

**TARIFF DISTRIBUTION**

FILE PACKAGE NO.: TN-19-0008

DATE: March 1, 2019

STATE: TENNESSEE

EFFECTIVE DATE: 03/01/2019

TYPE OF DISTRIBUTION: Approved

PURPOSE: Increase business Private Line Channels (APL) monthly charges.

### B3. CHANNELS

#### B3.3 Application of Rates (Cont'd)

##### B3.3.3 Mileage Measurements (Cont'd)

A. (Cont'd)

6. Obtain the square root of the result obtained in paragraph 5. This is the rate distance in miles (fractional miles being considered as full miles).

EXAMPLE: The rate distance is required between City One and City Two.

|            | V      | H      |          |
|------------|--------|--------|----------|
| City One   | 7260   | 2083   |          |
| City Two   | 7364   | 1865   |          |
| Difference | 104    | 218    |          |
| Squared    | 10,816 | 47,524 | = 58,340 |

58,340 divided by 10 = 5834

Square root of 5834 = 76.38 = 77 Airline miles

- B. When a private line is furnished over facilities which the Company elects to provide on a direct basis and is not routed through a central office, one two-point channel charge from B3.4.2 will apply. The arrangement is limited to channels not more than one airline mile in length.
- C. For the purpose of applying multipoint charges, the bridging or hubbing locations are determined by that combination of airline distances connecting the serving wire center which will produce the lowest interoffice mileage charges. Bridging charges apply when three or more channels connect at the same location.
- D. For Series 1000, 2000 and 6000 channels the customer may specify the sequence in which the service points are to be connected in which case the rate mileage is the shortest airline mileage determined in accordance with paragraph C, which will connect the wire centers of the service points in the specified sequence.

#### B3.4 Rates And Charges

##### B3.4.1 Local Channels

|                             | Monthly<br>Rate | Nonrecurring<br>Charge |            | USOC  |     |

**Note 1:** For method of determining mileage, see B3.3.3.A.

**Note 2:** Metallic interoffice channels are no longer available for new installations, moves or transfers. Metallic interoffice facilities are in continually decreasing supply due to modernization programs that replace existing metallic interoffice with non-metallic facilities such as fiber optics.

**B3.4.4 Optional Features And Functions**

**A. Bridging**

Bridging charges are applicable where more than two Local Channels, or one or more Local Channels and more than one Interoffice Channel, or more than one Local Channel and one Interoffice Channel are bridged or hubbed at the same wire center. No additional bridging charges are applicable for Series 1000, Types 1204 and 1205.

##### B3.4.4 Optional Features And Functions (Cont'd)

**B.** Signaling Arrangements

Signaling arrangements are provided at the customer's option to arrange channels for suitable signaling. Signaling is required on all off-premises extension channels and tie line channels associated with PBX (or similar) systems.

1. Per local channel

|                               | <b>Monthly</b>  | <b>Nonrecurring</b> |                   |             |     |

**C.** Conditioning (Voice Grade Services)

1. Conditioning provides more specific transmission characteristics for data services. There are two types of C-conditioning and one type of D-conditioning, each with different technical specifications. C-Type conditioning controls attenuation distortion and envelope delay distortion. D-Type conditioning controls the signal to C-notched noise ratio and intermodulation distortion.

Conditioning is charged for on a per Local Channel basis for two-point and multipoint service. For two-point services the parameters apply to each service. For multipoint services the parameters apply to any path between any two service points.

C. Conditioning (Voice Grade Services) (Cont'd)

2. The types and description of the available conditioning options are as follows:

| Type Conditioning            | Frequency Response Specification   | Envelope Delay Distortion Specification  |
|------------------------------|--|--|
| C1 (two-point or multipoint) | 300-2700 Hz,<br>-2dB to +6dB.<br>1000-2400 Hz,<br>-1dB to +3dB.                                  | 1000-2400 Hz, less than 1000 microseconds  |
| C2 (two-point or multipoint) | 300-3000 Hz,<br>-3dB to +12dB.<br>300-3000 Hz,<br>-2dB to +6dB.<br>500-2800 Hz,<br>-1dB to +3dB. | 1000-2600 Hz, less than 500 microseconds<br>600-2600 Hz, less than 1500 microseconds<br>500-2800 Hz, less than 3000 microseconds |
|                              | <b>C-Notched Noise</b>   | <b>Non-Linear Distortion</b>   |
| D1 (two-point)               | Noise level 28dB below signal level  | <b>2nd Order Distortion</b> 35dB below signal level<br><b>3rd Order Distortion</b> 40dB below signal level                       |

3. When a channel is equipped with Type D1 conditioning and is utilized for voice communications, the Company does not undertake to represent that the channel will be suitable for such voice transmission.

|  | Monthly Rate | Nonrecurring Charge |            | USOC |     |
|--|--------------|---------------------|------------|------|-----|
|  |              | Initial             | Subsequent |      |     |
| 4. C-Type Conditioning                                       |              |                     |            |      |     |
| a. C-Type Conditioning is available for Types 2463 and 2464. |              |                     |            |      |     |
| (1) C-Types of Conditioning per local channel                |              |                     |            |      |     |
