Original Page 1

SECTION A013 - Additional Engineering, Additional Labor and Miscellaneous Services

13 ADDITIONAL ENGINEERING, ADDITIONAL LABOR AND MISCELLANEOUS SERVICES

13.1 Except as otherwise provided below, regulations and rates in Section 13 of the Ameritech Operating Companies Tariff F.C.C. No 2 relevant to intrastate service provided in the state of Wisconsin apply to service provided under this tariff.

13.2 Local Exchange Toll Provider Exceptions

Testing Services for Switched Access are not applicable to Switched Access provided to a local exchange carrier that is providing intraLATA service as an interexchange carrier.

13.3 Miscellaneous Services

13.3.1 Public Telephone Carrier Selection Service Arrangements

(A) General

Service arrangements that allow convenient user selection of an interexchange carrier for completion of an end user's call are provided at selected public telephone locations. Two general types of service are available to interexchange carriers (customers) under this tariff. Select-a-Carrier Charge-a-Call Service requires the end user to depress a carrier specific button located on the public telephone station. Card Reader Automatic Carrier Selection Service requires the use of a carrier provided magnetic-card containing the carrier's identity.

Service is provided in accordance with the following provisions which apply in addition to, or in lieu of, the regulations contained in Section 2 of Ameritech Operating Companies F.C.C. Tariff No. 2.

(B) Regulation and Description of Service

(1) Description of Service

(a) Select-a-Carrier Charge-a-Call Service

Select-a-Carrier Charge-a-Call Service is an arrangement that allows selection of an interexchange carrier by depression of a button located on a panel associated with a public telephone station. A button is identified with the logo of each customer subscribing to the service. Depression of the button initiates the carrier's access code to the network and will result in connection to the interexchange carrier's service. Two Select-a-Carrier arrangements are offered. Arrangement 1 is suitable for carriers utilizing Feature Group A Switched Access. Arrangement 2 is suitable for carriers utilizing Feature Group B Switched Access.

13.3.1 Public Telephone Carrier Selection Service Arrangements (Cont'd)

(B) Regulation and Description of Service (Cont'd)

(1) Description of Service (Cont'd)

(b) Card Reader Automatic Carrier Selection Service

Card Reader Automatic Carrier Selection Service is an arrangement that allows selection of an interexchange carrier through insertion of the interexchange carrier's magnetic striped card into the card reader device. A sign is provided identifying the logo of each customer's card subscribing to the service.

Insertion and removal of the card initiates auto dialing of the carrier's access code to the network and will result in connection to the interexchange exchange carrier's service. The billing number encoded on the card is stored, then downloaded upon a signal from the customer after the user dials the called number. Card Reader Automatic Carrier Selection Service is suitable for carriers utilizing Feature B, D or 800 Switched Access.

(c) Subscription Areas

Select-a-Carrier Charge-a-Call Service and Card Reader Automatic Carrier Selection Service are offered only at public coinless telephone stations selected by the Telephone Company within defined subscription areas. Customers must subscribe to service at each station established as a service location within a given subscription area. In the case of Select-a-Carrier Service, the description of the subscription area and the number and location of stations will be identified at the time of initial subscription, except that stations may be added or deleted at the sole option of the Telephone Company during the subscription period, provided that the number of stations will not exceed a maximum number established for the area at the time of initial subscription. In the case of Card Selection Service, the subscription area will encompass all stations in a LATA equipped to provide the service. Addition or deletion of stations during the subscription period will be identified to customers as they occur. In the case of Select-a-Carrier Charge-a-Call Service, a proposed subscription area will be established only where a minimum of three customers subscribe to service.

13.3 Miscellaneous Services (Cont'd)

13.3.1 Public Telephone Carrier Selection Service Arrangements (Cont'd)

(B) Regulation and Description of Service (Cont'd)

(2) Subscription Period

Select-a-Carrier Charge-a-Call Service and Card Reader Automatic Carrier Selection Service in a subscription area are provided for an initial 12-month subscription period applicable to each area. Customers must subscribe for the full 12-month subscription period, except that a customer may be added to existing stations in an established area upon payment of an installation charge for subsequent addition. In the event of such addition, the initial subscription period for that customer will be the remainder of the initial subscription period for the area. Following expiration of the initial subscription period for the area, at the option of the Telephone Company, service may be continued on a month-to-month basis.

(4) Carrier Logo and Logo Position

The customer shall be responsible for supplying a camera-ready copy of its logo or graphics designating such logo in the dimensions required by the Telephone Company. The dimension and style will be dependent upon whether the logo or graphics are to be utilized to identify the Carrier's Select-a-Carrier button or in the signage or instructions associated with the Card Selection Service. The position of a customer's logo on the Select-a-Carrier Service panel will be established by lottery at the inception of the initial subscription for the individual subscription area. The position of a customer's logo on the signage or instructions associated with Card Reader Automatic Carrier Selection Service will be established by lottery at the inception of the initial subscription for the initial subscription area and will be the same for all subscription areas. Customers added during a subscription period will be positioned contiguous to pre-existing customers. Where a customer changes its logo and requests the Telephone Company to change materials utilizing the logo, the customer requesting the change will be responsible for payment of charges based on the actual costs incurred by the Telephone Company in accomplishing the change.

(B) Regulation and Description of Service (Cont'd)

(4) Access Codes

The customer must provide the Telephone Company with its access code at inception of service. When a customer changes the access code applicable to the provision of its service from a Select-a-Carrier station where it has been subscribing to service, the customer will be responsible for payment of a charge equivalent to a service order charge for change and a central office work charge as shown in Section 3 of P.S.C. of W. No. 1 for each area affected. When a customer changes the access code applicable to the provision of its service from a Card Selection station where it has been subscribing to service, the customer will be responsible, per station, for payment of a service order charge and premises work charges equivalent to those for Semi-Public Telephone Service. The Telephone Company will complete the access code changes on all stations in 30 days. The customer shall provide to the Telephone Company a suitable number of the customer's cards for installation and maintenance purposes.

(5) Change in Type of Service

The customer may change from Type 1 service to Type 2 Select-a-Carrier service during the subscription period. Charges for such change are the charges associated with the attendant access code change.

(6) Allowance for Service Interruptions

No credit to monthly charges apply for interruptions affecting Select-a-Carrier Service or Card Selection Service.

(7) Discontinuance of Service

In the event that a customer discontinues either the Select-a-Carrier Service or the Card Selection Service during a subscription period, the customer shall be required to pay monthly charges for the remainder of the subscription period. In addition, for Select-a-Carrier Charge-a-Call Service, a termination charge of \$45.00 applies for each station at which service is discontinued. In the event that all customers agree to simultaneously discontinue Select-a-Carrier Charge-a-Call Service, each customer shall be liable only for the monthly charges for the remainder of the subscription period.

(B) Regulation and Description of Service (Cont'd)

(8) Cancellation of an Order for Service

- (a) When a customer cancels an order for Select-a-Carrier Service prior to start of service and the number of remaining subscribers falls below the minimum, the subscription area will not be established.
- (b) When a customer cancels an order for Select-a-Carrier or Card Selection Service, a cancellation charge will apply. Charges will be determined in the same manner as set forth for Switched and Special Access Services in Section 5 of Ameritech Operating Companies F.C.C. Tariff No. 2.

(9) Non-recurring Charges

Non-recurring Charges for installation apply as set forth in (B) following. In addition, Service Order Charges as set forth in Section 3 of P.S.C. of W. No. 1 apply for establishment, additions or changes to service.

(10) Payment of Rates, Charges and Deposits

In lieu of the provisions contained in Section 2 of Ameritech Operating Companies F.C.C. Tariff No. 2, regulations contained in Section 2.2.3 of P.S.C. of W. No. 1 apply, as appropriate, to the provision of Select-a-Carrier or Card Selection service.

13.3.2 Interexchange Carrier Public Service Line

The following provisions apply in addition to, or in lieu of, the regulations contained in Section 2 Ameritech Operating Companies F.C.C. Tariff No. 2.

(A) General

(1) Description of Service

In central offices where facilities permit, the Telephone Company will provide an Interexchange Carrier Public Service Line (ICPSL). An Interexchange Carrier Public Service Line is a local exchange service line provided at the request of the customer at a location accessible to the general public for connection to a non-coin public telephone instrument provided by the carrier.

The use of interexchange facilities, Foreign Central Office or Foreign Exchange Service to provide an ICPSL is not permitted.

An ICPSL may only be used to originate local, intraLATA and interLATA calls. Incoming calling is not provided. Completion of interLATA calls requires use of Switched Access Services obtained by interexchange carriers under the appropriate access tariff. Local and intraLATA calls will be completed and billed by the Telephone Company at appropriate tariff rates.

PART A013 - Additional Engineering, Additional Labor and Miscellaneous Services

SECTION A013 - Additional Engineering, Additional Labor and Miscellaneous Services

13 ADDITIONAL ENGINEERING, ADDITIONAL LABOR AND MISCELLANEOUS SERVICES

13.3 Miscellaneous Services (Cont'd)

13.3.2 Interexchange Carrier Public Service Line (Cont'd)

(A) General (Cont'd)

(2) Service Features

An Interexchange Carrier Public Service Line (ICPSL) will be arranged to restrict outgoing calls to non-sent-paid calls. Calls through an operator will be restricted to those charged to the called number or a third number.

An ICPSL will be equipped with TOUCH-TONE. Charges for TOUCH-TONE under P.S.C. of W. No. 1 will apply.

Directory listings are not available for an ICPSL.

(3) Requirements of installations utilizing an Interexchange Carrier Public Service Line (ICPSL)

Installations utilizing an ICPSL must:

- (a) Provide access to 911 Emergency Service (where available);
- (b) Provide access to "O" Operator ("O"-minus) to allow calls to public safety agencies (e.g., police, fire);
- (c) Comply with relevant statutes governing public telephone installations.

(4) Payment of Rates, Charges and Deposits

In lieu of the provisions for payment contained in Section 2 of Ameritech Operating Companies F.C.C. Tariff No. 2, regulations contained in P.S.C. of W. No. 1 apply as appropriate.

(B) Rates and Charges

An Interexchange Carrier Public Service Line is provided at the rates and charges for Semi-Public Coinless Telephone Service as set forth in P.S.C. of W. No. 1. Rates are applicable depending upon the exchange wherein service is provided. Non-recurring installation charges apply in addition to monthly charges.
