A1. DEFINITION OF TERMS

ACCESSORIES

Devices which are mechanically attached to, or used with, the facilities furnished by the Company and which are independent of, and not electrically connected to, the conductors in the communications path of the telecommunications system.

(DELETED)

(D)

ADD-ON

A feature which permits a station user to add one other station to the conversation.

ANSWER SUPERVISION

This feature provides the capability of delivering "off hook" supervision signals from the subscriber's serving central office to a line interface at the customer's premises. These supervisory signals indicate when the called party has answered an incoming call (gone "off hook").

ATM

The term "ATM", referring to Asynchronous Transfer Mode, denotes one of the general class of packet switching technologies that relay traffic via an address contained within the packet (referred to in ATM as cells). ATM is a switching method in which information does not occur periodically with respect to some reference such as a frame pattern.

AUTHORIZED PROTECTIVE CONNECTING MODULE

The term authorized protective connecting module denotes a protective unit designed by the Company and manufactured under the control of Company quality assurance procedures, which unit is to be incorporated in a conforming answering device.

AUXILIARY LINE

An additional individual line main station used for one-way (inward to the subscriber) service.

AUXILIARY STATION

A station connected to the central office by means of an auxiliary line.

BACK-UP LINE

An optional service which provides individual line business subscribers with an additional line which is available for inward and outward calling with usage charges applying for originating and terminating calls.

BASE RATE

The rate for primary classes of exchange service which does not include zone or extra exchange line mileage charges.

BASE RATE AREA (BRA)

A specific section of an exchange area including the continuous built-up portion of the community served within which primary classes of service are available without zone or extra exchange line mileage charges.

BASIC TERMINATION CHARGE

See "Termination Charge"

BELLSOUTH CHANNELIZED TRUNKS

Provides channelized DS1/1.544 Mbps circuits available for voice intraLATA communications services. Provides up to 24 DID, Outward Only or Combination/2-Way trunks.

A29.7 Administrative Management Service (AMS)

A29.7.1 Description of Service

A. General

Administrative Management Service provides customers a single point of access to other Company network management products, and provides the customers greater control of and additional information about the network services they purchase from the Company. Although most Operation Support Systems (OSS) are optional on a nominal business day, AMS will be provided on a 24 hour basis for continuous usage of those systems that are accessible 24 hours.

Note 1: Refer to the National Exchange Carrier Association (NECA) Tariff, FCC No. 4, for mileage measurement methodology and wire center V&H coordinates.
