A113.19.1 Definitions of Feature Offerings

A. Caller ID – Multi-Line²

This feature allows residence and business customers with Rotary (Grouping) arrangements to receive and view on a display unit call related information on certain incoming calls.

The following information is transmitted to the Caller ID – Multi-Line² customer and displayed on the called CPE during the first long silent interval of the ringing cycle: calling Directory Number, time of day (hours and minutes) the call was received, and date (month and day) the call was received.

A service order is required to establish or discontinue Caller ID – Multi-Line². Subsequent to establishment, the feature can be activated and deactivated at the customer's discretion through the use of preassigned feature access codes.

Any customer subscribing to Caller ID – Multi-Line² will be responsible for the provision of a display device which will be located on the customer's premises. The installation, repair and technical capability of that equipment to function in conjunction with the features described herein will be the responsibility of the customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network feature described herein.

If the incoming call is from a caller who subscribes to and/or has activated Calling Number Delivery Blocking as described in paragraph A13.19.2 or A13.19.2.M, the calling number will not be delivered.

If the incoming call is from a line equipped with RingMaster service, the number transmitted will always be the main number rather than any dependent RingMaster service number.

If the incoming call is from a caller served by a Private Branch Exchange (PBX), only the main number will be transmitted and available for display.
