furnished from No. 1 Electronic Switching System (ESS) central office equipment located on Company premises and associated facilities so arranged as to provide the following basic service features.
 1. Direct Inward Dialing (DID) and Identified Outward Dialing (IOD) of exchange and toll calls to and from station lines and attendant positions of an ESSX-1 system
 2. Intercommunicating calls between station lines of the same ESSX-1 system
 3. Identification by station number of outgoing toll calls dialed by a station line
 4. Call Transfer, Consultation Hold and Three-Way Calling of incoming and outgoing exchange, toll, Enhanced Private Switched Communications Service (EPSCS), and Common Control Switching Arrangement (CCSA) type calls without the assistance of an attendant
 5. Station hunting on main station lines provided by series sequential, series non-sequential, basic multi-line hunt group or call forwarding-busy line and call forwarding-don't answer listing calls
 6. Common recorded announcement interception of calls to unassigned station numbers
 7. Trunk answer any station line of incoming primary directory listing calls

A111.1.2 Terms and Conditions (T)

A. Definitions

ATTENDANT ACCESS CIRCUIT

An attendant access circuit connects an attendant position to the serving central office. These circuits are used for the completion of calls directed to the attendant, extension of those calls to station lines and attendant assistance for station lines.

ATTENDANT POSITION

An attendant position consists of customer-provided premises equipment.

BASE SERVICE AREA

The base service area of an ESSX-1 system is located in the serving central office area within a one-half air line mile radius of the serving central office.

COMMON BLOCK

A Common Block is that portion of the memory storage in a No. 1 ESS central office that contains the features for a specific ESSX01 system. An additional common block is required when a single ESSX-1 system serves two or more locations with widely differing calling characteristics.

A. Definitions (Cont'd)

ESSX-1 MAIN STATION CIRCUIT

An ESSX-1 main station circuit connects an ESSX-1 main station line to the serving central office.

ESSX-1 MAIN STATION LINE

An ESSX-1 main station line consists of the termination of a station circuit in the switching equipment of the serving central office.

ESSX-1 SYSTEM

An ESSX-1 system consists of all station lines of a customer with the same primary directory listing which are served by the same central office equipment.

A111.1.2 Terms and Conditions (Cont'd)

(T)

A. Definitions (Cont'd)

GROUP USE SERVICE

Group Use Service is an optional service feature whereby different ESSX-1 systems which are served by the same central office equipment may be arranged for intercommunication calling between station lines and attendant positions of those systems.

NETWORK ACCESS REGISTER

The Network Access Register provides for exchange and toll network calling to and from main station lines and attendant positions of an ESSX-1 system.

STATION HUNTING

1. Series Sequential

When a call is originated to a busy station line in a series sequential station hunting group, the call hunts for an idle station line in that group in an ascending numerical sequence. A number may not hunt to any number which would hunt back to the original number dialed. Each line can hunt to and/or be hunted from only one number.

2. Series Non-Sequential

When a call is originated to a busy station line in a series non-sequential hunting group, the call hunts for an idle station line in that group in a pre-arranged numerical sequence. A number may not hunt to any number which would hunt back to the original number dialed. Each line can hunt to and/or be hunted from only one number.

3. Basic Multi-Line Hunt Group

When a call is originated to a busy station line in a basic multi-line hunting group, the call hunts once in a pre-arranged order for an idle station line through all remaining station lines in that group.

4. Call Forwarding - Busy Line

When a call is originated to a busy station line, the call is forwarded to the attendant or a designated station line in the same ESSX-1 system. The calls forwarded may be incoming only or incoming and intercommunicating.

5. Call Forwarding - Don't Answer

When a call which has been originated to a station line is not answered before the message of a prescribed time interval which is dependent upon the arrangement of the serving central office equipment, the call is forwarded to the attendant or a designated station line in the same ESSX-1 system. The calls forwarded may be incoming only or incoming and intercommunicating.

TOLL DIVERSION

Toll Diversion automatically denies an ESSX-1 station line direct dialing access to a toll network. Station line users attempting to place such calls are diverted to the attendant.

TOLL RESTRICTION

Toll Restriction automatically denies an ESSX-1 station line direct dialing access to a toll network. Station line users attempting to place such calls will receive a distinctive tone to indicate that access is denied.

TRUNK ANSWER ANY STATION LINE

Trunk Answer Any Station Line is an attendant position night service arrangement whereby, when activated by the attendant, calls to the primary directory listing activate a common alerting signal on the customer's premises. These calls may then be answered by any main station line in the system upon dialing a special code.

A111. OBSOLETE SERVICE OFFERINGS – ESSX-1 SERVICE

A111.1 Obsolete ESSX-1 Service (Cont'd)

A111.1.2 Terms and Conditions (Cont'd)

- B. ESSX-1 Service is classified as business service and is furnished only from No. 1 ESS central office equipment located on Company premises. ESSX-1 Service is offered subject to the availability of facilities and where, in the judgment of the Company, service may be provided by the use of service arrangements, equipment and facilities in quantities and types regularly furnished by the Company.
- C. ESSX-1 Service is offered only as a complete service. ESSX-1 Service is not available without Network Access Registers.
- D. Attendant positions, if provided, are located on the customer's premises and must conform to the operating practices of the Company to ensure that a proper standard of service is maintained.
- E. One primary directory listing is furnished without additional charge for each ESSX-1 system in order to direct incoming calls from the exchange and toll networks to an attendant position of an ESSX-1 system.
- F. An attendant access circuit may be arranged for dial "O" operation in order to permit station line users direct access to an attendant position.
- G. The number of simultaneous exchange and toll network calls to and from main station lines and attendant positions of an ESSX-1 system is limited by the number of network access registers subscribed to by the customer. Each network access register may be arranged for two-way, one-way incoming or one-way outgoing operation depending upon the option of the customer at the time the network access register is installed. When a change in the type of operation is requested the customer, the appropriate Service Charge, as specified in Section A4, applies per network access register affected.
- H. Interception of Calls to Unassigned Station Lines
 1. Incoming calls from the exchange and toll networks to unassigned station lines are intercepted by the same standard central office recorded announcement equipment used to intercept such calls for exchange services. The announcement provided states that the number called is not in service. Referral of unassigned number calls will not be provided.
 2. Intercommunicating calls to unassigned station lines are intercepted by central office recorded announcement equipment which is common to all ESSX-1 systems served out of the same office. The announcement states that the number is not in service and advises that the attendant or the directory of the caller's system should be consulted.
- I. At the time an ESSX-1 main station line is initially installed, it will be equipped with a suitable station hunting arrangement as determined jointly by the customer and the Company. When a change in that arrangement is requested by the customer, the appropriate Service Charge, as specified in Section A4 for a change in a line termination, applies per main station line affected.
- J. When the station hunting arrangements Call Forwarding-Busy Line and Call Forwarding-Don't Answer are provided on the same station line, all busy line and don't answer condition calls forwarded must either be incoming only or incoming and intercommunicating and, in addition, must be forwarded to the attendant or the same designated station line.
- K. With the exception of Network Access Registers, neither partial nor complete temporary suspension of ESSX-1 Service is permitted.
- L. Optional Service Features
 1. Definitions
 - CALL HOLD

A station line user may place any call involving his station line on hold by dialing a preset code.

1. Definitions (Cont'd)

CALL PICK-UP

A station line user may answer calls directed to another station line in the same call pick-up group by dialing a preset code.

CALL WAITING-TERMINATING

A called station line equipped with this optional service feature will receive an audible tone to indicate that an incoming or intercommunication call is waiting when the called station line is busy.

CALL WAITING-ORIGINATING

A calling station line provides an audible tone to a called station line in the same ESSX-1 system to indicate that an intercommunication call is waiting when the called station line is busy.

2. The optional service feature Call Waiting-Terminating can only be provided when all station lines in an ESSX-1 system which are so equipped are arranged for either incoming calls only or incoming and intercommunication calls. Call Waiting--Terminating and the basic service feature Call Forwarding-Busy Line cannot be provided on the same station line.

M. Rates and Charges

1. Except where *paragraph* A111.1.2.M.6 is applicable, the rates and charges specified for ESSX-1 Service are in addition to the *guidebook* rates and charges for statins and other services with which the system is associated. (T)

2. Nonrecurring Charges

- a. ESSX-1 nonrecurring charges are in addition to appropriate Service Charges (including Premises Work Charges) outlined in Section A4. (T)

- b. ESSX-1 nonrecurring charges applicable on initial or subsequent installation may, at the customer's option, be paid in a lump sum when the service is established or deferred over a predetermined time in accordance with existing administrative procedures.

3. If the ESSX-1 subscriber elects a Measured Rate Service option, Measured Rate Service usage charges specified in Section A3 are applicable on calls to locations outside the subscriber's ESSX-1 system in addition to the rates and charges in this and other *guidebook* sections for ESSX-1 Service and other associated services. Usage charges are not applicable on calls originated and terminated within the same ESSX-1 system. (T)

4. A mixture of flat rate and measured rate service will not be allowed within a single customer system.

5. ESSX-1 Basic Equipment, Network Access Registers, lines and circuits are available either at the rates and charges specified in *paragraph* A100.111.1.3, or under the ESSX-1/Multiline Service Option in *paragraph* A100.111.1.7. The customer must subscribe to all of these elements from the same *guidebook* section. (T)

6. When connecting ESSX-1 lines to facilities of other Interexchange Carriers not under the Company's jurisdiction, all ESSX-1 rates and charges associated with that line are not applicable.

A111.1.2 Terms and Conditions (Cont'd)

M. Rates and Charges (Cont'd)

- 7. The rates and charges in this and other *guidebook* sections for ESSX-1 Service and the associated features and services will continue to apply to existing ESSX-1 subscribers served at a location that is converted through no desire or fault of the subscriber to other than Number 1 ESS central office equipment. Should one of the aforementioned existing subscribers wish to utilize features and/or services specific to the non-Number 1 ESS equipment, the billing for that customer's system will be converted to charges appropriate for the central office equipment providing his service.

B. Automatic Route Selection (Cont'd)

2. Definitions (Cont'd)

FOREIGN AREA DISCRETE TRANSLATION

Foreign Area Discrete Translation is the screening of a specific group of digits, by the switching equipment, to determine proper call routing.

PATTERN

A group of routes arranged to be selected in a sequence specified by the customer. For example:

Pattern #1	Pattern #2	Pattern #3
FMAS, FX	WATS	FMAS, FX
WATS	CCSA	WATS
CCSA	Toll	Toll
Toll		

ROUTE

A route is a group of one or more facilities of the same type used to complete 7 or 10-digit calls between the same points.

ROUTE SELECTION

The automatic selection of the preferred route as predetermined by the customer, upon dialing of an access code by the station line user.

3. **Terms and Conditions**

- a. Automatic Route Selection is offered only to ESSX-1 or Centrex-CO customers served from No. 1 ESS central offices equipped to furnish this feature, where facilities permit.
- b. Preferred routes and alternate routing patterns will be specified by the customer.
- c. All rates and charges specified for Automatic Route Selection are in addition to the rates and charges for the associated facilities.
- d. The number of patterns required by a customer are governed by the type and variety of facilities to which the customer subscribes.
- e. A single rate per facility will apply regardless of the number of patterns having access to that facility. The monthly rate specified is applicable to each facility available to the patterns.
- f. Patterns without final route to a toll network may be offered only if a customer subscribes to a sufficient number of facilities which, in the judgment of the Company, provide an adequate level of service so as to avoid interfering with the service of others (or to prevent others from making or receiving calls over their service.)
- g. Where a route is used in one pattern (pattern reached by one access code), only one translation may be provided per route. Where a route is used in two or more patterns (each pattern is accessed by different access codes), one translation per pattern may be provided subject to the appropriate charges as specified in *paragraph* A111.1.4.B.4.c. Where central office code translation is required for more than one Number Plan Area (NPA) per single facility group or route, rates and charges as specified in *paragraph* A111.1.4.B.4.b will apply for each NPA translated.

C. Station Message Detail Recording

1. General

Station Message Detail Recording (SMDR) is an arrangement to provide a record, by station number of originating intercity traffic routing over FMAS, FX, WATS, EPSCS, CCSA, OCC and/or toll type facilities for ESSX-1 or Centrex-CO customers, where facilities have been made available. The station message detail will include the calling station number, the called number, date, time of day, duration of call and the type of facility used. Some message detail may be limited or omitted when this service is provided in conjunction with Automatic Route Selection.

The record will be provided, on magnetic tape, to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in the routes selected by the customer for Station Message Detail Recording.

2. **Terms and Conditions**

- a. Station Message Detail Recording (SMDR) may be offered to station lines of ESSX-1 or Centrex-CO customers served from a No. 1 ESS central office where facilities permit and where the Company's message billing process has been arranged to provide this optional feature.
- b. Station Message Detail Recording is not represented to be a provision of billing detail. Where Foreign Exchange type facilities are involved, all such call attempts, whether completed or not, will appear in the SMDR.
- c. Station message details will be provided on magnetic tape. The tape density and number of tracks will be that used by the program and data processing system in use by the accounting center furnishing the tape.
- d. Station message details may be provided on all facilities subscribed for by the customer but will not include intercom calls originated by station line users. The customer may designate the group or groups of facilities on which Station Message Detail Recording (SMDR) is to be provided.

D. Uniform Call Distribution

1. Definitions

UNIFORM CALL DISTRIBUTION (UCD)

UCD is a hunting arrangement available on ESSX-1 or Centrex-CO lines served by a No. 1 ESS central office equipped with Generic Program 6 and higher. The feature provides even distribution of incoming and intercommunicating calls to the group of lines designated as part of the UCD group.

UNIFORM CALL DISTRIBUTION WITH QUEUING (UCD/Q)

Queuing is an option that may be added to the UCD arrangement. Queuing permits calls, in excess of lines in a UCD group, to be held in the central office and distributed in their order of arrival to lines in the UCD group as the lines become available.

2. Rates

A111.1.5 Use Of Other Services With ESSX-1 Service

Where other services offered by the Company can be used with ESSX-1 service, they will be furnished under the *terms and conditions*, and at the rates as covered in other sections of this and other Company *Guidebooks*. (T)

A111.1.6 Credits and Surcharges

For ESSX-1 Systems in service or an order as of July 27, 1983, where the customer's primary service location is within one and one-half miles of the serving central office, credits and surcharges as described following will apply for all Network Access Registers (NAR's) and lines in service on May 25, 1984.

For such systems, a surcharge equal to the interstate access charge for PBX trunk will be made for the Network Access Registers in service as of May 25, 1984. Network Access Registers ordered after that date will not pay the surcharge.

For such systems a credit will be made for each station line in service as of May 25, 1984, which credit is equal in amount to the interstate access line charge which was in effect as of May 25, 1984.

A111.1.7 ESSX-1/Multiline Service Option, Vintage I

A. Terms and Conditions (T)

- 1. For ESSX-1 Systems of four hundred (400) main station lines or less the ESSX-1 circuits are available under the VTPP ESSX-1/Multiline Service option and a conventional payment plan at rates and charges specified *herein*. Circuit packages under the ESSX-1/Multiline Service Option will be provided under the Variable Term Payment Plan (VTPP) as described in Section A2, except as specified *herein*. Individual circuits may be provided under the conventional payment plan only to VTPP ESSX-1/Multiline Service subscribers and only under the following circumstances: (T)
 - a. When less than a 24-circuit package is required to serve a single customer location, or
 - b. When less than an additional 24-circuit package is required to complete service to a single customer location where VTPP ESSX-1/Multiline Service circuit packages are being provided.

A111.1.7 ESSX-1/Multiline Service Option, Vintage I (Cont'd)

A. Terms and Conditions (Cont'd)

2. Options and Conditions Under VTPP

- a. Customers may select one of three payment periods - 36 months, 60 months or 84 months.
- b. Transfer of service is permitted under the Plan. A transfer charge is applicable to the customer acquiring ESSX-1 Service.

(1) Transfer charge

(a) Each	Charge	USOC
	\$200.00	NA

- c. The ESSX-1/Multiline Service rates in effect at the time the Company is notified in writing of the subscriber's choice of the ESSX-1/Multiline Service payment period options will be applicable for the duration of the payment period chosen by the subscriber.
- d. Termination charges under the ESSX-1/Multiline Service option will be an amount equal to the monthly rate for the unexpired portion of the customer's payment period. Termination charges will not apply to a circuit package that is made to become a part of a larger circuit package that is subsequently subscribed to as a new VTPP ESSX-1/Multiline Service Option circuit package.
- e. ESSX-1/Multiline Service Option is provided in specific line package sizes between a single point of termination and the serving wire center. The VTPP *terms and conditions* in Section A2 pertaining to in-service moves will apply to a move of a VTPP ESSX-1/Multiline Service circuit package. (T)
- f. ESSX-1/Multiline Service is provided subject to availability of adequate facilities as determined by the Company.
- g. The rates as specified in *paragraph* A111.1.7.C.1.a apply per package regardless of the number of lines within each package that are activated by the customer. (T)
- 3. ESSX-1 monthly rates that are in effect for Basic Equipment, Intercommunication Switching, Terminating Arrangements, Additional Common Blocks and Station User Optional Features when the Company is notified in writing of the customer's choice of a VTPP ESSX-1/Multiline payment period will apply for that customer for the length of his VTPP ESSX-1/Multiline payment period. For the Intercommunication Switching portion, this *condition* applies only to those Intercommunication Switching rates that are associated with circuits that are provided as part of VTPP ESSX-1/Multiline Service Option circuit packages. Termination charges will not apply for these services and features. (T)
- 4. For systems provided under the ESSX-1/Multiline Service Option, Line Connection and Line Change Charges in Section A4 will apply to Network Access Registers only.¹ (T)
- 5. **(DELETED)** (D)
- 6. The Secondary Service Charge in Section A4 will be the only nonrecurring charge applicable for a conversion from conventional ESSX-1 Service rates to ESSX-1/Multiline Service Option rates if there is no change in services or facilities at the time of conversion.¹ (T)

Note 1: These charges result from the restructure of Section A4, and are to be implemented on May 9, 1995.
