**A12.25.14 Systems Communication Service (SCS)**

**A. General**

1. Systems Communication Service (SCS) is an arrangement that provides abbreviated dialing between systems. SCS allows users in a BellSouth Centrex service system to dial four or five digits to reach users in the other destinations included in the SCS arrangement. Destinations included in the SCS arrangement may be PBX, MultiServ service, MultiServ PLUS service, BellSouth Centrex service or any other location which may be dialed directly (the subscriber may subscribe to BellSouth Centrex service at the other locations, but it is not required). The calls can be local or toll.
2. The only function SCS offers to BellSouth Centrex service subscribers is abbreviated dialing to the other selected locations.

**B. Terms and Conditions**

1. SCS will allow four- or five-digit dialing on a system basis to the subscriber's distant number range. SCS will prefix any Access Code (if required), Home (HNPA) or Foreign Numbering Plan Area (FNPA) (if required), and NXX dialed by the subscriber before routing to the distant location.
2. The four- or five-digit abbreviated dialing ranges cannot be duplicated at any other SCS location or destination.
3. BellSouth Centrex service common equipment is required at each serving central office at which SCS is provided.
4. SCS will be offered only where facilities exist.
5. IntraLATA toll calls will be subject to the applicable rates for the authorized intraLATA toll service selected by the subscriber. InterLATA toll calls will be routed to the Interexchange Carrier (IC) to which the subscriber has presubscribed. Other usage charges will apply as appropriate.
6. When SCS involves more than one subscriber, each subscriber must consent to sharing of information with other subscribers that is necessary for implementation of SCS.

**Note 1:** See paragraph A12.25.13.A.1 for availability of functions included in this rate element.

**Note 2:** Rates and charges for terminations in BellSouth Centrex service (other than Tandem Switching Features SFGs) are located in paragraph A12.25.8.

**A12.25.15 Numbers and Facilities Reserved for Future Use**

A. General

1. A customer may reserve preassigned numbers and facilities necessary to meet their specified growth requirements at specific locations on a mutually agreeable date. In the event the customer elects not to be provided with reserve numbers, timely station line additions cannot be assured and facilities necessary for growth requirements will be provided only within normal engineering and construction intervals.
2. Numbers reserved for future use includes preassigned numbers and the facilities required. Such numbers and facilities will be removed from reserved status and assigned as active station lines as requested by the customer.
3. The assignment of numbers and the sequence of numbers assigned to a subscriber's system is made at the discretion of the Company.
4. The service is furnished subject to the availability of facilities and numbers.
5. Calls to reserved (unassigned) numbers will be routed to intercept common recorded announcement facilities as specified in paragraph A12.25.1.A.
6. Numbers furnished herein retain their reserved status until assigned to a station line at which time the service assumes rates and charges applicable to a BellSouth Centrex service station line.
7. Reserved numbers not assigned to a station line will be billed at the following rates until removed from reserved status or billed as an active BellSouth Centrex service station line.

B. Rates and Charges

1. Reserved BellSouth Centrex service numbers

A. Description of Service

1. BellSouth Centrex Control is a feature of BellSouth Centrex service which utilizes a computer-based operations system accessed via an Internet connection or a Company Secure Network pending conversion to Internet access. BellSouth Centrex Control allows end users to activate and/or deactivate selected features and/or change certain service options and feature configurations on designated BellSouth Centrex service station lines. These changes can be performed on a per line basis or a bulk change basis. Subscriber provided equipment is required for the operation of BellSouth Centrex Control. The BellSouth Centrex Control feature is available where central office switching systems and facilities permit. ISDN station lines will only be controllable in the DMS-100 and 5ESS switches where facilities permit.
2. For access to BellSouth Centrex Control, the subscriber will be required to provide appropriate equipment and Internet access. Service established prior to June 30, 2006, using dedicated access lines will be converted to Internet access..

**Note 1:** Billing will be in increments of 100 numbers. Partial increments will be rounded up to the next 100.
