

REGULATIONS (FOR DIGITAL LINK SERVICES)

The regulations described below apply to MegaLink Digital Service, MegaLink III – Wideband Digital Service/1.544 Mbps, MicroLink I – Public Switched Digital Service, DS3 Service, Network Reconfiguration Service^{2/} and GigaMAN Service^{1/}.

(C)

A. Undertaking of the Company

1. Scope

- a. This guidebook section contains the regulations and definitions governing the furnishing of Digital Link Service by the Company.
- b. Digital Link Service is the furnishing of Company facilities for communications between specified locations, within the local access and transport areas (LATAs) all within the state of Texas, 24 hours daily, seven days per week. Facilities may be those of the Company only, or those of the Company and other LECs.
- c. The Company does not undertake to transmit messages but offers the use of its facilities where available to customers for such purposes.
- d. Services provided under this guidebook shall be used by Digital Link Service customers for end-to-end service within the LATA. To establish end-to-end service, customers may order segments of Digital Link Services between a customer premises and a Company-designated hub location when the services terminate in certain additional service features or central office-based services, e.g., central office multiplexing or Network Reconfiguration Service. Interexchange Carriers (ICs) may use services found in this guidebook that will meet their administrative needs, however, an IC is restricted from using services found in this guidebook to furnish a portion of their authorized service offerings.

2. Limitations

- a. The use and restoration of services shall be in accordance with Part 64, Subpart D, Appendix A, of the Federal Communications Commission's (FCC's) Rules and Regulations and those found in Part 8, Section 5 (*Telecommunications Service Priority System*), which specify the priority system for such activities.
- b. The furnishing of service under this guidebook will require certain physical arrangements of the facilities of the Company and is therefore subject to the availability of such facilities.
- c. Digital Link Service may be limited in order to comply with orders issued under wartime authority of the President of the United States.

/1/ Effective September 30, 2017, GigaMAN Service will no longer be available for purchase by new or existing customers. See Part 20, Section 15.

/2/ Effective October 30, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers. See Part 20, Section 15.

(N)
(N)

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)**A. Obligations of the Company (cont'd)**

3. Liability

- a. In view of the fact that the customer has exclusive control of communications over the facilities furnished him or her by the Company, and of the other uses for which facilities may be furnished by the Company, and because of unavoidableness of errors incident to the services and to the use of such facilities of the Company, the services and facilities furnished by the Company are subject to the terms, conditions and limitations herein specified.
- b. The Company's failure to provide or maintain facilities under this guidebook shall be excused by labor difficulties, governmental orders, civil commotions, acts of God and other circumstances beyond the Company's reasonable control, subject to the interruption allowance provisions of this guidebook.
- c. The Company's liability, if any, for its gross negligence or willful misconduct is not limited by this guidebook. With respect to any other claim or suit, by a customer or any others, for damages arising out of mistakes, omissions, interruptions, delays, errors, or defects in transmission occurring in the course of furnishing service hereunder, the Company's liability, if any, shall not exceed an amount equivalent to the proportionate charge to the customer for the period of service during which such mistake, omission, interruption, delay, error, or defect in transmission or service occurs and continues. This liability shall be in addition to any amounts that may otherwise be due to the customer under this offering and/or 'Regulations Applying to All Customers' Contracts' in Part 2, Section 2, paragraph 1.8 (*Service Guarantee*) as an allowance for interruptions. However, any such mistake, omission, interruption, delay, error, or defect in transmission or service which is caused or contributed to by the negligence or willful act of the customer or user or which arises from the use of customer provided facilities or equipment shall not result in the imposition of any liability whatsoever upon the Company. Except as specifically set forth in 'Regulations Applying to All Customers' Contracts' in Part 2, Section 2, paragraph 1.8 (*Service Guarantee*), no other liability shall in any case attach to the Company in consideration of such interruptions.
- d. The Company shall be indemnified and saved harmless by the customer or user against:
 1. claims for libel, slander and infringement of copyright arising from the material transmitted over the facilities;
 2. claims for infringement of patents arising from combining with, or using in connection with, facilities furnished by the Company, apparatus and systems of the customer or user; and
 3. all other claims arising out of any act of omission of the customer or user in connection with the facilities provided by the Company.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)**A. Obligations of the Company (cont'd)**

3. Liability (cont'd)

- e. The Company does not guarantee nor make any warranty with respect to equipment provided by it for use in an explosive atmosphere. The customer or user indemnifies and holds the Company harmless from any and all loss, claims, demands, suits, or other action, or any liability whatsoever, whether suffered, made, instituted or asserted by the customer or user or by any other party or persons, for any personal injury to or death of any person or persons and for any loss, damage or destruction of any property, whether owned by the customer or others, caused or claimed to have been caused directly or indirectly by the installation, operation, failure to operate, maintenance, removal, presence, condition, location or use of said equipment so provided.

The Company will require each customer to sign an agreement for the furnishing of such equipment as a condition precedent to the furnishing of such equipment.

- f. The Company is not liable for any defacement of or damage to the premises of a customer (or user) resulting from the furnishing of channel facilities or the attachment of apparatus and associated wiring furnished by the Company on such premises or by the installation or removal thereof, when such defacement or damage is not the result of negligence of the agents or employees of the Company.
- g. The Company shall in no way be liable for any harm or any damages arising in connection with any failure by the customer to properly bond or ground a mobile premises or any mobile structure in which service is to be provided (e.g., boats, RVs and mobile homes), as well as equipment and associated wiring located on the customer's side of the demarcation point at any premises, whether fixed or mobile.

4. Provision of Facilities

- a. The Company will provide all facilities necessary for Digital Link Service. The customer or user must provide his own terminal equipment or communications system for use with the service as specified in this guidebook.
- b. Digital Link Service furnished by the Company will be furnished at the rates contained in this guidebook, provided the necessary facilities are available. Where facilities are not available, and unusual expenditures are involved in making Digital Link Service available, the customer may be required to pay additional charges to cover the unusual expenditure, or to contract for service beyond the initial period, or both.
- c. The charges specified in this guidebook do not contemplate work being performed by the Company employees involved at a time when overtime wages apply, due to the request of the customer, nor do they contemplate work once begun being interrupted by the customer.

If the customer requests labor be performed at hours of the day or days of the week other than normal work hours or days or on holidays, or interrupts work once begun, an additional charge based on the additional costs involved applies. Such charges do not apply if sufficient advance notice is given so that employees' work schedules can be changed and it is agreeable to the Company. The additional charge does not apply to overtime or premium time worked at the Company's convenience.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)

A. Obligations of the Company (cont'd)

4. Provision of Facilities (cont'd)

- d. The apparatus and associated wiring on customer's premises, furnished by the Company, shall be and remain the property of the Company, whose agents and employees have the right to enter said premises at any reasonable hour for the purpose of installing, inspecting, maintaining or repairing the channel facilities, apparatus and associated wiring and upon termination of the service, for the purpose of removing such channel facilities, apparatus and associated wiring.

B. Obligations of the Customer

1. The customer shall be responsible for:

- a. Damages to facilities of the Company caused by the negligence or willful act of the customer or users.
- b. Reimbursing the Company for any loss through theft of its equipment or apparatus on the customer's or user's premises.
- c. Provision of the power required to operate the Company facilities installed on the premises of the customer or users.
- d. Provision, installation and maintenance of sealed conduit with explosive-proof fittings between equipment furnished by the Company in explosive atmospheres and points outside the hazardous area where connection may be made with regular facilities of the Company , and may be required to install and maintain the Company equipment within the hazardous area if, in the opinion of the Company , injury or damage to Company employees or property might result from installation or maintenance by the Company.
- e. Obtaining permission for Company agents or employees to enter the premises of the customer or user at any reasonable hour for the purpose of installing, inspecting, repairing or upon termination of the service, removing the facilities of the Company.
- f. Bonding and/or grounding a mobile premises or any mobile structure in which service is to be provided or used (e.g., boats, RVs and mobile homes), as well as any equipment and associated wiring on the customer's side of the demarcation point at any premises, whether fixed or mobile.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)**B. Obligations of the Customer (cont'd)**

2. Assignment and Transfer of Facilities

The customer may not assign or transfer the use of services provided under this guidebook except, where there is no interruption of use or relocation of the services, such assignment or transfer may be made to:

- a. Another customer, whether an individual, partnership, association or corporation, provided the assignee or transferee assumes all outstanding indebtedness for such services, and the unexpired portion of the minimum period and the termination liability applicable to such services, if any; or
- b. A court appointed receiver, trustee or other person acting pursuant to law in bankruptcy, receivership, reorganization, insolvency, liquidation or other similar proceedings, provided the assignee or transferee assumes the unexpired portion of the minimum period and the termination liability applicable to such services, if any.

In all cases of assignment or transfer, the written acknowledgment of the Company is required prior to such assignment or transfer. All regulations and conditions contained in this guidebook shall apply to such assignee or transferee.

The assignment or transfer of services does not relieve or discharge the assignor or transferor from remaining jointly or severally liable with the assignee or transferee for any obligations existing at the time of the assignment or transfer.

C. Use

1. General

Digital Link Service may be used for the transmission of communications to or from any station on the service.

2. Shared Use

- a. A user must have a station on the service and the station must be located on the premises of the user and connected to the service by means of a separate local distribution channel.
- b. An interexchange carrier who is a customer for Digital Link Service may not enter into a shared use arrangement between itself and others.^{/1/}
- c. The Company shall not be responsible for the manner in which the use of service will be allocated. Orders which involve the start, rearrangement, release, or discontinuance of service will be accepted by the Company only from the customer.
- d. The charges for Digital Link Service shall be determined as provided in this guidebook and all charges for the service will be billed to the customer.

/1/ Customers wishing to use MegaLink in the provisioning of a shared use arrangement should refer to the *Special Access Section* of the Access Service Tariff.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)

C. Use (cont'd)

3. Unlawful Use

The service furnished under this guidebook shall not be used for any purpose or in any manner directly or indirectly in violation of the law or in aid of any unlawful act or undertaking.

D. Payment Arrangements and Credit Allowances

1. Reserved for future use

2. Cancellation for Cause

a. The Company, ten days after written notice to the customer prior to the stated date of disconnection, may immediately discontinue the furnishing of Digital Link Service without incurring liability upon:

- nonpayment of any sum due the Company, or
- a violation of any condition governing the furnishing of service.

3. Minimum and Fractional Rates and Charges

a. The minimum period for which service is furnished and for which charges are applicable is one month, unless otherwise specified.

b. In applying a rate involving a fraction of a cent, the fraction is carried through the entire computation of the charge for the service. When the charge so computed includes a fraction of a cent, a fraction of less than one-half cent is disregarded and a fraction of one-half cent or more is treated as one cent.

c. If the period of use exceeds the minimum period, the charges for any fractional part of a month following the minimum period will be a proportionate part of the monthly charges based on the actual number of days the facilities are furnished. For the purpose of administering this regulation with respect to the determination of charges for a fractional part of a month, every month is considered to have thirty days.

The applicable charges for a Digital Link Service, or any component thereof, including additions to an existing service, shall commence on the day after service is furnished and will continue to accrue through and include the day on which such service is discontinued.

When an existing Digital Link Service, or any component thereof, is changed or rearranged at the request of the customer without the addition of equipment, access lines or channels, any revision in charges necessitated thereby shall commence on the same day that the change or rearrangement is completed.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)

D. Payment Arrangements and Credit Allowances (cont'd)

4. Cancellation of Application for Service
 - a. Where the applicant cancels an application for service prior to the start of installation, no charge applies.
 - b. Where installation of facilities has been started prior to the cancellation, the charge specified in 1. or 2. following (whichever is lower) applies.
 1. A charge equal to the estimated costs incurred in such installation, less estimated net salvage.
 2. The charge for the minimum period of the service ordered by the customer as provided in this guidebook, plus the full amount of any termination charges applicable.
 - c. Installation of facilities for a customer is considered to have started when the Company incurs any expense in connection therewith or in preparation therefore which would not otherwise have been incurred provided:
 1. The customer has advised the Company to proceed with the installation, or
 2. The Company has advised the customer that, per his order, it is commencing the installation.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)

D. Payment Arrangements and Credit Allowances (cont'd)

5. Suspension of Service

Upon request of the customer, service will be suspended without cancellation at any time after the minimum billing period, subject to a. and b. following:

- a. Service will be suspended for a period of not less than two weeks.
- b. Billing shall continue at the full rate.

6. Allowance for Interruptions

In the event a customer's service is interrupted other than by the negligence or willful act of the customer, and it remains out of order for eight normal working hours or longer after access to the premises is made available and after being reported to be out of order, appropriate adjustments or refunds shall be made to the customer. The amount of adjustment or refund shall be determined on the basis of the known period of interruption, generally beginning from the time the service interruption is first reported. The refund to the customer shall be the pro rata part of the month's flat rate charges for the period of days and that portion of the service facilities rendered useless or inoperative. The refund may be accomplished by a credit on a subsequent bill for telephone service.

7. Special Charges, Fees and Taxes

There shall be added to the customer's bill for service, an additional charge equal to the pro rata share of any occupation, franchise, business, license, excise, privilege or other similar charge or tax, now or hereafter imposed upon the gross receipts or revenue of the Company by any municipal taxing body or municipal authority whether by statute, ordinance, law or otherwise, and whether presently due or to hereafter become due.

The charge applicable to each customer will appear separately on the customer's regular monthly bill and shall be determined on a basis equal to the tax levied by each municipal taxing body or municipal authority. The amount of charge to the customer shall be computed by dividing the tax expressed as a percentage by 100% minus the tax expressed as a percentage and multiplying the decimal thus obtained by the customer's service charges to which such tax applies as reflected by the following formula:

$$\frac{\text{Tax}\%}{100\% - \text{Tax}\%} \times \text{Service Charges Subject to Tax} = \text{Amount of Charge to Customer}$$

The amount of charge to the customer will be rounded to the nearest cent.

8. Special Construction

- a. Rates and charges for special construction will be based on estimated costs incurred by the Company and may include (1) one-time service charges, (2) recurring type charges, (3) termination liabilities, (4) or combination thereof. Special construction rates and charges are in addition to rates and charges for Digital Link Service in this guidebook.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)**D. Payment Arrangements and Credit Allowances (cont'd)**

8. Special Construction (cont'd)

b. Special construction is that construction undertaken:

1. Where facilities are not presently available, and there is no other requirement for the facilities so constructed.
2. Where facilities are of a type other than that which the Company would normally use in the furnishing of its services.
3. Where facilities are provided over a route other than that which the Company would normally use in the furnishing of its services.
4. Where facilities are provided in a quantity greater than that which the Company would normally construct to serve the customer needs.
5. Where facilities are provided on a temporary basis until permanent facilities are available.
6. Where facilities requested involve abnormal costs.
7. Where the service requested is provided on an expedited basis.

c. No charge applies where special construction has been started prior to cancellation and it is determined by the Company there is another requirement for the facilities.

d. No charge applies where the applicant cancels an application for service prior to the start of special construction of facilities.

e. Where special construction has been started prior to cancellation, and there is no other requirement for the specially constructed facilities, a charge equal to the costs incurred in the special construction, less net salvage, applies; except that where one or more, but not all, of the services involved in the special construction are canceled, a charge equal to the cost, less net salvage, incurred for the discontinued services applies instead. Net salvage is determined based on the value of reusable material, less cost of removal. In determining the charge, each canceled service is treated as discontinued as of the date on which it was to have been placed in service.

Special construction of facilities for a customer is considered to have started when the Company incurs any expense which would not otherwise have been incurred; provided, (1) the customer has advised the Company to proceed with the installation or, (2) the Company has advised the customer that per his order it is commencing the installation.

f. The Company will provide one primary demarcation point for services provided through Company network facilities at no cost to the subscriber. Any secondary or additional demarcation point(s) requested by the customer will be provided as specified in Part 2, Section 5 (*Construction Charges*). The costs of providing these secondary or additional demarcation points include all labor and materials including cabling. Additions or reinforcements of existing facilities to secondary demarcation points will only be provided upon customer request and billed as specified in Part 2, Section 5 (*Construction Charges*).

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)

D. Payment Arrangements and Credit Allowances (cont'd)

9. Nonrecurring Charges Do Not Apply

a. Nonrecurring charges do not apply as follows:

- Service reestablished, within the same exchange, after the destruction or partial destruction of the customer's premises by means beyond the control of the customer whether at the same or another location. However, if service is established at a new location and the customer later moves back to the old location, Nonrecurring Charges are applied in connection with the reestablishment of service at the old location.

b. Change in Service Arrangement

If a modification of use causes a service to be re-designated from Exchange status to Access status, such a change is allowed without incurring Termination Charges given the following conditions are met:

- There must be no change in service locations.
- The new Term Pricing Plan (TPP) must be equal to or longer than the remaining time in the existing TPP.

Upgrades are permitted subject to underlying product guidebooks.

Nonrecurring charges associated with the service under the new jurisdiction may apply.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)

E. Definitions

Accessories

Devices which are mechanically attached to, or used with, the facilities furnished by the Company and which are independent of, and not electrically, acoustically, or inductively connected to, the conductors in the communications path of Company facilities.

Bit

The smallest unit of information in the binary system of notation.

Carrier or Common Carrier

See interexchange carrier.

Category I

Private line services identified in Section 68.2(a)(iii) of the FCC's Rules and Regulations.

Category III

Private line services identified in Section 68.2(a)(iii) of the FCC's Rules and Regulations.

Central Office

A local Company switching system where telephone exchange service customer station loops are terminated for purposes of interconnection to each other and to trunks.

Channel

A communications path between two or more points of termination.

Channelize

The process of multiplexing-demultiplexing wider bandwidth or higher speed channels into narrower bandwidth or lower speed channels.

Clear Channel Capability

A feature that provides customers with an increase in usable bandwidth by providing an unconstrained data stream across the network.

Communications System

Channels and other facilities which are capable, when not connected to the telecommunications network, of two-way communications between customer-provided terminal equipment.

Composite Data Service

The combined use of terminal and customer-provided data switching equipment with the use of Company communications services by a composite data service vendor to perform data switching for others.

Composite Data Service Vendor

A customer that has been certificated by the proper state or municipal regulatory body, and/or the FCC pursuant to section 214 of the Communications Act of 1934, as amended to acquire and operate facilities to perform data switching for others. A customer shall be classified as a composite data service vendor only with respect to use of those exchange services which are used for the provision of composite data.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)**E. Definitions (cont'd)**Customer

Any individual, partnership, association, joint-stock company, trust, corporation, governmental entity or any other entity which orders service and is responsible for the payment of charges and compliance with Company regulations. A customer for Digital Link Service must have a communication requirement of his own for its use, except where:

- the customer is a composite data service vendor; or
- the service is provided for the transmission of communications relating directly to the business of a subsidiary corporation over which the customer exercises control through ownership of more than 50% of the voting stock; or
- the customer for Digital Link Service orders the addition of service points to meet the communications requirements of a user of such service and such additional service points are required to extend the transmission of communications to or from the Digital Link Service for which the customer has a communication requirement of his own.

Data Switching

As used in connection with composite data service denotes the switching of data (non-voice) messages by the interchange, controlling and routing of data messages between two or more stations, via communications facilities, wherein the information content of the message remains unaltered.

Demarcation Point

The point of demarcation and/or interconnection between Company communications facilities and terminal equipment, protective apparatus or wiring at a subscriber's premises. Company-installed facilities at, or constituting, the demarcation point shall consist of wire or a jack conforming to Subpart F of Part 68 of the Commission's rules. The Company will provide one primary demarcation point for services provided through Company network facilities at no cost to the subscriber. Any secondary or additional demarcation point(s) requested by the customer will be provided as specified in Part 2, Section 5 (*Construction Charges*). The costs of providing these secondary or additional demarcation points include all labor and materials including cabling. Additions or reinforcements of existing facilities to secondary demarcation points will only be provided upon customer request and billed as specified in Part 2, Section 5 (*Construction Charges*). "Premises" as used herein generally means a dwelling unit, other building or a legal unit of real property such as a lot on which a dwelling unit is located, as determined by the Company's reasonable and nondiscriminatory standard operating practices. The "minimum point of entry" (MPOE) as used herein shall be either (1) the closest practicable point to where the wiring crosses a property line or (2) the closest practicable point to where the wiring enters a multiunit building or buildings. The Company's reasonable and nondiscriminatory standard operating practices shall determine which of (1) or (2) shall apply. The Company is not precluded from establishing reasonable classifications of multiunit premises for purposes of determining which of (1) or (2) above shall apply. Multiunit premises include, but are not limited to, residential, commercial, shopping center and campus situations.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)**E. Definitions (cont'd)**Demarcation Point (cont'd)

Single Unit Installations: For single unit installations existing as of June 9, 1994 and installations installed after that date the demarcation point shall be a point within twelve inches of the protector or, where there is no protector, within twelve inches of where the telephone wire enters the customer's premises.

Multiunit Installations:

1. In multiunit premises existing as of June 9, 1994, the demarcation point shall be determined in accordance with the Company's reasonable and nondiscriminatory standard operating practices. Provided, however, that where there are multiple demarcation points within the multiunit premises, a demarcation point for a customer shall not be further inside the customer's premises than a point twelve inches from where the wiring enters the customer's premises.
2. In multiunit premises in which wiring is installed after June 9, 1994, the multiunit premises owner shall determine the location of the demarcation point or points. The multiunit premises owner shall determine whether there shall be a single demarcation point location for all customers or separate such locations for each customer. Provided, however, that where there are multiple demarcation points within the multiunit premises, a demarcation point for a customer shall not be further inside the customer's premises than a point twelve inches from where the wiring enters the customer's premises.

At this time, the Company has elected not to establish a practice of placing the demarcation point at the MPOE for multiunit premises. However, at the customer's request, the Company will place the demarcation point at the MPOE in existing installations, and as appropriate, in new installations. The Company will relocate multiple demarcation points to a single demarcation point at an MPOE in a manner that minimizes any resultant charges or other adverse impact to either building owners or customers.

If conforming to the twelve inch limitation is unrealistic or technically impossible, the demarcation point will be the most practicable MPOE.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)**E. Definitions (cont'd)**Distance Learning

Instruction, learning, and training that is transmitted from one site to one or more sites by telecommunications services that are used predominantly for such instruction, learning, or training, including video, data, voice, and electronic information.

Duplex

An operation which permits customers or users to communicate in both directions simultaneously.

Educational Institution

Accredited primary or secondary schools owned or operated by state and local government entities or by private entities; institutions of higher education as defined by the Education Code, §61.003(13); the Central Education Agency, its successors and assigns; regional education service centers established and operated pursuant to the Education Code, §11.32 and §11.33; and the Texas Higher Education Coordinating Board; its successors and assigns.

Encoded Analog Content

An analog signal which has been multiplexed and coded within a digital signal.

Equivalent Analog Signal Power

The power of the analog signal at the output of a zero level decoder, obtained when a digital signal is the input to the decoder. A zero level decoder yields an analog level of OdBm at its output when the input is a digital milliwatt signal.

Exchange

A unit generally smaller than a local access and transport area (LATA), established by the Company for the administration of communications service in a specified area which usually embraces a city, town or village and its environs. It consists of one or more central offices together with the associated facilities used in furnishing communications service within that area. One or more designated exchanges comprise a given LATA.

High Capacity Service (DS1)

A special access service with a bandwidth of 1.544 mbps equivalent to Megalink III - Wideband Digital Service/1.544 Mbps.

Interactive Multimedia Communications

Real-time, two way, interactive voice, video, and data communications conducted over networks that link geographically dispersed locations. This definition includes interactive communications within or between buildings on the same campus.

Interexchange Carrier (IC) or Interexchange Common Carrier

Any individual, partnership, association, joint-stock company, trust, governmental entity or corporation engaged for hire in interstate or foreign communication by wire or radio, between two or more exchanges.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)**E. Definitions (cont'd)**Interoffice Channel Mileage

The component of a service between two Company serving wire centers, between a serving wire center and a Company-designated digital hub, between two digital hub locations or between a digital hub and an NRS hub.

IntraLATA Service

Digital Link Service where service point locations are all within the same LATA.

Isochronous

Transmission timing derived from the signal carrying the data (i.e., no timing or clock lead is provided at the customer interface).

Library

Public library or regional library system as defined by Government Code §441.122, or a library operated by an institution of higher education or a school district.

Local Access and Transport Area (LATA)

A geographic area established for the administration of telecommunications service. It encompasses designated local operating Company exchanges which are grouped to serve common social, economic and miscellaneous purposes.

Local Distribution Channel

A channel between a customer's premises and the Company serving wire center or a Company-designated digital or NRS hub which is also the customer's normal serving wire center.

Move

As used in connection with the application of move charges for Digital Link Service denotes a change in the physical location (whether on the same or different premises), when made at the request of the customer without discontinuance of service, or facilities and items of equipment provided by the Company.

Multiplexing

An arrangement that converts a higher bit rate signal to lower bit rate, or bandwidth, or from digital to voice grade channels.

Network Channel Terminating Equipment (NCTE)

Equipment located on customer premises for the purpose of providing certain transmission enhancements and network maintenance capabilities. For instance, NCTE corrects electrical distortion and static, tests for problems in transmission lines, performs signal amplification, and protects against hazardous power surges.

Network Interface

That point of connection at the customer's premises where premises services are connected to the telecommunications network. The network interface is a standard registration jack or its equivalent. (see *Demarcation Point*)

/1/

/1/ Material now appears on Sheet 16.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)

E. Definitions (cont'd)

Network Reconfiguration Service (NRS)^{/1/}

A central office-based service which permits customers to remotely reconfigure their dedicated networks without going through normal Company service order procedures.

/2/ (C)
|
/2/

Network Reconfiguration Service Hub (NRS Hub)^{/1/}

Designated Company serving wire center where NRS is provided. An NRS hub may be collocated with a Company-designated digital hub, but not all digital hubs are designated as NRS hubs. NRS hub locations are specified in the National Exchange Carrier Association Inc. Wire Center Information Tariff (NECA Tariff).

(C)

Other Participating Carrier-Provided Communications Systems

The facilities provided by an other participating carrier to its customer which are capable, when not connected to Digital Link Service, of communications between customer-provided terminal equipment.

Patron

As used in connection with composite data service, denotes a subscriber to the data switching services of a composite data service vendor.

Premises

All portions of the same building occupied by the same customer, provided that:

- All portions are not separated from each other by intervening offices, rooms or suites not occupied by the customer.
- The portions on different floors are contiguous and that the portion on the upper floor is directly above the portion occupied on the lower floor.

All of the buildings occupied by the same customer, provided that:

- All of the buildings are located on the same continuous property, which is owned and/or leased by the same customer, and are not separated by a public highway.

Note: A public highway is considered to mean a vehicular thoroughfare which is governmentally owned.

Px64 Standards Compliance

Consultative Committee on International Telephony and Telegraphy (CCITT) established compressed digital video standards compliance that describes the video displays and compression requirements for digital services transmission.

Registered Equipment

Customer premises equipment (CPE) which complies with and has been approved within the Registration Provisions of Part 68 of the FCC's Rules and Regulations.

/3/

/1/ Effective October 30, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers. See Part 20, Section 15. (N)
(N)
/2/ Material formerly appeared on Sheet 15.
/3/ Material now appears on Sheet 17.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)

E. Definitions (cont'd)

Secondary Channel Capability

An enhancement that provides additional capacity on MegaLink I Digital Services, for use as a lower speed (secondary) channel through which the customer has the capability of performing functions such as on-line diagnostics, data monitoring, traffic measurements and network configuration management.

/1/
|
/1/

Serving Wire Center

The end office from which the customer designated premises would normally obtain dial tone from the Company for Local Exchange Service purposes.

Station

When used in connection with Digital Link Service denotes a point on a customer's or user's premises or a Company-designated hub at which the Digital Link Service is terminated.

SWBT

The Southwestern Bell Telephone Company. Also the Company.

Telecommunications Network

All facilities of the Company that are used to provide its service.

Uniform Service Order Code (USOC)

A three or five character alphabetic, numeric, or an alphanumeric code that identifies a specific item of service or equipment. Uniform Service Order Codes are used in the Company billing system to generate recurring rates and nonrecurring charges.

User

A person, firm, or corporation who is designated by the customer as a "user" of a Digital Link Service furnished to the customer and who may share such service with the customer in accordance with the provisions set forth in paragraph C.2. A user must be specifically named in the customer's application for service.

V and H Coordinates Method

A method for computing airline miles between two points by using an established formula which is based on the vertical (V) and horizontal (H) coordinates of the two points.

Wire Center

A building in which one or more central offices, used for the provision of telephone exchange services, are located.

/1/ Material formerly appeared on Sheet 16.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)

F. Connections

1. General

Terminal equipment, derivation equipment and communications systems may be connected to Digital Link Service provided by the Company when such connection is made under the provisions of paragraph F.2.

All connections as provided for in paragraph F.2 shall be made through equipment furnished by the customer or user. The responsibility of the Company shall be limited to the furnishing of service to that point on the customer's or user's premises where provision is made for the connection of such equipment. The customer or user is responsible for testing its equipment or facilities to insure that when they are connected with Digital Link Service such equipment or facilities are operating properly.

The customer shall be responsible for payment of a Maintenance of Service Charge, for each repair visit by a Company employee to the premises of the customer or user where the service difficulty or trouble report results from the use of equipment or facilities provided by the customer or user.

Maintenance of Service Charge, each visit	\$30.00
---	---------

The responsibilities of the customer and the responsibilities of the Company are further set forth in F.4 and F.5, respectively.

2. Connection of Terminal Equipment, Derivation Equipment and Communications Systems

- a. The customer or user, by use of its own derivation equipment, may create digital bit streams from a Digital Link Service and such equipment may be connected at the customer's or user's premises for the transmission of such bit streams to facilities furnished for Private Line Service, Digital Link Service, Local or Long Distance Message Telecommunications Service and Wide Area Telecommunications Service (WATS) furnished under the rates and regulations of Company Guidebooks.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)**F. Connections (cont'd)**

2. Connection of Terminal Equipment, Derivation Equipment and Communications Systems (cont'd)

b. Connection to Digital Link Service

1. Connection of terminal equipment and communications systems which do not have the capability to transmit signals with encoded analog content, may be connected to the telecommunications network or to category I or category III private line services via Digital Link Service. All connections to a Digital Link Service are made at the Company-provided network interface and must be made per the following regulations.
2. Terminal equipment may be connected to Digital Link Service through, or in combination with, channel derivation equipment. If the connection provides the capability to transmit signals with encoded analog content via the Digital Link Service to the telecommunications network or to a category I or category III private line service, the terminal equipment must be connected in accordance with the FCC Registration Program. (See Registration Program)

In addition, when voice-band data terminal equipment is used with the channel derivation equipment the voice-band data terminal equipment must comply with Part 68 of the FCC's Rules and Regulations to ensure continued billing integrity.

3. Registration Program - Part 68 of the FCC's Rules and Regulations (Registration Program) includes certain connections to Digital Link Service.
- c. Unless a specific waiver has been granted by the FCC, or except as otherwise provided in paragraph F.2.d following, all connections of registered equipment to services furnished by the Company will be made through a point of demarcation. In most cases, this will be through a Company-provided standard jack. In the case of a registered communications system utilizing complex wiring, a method of connection, jacks, terminal strips, etc., will be provided by the Company.
 - d. The requirement for the use of standard jacks as described in paragraph F.2.c, preceding, is waived for registered equipment which is located in hazardous or inaccessible locations.

3. Accessories

Accessories provided by customers or users may be used in conjunction with Digital Link Service provided that such accessories comply with the provisions of paragraph F.4.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)**F. Connections (cont'd)**

4. Responsibility of the Customer
 - a. Where Digital Link Service is available under this guidebook for use in connection with terminal equipment or communications systems provided by a customer or user, the operating characteristics of such equipment or systems shall be such as not to interfere with any of the services offered by the Company. Such use is subject to the further provisions that the equipment of a customer or user does not endanger the safety of Company employees or the public; or damage, require a change in or the alteration of the equipment or other facilities of the Company; interfere with the proper functioning of such equipment or facilities; impair the operation of Company facilities or otherwise injure the public in its use of Company services. Upon notice from the Company that the equipment provided by a customer or user is causing or is likely to cause such hazard or interference the customer shall take such steps as shall be necessary to remove or prevent such hazard or interference.
 - b. Where a customer elects to connect a communications system to Digital Link Service the customer shall be responsible for:
 - Compatibility of the connected communications system to Digital Link Service. This includes the replacing of channel service units due to technological changes in the network.
 - Testing, sectionalization and clearance of trouble conditions or service difficulties on any communications system which is connected to Digital Link Service.
 - c. The consent of the customer must be obtained by the user prior to the connection of user provided terminal equipment or communications systems to a Digital Link Service provided to the customer.
5. Responsibility of the Company
 - a. The Company shall not be responsible for installation, operation or maintenance of any terminal equipment or communications systems provided by a customer or user. Digital Link Service is not represented as adapted to the use of such equipment or system and where such equipment or system is connected to Company facilities the responsibility of the Company shall be limited to the furnishing of facilities suitable for Digital Link Service and to the maintenance and operation of such facilities in a manner proper for such digital service. Subject to this responsibility the Company shall not be responsible for (i) the through transmission of signals generated by such equipment or system, or for the quality of, or defects in such transmission or (ii) the reception of signals by such equipment or systems or (iii) damage to terminal equipment or communications systems provided by a customer or user due to testing.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)**F. Connections (cont'd)**

5. Responsibility of the Company (cont'd)

- b. The Company shall not be responsible to the customer or user, if changes in any of the facilities, operations or procedures of the Company used in the provision of Digital Link Service render any facilities provided by a customer or user obsolete or require modification or alteration of such equipment or system or otherwise effect its use or performance.
- c. The Company undertakes to maintain and repair during normal working hours the facilities which it furnishes hereunder. The customer or user may not rearrange, disconnect, remove or attempt to repair any equipment installed by the Company without prior written consent of the Company.

6. Violation of Regulations

Where any terminal equipment or communications system provided by a customer or user is used with services furnished by the Company and any of the provisions in paragraph F. *Connections* are violated the Company will take such immediate action as necessary for the protection of its facilities, and will promptly notify the customer of the violation. The customer shall take such steps as are necessary to discontinue such use of the equipment or system or correct the violation and shall confirm in writing to the Company within ten days, following the receipt of written notice from the Company, that such use has ceased or that the violation has been corrected. Failure to discontinue such use or to correct the violation and to give the required written confirmation to the Company within the time stated above shall result in suspension of the customer's service until such time as there is compliance with the provisions of this guidebook.

7. Connection of Network Channel Terminating Equipment

Effective January 2, 1986, in accordance with the FCC's Memorandum Opinion and Order on CC Docket 81-216, (FCC 85-564), Part 68 of the FCC's Rules and Regulations (Registration Program), was amended to provide for inclusion of NCTE for direct connection to subrate and high capacity digital services. The following dates and regulations were established:

- a. *Grandfathered equipment* - Terminal equipment, including its premises wiring and protective apparatus (if any) and multiline terminating systems that were directly connected to subrate digital services on January 2, 1986, may remain connected and be reconnected to such digital services for life without registration, unless subsequently modified.
- b. *Interim installations* - An interim program established by the FCC and the Company allowed for connection of terminal equipment, including premises wiring and protective apparatus (if any) to be installed (including additions to existing systems) up to June 30, 1987, without registration of any terminal equipment involved, provided that this terminal equipment is of a type directly connected to subrate or 1.544 Mbps digital services as of January 2, 1986, or they appeared on the interim program summary for approved equipment. Any equipment connected under this interim program may require modification at the owners expense in response to Part 68 of the rules as adopted.
- c. *Registered only equipment* - Any terminal equipment connected to subrate digital services after June 30, 1987 must comply with the FCC's Registration Program. The equipment must also comply with the requirements of Technical Reference Publications 62411 and/or 62310.

REGULATIONS (FOR DIGITAL LINK SERVICES) (cont'd)

G. Reserved

(C)

(D)

(D)

H. Educational Percentage Discount Rates (E-Rates)

The percentage discount rates available pursuant to 47 Code of Federal Regulations part 54, subpart F to eligible schools, libraries, and consortia as defined by 47 Code of Federal Regulations part 54, subpart F shall apply to the guidebook rates contained herein. Schools, libraries, and consortia eligible for E-Rates pursuant to 47 Code of Federal Regulations part 54, subpart F shall comply with the provisions of 47 Code of Federal Regulations part 54, subpart F in order to receive the intrastate E-Rates.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES)

The regulations described below apply to Analog Private Line services such as Special Signaling Services – Series 100, Subvoice Grade Service – Series 200, Voice Grade Services – Series 300 and 400, Special Bridging Service (Split Bridging Arrangement), Signaling, and Network Reconfiguration Service (NRS)^{/1/} (associated with Analog Private Line Services) described in Part 20, Section 15.

(C)

A. Undertaking of the Company

1. Scope

- a. This guidebook section contains the regulations and definitions governing the furnishing of private line services by the Company. The regulations of other local exchange companies (LECs) apply to the portion of private line services which are furnished at "other line" charges.
- b. Private line service is the furnishing of Company facilities for communications between specified locations, within the Local Access and Transport Areas (LATAs) all within the state of Texas, 24 hours daily, seven days per week. Facilities may be those of the Company only, or those of the Company and other LECs.
- c. The Company does not undertake to transmit messages, but offers the use of its facilities where available to customers for such purposes.
- d. Private line service is the provision of Company facilities for communication between specified locations of customers or authorized users.

2. Limitations

- a. In case a shortage of facilities exists at any time, either for temporary or protracted periods, the establishment of long distance telecommunications service and/or regular local exchange telephone services shall take precedence over all other services and uses.
- b. Service under this guidebook is subject to the availability of facilities.
- c. The use and restoration of service shall be in accordance with Part 64, Subpart D, Appendix A of the Federal Communications Commission's (FCC) Regulations and those found in *Telecommunications Service Priority System* described in Part 8, Section 5, which specify the priority system for such activities.
- d. Subject to compliance with the above-mentioned rules, where a shortage of channels or equipment exists at any time either for temporary or protracted periods, the establishment of long distance message telecommunications service (LDMTS) shall take precedence over all other services.

Expanded interconnection is offered under protest. Its availability is subject in all respects to the Stipulation and Agreement entered into in Docket No. 13990.

/1/ Effective October 30, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers. See Part 20, Section 15.

(N)
(N)

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

A. Undertaking of the Company (cont'd)

3. Liability

- a. In view of the fact that the customer has exclusive control of his communications over the facilities furnished him by the Company, and of the other uses for which facilities may be furnished him by the Company, and because of unavoidable errors incident to the services and to the use of such facilities of the Company, the services and facilities furnished, by the Company, are subject to the terms, conditions, and limitations herein specified.
- b. The Company's failure to provide or maintain facilities under this guidebook shall be excused by labor difficulties, governmental orders, civil commotions, acts of God and other circumstances beyond the Company's reasonable control, subject to the interruption allowance provisions of this guidebook.
- c. The Company's liability, if any, for its gross negligence or willful misconduct is not limited by this guidebook. With respect to any other claim or suit, by a customer or any others, for damages arising out of mistakes, omissions, interruptions, delays or errors, or defects in transmission occurring in the course of furnishing service hereunder, the Company's liability, if any, shall not exceed an amount equivalent to the proportionate charge to the customer for the period of service during which such mistake, omission, interruption, delay, error, or defect in transmission or service occurs and continues. This liability shall be in addition to any amounts that may otherwise be due to the customer under this guidebook and/or Part 2, Section 2, paragraph 1.8 (*Service Guarantee*) as an allowance for interruptions. However, any such mistakes, omissions, interruptions, delays, errors, or defects in transmission or service which are caused or contributed to by the negligence or willful act of the customer or authorized user, or which arise from the use of customer-provided facilities or equipment shall not result in the imposition of any liability whatsoever upon the Company. Except as specifically set forth in Part 2, Section 2, paragraph 1.8 (*Service Guarantee*), no other liability shall in any case attach to the Company in consideration of such interruptions. (C)
- d. The customer or authorized user indemnifies and saves the Company harmless against (1) claims for libel, slander or the infringement of copyright arising from the material transmitted over the facilities; (2) claims for the infringement of patents arising from, combining with, or used in connection with, facilities of Company apparatus and systems of the customer or authorized user; and (3) against all other claims arising out of any act or omission of the customer or authorized user in connection with the facilities provided by the Company. (C)
- e. The Company does not guarantee nor make any warranty with respect to equipment provided by it for use in an explosive atmosphere. The customer or authorized user indemnifies and holds the Company harmless from any and all loss claims, demands, suits, or other actions, or any liability whatsoever, whether suffered, made, instituted or asserted by the customer or authorized user, or by any other party or persons for any personal injury to or death of any person or persons, and for any loss, damage or destruction of any property, whether owned by the customer, authorized user, or others, caused or claimed to have been caused directly or indirectly by the installation, operation, failure to operate, maintenance, removal, presence, condition, location or use of said equipment so provided. (C)

The Company may require each customer to sign an agreement for the furnishing of such equipment as a condition precedent to the furnishing of such equipment.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

A. Undertaking of the Company (cont'd)

3. Liability (cont'd)

- f. When the lines of other LECs are used in establishing connection to points not reached by the Company's lines, the Company is not liable for any act or omission of the other LEC.
- g. The Company is not liable for any defacement of or damage to the premises of a customer or authorized user, resulting from the furnishing of channel facilities or the attachment of the apparatus and associated wiring furnished by the Company on such premises or by the installation or removal thereof, when such defacement or damage is not the result of negligence of the agents or employees of the Company. (C)
- h. The Company shall in no way be liable for any harm or any damages arising in connection with any failure by the customer to properly bond or ground a mobile premises or any mobile structure in which service is to be provided (e.g., boats, RVs and mobile homes), as well as equipment and associated wiring located on the customer's side of the demarcation point at any premises, whether fixed or mobile. (C)

4. Provision of Facilities

- a. The Company or the Company and other LECs with which it jointly furnishes service, will provide, maintain and repair all facilities and equipment necessary for private line service, except for those facilities on the customer's side of the demarcation point, and except that the customer or authorized user may provide his own terminal equipment, communications systems or premises wiring for use with such service as specified in paragraph F., following. (C)
 - 1. When a private line service is used for teletypewriter transmission, the teletypewriter equipment will be provided by the customer or authorized user. (C)
 - 2. When a private line service is used for data transmission which requires terminal equipment (data sets), such data sets will be provided by the customer or authorized user, except that, the Company shall furnish all equipment located on Company premises. Where the customer or authorized user provides his own data sets on a private line, it shall be the responsibility of the customer or authorized user to insure the continuing compatibility of such data sets with the facilities, including data sets, furnished by the Company. (C)
 - 3. The Company has the service responsibility up to the demarcation point on the customer's premises at which the interface appears for the customer-provided equipment. Terms and conditions for the location of demarcation points are in 'Rules and Regulations Applying to All Customers' Contracts' described in Part 2, Section 2.
 - 4. Private line service is offered where existing facilities and operating conditions permit.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

A. Undertaking of the Company (cont'd)

4. Provision of Facilities (cont'd)

- b. The charges specified in this guidebook do not contemplate installation, maintenance, or repair work being performed by Company employees involved at a time when overtime wages apply as a result of customer or authorized user requests, nor do they contemplate work once begun being interrupted by the customer or authorized user. (C)
(C)

If the customer requests that labor be performed at hours of the day or days of the week other than normal work hours or days, or on holidays, or interrupts work once begun, an additional charge, based on the additional costs involved, applies. Such charges do not apply if sufficient advance notice is given so that employees' work schedules can be changed. The additional charge does not apply to overtime or premium time worked at the Company's convenience.

In situations where the customer requests that "standby" Company personnel be provided for installation or maintenance irrespective of when such "standby" workmen are provided, the additional estimated cost of providing such "standby" personnel will be billed to the customer.

- c. Services used exclusively with customer terminal equipment will be provided for intercommunication between station locations in different buildings on the same premises where facilities exist and conditions permit.^{/1/}
- d. Facilities furnished by the Company on the premises of a customer or authorized user, are the property of the Company, whose agents and employees shall have the right to enter said premises at any reasonable hour for the purpose of installing, inspecting or repairing the lines, or upon termination of the service, for the purpose of removing such lines. (C)
(C)
- e. When serving office boundary realignments are necessary at the discretion of the Company, those private line services affected by the change will be reconfigured, and this may result in increases or decreases in charges. Any change in the charges billed to a private line customer will become effective when the serving office area transfer is made.
- f. The placement of the demarcation point shall be located in a manner consistent with federal and state regulatory requirements. This location shall be at each customer's premises, unless specified otherwise by the customer or building/landowner, and agreed to by the Company.

^{/1/} Obsolete -- see Part 15, Section 2.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**A. Undertaking of the Company (cont'd)**

4. Provision of Facilities (cont'd)

- g. In addition to the obsolescence restrictions found in Part 15, Section 2, the following is applicable to on-premises private line services:

1. Existing Single Unit Installations - If the existing cable is absent of network channel terminating equipment (NCTE), the demarcation point shall be a point established within twelve inches of the protector, or absent a protector, within twelve inches of the entry point to the customer's premises. The single unit building owner has the right to access, rearrange, attach to or remove the cable up to the newly defined demarcation point.

If the cable has existing circuits with NCTE present, the demarcation points may remain at the existing locations and the customer may continue to add additional service where spare facilities are available. Or the building owner can establish a minimum point of entry (MPOE) and relocate the NCTE. Service charges would apply as found in Part 3, Section 1.

2. Existing Multiunit Installations - The demarcation point is determined per current Company practices. In the case of multiple demarcation points within a multiunit premises, the demarcation point for a customer shall not be further inside his or her unit than a point twelve inches from where the wiring enters his or her premises.
3. New Multiunit Installations - Where wiring is installed after June 9, 1994, the Company will negotiate with the building owner to locate a demarcation point twelve inches within each customer premises unit.

However, for 2. and 3. above, the multiunit property owner has the option of having a single demarcation point for all customers or separate demarcation points for each customer. The owner can determine where the demarcation point(s) shall be located provided that such demarcation points for each customer premises unit shall not be further inside the customer's premises than twelve inches from where the wiring enters the customer's unit. If a single demarcation point is established, all current on-premises private line services beyond that newly established demarcation point will be discontinued.

- h. Any changes in charges for private line services that are affected by the relocation of the demarcation point will be effective on the scheduled date of the relocation of the demarcation point, regardless of the actual date of the relocation of the demarcation point.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**A. Undertaking of the Company (cont'd)**

5. Protective Equipment

- a. When a hazardous electrical environment is present at customer or authorized user premises, protective equipment is required to protect all facilities when the estimated rise in ground potential is sufficient to cause damage to Company facilities or to endanger the safety of its employees or customers. The customer may provide the protective equipment subject to Company specifications. The protective equipment may also be provided in accordance with A.7. (C)
- b. Neutralizing transformers, isolating transformers, drainage coils and other special protective equipment for use in providing service to customer or authorized user premises where there are high ground potentials, even though not required by A.5.a, above, may be provided by the customer or in accordance with A.7. (C)

6. Application for Private Line Service

- a. Any applicant for private line service may be required to sign an application requesting the Company to furnish the service in accordance with rates, charges, regulations as specified in this guidebook.
- b. The Company reserves the right to refuse service to any applicant who is found to be indebted to the Company for private line service previously furnished until satisfactory arrangements have been made for the payment of such indebtedness.

The Company may also refuse to furnish service to any applicant desiring to establish service for former customers or previous customers of the Company who are indebted for private line service until satisfactory arrangements have been made for the payment of such indebtedness.

- c. If private line service is established and it is subsequently determined that either condition in A.6.b, preceding, exists, the Company may suspend or disconnect such service on five days written notice until satisfactory arrangements have been made for the payment of the prior indebtedness.

7. Special Equipment and Arrangements

When the customer or authorized user requests a service arrangement which requires the installation of special equipment or modification of standard equipment, and for which provision is not otherwise made in this guidebook, it can be furnished by the Company at additional rates and charges. (C)

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**B. Use**

A private line service may be used for one or more of the purposes specified in B.1, following. When a private line service is arranged for use by authorized users, the users shall be permitted to use such service in the same manner as the customer as specified in B.1, following. (C)

1. Authorized Use

a. Authorized users may use private line services for one or more of the following:

1. For the transmissions of communications to or from the customer and relating directly to the customer's business.
2. For the transmission (to all stations simultaneously) of communications which relate directly to matters of common interest to the customer and the authorized users when those connected to the service are all in the same general line of business. (C)
3. For the transmission of communications relating directly to the business of a subsidiary corporation over which the customer or authorized user exercises control through the ownership of more than 50% of the voting stock. (C)
4. For the transmission of communications to or from any stations on a service furnished to a department or agency of the United States Government when the head of the department or agency, or his duly authorized representative, notifies the Company in writing that the use is intended only for official United States government business.
5. Where the customer is an organized stock or commodity exchange for the transmission of communications to or from an exchange member located on the floor of such exchange and relating directly to the business of the member.
6. Where the use of the service relates to coordination or exchange of electrical pooled power for the transmission of communications between any two or more stations of such service or similar services furnished to others who are parties to the coordinating or exchange arrangement.
7. For the transmission of communications to, from, within and between air carriers, where the customer is an aeronautical communications company licensed under the Aviation Services rules of the Federal Communications Commission (FCC) to operate stations in the aeronautical mobile and fixed services.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

B. Use (cont'd)

(D)

(D)

- 2. An arrangement between the customer and authorized users to share the cost of a private line service does not apply to a Composite Data Service Vendor's premises where one type of service may be provided for the exclusive use of the Composite Data Service Vendor's management or employees and another type of service may be provided for the use of the patrons of the Composite Data Service Vendor. (C)

3. Unlawful Purposes

The service is furnished subject to the condition that it will not be used for any unlawful purpose. Service will be discontinued forthwith if any law enforcement agency, acting within its apparent jurisdiction, advises in writing that such service or channels are being used in violation of law. The Company will refuse to furnish service when it has reasonable grounds to believe that such service will be used in violation of the law.

Expanded interconnection is offered under protest. Its availability is subject in all respects to the Stipulation and Agreement entered into in Docket No. 13990.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**C. Obligations of the Customer**

1. Customer Responsibilities

In addition to other regulations, the customer shall be responsible for:

- establishing his identify in the course of any communication as often as may be necessary;
- establishing the identity of the person or persons with whom connection is made at the called station;
- damages to facilities of the Company caused by the negligence or willful act of the customer or authorized user, and not due to ordinary wear and tear or other causes beyond the control of the customer; (C)
- reimbursing the Company for any loss through theft of the equipment or apparatus on the customer's or authorized user's premises; (C)
- the provision of appropriate power including the outlet and power wiring when the Company equipment installed on the premises of a customer or authorized user requires power for its operation; (C)
- furnishing and maintaining poles and/or underground facilities on private property. The customer is also responsible for the provision of space, supporting structures and on premised conduit for Company equipment located on the premises of the customer or authorized user; (C)
(C)
- the provision, installation and maintenance of sealed conduit with explosive-proof fittings between equipment furnished by the Company in explosive atmospheres and points outside the hazardous area where connection may be made with regular facilities of the Company, and may be required to install and maintain Company equipment within the hazardous area if, in the opinion of the Company , injury or damage to Company employees or property might result from installation or maintenance by the Company;
- obtaining permission for Company agents or employees to enter the premises of any authorized user at any reasonable hour for the purpose of installing, inspecting, repairing or removing the facilities of the Company; and (C)
- making Company facilities available periodically for maintenance purposes at a time agreeable to both the Company and the customer or authorized user. No allowance will be made for the period during which the service is interrupted for such purposes. (C)
- bonding and/or grounding a mobile premises or any mobile structure in which service is to be provided or used (e.g., boats, RVs and mobile homes), as well as any equipment and associated wiring on the customer's side of the demarcation point at any premises, whether fixed or mobile.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**C. Obligations of the Customer (cont'd)**

2. Rearrangements and Repairs

A customer or authorized user may not rearrange, disconnect, remove or attempt to repair or permit others to rearrange, disconnect, remove or attempt to repair any apparatus or wiring installed by the Company except upon the written consent of the Company or except as otherwise authorized in the Company's guidebooks. (C)

3. Transfer of Service

Service furnished one customer may be assumed by a new customer upon due notice of cancellation or abandonment, provided there is no lapse in service. The new customer must assume all the obligations of the previous customer. Such transfers are subject to applicable nonrecurring charges as specified in this guidebook.

4. Intended Use

The purpose or purposes for which the private line service is to be used must be made known to the Company at time of application for service. In the event of a planned change in use of service the customer will notify the Company in writing prior to the change.

D. Payment Arrangements and Credit Allowances

1. Reserved for Future Use

2. Cancellation for Cause

Service may be discontinued for nonpayment of any sum due the Company, or upon illegal use of any service, or upon a violation of any of the conditions governing the furnishing of a service. The due date of the bill shall not be less than 16 days after issuance. If the bill is not paid by the due date, the Company may discontinue service after ten days written notice to the customer under 23.45(a) and 23.46(a) of the Commission's Substantive Rules.

3. Minimum and Fractional Rates and Charges

- a. The minimum service period is one month except for special construction which may necessitate a longer contract period, or as otherwise provided in this guidebook.
- b. If the period of use exceeds the minimum period, the charges for any fractional part of a month following the minimum period will be a proportionate part of the monthly charges based on the actual number of days the facilities are furnished. For the purpose of administering this regulation with respect to the determination of charges for a fractional part of a month, every month is considered to have thirty days.
- c. In applying a rate involving a fraction of a cent, the fraction is carried through the entire computation of the charge for the service. When the charge so computed includes a fraction of a cent, a fraction of less than one-half cent is disregarded and a fraction of one-half cent or more is treated as one cent.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**D. Payment Arrangements and Credit Allowances (cont'd)**

4. Special Construction

- a. Rates and charges for special construction will be provided as set forth in Section 14 of the Access Service Tariff. Special construction rates and charges are in addition to rates and charges for private line service in this guidebook.
- b. Special construction is that construction undertaken:
 1. where facilities are not presently available, there is no other requirement for the facilities so constructed, and the nonrecoverable investment associated with construction exceeds \$25,000.
 2. of a type other than that which the Company would normally use in the furnishing of its services.
 3. over a route other than that which the Company would normally use in the furnishing of its services.
 4. in quantity greater than that which the Company would normally construct to serve the customer needs.
 5. on a temporary basis until permanent facilities are available.
 6. involving abnormal costs.
 7. on an expedited basis.
- c. A request for charges for special construction as provided in D.4.b.2. and 3. above, will be subject to a special quotation charge for the direct administrative and engineering costs associated with the preparation of that particular quotation. The amount of such charges will be credited to the account of the customer when an order for that particular special construction is received within 90 days of the quotation. The customer will authorize, through a designated representative, the request for a quotation before the Company undertakes any work involved in developing such quotations.
- d. Where special construction has been started prior to cancellation, and there is no other requirement for the specially constructed facilities, a charge equal to the costs incurred in the special construction, less net salvage, applies; except that where one or more, but not all, of the services involved in the special construction are canceled, a charge equal to the cost, less net salvage, incurred for the discontinued services applies instead. Net salvage is determined based on the value of reusable material, less cost of removal. In determining the charge, each canceled service is treated as discontinued as of the date on which it was to have been placed in service.

Special construction of facilities for a customer is considered to have started when the Company incurs any expense which would not otherwise have been incurred; provided, (1) the customer has advised the Company to proceed with the installation, or (2) the Company has advised the customer that under his order it is commencing the installation.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**D. Payment Arrangements and Credit Allowances (cont'd)**

4. Special Construction (cont'd)

- e. The Company will provide one primary demarcation point for services provided through Company network facilities at no cost to the subscriber. Any secondary or additional demarcation point(s) requested by the customer will be provided as specified in Part 2, Section 5 (*Construction Charges*). The costs of providing these secondary or additional demarcation points include all labor and materials including cabling. Additions or reinforcements of existing facilities to secondary demarcation points will only be provided upon customer request and billed as specified in Part 2, Section 5 (*Construction Charges*).

5. Change in Service Arrangement

The normal service charge per channel applies when changing from one type of private line service to another type of private line service.

6. Suspension of Service

Upon request of the customer, service will be suspended without cancellation at any time after the minimum period of service. Service will be suspended for a period of not less than two weeks and billing shall continue at the full rate. For the purposes of this paragraph, the minimum service period shall be computed from the initial establishment of service or from the date the service was last restored from suspension.

7. Temporary Surrender of a Service

When, at the request of the Company, a service is temporarily surrendered by the customer or authorized user for other than maintenance purposes, credit will be allowed; the amount of which will be determined in the same manner as for an allowance for interruptions. (C)
(C)

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**D. Payment Arrangements and Credit Allowances (cont'd)**

8. Allowances for Interruptions

In the event a customer's service is interrupted other than by the negligence or willful act of the customer, and it remains out of order for eight normal working hours or longer after access to the premises is made available and after being reported to be out of order, appropriate adjustments or refunds shall be made to the customer. The amount of adjustment or refund shall be determined on the basis of the known period of interruption, generally beginning from the time the service interruption is first reported. The refund to the customer shall be the pro rata part of the month's flat-rate charges for the period of days and that portion of the service facilities rendered useless or inoperative. The refund may be accomplished by a credit on a subsequent bill for telephone service.

a. Virtual Collocation

An interruption period begins when an inoperative condition of a virtual collocation arrangement is reported to the Company's designated contact point and ends when the virtual collocation arrangement is operative. No allowance for an interruption period will be provided for virtual collocation where the interruption is due to the actions or negligence of the interconnector or to an inoperative condition on Company-provided private line service.

When a credit allowance does apply, such credit will be determined based on the rates applicable to the specific item(s) causing the interruption; however, the credit allowance for an interruption or for a series of interruptions shall not exceed the applicable monthly rate for the item(s) involved.

For calculating credit allowances, every month is considered to have 30 days. No credit shall be allowed for an interruption of less than 30 minutes. The interconnector shall be credited for an interruption of 30 minutes or more at the rate of 1/1440 of the monthly rate.

When a third party vendor maintains and repairs an interconnector's designated termination equipment, a credit allowance will not apply to any interruption of the items maintained and repaired by the third party vendor.

Expanded interconnection is offered under protest. It's availability is subject in all respects to the Stipulation and Agreement entered into in Docket No. 13990.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

D. Payment Arrangements and Credit Allowances (cont'd)

9. Cancellation of Application for Service

Where installation of facilities other than those provided by special construction has been started prior to the cancellation, the charge specified in D.9.a or D.9.b following, whichever is lower, applies.

- a. A charge equal to the estimated costs incurred in such installation, less estimated net salvage.
- b. The charge for the minimum period of the service ordered by the customer as provided in this guidebook plus the full amount of any termination charges applicable.
- c. Installation of facilities for a customer is considered to have started when the Company incurs any expense in connection therewith or in preparation therefore, which would not otherwise have been incurred; provided the customer has advised the Company to proceed with the installation of facilities.

10. Reserved for Future Use

11. Telecommunications Service Priority System

Telecommunications Service Priority System is available for Private Line Services under the regulations and rates specified in 'Telecommunications Service Priority System' described in Part 8, Section 5.

12. Reserved

(C)

(D)

(D)

13. Educational Percentage Discount Rate (E-Rate)

The percentage discount rates available pursuant to 47 Code of Federal Regulations part 54, subpart F to eligible schools libraries, and consortia as defined by 47 Code of Federal Regulations part 54, subpart F shall apply to the guidebook rates contained herein. Schools, libraries, and consortia eligible for E-Rates pursuant to 47 Code of Federal Regulations part 54, subpart F shall comply with the provisions of 47 Code of Federal Regulations part 54, subpart F in order to receive the intrastate E-Rates.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**E. Definitions**

Certain terms used generally throughout this guidebook are defined as follows:

Access Line

In connection with special bridging service, that dedicated channel or channels connecting the master station, remote station, or connecting station to a special bridge.

Accessories

Denotes devices which are mechanically attached to, or used with, the facilities furnished by the Company and which are independent of, and not electrically, acoustically, or inductively connected, to the conductors in the communications path of Company facilities.

Authorized Protective Connecting Module

Denotes a protective unit designed by the Company and manufactured under the control of Company quality assurance procedures, which unit is to be incorporated in a conforming answering device.

Authorized User

Denotes a person, firm or corporation who is authorized by the customer to be connected to the service of the customer for the purpose of transmitting communications to or from the customer and relating directly to the customer business. An authorized user must be specifically named in the application for service and a station must be located on his premises.

Base Rate Area

The portion of the exchange area in which exchange service is furnished at schedule rates for each class of service without mileage or construction charges.

Basic Transmission Equipment

Denotes, for virtual collocation, central office circuit equipment that provides functionality requested by an interconnector and also provides technical compatibility with an interconnector's equipment or support systems located on the interconnector's side of the demarcation point. Basic transmission equipment does not include enhanced services equipment, customer premises equipment or switches.

Baud

Denotes a unit of signaling speed. It is the reciprocal of the time duration in seconds of the shortest signal element (mark or space) within a code signal. The speed in bauds is the number of signal elements per second.

Bridging

The connection of a channel or channels to another channel or the common point where more than two channels of any type connect.

Expanded interconnection is offered under protest. Its availability is subject in all respects to the Stipulation and Agreement entered into in Docket No. 13990.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**E. Definitions (cont'd)**Building

"Same Building" is a structure under one roof, or two or more structures on the same premises which are connected by an enclosed passageway in which the wires or cables of the Company may be placed without exposure to outside electrical circuits or the weather. In no case can conduit be considered as an enclosed passageway. The term "same building" does not include those premises connected by a covered public mall. (see *Premises*)

Channel

Denotes a portion of a private line service which is a path (or paths) for electrical communication, between two or more stations or Company serving offices or between a station and a serving office. A channel may be furnished in such manner as the Company may elect, whether by wire, radio or a combination thereof, and whether or not by means of a single physical facility or route.

Channel Terminal

The facilities required to terminate an interexchange intraLATA channel or an interoffice channel at a serving office.

Communications Systems

Denotes channels and other facilities which are capable, when not connected to private line services, of two-way communications between customer-provided terminal equipment.

Composite Data Service

The combined use of terminal and data switching equipment provided by a composite data service vendor with the use of telecommunications services of the Company to perform data switching for others.

Composite Data Service Vendor

A customer that has been certificated by the proper state or municipal regulatory body, and/or the FCC pursuant to Section 214 of the Communications Act of 1934, as amended, to acquire and operate facilities to perform data switching for others. A customer shall be classified as a Composite Data Service Vendor only with respect to use of those exchange services which are used for the provision of composite data service.

Conformance Number

Denotes an identifying number assigned by the Company to a particular model of conforming answering device incorporating an authorized protective connecting module when that model of device is in conformance with the provisions set forth by the Company in its Technical Reference for conforming answering devices.

Expanded interconnection is offered under protest. Its availability is subject in all respects to the Stipulation and Agreement entered into in Docket No. 13990.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**E. Definitions (cont'd)**Conforming Answering Device

Denotes a customer-provided device which automatically answers incoming calls; transmits a prerecorded voice message or appropriate audible signal to the calling party; records a voice message from the calling party if so designed and arranged; and automatically disconnects from the line in a prearranged manner or completion of the last of the functions for which it was designed and arranged as described in this paragraph. The conforming answering device may include remote interrogation and/or device function control. A conforming answering device must incorporate an authorized protective connecting module and must bear a valid conformance number.

Connecting Arrangement

Denotes the equipment provided by the Company to accomplish the direct electrical connection of customer-provided facilities with the facilities of the Company, or the direct electrical connection of Company facilities.

Connecting Company

A corporation, association, firm or individual, owning and operating one or more exchanges and with whom traffic is interchanged.

Contract

The service agreement between a customer and the Company under which facilities for communication between specified locations, for designated periods, and for the use of the customer or authorized user specifically named in the contract are furnished in accordance with the provisions of the guidebook. (C)

Covered Public Mall

A covered public area, intended for the general public use, running between two or more premises and not an integral part of any building.

Customer

The person, firm or corporation who orders service and is responsible for the payment of charges and the compliance with the regulations of the Company. A customer must have a communications requirement of his own for each private line telephone service.

Customer-Provided Terminal Equipment

Devices, apparatus and their associated wiring, provided by a customer or authorized user for use with facilities furnished by the Company for private line service and does not include customer-provided communications systems. (C)

Customer-Provided Test Equipment

Denotes test equipment located at the premises of the customer that is used by the customer for the detection and/or isolation of a communications service fault.

Data Access Arrangement

Denotes a protective connecting arrangement for use with the network control signaling unit, or, in lieu of the connecting arrangement, an arrangement to identify a central office line and protective facilities and procedures to determine compliance with criteria set forth in this guidebook.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**E. Definitions (cont'd)**Demarcation Point

The point of demarcation and/or interconnection between Company communications facilities and terminal equipment, protective apparatus or wiring at a subscriber's premises. Company-installed facilities at, or constituting, the demarcation point shall consist of wire or a jack conforming to Subpart F of Part 68 of the Commission's rules. The Company will provide one primary demarcation point for services provided through Company network facilities at no cost to the subscriber. Any secondary or additional demarcation point(s) requested by the customer will be provided as specified in Part 2, Section 5 (*Construction Charges*). The costs of providing these secondary or additional demarcation points include all labor and materials including cabling. Additions or reinforcements of existing facilities to secondary demarcation points will only be provided upon customer request and billed as specified in Part 2, Section 5 (*Construction Charges*). "Premises" as used herein generally means a dwelling unit, other building or a legal unit of real property such as a lot on which a dwelling unit is located, as determined by the Company's reasonable and nondiscriminatory standard operating practices. The "minimum point of entry" (MPOE) as used herein shall be either (1) the closest practicable point to where the wiring crosses a property line or (2) the closest practicable point to where the wiring enters a multiunit building or buildings. The Company's reasonable and nondiscriminatory standard operating practices shall determine which of (1) or (2) shall apply. The Company is not precluded from establishing reasonable classifications of multiunit premises for purposes of determining which of (1) or (2) above shall apply. Multiunit premises include, but are not limited to, residential, commercial, shopping center and campus situations.

Single Unit Installations. For single unit installations existing as of June 9, 1994 and installations installed after that date the demarcation point shall be a point within twelve inches of the protector or, where there is no protector, within twelve inches of where the telephone wire enters the customer's premises.

Multiunit Installations

1. In multiunit premises existing as of June 9, 1994, the demarcation point shall be determined in accordance with the Company's reasonable and nondiscriminatory standard operating practices. Provided, however, that where there are multiple demarcation points within the multiunit premises, a demarcation point for a customer shall not be further inside the customer's premises than a point twelve inches from where the wiring enters the customer's premises.
2. In multiunit premises in which wiring is installed after June 9, 1994, the multiunit premises owner shall determine the location of the demarcation point or points. The multiunit premises owner shall determine whether there shall be a single demarcation point location for all customers or separate such locations for each customer. Provided, however, that where there are multiple demarcation points within the multiunit premises, a demarcation point for a customer shall not be further inside the customer's premises than a point twelve inches from where the wiring enters the customer's premises.

Expanded interconnection is offered under protest. Its availability is subject in all respects to the Stipulation and Agreement entered into in Docket No. 13990.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**E. Definitions (cont'd)**Demarcation Point (cont'd)

At this time, the Company has elected not to establish a practice of placing the demarcation point at the MPOE for multiunit premises. However, at the customer's request, the Company will place the demarcation point at the MPOE in existing installations, and as appropriate, in new installations. The Company will relocate multiple demarcation points to a single demarcation point at an MPOE in a manner that minimizes any resultant charges or other adverse impact to either building owners or customers.

If conforming to the twelve inch limitation is unrealistic or technically impossible, the demarcation point will be the most practicable MPOE.

For Expanded Interconnection provided as virtual collocation, the demarcation point denotes the virtual network interface between the Company and the interconnector. The virtual network interface is the location at which Company ownership and responsibility for maintenance of the entrance cable begins. This location is normally a point in the public right-of-way near the Company's entrance manhole. The demarcation point is specified by the Company.

Direct Electrical Connection

Denotes a physical connection of the electrical conductors in the communications path.

Distance Learning

Instruction, learning, and training that is transmitted from one site to one or more sites by telecommunications services that are used predominantly for such instruction, learning, or training, including video, data, voice, and electronic information.

Distribution Center

Indicates amplifying and bridging equipment required to connect the various local sections of a music network or to connect local sections to an interexchange intraLATA section of the network.

Duplex Service

Denotes service which permits customers and authorized users to communicate in both directions simultaneously. (C)

Educational Institution

Accredited primary or secondary schools owned or operated by state and local government entities or by private entities; institutions of higher education as defined by the Education Code, §61.003(13); the Central Education Agency, its successors and assigns; regional education service centers established and operated pursuant to the Education Code, §11.32 and §11.33; and the Texas Higher Education Coordinating Board, its successors and assigns.

Entrance Cable

Denotes a single mode dielectric fiber optic cabling arrangement that consists of a fiber optic cable from the Expanded Interconnection virtual network interface, the riser tail to which the fiber optic cable is spliced and the termination of the riser tail onto a fiber termination shelf within the Company's wire center.

Expanded interconnection is offered under protest. Its availability is subject in all respects to the Stipulation and Agreement entered into in Docket No. 13990.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**E. Definitions (cont'd)**Entrance Facilities

Denotes the facilities required to extend customer-provided channels to a service point of the customer or authorized user.

Equalized

Denotes a procedure which provides for the component frequencies of the material transmitted having about the same relationship at the two ends of the channel.

Exchange

Denotes a unit established by the Company or a connecting company for the administration of telecommunication service in a specified area which usually embraces a metropolitan area, city, town or village and its environs. It consists of one or more serving offices together with the associated plant used in furnishing communication service within that area.

Exchange Area

The area within which the Company will furnish complete telephone service at the exchange rates applicable within that area.

Expanded Interconnection

Denotes an arrangement that provides an interconnector with the ability to interconnect its fiber optic facilities with certain Company-provided intrastate private line services.

Foreign Exchange - Exchange service furnished by means of a circuit connecting a customer's station to a primary serving office of another exchange.

Foreign Serving Office - Exchange service furnished by means of a circuit connecting a customer's station to a serving office of the same exchange but outside of the serving office area in which the station is located.

Grandfathered Communications Systems

Denotes communications systems (including their equipment, premises wiring and protective circuitry, if any) connected at the customer's or authorized user's premises, under any Company guidebook, and that are considered to be grandfathered under Part 68 of the FCC's Regulations because, (a) such systems were connected to the telecommunications network or to private line services specified in F.2.b, following, prior to January 1, 1980, and were of a type of system which was directly connected (i.e., without Company-provided connecting arrangements) to the telecommunications network or to private line services specified in F.2.b, following, as of June 1, 1978, or (b) such systems are connected to the private line services specified in F.2.c or F.2.d, following, prior to May 1, 1983, and are of a type system which was directly connected (i.e., without Company-provided connecting arrangements) to private line services specified in F.2.c or F.2.d, following, as of April 30, 1980. (C)

Expanded interconnection is offered under protest. Its availability is subject in all respects to the Stipulation and Agreement entered into in Docket No. 13990.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**E. Definitions (cont'd)**Grandfathered Connections of Communications Systems

Denotes connections via Company-provided connecting arrangements of customer-provided communications systems (including their equipment and premises wiring) at the customer's or authorized user's premises, under any Company guidebook, and that are considered to be grandfathered under Part 68 of the FCC's Regulations because, (a) such connections to be telecommunications network or to private line services specified in F.2.b, following, were made via Company-provided connecting arrangements prior to January 1, 1980, and such connecting arrangements are of a type of connecting arrangement connected to the telecommunications network or to private line services specified in F.2.b, following, as of June 1, 1978, or (b) such connections to private line services specified in F.2.c or F.2.d, following, are made via Company-provided connecting arrangements prior to May 1, 1983, and such connecting arrangements are of a type of connecting arrangement connected to private line services specified in F.2.c or F.2.d, following, as of April 30, 1980. (C)

Grandfathered Terminal Equipment

Denotes terminal equipment (including protective circuitry, if any) connected at the customer's or authorized user's premises, under any Company guidebook, and that is considered to be grandfathered under Part 68 of the FCC's Regulations because, (a) such terminal equipment was connected to the telecommunications network or to private line services specified in F.2.b, following, prior to July 1, 1979, and was of a type of terminal equipment which was directly connected (i.e., without Company-provided connecting arrangements) to the telephone communications network or to private line services specified in F.2.b, following, as of October 17, 1977, or (b) such terminal equipment is connected to private line services specified in F.2.c or F.2.d, following, prior to May 1, 1983, and is of a type of terminal equipment which was directly connected (i.e., without Company-provided connecting arrangements) to private line services specified in F.2.c or F.2.d, following, as of April 30, 1980. (C)

Grandfathered Connections of Terminal Equipment

Denotes connections via Company-provided connecting arrangements of customer-provided terminal equipment connected at the customer's or authorized user's premises, under any Company guidebook, and that are considered to be grandfathered under Part 68 of the FCC's Regulations because, (a) such connections to the telecommunications network or to private line services specified in F.2.b, following, were made via Company-provided connecting arrangements prior to July 1, 1979, and such connecting arrangements are of a type of connecting arrangement connected to the telecommunications network or to private line services specified in F.2.b, following, as of October 17, 1977, or (b) such connection to private line services in F.2.c or F.2.d, following, are made via Company-provided connecting arrangements prior to May 1, 1983, and such connecting arrangements are of a type of connecting arrangement connected to private line services specified in F.2.c or F.2.d, following, as of April 30, 1980. (C)

Half-Duplex Service

Denotes service which permits communication alternately in either direction, or for communication in one direction only, including bidirectional simultaneous transmission of tones required solely for control purposes or quick turnaround or synchronization.

Inside Wire and Cable

Those facilities furnished in connection with private line services from the building main or floor terminal, frame, or protector to the station equipment on the customer's premises.

Expanded interconnection is offered under protest. Its availability is subject in all respects to the Stipulation and Agreement entered into in Docket No. 13990.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**E. Definitions (cont'd)**Interactive Multimedia Communications

Real-time, two way, interactive voice, video, and data communications conducted over networks that link geographically dispersed locations. This definition includes interactive communications within or between buildings on the same campus.

Interconnecting Station

In connection with special bridging service, one of the many stations on a multipoint network which is connected to a special bridge and is provided for connecting two special bridges together through customer-owned and maintained equipment located at a remote station.

Interconnector

Denotes any individual, partnership, association, joint-stock company, trust, corporation or other entity that uses expanded interconnection for the purpose of connecting its services to Company-provided private line services.

Interexchange IntraLATA Channel

That portion of a private line service which interconnects two primary serving offices in different exchanges or metropolitan exchanges within the LATA.

Interexchange IntraLATA Service

A private line service where the demarcation points located on customer premises are in different exchanges or metropolitan exchanges, within the LATA.

Interface

Denotes that point on the premises of the customer or authorized user at which provision is made for connection of other than Company-provided facilities to facilities provided by the Company. (see *Demarcation Point*) (C)

Interoffice Channel

That portion of a private line service which interconnects, (1) local channels in different serving offices associated with intraexchange service; or, (2) interexchange channels.

Intraexchange Service

A private line service where all the demarcation points are wholly within an exchange or a metropolitan exchange as defined in Part 4, Section 1.

IntraLATA Service

private line service where the demarcation points located on customer's premises are all within the same LATA.

Expanded interconnection is offered under protest. Its availability is subject in all respects to the Stipulation and Agreement entered into in Docket No. 13990.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**E. Definitions (cont'd)**(D)
|
(D)LATA

Local access and transport area (LATA) denotes a geographic area established for the administration of telecommunications service. It encompasses designated local operating Company exchanges which are grouped to serve common social, economic and miscellaneous purposes.

Library

Public library or regional library system as defined by Government Code, §441.122, or a library operated by an institution of higher education or a school district.

Local Channel

That portion of a private line service which interconnects a station location to (1) an interexchange or interoffice channel; or (2) another station location on a different premises in the same serving office area, via another local channel to the station on a different premises.

Manhole

Denotes an enclosure that provides access to subterranean Company facilities. Manholes are normally completely below ground or pavement and are accessed via a chimney or neck with a covered top. This term shall also include handholes, which also provide physical access to subterranean Company facilities, but which are smaller than manholes and are recessed into the ground or pavement.

Master Station

In connection with special bridging service, the one station of a multipoint network located on a customer's premises, which communicates with each remote station.

Minimum Point of Entry (MPOE)

For demarcation purposes, the MPOE denotes a location on or within a subscriber's premises that does not exceed twelve inches from the protector, or where there is no protector, within twelve inches of where the telephone wire enters the customer's premises. In new multiunit installations, the MPOE may be either (1) the closest practicable point to where the wiring crosses a property line, or (2) the closest practicable point to where the wiring enters a building or buildings.

Move

When used in connection with the application of move service charges for private line service, denotes a change in the physical location on the same premises, when made at the request of the customer or authorized user, without discontinuance of service, of facilities and items of equipment provided by the Company.

(C)

Expanded interconnection is offered under protest. Its availability is subject in all respects to the Stipulation and Agreement entered into in Docket No. 13990.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**E. Definitions (cont'd)**Multiline Terminating System Area

Denotes a premises or multi-premises within the same building or continuous property in resold or shared use arrangements for customer premises key equipment or customer premises switching equipment.

Multipoint Service

Denotes a service arrangement which provides communications capability between more than two private line station locations constituting a common dedicated communications system.

Multiunit Installation

For demarcation purposes, denotes a facility arrangement configured for either more than one customer in a building or more than one premises on a legal unit of property. Multiunit installations include (but are not limited to):

- Multifamily residential apartments, condominiums, townhouses, or duplexes;
- Multitenant commercial, shopping center and campus situations; and
- Any other facility arrangement not classified as single unit.

Network Control Signaling

Denotes the transmission of signals used in the telecommunications system which perform functions such as supervision (control, status, and charging signals), address signaling (e.g., dialing), calling and called number identification, audible tone signals (call progress signals indicating reorder or busy conditions, altering, coin denominations, coin collect and coin return tones) to control the operation of switching machines in the telecommunications systems.

Network Control Signaling Unit

Denotes the network channel termination equipment furnished by the Company for network control signaling.

Network Interface

See *Demarcation Point*

Nonpowered-Conferencing Equipment

Denotes a portable plug-ended device, without active elements, consisting of a multi-winding transformer and manual line switches designed to bridge two or more, but not to exceed five, of the lines appearing on 4-button and 6-button key telephone instruments equipped with both hold and illumination features.

Other Line Charge

The charge applied by another LEC for the portion of an interexchange channel which it furnishes. The "other line" charge added to the Company's charge for the portion of the interexchange service which it furnishes is the through charge for the entire interexchange service furnished jointly by the Company and the connecting LEC.

Other Telephone Company

See *Connecting Company*

Point of Termination

See *Demarcation Point*

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**E. Definitions (cont'd)**Premises

All portions of the same building occupied by the same customer, provided that:

- The portions are not separated from each other by intervening offices, rooms or suites not occupied by the customer.
- The portions of different floors are contiguous and that the portion on the upper floor is directly above the portion occupied on the lower floor.

All of the buildings occupied by the same customer, provided that:

- All of the buildings are located on the same continuous property, which is owned and/or leased by the same customer, and are not separated by a public highway.

Note: A public highway is considered to mean a vehicular thoroughfare which is governmentally-owned.

Premises Wiring

Wiring on the customer's side of the demarcation point provided for use with service components furnished by the Company for private line service.

Primary Serving Office

That office in a single office service area or that office of a multi-office service area which is designated by the Company as the primary serving office. A primary serving office is also a serving office. In a service area where there is not physically located a serving office, a theoretical location has been established by the Company for billing purposes.

Category "A" primary serving offices when used in connection with Series 300 and 400 channels denotes primary serving offices designated on the basis of interexchange channel facility characteristics. Category "A" primary service offices are listed in G.2.i and G.2.j.

Category "B" primary serving offices when used in connection with Series 300 and 400 channels denotes primary serving offices other than Category "A" serving office.

Private Line Service

Channels and other facilities (when provided by the Company), provided solely for the use of a customer and his authorized users.

(C)

Registered

Denotes equipment which complies with and has been approved within the Registration provisions of Part 68 of the FCC's Regulations.

Remote Station - In connection with special bridging service, one of the many stations on a multipoint network which is connected to the master station by a bridging arrangement.

Riser Tail

Denotes a cable that terminates on a fiber termination shelf and has flammability and smoke characteristics which allow it to be routed in a central office area without being enclosed in a conduit.

Expanded interconnection is offered under protest. Its availability is subject in all respects to the Stipulation and Agreement entered into in Docket No. 13990.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**E. Definitions (cont'd)**Served Direct Service

Those facilities provided for specified two-point intraexchange channels between different buildings on different premises which do not route through a serving office.

Service Area

An exchange or a zone of a metropolitan exchange.

Service Point

When used in connection with private line services, denotes the service area in which a station of the customer or authorized user is located. (C)

When used in connection with customer systems, denotes the demarcation point on the customer or authorized user's premises where private line services provided by the Company to the customer or authorized user are terminated for communications with stations or customer-provided terminal equipment located on the premises. Where a station is not located in an exchange area, the location of the station or termination is considered to be an exchange for the purpose of this definition. (C)
(C)

Serving Office

The office in the service area from which a customer would normally be served for local exchange telephone service. Where the serving office is not located in the service area, a theoretical location has been established by the Company for billing purposes.

Serving Office Area

The specific area normally served by a serving office. A serving office area may be served in several ways, namely:

- By a single unit serving office with one telephone number prefix.
- By a multiple unit serving office with multiple telephone number prefixes.
- By a theoretical serving office with switching equipment located in another exchange or serving office area.

Single Unit Installation

For demarcation purposes, denotes a facility arrangement configured to accommodate a single customer. All other facility arrangements are classified as multiunit installations. Single unit installations include (but are not limited to):

- Single family dwellings;
- Single business premises; and
- Other single customer installations on one property, undivided by public thoroughfares (e.g., educational, industrial, government or medical premises).

Expanded interconnection is offered under protest. Its availability is subject in all respects to the Stipulation and Agreement entered into in Docket No. 13990.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**E. Definitions (cont'd)**Station

Denotes a demarcation point on a premises at which a private line service is terminated where the service at that premises involves only channels furnished by the Company and the transmitting or receiving equipment, or combination transmitting and receiving equipment, is furnished by the customer or authorized user. (C)

Station Port

A station port is the classification of the station interface for off-premises main stations or extension stations of a premises PBX (or similar) switching system used in reference to loop signaling requirements on grandfathered and registered PBX systems.

Studio

When used in connection with private line service for wired music distribution, indicates fixed premises of a customer at which personnel of the customer are present and from which audio material regularly originates or is received for closed circuit transmission to wired music locations. The term studio excludes all locations where the subject matter to be transmitted is not originated primarily for wired music distribution.

Telecommunication Service Priority System (TSP)

The TSP System is a service developed to meet the requirements of the Federal Government for the priority installation and/or restoration of National Security Emergency Preparedness (NSEP) telecommunications services.

Termination

When used in connection with the application of termination charges for private line services, denotes the discontinuance, either at the request of the customer or authorized user, or by the Company under its regulations concerning cancellation for cause, of service or facilities provided by the Company. (C)

Virtual Collocation

Denotes a type of Expanded Interconnection that provides a transmission path between an interconnector's facilities and certain Company-provided intrastate private line services. Virtual collocation includes central office basic transmission equipment designated by the interconnector and dedicated to its exclusive use but which is owned, installed and maintained by the Company. The Company maintains exclusive physical control of all equipment placed on its premises; however, the interconnector must perform remote monitoring and control functions on its designated equipment.

Zone

A *portion* of a metropolitan exchange which has one primary serving office and is further described in Part 4, Section 1.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems**

1. General Provisions

a. General

1. Terminal equipment, communications systems and premises cable and wire on the customer's side of the demarcation point may be connected at the customer's premises to private line services furnished by the Company where such connections are made under the provisions of A.4, preceding, and this paragraph F.
2. The term "Telecommunications Services" when used in this paragraph F., denotes exchange service, long distance message telecommunications service (LDMTS) and wide area telecommunications service (WATS).

b. Responsibility of the Customer

1. The customer shall be responsible for the installation, operation and maintenance of any customer or authorized user, or other common carrier-provided terminal equipment, communications systems or premises cable and wire on the customer's side of the demarcation point. No combination of customer-provided terminal equipment, communications systems or premises cable and wire on the customer's side of the demarcation point shall require change in or alteration of the equipment or services of the Company, cause electrical hazards to Company personnel, damage to Company equipment, malfunction of Company billing equipment, or degradation of service to persons other than the user of the subject terminal equipment or communications system, his calling or called party. Upon notice from the Company that customer-provided terminal equipment, communications systems or premises cable and wire on the customer's side of the demarcation point is causing such hazards, damage, malfunction or degradation of service, the customer or authorized user shall make such change as shall be necessary to remove or prevent such hazard, damage, malfunction or degradation of service. (C)
2. When the customer or authorized user provides his own data set on a given Company - provided private line, it shall be the responsibility of the customer to ensure the continuing compatibility of such data set with the private line service furnished by the Company. (C)
3. Maintenance of Service
 - (a) If trouble occurs with a customer's service, the customer should first determine whether the trouble is in the customer's own equipment and/or facilities. If the customer determines the trouble is in Company equipment and/or facilities, the customer should issue a trouble report to the Company.
 - (b) When a customer issues a trouble report to the Company for clearance and no trouble is found in Company equipment and/or facilities, the customer shall be responsible for payment of a Maintenance of Service Charge for the period of time when Company personnel are dispatched. No charge will apply if Company personnel fail to find trouble in Company equipment and/or facilities and the trouble is actually in the equipment and/or facilities, but not discovered on the initial dispatch.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

F. Connections of Terminal Equipment and Communications Systems (cont'd)

1. General Provisions (cont'd)

b. Responsibility of the Customer (cont'd)

3. Maintenance of Service (cont'd)

(c) The customer shall be responsible for payment of a Maintenance of Service Charge when the Company dispatches personnel, and the trouble is in equipment or communications systems provided by other than the Company or in detariffed CPE provided by the Company unless covered under a separate maintenance agreement.

(d) If the customer issues a trouble report allowing the Company access to the customer's or the customer's end user(s) premises and Company personnel are dispatched but denied access to the premises, then the Maintenance of Service Charge will apply for the period of time that Company personnel are dispatched. Subsequently, if Company personnel are allowed access to the premises, provisions in (b) and (c) preceding will apply.

(e) In either (a), (b) or (c) preceding, the Maintenance of Service Charge shall include all technicians dispatched, including technicians dispatched to other locations for purposes of testing.

(f) Maintenance of Service Charges apply on a first and additional basis for each half hour or fraction thereof. If more than one technician is dispatched in conjunction with the same trouble report, the total time for all technicians dispatched will be aggregated prior to the distribution of time between the "First Half Hour or Fraction Thereof" and "Each Additional Half Hour or Fraction Thereof" rate categories.

A call-out of a Company employee at a time not consecutive with the Company Business Day is subject to Overtime and/or Premium Time.

(g) No credit allowance will be applicable for the interruption involved if the Maintenance of Service charge applies.

(h) Maintenance of Service Charge

<u>Maintenance of Service Periods</u>	<u>First Half Hour or Fraction Thereof</u>	<u>Each Additional Half Hour or Fraction Thereof</u>
Basic Time	\$82.00	\$50.35
Overtime	96.00	64.25
Premium Time	109.90	78.15

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

F. Connections of Terminal Equipment and Communications Systems (cont'd)

1. General Provisions (cont'd)

b. Responsibility of the Customer (cont'd)

4. The customer who provides the premises wiring of communications systems subject to Part 68 of the FCC's Regulations under Section 68.215 of Chapter 1 of Title 47 of that Code of Federal Regulations shall be responsible for the payment of an institutional program for premises wiring charge as provided below for activities performed by Company employees at the customer's premises under subsections (f), (g) and/or (h) of said Section 68.215, when the premises wiring in question has failed acceptance tests monitored by, or participated in by, the Company under Section 68.215, and/or has been revealed to be not in conformance with the information provided in the related affidavit which was provided pursuant to Section 68.215, and/or has resulted in harm to the network.

The institutional program for premises wiring charge provided for above is comprised of the first, or a combination of both rate elements described below, as appropriate:

Element 1 - for the first fifteen minutes, or fraction thereof, of total time spent by Company employees in related monitoring or participation in acceptance tests and/or in related inspection of customer-provided premises wiring for communications systems subject to Part 68 of the FCC's Regulations, and for administrative expenses including the visit to the customer's premises.

Element 2 - for each additional fifteen minutes, or major fraction thereof, of total time spent by Company employees in performing the related customer-provided premises activities described in Element 1, preceding.

<u>IPPW Charge</u>	<u>Nonrecurring</u>	<u>USOC</u>
Element 1	\$35.80	EPC1E
Element 2	10.25	EPCAE

5. The consent of the customer must be obtained by the authorized user prior to the connection of authorized user provided terminal equipment or communications systems to a private line service provided to the customer. (C)
(C)

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

1. General Provisions (cont'd)

c. Responsibility of the Company

1. Private line services are not represented as adapted to the use of customer or authorized user, or other common carrier-provided terminal equipment, communications systems or premises cable and wire on the customer's side of the demarcation point. Where such terminal equipment, communications systems or premises cable and wire on the customer's side of the demarcation point are used with private line services, the responsibility of the Company shall be limited to the furnishing of service components suitable for private line services and to the maintenance and operation of service components in a manner proper for such services up to, and including the demarcation point. Subject to this responsibility the Company shall not be responsible for (a) the through-transmission of signals generated by the customer-provided terminal equipment or communications systems or for the quality of, or defects in, such transmission, or (b) the reception of signals by customer-provided terminal equipment or communications systems, or (c) address signaling where such signaling is performed by customer-provided signaling equipment. (C)
2. The Company will, at the customer's request, provide information concerning interface parameters, including the number of ringers which may be connected to a particular line, needed to permit customer-provided terminal equipment to operate in a manner compatible with the telecommunications network.
3. The Company may make changes in its telecommunications network, equipment, operations or procedures, where such action is not inconsistent with Part 68 of the FCC's Regulations. If such changes can be reasonably expected to render any customer's terminal equipment, communications systems or premises cable and wire on the customer's side of the demarcation point incompatible with the telecommunications network, or require modification or alteration of such customer-provided terminal equipment, communications systems or premises cable and wire on the customer's side of the demarcation point, or otherwise materially affect its use or performance, the customer or authorized user, or other common carrier will be given adequate notice in writing, to allow the customer an opportunity to maintain uninterrupted service. (C)

d. Recording of Two-Way Telephone Conversations

Private line services are not represented as adapted to the recording of two-way telephone conversations. When customer-provided voice recording equipment is used with a private line service which is connected to telecommunications services, the provisions relating to Recording of Two-Way Telephone Conversations, as set forth in Part 2, Section 9, are applicable to such private line service.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

1. General Provisions (cont'd)

e. Violation of Regulations

When any customer or authorized user, or other common carrier-provided terminal equipment, (C) communications systems or premises cable and wire on the customer's side of the demarcation point is used with private line services in violation of any of the provisions in this paragraph F., the Company will take such immediate action as necessary for the protection of the telecommunications network and Company employees, and will promptly notify the customer or authorized user, or other common carrier of the violation. The customer shall take (C) such steps as are necessary to discontinue such use of the terminal equipment, communications systems or premises cable and wire on the customer's side of the demarcation point or correct the violation and shall confirm in writing to the Company within ten days, following the receipt of written notice from the Company, that such use has ceased or that the violation has been corrected. Failure to discontinue such use or to correct the violation and to give the required written confirmation to the Company within the time stated above shall result in suspension of the customer's service until such time as there is compliance with the provisions of this guidebook.

f. Connection of Facilities Furnished by the Customer Which Involve Hazardous or Inaccessible Locations

Facilities furnished by the customer which involve hazardous or inaccessible locations may be connected with private line service furnished by the Company. Such facilities furnished by the customer must comply with the minimum protection criteria contained in F.4.f.

2. Connections of Registered Equipment

a. Registered terminal equipment, protective circuitry and communications systems may be connected on the customer's side of the demarcation point to private line services specified in F.2.b, F.2.c or F.2.d, following, subject to F.1, preceding, and this paragraph F.2 and Part 2, Section 9, **CONNECTIONS OF REGISTERED EQUIPMENT**.

b. The connection may be made only at the premises of the customer or authorized user to (C) Series 300 or 400 private line service that present a two-wire loop signaling interface for such (C) connection under the following conditions:

1. Registered terminal equipment, protective circuitry, and key telephone systems may be connected to the station end of private line services furnished in connection with off-premises stations.
2. Registered PBX systems may be connected, as a trunk termination, to the station end of private line services furnished in connection with off-premises stations.
3. A foreign exchange channel may be used with customer-provided registered terminal equipment, registered protective circuitry and registered communications systems which are connected to the exchange telephone service associated with such channels.

(D)

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

2. Connections of Registered Equipment (cont'd)

- c. The connection of registered terminal equipment and registered PBX systems may be made only at the premises of the customer or authorized user to a Series 300 or 400 private line service that presents an interface for two-wire transmission, with separate E and M signaling leads conventionally known as Type I (battery/ground) or Type II (contact closure type). Such E and M signaling leads are those terminal equipment or PBX leads (other than voice or data communications leads) used for the purpose of transferring supervisory or address signals across the interface. (C)
- d. The connection of customer-provided registered terminal equipment and registered PBX systems may be made only at the premises of the customer or authorized user to a Series 100, 300 or 400 private line service furnished to provide indications of message registration of outgoing calls or automatic identification of outward dialing (AIOD) to such customer-provided equipment or systems. (C)

In addition, customer's who intend to install, make additions to, or make rearrangements of AIOD functions shall give advance notice to the Company under the procedures specified in Part 68 of the FCC's Regulations or as otherwise authorized by the FCC.

- e. Unless a specific waiver has been granted by the FCC, or except as otherwise provided in F.2.f following, all connections of registered equipment to services furnished by the Company will be made through a point of demarcation. In most cases, this will be through a Company-provided standard jack. In the case of registered communications systems utilizing complex wiring, a method of connection, jacks, terminal strips, etc., will be provided by the Company.
- f. The requirement for the use of standard jacks as described in F.2.e preceding is waived for registered equipment which is located in hazardous or inaccessible locations.
3. Connections of Grandfathered Terminal Equipment and Grandfathered Communications Systems
- a. Direct Connections

1. Grandfathered terminal equipment and grandfathered communications systems directly connected to private line services specified in F.2.b, preceding, are subject to Part 2, Section 9, **CONNECTIONS OF GRANDFATHERED TERMINAL EQUIPMENT AND GRANDFATHERED COMMUNICATIONS SYSTEMS**, paragraphs A., D. and E. Such connections are subject to the minimum protection criteria set forth in F.4.f, following.
2. Grandfathered terminal equipment and grandfathered communications systems, directly connected to the private line services specified in F.2.c and F.2.d, preceding, on April 30, 1980, may remain connected for the life of the equipment without registration, and may be modified only under Part 68 of the FCC's Regulations, subject to the following:
- (a) All such connections shall comply with the minimum protection criteria set forth in F.4.f, following.
- (b) No changes may be made to equipment so connected except by the manufacturer thereof, or a duly authorized agent of the manufacturer.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

3. Connections of Grandfathered Terminal Equipment and Grandfathered Communications Systems (cont'd)
 - a. Direct Connections (cont'd)
 3. Until May 1, 1983, new installations of terminal equipment or communications systems which have been grandfathered may be connected for use with the private line services specified in F.2.c or F.2.d, preceding, subject to the following:
 - (a) The customer shall notify the Company when such equipment or systems are to be connected and shall notify the Company when such equipment or systems are to be permanently disconnected; such notification shall include a description of the equipment including the manufacturer's name, model number, and type of equipment.
 - (b) All such connections are made through Company-provided standard jacks, or are otherwise connected by the Company.
 - (c) All such connections shall comply with the minimum protection criteria set forth in F.4.f, following.
 - (d) Premises wiring associated with communications systems shall conform to Part 68 of the FCC's Regulations.
 - (e) No changes may be made to equipment so connected except by the manufacturer thereof, or a duly authorized agent of the manufacturer.
 4. Additions to grandfathered terminal equipment or grandfathered communications systems specified in F.3.a.2 or F.3.a.3, preceding, may be made, subject to F.3.a.3.(a) through F.3.a.3.(e), preceding, and to the following.
 - (a) Until May 1, 1983, where the equipment being added is of a type which has been grandfathered.
 - (b) After May 1, 1983, where the equipment being added is grandfathered.
 - (c) Additions of registered equipment are subject to F.2, preceding.
 5. Systems connected pursuant to F.3.a.2 through F.3.a.4, preceding, may remain connected and be moved and reconnected, under F.3.a.3.(a) through F.3.a.3.(e), preceding, for the life of the equipment and may be modified only under Part 68 of the FCC's Regulations.
 6. Customer-provided terminal equipment and customer-provided communications systems connected via customer-provided grandfathered protective circuitry are subject to the provisions of F.3.a.1 through F.3.a.5, preceding.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

3. Connections of Grandfathered Terminal Equipment and Grandfathered Communications Systems (cont'd)
 - b. Connections Through Connecting Arrangements Provided by the Company
 1. Grandfathered connections of terminal equipment and grandfathered connections of communications systems to private line services specified in F.2.b, preceding, are subject to Part 2, Section 9, **CONNECTIONS OF GRANDFATHERED TERMINAL EQUIPMENT AND GRANDFATHERED COMMUNICATIONS SYSTEMS**, paragraph B. Such connections are subject to the minimum protection criteria set forth in F.4.f, following.
 2. Grandfathered connections of terminal equipment and grandfathered connections of communications systems to the private line services specified in F.2.c and F.2.d, preceding, are subject to the following:
 - (a) Until May 1, 1983, the Company will provide connecting arrangements for installations of new customer-provided terminal equipment or communications systems that are subject to Part 68 of the FCC's Regulations. However, after May 1, 1983, Company-provided connecting arrangements will only be provided, to the extent that such connecting arrangements are available, to reconnect terminal equipment or communications systems which were previously connected to the private line services specified in F.2.c or F.2.d, preceding, through connecting arrangements prior to May 1, 1983.
 - (b) Grandfathered connections of terminal equipment and grandfathered connections of communications systems made under F.3.b.2.(a), preceding, may remain connected and be moved and reconnected for the life of the equipment and may be modified only under Part 68 of the FCC's Regulations. Connecting arrangements used for such moves and reconnections will continue to be provided by the Company subject to their availability, at the rates and charges specified in Part 2, Section 9, **CONNECTIONS OF GRANDFATHERED TERMINAL EQUIPMENT AND GRANDFATHERED COMMUNICATIONS SYSTEMS**, paragraph F.
 - (c) Network control signaling shall be performed by the connecting equipment furnished, installed and maintained by the Company, except that customer-provided tone-type address signaling is permissible through Company-provided connecting arrangement.
 - (d) The connections specified in F.3.b.2.(a) through F.3.b.2.(c), preceding, must comply with the minimum protection criteria specified in F.4.f, following.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

4. Connections of Customer-Provided Terminal Equipment and Communications Systems Not Subject to the FCC's Registration Program

a. General

1. Connecting arrangements are not required and minimum protection criteria are not applicable where customer-provided terminal equipment or communications systems are connected with the following channels when such channels are used for the types of transmission specified herein due to the nature of the service provided and/or the type of channels and equipment used.

- Series 100
- Series 200
- Series 400

- Video Channels (provided via special service request for closed circuit TV)

(D)

2. Except as otherwise provided in F.2 and F.3, preceding, customer-provided terminal equipment and communications systems may be electrically connected to private line services under this F.4.

(a) When the customer-provided terminal equipment or communications system is connected with private line service furnished by the Company and such private line service is not arranged for connection to telecommunications services, such connections shall be made to a demarcation point provided by the Company.

(b) When the customer-provided terminal equipment or communications system is connected with private line service furnished by the Company and such private line service is arranged for connection to telecommunications services:

(i) except as otherwise specified in F.4.d.1.(d), following, such connections shall be made through a connecting arrangement as provided in this paragraph F.4, and

(ii) the connection shall be such that the functions of network control signaling (except customer-provided tone-type address signaling through a Company-provided connecting arrangement) are performed by equipment furnished by the Company.

(iii) Customer-provided terminal equipment or communications systems connected under F.4.a.2.(a) or F.4.a.2.(b), preceding, must comply with the minimum protection criteria specified in F.4.f, following.

(D)

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

4. Connections of Customer-Provided Terminal Equipment and Communications Systems Not Subject to the FCC's Registration Program (cont'd)

b. Data Terminal Equipment

1. Direct Electrical Connection

- (a) Customer-provided data terminal equipment which involves direct electrical connection to facilities furnished for private line service by the Company may be used with such facilities for such purpose under the conditions set forth below:
- (i) The customer shall be responsible for ordering and specifying the type of channel and the channel conditioning for operation with data processing equipment provided by the customer or authorized user. (C)
 - (ii) Except as otherwise specified in (iii) and (iv), following, when the connection of customer-provided data terminal equipment requires the use of data sets, the data sets may be provided by either the customer or authorized user; except that, the Company shall furnish all data sets located on the premises of the Company. Where the customer or authorized user elects to provide his own data sets on a given private line service, it shall be the responsibility of the customer or authorized user to ensure the continuing compatibility of such data sets with the facilities furnished by the Company. (C)
 - (iii) To protect the telecommunications network, the connection of customer-provided data terminal equipment to private line service provided by the Company, when such private line service is arranged for connection to telecommunications services shall be through a connecting arrangement as described below. (C)

Data Access Arrangement

Where the customer elects to use customer-provided data terminal equipment through a data access arrangement, the customer or authorized user shall furnish the equipment which performs the functions of data signal conditioning and the Company shall furnish the data access arrangement for use with the network control signaling unit. (C)

- (iv) Where a data access arrangement is furnished with customer-provided terminal equipment and such terminal equipment is used for both voice and data communications, the data access arrangement may be used to connect the customer-provided equipment for voice communication.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

4. Connections of Customer-Provided Terminal Equipment and Communications Systems Not Subject to the FCC's Registration Program (cont'd)

c. Voice Terminal Equipment

1. Customer-provided voice terminal equipment may be connected at the customer's premises to private line service per the following, when such private line service is arranged as provided in F.4.a.2.(b), preceding.
 - (a) The connection shall be made through a network control signaling unit and a connecting arrangement furnished by the Company.
 - (b) Where a data access arrangement is furnished in connection with customer-provided terminal equipment and such terminal equipment is used for both voice and data communication, the data access arrangement may be used to connect the customer-provided terminal equipment for voice communication.
2. Attested equipment and conforming answering devices may be used with private line service subject to the provisions of Part 2, Section 9, **CONNECTIONS OF GRANDFATHERED TERMINAL EQUIPMENT AND GRANDFATHERED COMMUNICATIONS SYSTEMS**, paragraphs D and E.

d. Communications Systems

1. Customer-provided communications systems (other than communications systems connected pursuant to F.2 and F.3, preceding) may be connected to private line service per this F.4.d.1. These communications systems (including channels derived from such systems, not exceeding voice grade), may be connected at the customer or authorized user premises where the customer has a regular and continuing requirement for the origination or termination of communications over the customer-provided communications system provided that:
 - (a) The normal mode of operation of the customer-provided communications system shall be to provide communications originating or terminating at the premises on which the connection is made.
 - (b) The connection shall be made through switching equipment provided either by the customer, or authorized user.
 - (c) The connection shall be to channels of voice grade or less or to channels created therefrom in accordance with the provisions of F.5, following.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

4. Connections of Customer-Provided Terminal Equipment and Communications Systems Not Subject to the FCC's Registration Program (cont'd)

d. Communications Systems (cont'd)

1. (cont'd)

(d) When the private line service is arranged as provided in F.4.a.2.(b), preceding, the connection is made through:

- (i) a connecting arrangement provided by the Company, or
- (ii) registered or grandfathered terminal equipment, communications system, or protective circuitry which, either singularly or in combination assures that the requirements of Part 68 of the FCC's Regulations are met at the demarcation point.

Minimum protection criteria as set forth in F.4.f, following, must be complied with when the connection is made through equipment or systems that are not registered.

In lieu of these requirements for total hardware protection, an optional, alternative method, as described in F.4.d.1.(e), following, is available for the control of signal power only.

(e) When customer-provided communications systems not subject to Part 68 of the FCC's Regulations are connected to private line services that are arranged as provided in F.4.a.2.(b), preceding, and the connection is through (a) a Company-provided connecting arrangement or, (b) registered or grandfathered terminal equipment, communications system or protective circuitry which assures that all of the requirements of Part 68 of the FCC's Regulations are met at the demarcation point, no further action is required. However, when a customer elects to connect a communications system to private line service and the registered or grandfathered equipment, system or protective circuitry through which connection is made does not provide protection for signal power control, the customer must comply with the following institutional procedures:

- (i) The customer-provided communications system must be installed, operated and maintained so that the signal power (within the frequency range of 200- 4000 Hertz) at the demarcation point continuously complies with Part 68 of the FCC's Regulations.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

4. Connections of Customer-Provided Terminal Equipment and Communications Systems Not Subject to the FCC's Registration Program (cont'd)

d. Communications Systems (cont'd)

1. (cont'd)

(e) (cont'd)

- (ii) The operator/maintainer responsible for the establishment, maintenance and adjustment of the voice frequency signal power present at the demarcation point must be trained to perform these functions by successfully completing one of the following:
- a training course provided by the manufacturer of the equipment used to control voice frequency signal power; or
 - a training course provided by the customer or authorized representative, who has responsibility for the entire communications system, using training materials and instruction provided by the manufacturer of the equipment used to control the voice frequency signal power; or
 - an independent training course (e.g., trade school or technical institution) recognized by the manufacturer of the equipment used to control the voice frequency signal power; or
 - in lieu of the preceding training requirements, the operator/maintainer is under the control of the supervisor trained per F.4.d.1.(e)(ii).

Upon request, the customer is required to provide the proper documentation to demonstrate compliance with the requirements in this F.4.d.1.(e)(ii).

- (iii) At least ten days advance notice must be given to the Company in the form of a notarized affidavit before the initial connection of the customer-provided communications system. A copy of the affidavit must also be maintained at the customer's premises. The affidavit must contain the following information:
- The full name, business address, business telephone number and signature of the customer or authorized representative who has responsibility for the operation and maintenance of the communications system.
 - The line which the communications system will be either connected to or arranged for connection to.
 - A statement that all operations associated with the establishment, maintenance and adjustment of the signal power present at the demarcation point will comply with Part 68 of the FCC's Regulations.
 - A statement describing how each operator/maintainer of the communications system will meet and continue to meet the training requirements for persons installing, adjusting or maintaining the communications system.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

4. Connections of Customer-Provided Terminal Equipment and Communications Systems Not Subject to the FCC's Registration Program (cont'd)
 - d. Communications Systems (cont'd)
 1. (cont'd)
 - (f) Extraordinary Procedures
 - (i) The Company may invoke extraordinary procedures to protect the private line service where one or more of the following conditions are present:
 - Information provided in the affidavit gives reason to believe that a violation of Part 68 of the FCC's Regulations or the institutional procedures set forth in F.4.d.1.(e)(i), preceding, is likely.
 - Harm has occurred and there is reason to believe this harm was a result of operations performed under the institutional procedures set forth in F.4.d.1.(e), preceding.
 - (ii) The extraordinary procedures, which can be invoked by the Company, include:
 - Requiring the use of protective apparatus which either protects solely against signal power or which assured that all of the requirements of Part 68 are met at the demarcation point. This protective apparatus may be provided by either the Company or the customer.
 - Disconnecting service.
 - (iii) A charge equal to the Maintenance of Service Charge as provided in F.1.b.3, preceding, will apply when;
 - It is necessary to send a Company employee to the premises where the connection is made because a condition set forth in F.4.d.1.(f)(i), preceding, exists, and
 - A failure to comply with Part 68 of the FCC's Regulations or the institutional procedures for signal power control in F.4.d.1.(e), preceding, is disclosed.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

F. Connections of Terminal Equipment and Communications Systems (cont'd)

4. Connections of Customer-Provided Terminal Equipment and Communications Systems Not Subject to the FCC's Registration Program (cont'd)

d. Communications Systems (cont'd)

2. An entrance facility channel or channels created therefrom under the provisions of 6.5, following, may be connected at such customer's or user's premises to other customer-provided communications systems in accordance with 1., 1.a., 1.b. and 1.d. preceding.

3. Reserved

(C)
(D)
|
(D)

4. A communications system provided by an authorized user may be connected at the premises of the authorized user to private line service furnished by the Company to a customer on which the authorized user has a station provided that:

(a) The customer has a regular and continuing requirement for communications originating or terminating at the authorized user's premises at which the connection is made.

(b) The normal mode of operation of the authorized user-provided communications system shall be to provide communications originating or terminating at the premises on which the connection is made.

(c) The connection shall be made through switching equipment provided by the customer or authorized user or by the Company.

(d) The connection shall be to channels of voice grade or less or to channels created therefrom under the provision of F.5, following.

(e) The connection shall be made on the same basis as set forth for the customer in F.4.a.2, preceding, and F.4.f, following.

(f) All communications over the interconnected facilities shall be between the customer and authorized user and relate directly to the customer's business.

e. Accessories

Accessories provided by a customer may be used with private lines service provided that such accessories comply with the provisions of F.1.b and F.4.a.2.(b)(ii), preceding.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

4. Connections of Customer-Provided Terminal Equipment and Communications Systems Not Subject to the FCC's Registration Program (cont'd)
 - f. Minimum Protection Criteria for Electrical Connections
 1. Since private line services use Company channels and equipment in common with other services, it is necessary in order to prevent excessive noise and crosstalk, that the power of the signal applied to Company private line service be individually engineered. Because each private line service is individually engineered a single valued limit for all applications cannot be specified. Therefore, the power of the signal in the band above 300 Hertz (Hz) which may be applied by the customer-provided equipment to the demarcation point will be specified by the Company for each application to be consistent with the signal power allowed on the telecommunications network.
 2. To protect other services, it is necessary that the signal which is applied by the customer-provided equipment to the Company demarcation point located on the customer's premises meet the following limits:
 - (a) The power in the band from 3,995 Hz to 4,005 Hz shall be at least 18db below the power of the signal as specified in F.4.f.1, above.
 - (b) The power in the band from 4,005 Hz to 10,000 Hz shall not exceed 16db below one milliwatt.
 - (c) The power in the band from 10,000 Hz to 25,000 Hz shall not exceed 24db below one milliwatt.
 - (d) The power in the band from 25,000 Hz to 40,000 Hz shall not exceed 36db below one milliwatt.
 - (e) The power in the band above 40,000 Hz shall not exceed 50db below one milliwatt.
 3. Where there is connection to telecommunications services, to prevent the interruption or disconnection of a call, or interference with network control signaling, it is necessary that the signal applied by the customer-provided equipment to the Company demarcation point located on the customer's premises at no time have energy solely in the 2450 to 2750 Hz band. If signal power is in the 2450 to 2750 Hz band, it must not exceed the power present at the same time in the 800 to 2450 Hz band.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

F. Connections of Terminal Equipment and Communications Systems (cont'd)

4. Connections of Customer-Provided Terminal Equipment and Communications Systems Not Subject to the FCC's Registration Program (cont'd)

f. Minimum Protection Criteria for Electrical Connections (cont'd)

4. Where customer-provided equipment applies signals having components in the frequency spectrum below 300 Hz, excluding ringing signals, the currents and voltages (including all harmonics and spurious signals) at the demarcation point shall not exceed the limits indicated in F.4.f.4.(a) through F.4.f.4.(d), following.

- (a) The maximum root-mean-square (rms) value, including dc and ac components of the current per conductor, will be specified by the Company but in no case will the specified value exceed 0.35 ampere.
- (b) The magnitude of the peak of the conductor to ground voltage shall not exceed 70 volts.
- (c) The conductor to conductor voltage shall be such that the conductor to ground voltage limit in F.4.f.4.(b), above, is not exceeded. If the signal source is not grounded, the voltage limit in F.4.f.4.(b), above, applies to the conductor to conductor voltage.
- (d) The total weighted rms voltage within the band from 50 Hz to 300 Hz shall not exceed 100 volts. The total weighted rms voltage is the square root of the sum of the products of the weighting factors for the individual frequency components times the square of the rms voltage of the individual frequency components. The weighting factors are as indicated:

<u>for frequencies between</u>	<u>weighting factor</u>
50 Hz and 100 Hz	$f^2/10^4$
100 Hz and 300 Hz	$f^{3.3}/10^{6.6}$

where f is the numerical value of the frequency in Hz, of the frequency component being weighted.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

5. Channel Derivation Devices

Customer-provided channel derivation devices which are used to create additional channels under F.5.a and F.5.b, following, may be connected to private line service subject to F.1, F.2 and F.3, preceding.

- a. Subject to the normal transmission characteristics of the private line service ordered, the customer or authorized user may create additional channels from the service ordered through the use of channel derivation equipment located at his premises. Channel derivation equipment can be used with any service. (C)
- b. The Company makes no representation as to: (1) the suitability of the channels it provides for such subdivision into additional channels by derivation equipment, or (2) the suitability of the resultant derived channels for any communications purpose.

6. Connection of Certain Facilities of Power, Pipe Line and Railroad Companies^{/1/}

Facilities of an electric power company, an oil, oil products or natural gas pipe line company, or a railroad company provided primarily to communicate with points located along a right-of-way (including premises or such company anywhere in cities, towns or villages along the right-of-way) owned or controlled by such company may, in lieu of the provisions of F.3 and F.4.d, preceding, be connected with services furnished by the Company at the demarcation point to the same customer, subject to the following:

- a. Such connections will be made by means of switching or connecting equipment furnished by the customer.
- b. Such customer telephone facilities will be connected at the demarcation point to private line services furnished by the Company for voice transmission and using a Series 300 or 400 channel when furnished to the same customer, for communications with stations associated with such services; provided, however, that facilities of the customer will not be connected to a local or toll central office line to form a through-connection except as follows:
 1. in cases of emergency involving safety of life or property;
 2. in cases of calls originated by railroad employees under circumstances indicating need for prompt action to secure or maintain the safety, continuity or reliability of railroad service to the public, and related to the movement of passengers, mail, property or equipment by railroad, or the repair, maintenance or construction of railroad rights-of-way, structures or equipment;
 3. in cases where the customer facilities serve locations where it is impracticable because of hazard or inaccessibility for the Company to furnish its facilities; and
 4. during an interim period in cases where the customer has arranged for replacement of said customer facilities with facilities of the Company.

/1/ Obsolete - cannot add to an existing system, cannot outside move, cannot supersede.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

6. Connection of Certain Facilities of Power, Pipe Line and Railroad Companies^{/1/} (cont'd)
- c. Telephone circuits of such companies will be connected to a local or toll central office line to form a through-connection only through manual switching equipment, or an attendant's position of dial PBX equipment. Such equipment or position may be located at either or both ends of the customer's circuit.
 - d. Connection of a telephone circuit of such companies as specified in F.6.b.1 through F.6.b.4 preceding, may be established at either end of such circuit, but shall not be established at both ends simultaneously.
 - e. Customer teletypewriter or morse, telephotograph, data transmission, remote metering, supervisory control or miscellaneous signaling facilities will be connected at the demarcation point to private line service furnished by the Company for such purposes to the same customer.
 - f. Company-provided private line services, when connected at the demarcation point with facilities of the customer, will not be used for communications of other than the customer, except that such services may be used for the communications of, and be connected with services furnished by the Company, to other companies which:
 - 1. Are operated with the customer as parts of an integrated electric power, oil, oil products or natural gas system or railroad system under direct or common ownership or control; or
 - 2. Own or operate an electric power or pipe line or railroad system jointly with the customer; or
 - 3. Own or operate electric power or pipe line or railroad facilities interconnected with those of the customer.

Company-provided private line services when so connected may be connected to a local or toll central office line to form a through-connection for communications of other companies specified in F.6.f.1 through F.6.f.3, preceding, including calls originated by employees of such companies only under the circumstances set forth in F.6.a and F.6.b, preceding.

- g. Customer-provided terminal equipment and communications systems connected to the private line services specified in F.2.b, preceding, per F.6.a through F.6.f, preceding, prior to January 1, 1980, may remain connected and be moved and reconnected for the life of the equipment without registration unless subsequently modified. New installations of customer-provided terminal equipment or communications systems subject to Part 68 of the FCC's Regulations connected to such private line services must meet the requirements of Part 68 of the FCC's Regulations.
- h. Effective May 1, 1983, new installations of, or additions to customer-provided terminal equipment and communications systems subject to Part 68 of the FCC's Regulations, connected to the private line services specified in F.2.c or F.2.d, preceding, per F.6.a through F.6.f, preceding, must meet the requirements of Part 68 of the FCC's Regulations.

/1/ Obsolete - cannot add to an existing system, cannot outside move, cannot supersede.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**7. Connections of Certain Facilities of the U.S. Army, Navy and Air Force^{/1/}

Facilities of the U.S. Department of the Army, Navy, or Air Force will be connected with services furnished by the Company, in lieu of the provision of F.3 and F.4.d, preceding, as provided in F.7.a and F.7.b, following, where the Secretary of the appropriate Department or his authorized representative notifies the Company in writing that such connection is required for reasons of military necessity.

- a. Telephone facilities of the aforesaid Departments will be connected to private line services furnished by the Company for voice, transmission and using a Series 300 or 400 channel for communications with stations associated with such services; provided, however, that such Department facilities will not be connected to a local or toll central office line to form a through-connection except in cases of emergency involving safety of life or property, unless such facilities are provided in locations where it is impracticable for the Company to furnish its services.
- b. Teletypewriter or morse, telephotograph, data transmission, remote metering, supervisory control or miscellaneous signaling facilities of the aforesaid Departments will be connected to private line services furnished for such purposes.
- c. Customer-provided terminal equipment and communications systems connected to the private line services specified in F.2.b, preceding, per F.7.a and F.7.b, preceding, prior to January 1, 1980, may remain connected and be moved and reconnected for the life of the equipment without registration unless subsequently modified. New installations of customer-provided terminal equipment or communications systems subject to Part 68 of the FCC's Regulations connected to such private line services must meet the requirements of Part 68 of the FCC's Regulations.
- d. Effective May 1, 1983, new installations of, or additions to customer-provided terminal equipment and communications systems subject to Part 68 of the FCC's Regulations connected to the private line services specified in F.2.d and F.2.d, preceding, per F.7.a and F.7.b, preceding, must meet the requirements of Part 68 of the FCC's Regulations.

8. Connection of Services Furnished by the Company with Service of Other Common Carriers

The connection of services furnished by the Company with services of other carriers shall be under the regulations found in the Access Service Tariff and other sections of this guidebook.

/1/ Obsolete - cannot add to an existing system, cannot outside move, cannot supersede.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

F. Connections of Terminal Equipment and Communications Systems (cont'd)

9. Connection of Services Furnished by the Company to the Same Customer

- a. A private line service furnished by the Company may be connected to another private line furnished by the Company, or by the Company and its other participating carriers, or to another service provided by the Company as specified in F.9.b through F.9.h, following.
- b. A private line service may be connected to another private line if the forms of electrical communication for which they are being used are the same. These private lines may be connected (1) at the premises of the customer, or (2) at the premises of an unauthorized user with a common service point on both private lines.

All connections will be made through channel switching arrangements provided by the Company or through switching equipment provided by the customer or authorized user, except as otherwise provided in F.9.c, following.

- c. Reserved (C)
(D)

- d. Channels created by the customer or authorized user under the provisions of F.5, preceding, may be connected at the customer's or authorized user's premises:

- 1. To channels of voice grade or less furnished by the Company, and channels created therefrom as authorized in F.5.

The connection of channels specified above is subject to the regulations contained in F.1, F.2 and F.3, preceding.

- 2. To entrance facilities furnished by the Company and to channels created therefrom as authorized in F.5.

The connection of channels specified above is subject to the regulations contained in F.1, F.2 and F.3, preceding.

(D)

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

9. Connection of Services Furnished by the Company to the Same Customer (cont'd)

- e. A voice frequency private line service for voice communication, or other types of voice grade channels when used alternately for voice transmission and when in the voice mode, may be connected at a PBX or other switching or connecting arrangement to LDMTS, local exchange service or WATS to form a through-connection over the private and exchange lines where facility conditions permit. It is not contemplated that not more than one such type of connection will be established simultaneously and transmission is not represented as adapted to such connections.

When a two-point private line service (or a multipoint private line service arranged for service solely between two points) using the above type channels is used for transmission of data, through-connections over the private and exchange lines may also be established as described above.

- f. The telecommunications network may be used in conjunction with channels for medium speed facsimile transmission to extend the transmission and reception of pictures and similar material for publication subject to the rates and regulations specified in other parts/sections of this Guidebook. No direct connection of the telecommunications network shall be made to the above type channels at the premises of the customer except where protective connection equipment is provided for this purpose by the Company.
- g. Entrance facility channels may be connected to private line service (including other entrance facility channels) either on the premises of the customer or authorized user or through Centrex control switching equipment which serves the premises of the customer or authorized user provided that:
 1. At such premises the customer has a regular and continuing requirement for the origination or termination of communications over the customer-provided communications system which is extended by the entrance facility channel.
 2. The normal mode of operation of the customer-provided communications system shall be to provide communications originating or terminating at the premises where the connection is made or at the customer's or authorized user's premises served by the Centrex control switching equipment.
 3. Where the connection is made on the premises of the customer or authorized user, the connection shall be made through switching equipment provided either by the customer or authorized user.
 4. The connection shall be to channels of voice grade or less furnished by the Company or to channels created therefrom under the provisions of F.5, preceding.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**

9. Connection of Services Furnished by the Company to the Same Customer (cont'd)

- h. Entrance facility channels may be connected to LDMTS, local exchange service or WATS either on the premises of the customer or authorized user or through Centrex control switching equipment which serves the premises of the customer or authorized user provided that:
 - 1. At such premises the customer-provided communications system which is extended by the entrance facility channel, or the LDMTS, local exchange service or WATS is used for the origination or termination of communications.
 - 2. Where the connection is made on the premises of the customer or authorized user, the connection shall be made through switching equipment provided either by the customer or authorized user.
- i. Channels of less than voice grade may be connected at the customer's premises to telecommunications service through switching equipment provided by the customer. The connection shall be through a data set or a data access arrangement and shall be such that the function of network control signaling is performed by equipment furnished, installed and maintained by the Company.

10. Connection of Services Furnished by the Company to Different Customers

a. A private line service furnished to a customer may be connected:

- 1. With a private line service furnished to a branch or agency of the United States Government for the purposes specified under F.10.a.4 and F.10.a.5, below, provided such connection is authorized by the branch or agency to whose service the connection is made.
- 2. With a private line service or telecommunications service furnished to a different customer, provided such connection is made at the premises of an authorized user as specified in F.10.a.6 through F.10.a.9, following, or (C)
- 3. As specified under F.10.a.10 through F.10.a.12, following, when connections involve (1) channels for wired music distribution, (2) channels of voice grade or less when these are furnished for data transmission to one customer with connection to channels created by another customer, or (3) private lines furnished to the U.S. Army, which may be connected to Associated Press and United Press International private lines for teletypewriter transmission, used in establishing an Emergency Action Notification System.
- 4. Connections as specified in F.10.a.1 through F.10.a.3, preceding, will be provided only when the same types of channels (except LDMTS, local exchange service or WATS lines as set forth in F.10.a.7 and F.10.a.9, following, are involved) are connected and the same forms of electrical communication are used over the connected channels. (C)

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

F. Connections of Terminal Equipment and Communications Systems (cont'd)

10. Connection of Services Furnished by the Company to Different Customers (cont'd)

a. A private line service furnished to a customer may be connected: (cont'd)

5. Where the private line service is furnished to the Government for teletypewriter transmission for the collection and dissemination of (a) weather information, (b) miscellaneous airways information pertaining to the supervision of the flight of aircraft along the civil airways, or (c) agricultural and farm market information, connection may be made as follows:

(a) Receiving only service - for reception of weather and miscellaneous airways information and agricultural and farm market information transmitted over the government service to which it is connected.

(b) Sending and receiving service - for transmission of flight plans to and acknowledgment of such plans from the government service to which connection is authorized.

6. Where the private line utilizes a voice grade data channel and is furnished to the government for data transmission for the collection and dissemination of weather information and for the collection and dissemination of data relating to national defense, connection may be made for such purposes.

7. Reserved

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

F. Connections of Terminal Equipment and Communications Systems (cont'd)

10. Connection of Services Furnished by the Company to Different Customers (cont'd)

a. A private line service furnished to a customer may be connected: (cont'd)

8. Reserved

(C)
(D)

9. A private line furnished to a customer may be connected to a "different" customer's private line if the "different" customer is an authorized user on the other customer's private line and provided that:

- (a) All communications over the interconnected private lines are between the customers and relate directly to their business.
- (b) Such connections be made through switching equipment provided by the customer or authorized user.
- (c) Neither of the private lines are being furnished for foreign exchange service.
- (d) Such private lines shall include channels created by the customer per F.5.

(D)

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

F. Connections of Terminal Equipment and Communications Systems (cont'd)

10. Connection of Services Furnished by the Company to Different Customers (cont'd)

a. A private line service furnished to a customer may be connected: (cont'd)

10. A private line furnished to a customer may be connected to LDMTS or local exchange service furnished to a different customer provided that:

- (a) The customer for the LDMTS or local exchange service is an authorized user of the other customer's private line.
- (b) The connection shall be made through switching equipment provided by the customer or the authorized user.
- (c) The connection shall be such that the functions of network control signaling are performed by equipment furnished, installed and maintained by the Company.
- (d) Such private lines shall include channels created by the customer per F.5.

(D)

(D)

11. Private lines used for teletypewriter transmission furnished to the U.S. Army may be connected to private lines used for teletypewriter transmission to the Associated Press and United Press International for the purpose of establishing an Emergency Action Notification System provided that said customers agree to such connection.

(C)

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**11. U.S. Government Executive Departments and Agencies^{/1/}

- a. Equipment of a department or agency of the executive branch of the U.S. Government used for the purpose of disguising or concealing the contents or meaning of communications may be connected to Company services, subject to the regulations and conditions stated below:
- b. The head of the department or agency whose equipment is to be connected, or his authorized representative, shall notify the Company in writing that such connection is necessary to safeguard official information which requires protection in the interests of national defense, or other confidential official information disclosure of which to unauthorized persons would be detrimental to the public interest.
- c. The government equipment shall be so constructed, maintained and operated as to work satisfactorily with the facilities of the Company.

12. Entrance Facilities^{/1/}

- a. Entrance facility channels are furnished to the customer by the Company for the purpose of extending customer-provided communications systems to a service point of the customer or authorized user or to Centrex control switching equipment serving the premises of the customer or authorized user for use at such premises.

These channels are furnished for half-duplex or duplex operation on a two-point basis. The approximate bandwidth is 300-3000 Hz.

- b. Regulations

Customer-provided communications systems may be connected through connecting arrangements furnished by the Company with entrance facilities furnished to the same customer for the purpose of extending the customer-provided communications system to a service point of the customer or authorized user. The channels created therefrom per 6.5, preceding, may be connected at such customer's or authorized user's service point to other customer-provided communications systems per F.4.d.1.(a), F.4.d.1.(b) and F.4.d.a.(d), preceding.

Entrance facilities are furnished (a) within an exchange, or (b) located 25 airline miles or less from the point at which the customer-provided communications channel is connected to the Company entrance facility.

Requests for entrance facilities outside an exchange or over 25 airline miles will be reviewed on a case-by-case basis.

/1/ Obsolete - cannot add to an existing system, cannot outside move, cannot supersede.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**12. Entrance Facilities^{/1/} (cont'd)

c. Connection of Customer-Provided Terminal Equipment or Communications Systems to Company Entrance Facilities

1. Customer-provided communications channels may be connected with entrance facilities furnished by the Company for the purpose of extending the customer-provided communications channels. The connection shall be through connecting arrangements furnished, installed and maintained by the Company.
2. Entrance facilities may be connected to customer-provided transmitting and receiving terminal equipment or to customer-provided communications systems for the purpose of communicating with transmitting and receiving terminal equipment located on the premises on which the service point is located. The connection shall be through connecting arrangements furnished, installed and maintained by the Company.

d. Minimum Protection Criteria

Customer-provided channels, communications systems or terminal equipment must comply with the minimum protection criteria set forth in F.4.f, preceding.

e. Rates and Charges - Monthly Service

Special charges are applied for entrance facilities on a case-by-case basis.

f. Exceptions

In compliance with the FCC Memorandum Opinion and Order 79-154, adopted March 15, 1979, "Interconnections with Private Interstate Communications Systems", and pending the completion of a rulemaking proceeding announced therein, the following facilities are provided without regard to F.12.a and F.12.b, preceding.

Aeronautical Radio Inc. (ARINC)

A 4-wire voice grade facility between ARINC microwave terminals at 4635 Southwest Freeway and 1900 St. James Street, Houston, Texas.

Cosden Chemical

A 4-wire voice grade facility between ARCO microwave terminal at Highway 80 Midland, Texas and the customers service point at I-20 E., Big Spring, Texas.

Union Oil

A 4-wire voice grade facility between ARINC microwave terminals at 4635 Southwest Freeway and 1900 St. James Street, Houston, Texas.

/1/ Obsolete - cannot add to an existing system, cannot outside move, cannot supersede.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**13. Connections of Customer-Provided Test Equipment^{/1/}

a. Totally Protective Connections

1. Customer-provided test equipment may be connected to those private line services specified in F.2, preceding, at the premises of the customer through registered or grandfathered terminal equipment, protective circuitry, or communications systems subject to Part 68 of the FCC's Regulations which, either singularly or in combination, assures that all of the requirements of Part 68 of the FCC's Regulations (total protection) are met at the demarcation point.
2. Customer-provided test equipment may be connected to those private line services specified in F.4.a.2, preceding, at the premises of the customer either (a) directly at the demarcation point, or (b) through other equipment, provided that the minimum protection criteria specified in F.4.f, preceding, are continually met at the demarcation point.

b. Interim Program Connections of Customer-Provided Test Equipment

Customer-provided test equipment may also be connected at the premises of the customer to those private line services specified in F.2.g, preceding, either (a) directly at the demarcation point, or (b) through terminal equipment, protective circuitry, or communications systems subject to Part 68 of the FCC's Regulations which does not provide protection for signal power control under the following Interim Program provided that:

1. The customer-provided test equipment is limited to transmission signal power generating and/or detection devices, or similar devices, used by the customer for the detection and/or isolation of a communications service fault.
2. The customer-provided test equipment is of a type that was lawfully directly connected to private line service as of March 6, 1981. Such test equipment may remain connected, be moved or reconnected during the life of the test equipment unless it has been subsequently modified.
3. Direct connection of customer-provided test equipment or connections through Company-provided terminal equipment, or communications systems subject to Part 68 of the FCC's Regulations are made through Company-provided jacks or as otherwise authorized by the Company.

/1/ The Interim Program for the Connection of Customer-Provided Test Equipment, unless sooner canceled or changed, will remain in effect until a permanent program is adopted by the FCC as a result of Part 68 Rulemaking in CC Docket No. 81-216,85 F.C.C.2d 868 (1981).

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

F. Connections of Terminal Equipment and Communications Systems (cont'd)

13. Connections of Customer-Provided Test Equipment^{/1/} (cont'd)

b. Interim Program Connections of Customer-Provided Test Equipment (cont'd)

4. Customer-provided test equipment must be operated per the institutional procedures for signal power control as specified in F.13.c, following.
5. The customer notifies the Company of each private line service at each premises to which the customer-provided test equipment will be connected in advance of the initial connection. The customer must also notify the Company when such test equipment is permanently disconnected at each premises.
6. No customer-provided test equipment or combination of test equipment with terminal equipment, protective circuitry or communications systems subject to Part 68 of the FCC's Regulations (including but not limited to wiring) may cause electrical hazards to Company personnel, damage to Company equipment, malfunction of Company billing equipment, or degradation of service to persons other than the user of the subject test equipment or the user's calling or called party.

/1/ The Interim Program for the Connection of Customer-Provided Test Equipment, unless sooner canceled or changed, will remain in effect until a permanent program is adopted by the FCC as a result of Part 68 Rulemaking in CC Docket No. 81-216,85 F.C.C.2d 868 (1981).

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**13. Connections of Customer-Provided Test Equipment^{/1/} (cont'd)

c. Institutional Procedures for Signal Power Control

1. Under F.13.b.4, preceding, the customer must comply with the following institutional procedures:
 - (a) The customer must install, operate and maintain the test equipment so that its signal power at the demarcation point complies with Subpart D of Part 68 of the FCC's Regulations.
 - (b) The operator/maintainer responsible for the test equipment signal power present at the demarcation point must be trained to perform these functions by successfully completing one of the following:
 - (i) a training course provided by the manufacturer of the test equipment, or
 - (ii) a training course provided by the customer, or authorized representative of the customer, using training materials and instructions provided by the manufacturer of the test equipment, or
 - (iii) an independent training course (e.g., trade school or technical institution) recognized by the manufacturer of the test equipment, or
 - (iv) in lieu of the preceding training requirements, the operator/maintainer is under the control of a supervisor trained per F.13.c.1.(b)(i) through F.13.c.1.(b)(iii), preceding.

Upon request, the customer is required to provide proper documentation to demonstrate compliance with the requirements in this F.13.c.1.(b).

- (c) Advance notice must be given to the Company in the form of a notarized affidavit before the initial connection of the customer-provided test equipment at each premises after April 9, 1981. A copy of the affidavit must also be maintained at the customer's premises. The affidavit must contain the following information:
 - (i) The full name, business address, business telephone number and signature of the customer or authorized representative who has responsibility for the operation of the test equipment.

/1/ The Interim Program for the Connection of Customer-Provided Test Equipment, unless sooner canceled or changed, will remain in effect until a permanent program is adopted by the FCC as a result of Part 68 Rulemaking in CC Docket No. 81-216,85 F.C.C.2d 868 (1981).

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**13. Connections of Customer-Provided Test Equipment^{/1/} (cont'd)

c. Institutional Procedures for Signal Power Control (cont'd)

1. (cont'd)

(c) (cont'd)

- (ii) The lines to which the test equipment will be either connected to or arranged for connection to.
- (iii) A statement that all operations associated with the establishment, maintenance and adjustment of the test equipment signal power present at the demarcation point will comply with Subpart D of Part 68 of the FCC's Regulations.
- (iv) A statement describing how each operator of the test equipment will meet and continue to meet the training requirements for persons installing, connecting, adjusting or maintaining the test equipment.

2. Extraordinary Procedures

- (a) The Company may invoke extraordinary procedures to protect the telecommunications network where one or more of the following conditions are present:
 - (i) Information provided in the affidavit gives reason to believe that a violation of Part 68 of the FCC's Regulations or the institutional procedures set forth in F.13.c.1, preceding, is likely.
 - (ii) Harm has occurred and there is reason to believe this harm was a result of operations performed under the institutional procedures set forth in F.13.c.1, preceding.
- (b) The extraordinary procedures, which can be invoked by the Company, include:
 - (i) Requiring the use of protective apparatus which either protects solely against excessive signal power or which assures that all of the requirements of Part 68 of the FCC's Regulations are met at the demarcation point.
 - (ii) Disconnecting service.

/1/ The Interim Program for the Connection of Customer-Provided Test Equipment, unless sooner canceled or changed, will remain in effect until a permanent program is adopted by the FCC Commission as a result of Part 68 Rulemaking in CC Docket No. 81-216,85 F.C.C. 2d 868 (1981).

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**F. Connections of Terminal Equipment and Communications Systems (cont'd)**13. Connections of Customer-Provided Test Equipment^{/1/} (cont'd)

c. Institutional Procedures for Signal Power Control (cont'd)

2. Extraordinary Procedures (cont'd)

(c) A charge equal to the Maintenance of Service Charge will apply when:

- (i) It is necessary to send a repair person to the premises where the test equipment is connected because a condition as set forth in F.13.c.2.(a), preceding, exists, and
- (ii) A failure to comply with the institutional procedures for signal power control is disclosed.

G. Method of Applying Rates

1. The method of applying rates for Special Bridging Service is as set forth in Part 15, Section 2. (C)
The paragraphs in Part 20, Section 15 include Local Area Data Service^{/2/} and Served Direct Service^{/2/}.
2. The method of applying rates for interexchange and intraexchange private line service involving two-point and multipoint services for Series 100, Series 200, Series 300 and Series 400 is determined as follows:

a. Local Channel

1. Two-point

A local channel charge shall apply for the first channel termination, per service, involved on a customer or authorized user premises. Charges are based on the airline distance in quarter miles, or fraction thereof, between each customer or authorized user premises and the serving office. The following have only one local channel: 314B, 314C, 315, 316, 317A^{/2/} and 317B^{/2/}. When terminated in a Network Reconfiguration Service^{/3/} the following may have only one local channel: 420, 422, 423, 424, 425 and 435.

2. Multipoint

In addition to applicable private line service charges, a bridging charge per channel bridged, applies when three or more voice grade channels connect at the same location. Bridging charges do not apply to foreign exchange, foreign serving office and Types 315, 316, 317A and 317B.

/1/ The Interim Program for the Connection of Customer-Provided Test Equipment, unless sooner canceled or changed, will remain in effect until a permanent program is adopted by the FCC as a result of Part 68 Rulemaking in CC Docket No. 81-216, 85 F.C.C. 2d 868 (1981).

/2/ Obsolete -- Applicable to existing installations at existing locations for existing customers.

/3/ Effective October 30, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers. See Part 20, Section 15.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**G. Method of Applying Rates (cont'd)**

2. (cont'd)

a. Local Channel (cont'd)

3. Determination of Local Channel Mileage

- (a) A local channel includes a loop and such other equipment as required to provide a private line channel from a customer's premises to the serving central office for that premises.
- (b) The Company may use city maps of the appropriate scale or other means to measure private line local channels. The maps may be paper or digitized, but need not include detail of building locations or customer campus arrangements.
- (c) The Company will measure the private line local channel distance between the customer's requested service address and the serving central office for that address (the location of the customer's street address on a map may be estimated). Mileages are measured in units of quarter miles or tenths of a mile. For billing purposes fractional units are rounded to the next higher unit.
- (d) The customer may provide documented mileage measurements that show the placement of the customer's building on a premises. The airline mileage measurement to the building where the requested private line service is to be terminated may be different from the measurement obtained by the Company using its standard maps. The Company may accept the customer's mileage upon validation by the Company.
 - (i) Acceptable validation will be an official scale map of the customer's premises showing the building location on the property in addition to a measurement verification from a standard scale city map of the airline distance between the property location and the serving central office. If this information is sufficient and not in dispute, no additional validation will be necessary.
 - (ii) If a dispute exists, or if acceptable documentation of the location on the customer's premises of the served building in question is not available, then other official validation will be necessary. For example, a document signed by a registered professional surveyor, professional engineer, professional cartographer, etc. verifying the airline mileage will be acceptable.
 - (iii) Attestation of mileage measurements by a non-professional such as a customer or a consultant is not acceptable validation.
 - (iv) The Company reserves the right to verify mileage validation documentation submitted pursuant to (i) and (ii) above.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**G. Method of Applying Rates (cont'd)**

2. (cont'd)

a. Local Channel (cont'd)

3. Determination of Local Channel Mileage (cont'd)

- (e) Billing adjustments to existing customers may result from mileage validations pursuant to (d) above.
 - (i) Such adjustments (if any) will be made prospectively from the date of notification by the customer (or the customer's agent) to the Company that the private line local channel mileage charge to the served building is in error and should be adjusted.
 - (ii) If the customer presents adequate documentation based on the Company and/or customer-provided data, that the served building and service to the served building existed prior to the date of notification by the customer to the Company, then the Company shall adjust the billing in arrears to the installation date of the service.
 - (iii) The Company reserves the right to verify billing adjustment documentation submitted pursuant to (ii) above.
- (f) Local channels normally measured to a theoretical serving office may, instead, be measured to the actual adjacent serving office, at the customer's request.
 - (i) Billing adjustments (if any) will be made prospectively from the date of notification by the customer (or the customer's agent) to the Company that the private line local channel mileage should be measured to the adjacent serving office.
 - (ii) If the customer elects to have a local channel measured to the adjacent serving office, all local channels for the customer's private line services will be rated to the adjacent serving office. If the customer elects to have a local channel measured to the theoretical serving office, all local channels for the customer's private line services will be rated to the theoretical serving office.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

G. Method of Applying Rates (cont'd)

2. (cont'd)

a. Local Channel (cont'd)

4. Service Charges Do Not Apply

(a) Service charges do not apply as follows:

- Service reestablished, within the same exchange, after the destruction or partial destruction of the customer's premises by means beyond the control of the customer whether at the same or another location. However, if service is established at a new location and the customer later moves back to the old location, Service Charges are applied in connection with the re-establishment of service at the old location.^{/1/}

/1/ For customers displaced by the major floods of October, 1994, Service Charges do not apply to the establishment of service at an interim location nor to the later reestablishment of service at the same or different location. This provision expires January 31, 1995.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**G. Method of Applying Rates (cont'd)**

2. (cont'd)

b. Interoffice Channel

1. Two-Point

Intraexchange - When demarcation points of an intraLATA, intraexchange private line service are located in different serving office areas, interoffice mileage charges apply. Charges are based on the V & H distance between the serving offices.

Interexchange intraLATA - When a demarcation point of an interexchange intraLATA private line service is located in an area served by a serving office that is not also the primary serving office, interoffice mileage charges apply. Charges are based on the V & H distance between the primary serving office and the serving office.

2. Multipoint

Each channel connecting primary serving offices with serving offices, or serving offices with serving offices is considered a separate channel for which mileage is independently computed. When the customer requests all or some of the offices connected in a specific sequence, the channel charges will be determined in that sequence. Otherwise, mileage will be charged for in a manner that results in the lowest possible total interoffice channel charges. Bridging charges per channel bridged apply when the three or more voice grade channels connect at the same location. Bridging charges do not apply to foreign exchange, foreign serving office, and Types 315, 317A^{/1/} and 317B^{/1/}.

c. Channel Terminals

Channel terminals charges apply at (1) each termination of an interexchange intraLATA channel, and (2) each termination of an interoffice channel.

d. Interexchange IntraLATA Channel

1. Two-point

When the demarcation points of a private line service are located in different exchanges or metropolitan exchanges, interexchange intraLATA mileage charges apply.

Each exchange and each zone of a metropolitan exchange has one primary serving office. Charges are based on the V & H distance between primary serving offices.

Where "other line" charges apply, mileage is calculated between a Company primary serving office and a point of connection with the facilities of another LEC. This interexchange mileage shall not exceed the distance between the primary serving offices.

/1/ Obsolete -- Applicable to existing installations at existing locations for existing customers.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

G. Method of Applying Rates (cont'd)

2. (cont'd)

d. Interexchange IntraLATA Channel (cont'd)

2. Multipoint

Each channel connecting primary serving offices is considered a separate channel for which mileage is independently computed. When the customer requests all or some of the primary serving offices to be connected in a specific sequence, the interexchange channel charges will be determined in that sequence. Otherwise, mileage will be charged in a manner that results in the lowest possible total interexchange channel charges. Bridging charges per channel bridged, apply when three or more voice grade channels, connect at the same location. Bridging charges do not apply to foreign exchange, and Types 315, 316, 317A^{/1/} and 317B^{/1/}.

(C)

e. Additional Point of Termination of a Local Channel in Different Buildings (Same Premises)^{/2/}

1. A charge, as provided in Part 15, Section 2, for extending a local channel and terminating the channel at a demarcation point in a different building on the same premises shall apply in lieu of additional local channel charges.^{/2/}
2. When all demarcation points of a single private line service are located in different buildings on the same premises, the charge for the channel between each pair of buildings shall be the same as the charge for extending a local channel to a demarcation point in different buildings on the same premises as specified in Section 2.^{/2/}

f. Additional Point of Termination in Same Building^{/2/}

A charge as provided in Part 15, Section 2, for extending a local channel and terminating the channel at a demarcation point in the same building, shall apply in lieu of additional local channel charges.^{/2/}

g. Category "A" Primary Serving Offices

Those offices to which Schedule 1 and 2 interexchange channel rates apply for Series 300 and 400 channels.

Abilene - Orchard	Houston - Capitol
Amarillo - Drake	Laredo
Austin - Greenwood	Longview - Main
Beaumont - Beaumont 835	Lubbock - Porter/Sherwood
Corpus Christi - Tulip	Midland - Mutual
Dallas - Taylor	San Angelo - 653
El Paso - 542	San Antonio - Capitol
Fort Worth - Edison	Sweetwater
Freeport	Waco - Plaza
Harlingen	

/1/ Obsolete -- Applicable to existing installations at existing locations for existing customers.

/2/ Obsolete -- See Part 15, Section 2.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**G. Method of Applying Rates (cont'd)**

2. (cont'd)

h. Category "A" Primary Serving Offices - U. S. Government

Those offices in addition to G.2.g, preceding, to which Schedule 1 and 2 interexchange channel rates apply for Series 300 and 400 channels for service furnished only to a branch or agency of the United States Government.

Apollo
Ennis

Seguin

i. Service Charges

A charge applies per point of termination installed or moved as provided in Part 15, Section 2, following. Those services with one local channel shall be billed as provided in Part 15, Section 2, following. Private line service charges for local channel Type 315 does not apply for inside moves within the same building on the same premises.

j. Bridging charges per channel bridged apply when three or more voice grade channels connect at the same location. Bridging charges do not apply to foreign exchange, foreign serving office and Types 315, 317A^{/1/} and 317B^{/1/}.

(C)

k. Signaling

Signaling charges for Series 400 channels are applicable per point of termination, except for Type 428 which is applicable per local channel. Rates and charges are found in Part 15, Section 2.

Local channel Types 428 require Type A, B or C loop signaling, except for the following:

Signaling charges do not apply to different buildings, same premises PBX (or similar) stations. Loop signaling is optional on Type 428 local channels associated with a grandfathered customer-provided PBX (or similar) switching system.

Local channel Types 424 require E&M signaling.

E&M signaling is optional on Type 424 local channels terminating in a grandfathered customer-provided PBX (or similar) switching system.

l. Special Routing

The private line services furnished under this guidebook are provided over such routes as the Company may elect. Special routing is involved where, to comply with requirements specified by the customer, the Company furnished the private line service via serving offices and/or primary serving offices other than those through which the service would normally be routed. Each channel connecting serving offices and/or primary serving offices is considered a separate channel for which charges are independently computed. Special routing will be provided only where suitable facilities are available.

/1/ Obsolete -- Applicable to existing installations at existing locations for existing customers.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)**G. Method of Applying Rates (cont'd)**

2. (cont'd)

m. Determination of Mileage

1. For the purpose of determining airline mileages, vertical and horizontal grid lines have been established across the United States and Canada. The spacing between adjacent vertical grid lines and between horizontal grid lines represents a distance of one coordinate unit. This unit is the square root of 0.1, expressed in statute miles. A vertical (V) and a horizontal (H) coordinate is computed for each primary serving office and serving office from its latitude and longitude location by use of appropriate map-projection equations. A pair of V-H coordinates locates a primary serving office or serving office for determining airline mileages, at a particular intersection of an established vertical grid line with an established horizontal grid line. The distance between any two primary serving offices or serving offices is the airline mileage computed as explained in 2., following.
2. To determine the rate distance between any two primary serving offices or serving offices, proceed as follows:

- (a) Obtain the "V" and "H" coordinates for each primary serving office or serving office.
- (b) Obtain the difference between the "V" coordinates of the two primary serving offices or serving offices. Obtain the difference between the "H" coordinates.

Note: The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.

- (c) Square each difference obtained in (b), above.
- (d) Add the squares of the "V" difference and the "H" difference obtained in (c), above.
- (e) Divide the sum of the squares obtained in (d), above, by 10.
- (f) Obtain the square root of the result obtained in (e), preceding. This is the rate distance in miles. (Fractional miles are rounded to the next higher quarter mile.) The rate for each quarter mile is 25% of the rate per mile rounded to the nearest cent.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

G. Method of Applying Rates (cont'd)

2. (cont'd)

m. Determination of Mileage (cont'd)

2. (cont'd)

Example:

The rate distance is required between the Dallas Zone of the Dallas Metropolitan Exchange and the Fort Worth Zone of the Fort Worth Metropolitan Exchange

	<u>V</u>	<u>H</u>
Dallas Zone	8432	4033
Ft. Worth Zone	<u>8479</u>	<u>4123</u>
difference	47	90
squared	2209 + 8100 = 10,309	

$$\sqrt{\frac{10,309}{10}} = 32.11 = 129 \text{ quarter miles}$$

H. Exceptions

In those cases where an intraexchange service has stations in Texas and another state, the method of applying rates in G.1 and G.2 is modified to apply the charges for that portion of the private line service located in the other state pursuant to that state's tariff.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

I. Reserved

(C)

(D)

(D)

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

J. Special Charges, Fees and Taxes

There shall be added to the customer's bill for service, an additional charge equal to the pro rata share of any occupation, franchise, business, license, excise, privilege or other similar charge or tax, now or hereafter, imposed upon the gross receipts or revenue of the Company by a municipal taxing body or municipal authority whether by statute, ordinance, law or otherwise, and whether presently due or to hereafter become due.

The charge applicable to each customer will appear separately on the customer's regular monthly bill and shall be determined on a basis equal to the tax levied by each municipal taxing body or municipal authority. The amount of charge to the customer shall be computed by dividing the tax expressed as a percentage by 100% minus the tax expressed as a percentage and multiplying the decimal thus obtained by the customer's service charges to which such tax applies as reflected by the following formula:

$$\frac{\text{Tax}\%}{100\% - \text{Tax}\%} \times \text{Service Charges Subject to Tax} = \text{Amount of Charge to Customer}$$

The amount of charge to the customer will be rounded to the nearest cent.

K. Surcharge

1. General

A surcharge applies to each interexchange private line service as follows:

	<u>Monthly Rate</u>	<u>USOC</u>
Surcharge	\$25.00	S25

Two-Point Service - One charge is applicable.

Multipoint Service - One charge is applicable for each local channel in excess of one.

This surcharge compensates the Company for use of the local exchange network when private line service is connected to a PBX or equivalent device which is capable of interconnecting the private line services with local exchange service ("leaky PBX"). The Company will automatically bill the appropriate surcharge on each private line service installed irrespective of whether the interconnection capability exists in the customer's premises equipment or in a Centrex-CO type switch unless the service is exempt from the surcharge as set forth in K.2, following.

REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES) (cont'd)

K. Surcharge (cont'd)

2. Exceptions to the Surcharge Application

- a. All Series 100, 200 and local area data service^{/1/} private line channels. (C)
- b. The surcharge is not applicable to intraexchange private line services, nor to private line services that are terminated between exchanges that have *mandatory* Extended Area Calling Service arrangements as that service is defined in Part 4, Section 2.
- c. In addition, there are two means by which the customer may be exempted from the monthly surcharge. First, if the customer certifies that the private line service is terminated in a device not capable of interconnecting the service with local exchange service, no surcharge will apply. Second, if the customer certifies that the private line service is associated with a switched access service in the same LATA that is subject to Carrier Common Line Charges, no surcharge will apply.

	<u>Monthly Rate</u>	<u>USOC</u>
Surcharge Exemption	\$0.00	S25EX

3. Certification

The certification will be in the form of a written notification to the Company. The notification may be provided (1) at the time the service is ordered, or (2) at such time as the service is reterminated to a device not capable of interconnecting to the local exchange network, or (3) at such time as the private line service becomes associated with a switched access service that is subject to Carrier Common Line Charges.

If a written certification is not received at the time an order for service is placed, the surcharge will be applied. Exempt status will become effective on the date certification is received by the Company.

4. Crediting the Surcharge

The Company will cease billing the surcharge when certification that the service has become exempt from the surcharge as set forth in K.3, preceding, is received. If the status of the service was changed prior to receipt of the exemption certification, the Company will credit the customer's account an amount up to and limited to 90 days (3 months) billing based on the effective date of the change specified by the customer in the letter of certification.

5. Definitions

Private Branch Exchange (PBX)

A private switching system, either manual or dial, usually serving an organization such as a business company or a government agency and usually located on the customer's premises.

"Leaky PBX"

A PBX or equivalent device which is capable of interconnecting the private line services with local exchange service.

/1/ Obsolete -- Applicable to existing installations at existing locations for existing customers.

LOCAL ACCESS AND TRANSPORT AREAS

A. General

Local Access and Transport Areas (LATAs) denote geographic areas established for the provision and administration of communications service. LATAs encompass one or more designated exchanges, which are grouped to serve common social, economic and other purposes.

LIST OF V-H COORDINATES

A. General

1. As set forth in **REGULATIONS (FOR ANALOG PRIVATE LINE SERVICES)**, the rate distance between any two primary serving offices or other serving offices is determined from vertical (V) and horizontal (H) coordinates. Listed below are the V-H coordinates for determination of private line mileage.
2. The primary serving office is listed first for each exchange. V-H coordinates for these offices are shown to the left of the exchange as "Interexchange V-H" for use in determination of mileage between exchanges. "Intraexchange V-H" coordinates for use in determination of interoffice mileage within exchanges and between zones of a metropolitan exchange are shown to the right of the associated serving office codes.
3. The exchanges are arranged to indicate those of the Company (shown in all capital letters, i.e., ABILENE) and those of other local exchange companies (LECs) (shown with initial capital letter, i.e., San Angelo).
4. Texas LATA designations for Company exchanges are indicated as follows: Abilene-ABLN; Amarillo-AMRL; Austin-AUST; Beaumont-BUMT; Brownsville-BWVL; Corpus Christi-CRCH; Dallas-DLLS; El Paso-ELPS; Hearne-HERN; Houston-HSTN; Longview-LGVW; Lubbock-LBCK; Midlan-MDLD; San Antonio-SNAN; Waco-WACO; Wichita Falls-WCFL. LATA association of LEC exchanges is also indicated.
5. Texas market area designations for LECs are indicated as follows: Bryan-BRYN; San Angelo-SANG. The Bryan market area LEC exchanges are associated with the Company's Hearne LATA as intraLATA exchanges for the determination of private line mileage. The San Angelo market area LEC exchanges are not associated with any Company LATA.
