A107.4 Access Line Service For Customer-Provided Public Telephones

Obsoleted June 1, 2021; Type D. Beginning June 1, 2021, new orders for this service will no longer be accepted. Current subscribers may keep their service at its existing location. The Company currently plans to discontinue this service on or after June 1, 2025.

A107.4.1 Definition And Requirements

An access line service for customer-owned coin operated telephone (COCOT) is an exchange line service provided at the request of a subscriber for telecommunication use by the general public. This access line service is not available without an authorization number issued by the Tennessee Regulatory Authority (TRA). The term COCOT is used interchangeably within this Guidebook and in the TRA Rules and Regulations with Public Pay Telephone Service provided by an owner or operator who is not a public company certified by the TRA.

A. Every company or individual, who is not a public telephone company certified by the TRA in accordance with TCA 65-4-201, operating a public pay telephone instrument located in the state of Tennessee connected with or to be connected with the public network shall be authorized by the TRA to provide pay telephone service in accordance with Rules in Chapter 1220-4-2. Customer-provided public pay telephone service shall mean the resale of local service and/or intrastate toll telephone service through customer or telephone company provided equipment which is coin operated or coinless and whose calls are sent paid or non-sent paid.

In order to insure uniformity throughout the state with regard to the provision of pay telephone service to the public, the owner or operator of a public pay telephone service seeking authorization to operate a pay telephone service shall agree to abide by the Rules of the TRA as outlined in Chapter 1220-4-2 including, but not limited to the following:

1. The following calls shall be provided without depositing money and free of charge to the customer: calls to the Company's operator; 911 or emergency numbers; toll-free and 800 service numbers; pay phone repair and refund numbers; and interexchange access numbers.¹
2. Local call charges are market based.¹
3. The public pay telephone shall provide the following: two way calling capability (unless waived by the TRA); no time limits on calls; the acceptance of nickels, dimes and quarters; and coin return for incomplete calls (coinless phones shall not be required to accept coins).
4. All public pay telephone instruments installed after July 1, 1990 shall be installed in accordance with the requirements of the American National Standards Institute for Buildings and Facilities - Providing Accessibility and Usability for Physically Handicapped People, ANSI, A 117.1 (1986), Section 4.29, Telephones. Provided, however, that in a given location where an owner has installed more than one instrument, only one pay telephone instrument shall be required to meet those requirements.
5. All public pay telephone instruments shall comply with TRA approved telecommunication industry standards and the current National Electric Code.
6. Local telephone directories shall be provided at each pay telephone service location.
7. The owner shall read and comply with all TRA rules and regulations governing public pay telephone service.
8. The owner shall charge for intrastate toll calls, including operator assistance surcharges, no more than the rates approved by the TRA for the Company and the dominant interexchange carrier in the state.
9. The owner shall provide an instrument capable of completing local and long distance calls. Provided however, that a coinless pay telephone is exempt from this requirement as long as the instrument is located in close proximity or next to a pay phone with local and long distance calling capabilities.
10. The owner agrees to provide customer access to all interexchange carriers certificated to do business in Tennessee in the interexchange carrier's preferred manner as officially designated by said carrier to the TRA.

Note 1: Pursuant to the Federal Communication Commission's Report and Order, Order on Reconsideration and Request for Clarification of Effective Date of Compensation for Directory Assistance Calls in CC Docket No. 96-128, the local coin rate and directory assistance rate charged to end users is market based as of October 7, 1997.

(F) (D)

A107.4.1 Definition and Requirements (Cont'd)

(F) (D)

B. Additional Requirements

(D)

1. Completion of local and intraLATA Toll messages are provided by the Company. (D)
2. The service is furnished subject to the condition that all applicable terms and conditions in Section A2 will be adhered to, with the exception of paragraphs A2.2.1.A and A2.2.1.B, which restrict the use of service and prohibit payment to the customer by another for use of the service. (D)
3. The service is provided for use by the subscriber but may be used by others when so authorized by the subscriber, provided that all such usage is subject to the provisions of this guidebook. (D)
4. This service is not subject to concessions. (D)
5. This service may not be suspended at a reduced rate. (D)
6. This access line may include an optional screening feature to prevent the operator from allowing toll charges against the subscriber's line. The operator also cannot perform coin collecting functions. (D)
7. The Company is not responsible for refunds of coins deposited in customer provided public pay telephones. (D)
8. The subscriber to this service will be responsible for any and all toll charges billed to the subscriber's account. (D)
9. The public pay telephone instrument must have an FCC Registration Number and must be connected to the Company's network in compliance with Part 68 of the FCC Rules and Regulations. (D)
10. This service is available in wire centers noted in paragraph C. (D)
11. The public pay telephone service may only be connected to access line service for customer provided public telephones as provided herein. It must be served on a single public telephone access line directly connected to the Company's network and billed at the guidebook rate. (D)
12. Installation, maintenance and operation of the public telephone instrument is the responsibility of the owner. Timely repairs shall be performed on the instruments by the owner; access lines are the responsibility of the Company. (D)
13. For customers subscribing to Caller ID - Deluxe, as specified in paragraph A13.19.2.H, if the incoming call originates from a customer provided public pay telephone instrument, the name information transmitted will always be "Pay Phone". (D)
